U.S. COINS AUCTION

MAY 31 - JUNE 3, 2012 | LONG BEACH

HERITAGE
AUCTIONS HA.com

U.S. Coins

Featuring: The JG Collection, Part Two • The Robert Dorsey Smith Collection
The Leonard Raines Collection, #1 NGC Registry Set of Proof Buffalo Nickels

May 31-June 3, 2012 | Long Beach

LIVE AUCTION Signature® Floor Sessions 1-3

(Floor, Telephone, HERITAGE Live!™ Internet, Fax, and Mail)

Long Beach Convention Center • Room 103B
300 E. Ocean Blvd. • Long Beach, CA 90802

Session 1

Thursday, May 31 • 6:00 PM PT • Lots 3001-4009

Session 2

Friday, June 1 • 1:00 PM PT • Lots 4010-4653

Session 3

Friday, June 1 • 7:00 PM PT • Lots 4654-5433

HERITAGE Live!™ Internet, Fax, & Mail only Sessions 4-5

Session 4

Saturday, June 2 • 12:00 PM CT • Lots 7001-9407

Session 5

Sunday, June 3 • 10:00 AM CT • Lots 9408-11422

LOT SETTLEMENT AND PICK-UP

Friday, June 1 • 10:00 AM – 1:00 PM PT

Saturday, June 2 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

This auction is subject to a 15% Buyer's Premium.

BIDDING METHODS:

HERITAGE Live!™ Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGE Live!™ program at HA.com/Live

Live Floor Bidding

Bid in person during the floor sessions.

Live Telephone Bidding (floor sessions only)

Phone bidding must be arranged on or before Wednesday, May 30, by 12:00 PM CT. Client Service: 866-835-3243.

Internet Bidding

Internet absentee bidding ends at 10:00 PM CT the evening before each session. HA.com/1171

Fax Bidding

Fax bids must be received on or before Wednesday, May 30, by 12:00 PM CT. Fax: 214-409-1425

Mail Bidding

Mail bids must be received on or before Wednesday, May 30.

Dear Bidder:

Welcome to Long Beach! With over 2400 lots in our Floor Sessions and thousands of Non-Floor Session items available for viewing, this is a great start to our summer auction season. Three Featured Collections have emerged from a pool of more than 200 consignors. We invite you to read about them below:

The JG Collection, Part Two

The first group of U.S. coins in The JG Collection was offered in our April 2012 Central States auction. This section is focused on the Non-Floor Sessions, providing quality opportunities for budget-conscious collectors, though several more expensive coins also are present, such as a rare V-2, LM-3 1795 half dime, XF40 NGC.

The Robert Dorsey Smith Collection

Mr. Smith is a U.S. Naval Academy graduate and retired Captain in the Naval Reserve with a nuclear submarine specialty. He was on the sound effects team for the 1990 submarine-themed thriller *The Hunt for Red October*, which won the Academy Award® for Best Sound Effects Editing in 1991. For the first 22 years of his civilian career, he helped build a small defense and technology business in Connecticut; now he works as a Program Manager and Engineer at Raytheon Company's Tucson facility.

Outside his career, Mr. Smith is active in his church and other pursuits rooted in his faith. His Contemporary Christian singing-songwriting has led to three albums with a fourth in progress (for more information, visit www.message-songs.com), in addition to his work in prison ministry, camp counseling, and short-term mission trips. A swimmer who has competed in national seniors' meets, he also enjoys outdoor activities such as golf, bicycling, and hiking.

As a numismatist, Mr. Smith is best known as "bobsmith50," the collector behind several high-ranking PCGS Registry™ gold sets. His 20th Century Gold Type Set, Circulation Strikes entry is the #2 Current Finest until its retirement with this sale, including a 1907 High Relief, Wire Rim Saint-Gaudens twenty, MS65 PCGS, CAC, and a 1907 Wire Rim ten dollar, XF45 PCGS, CAC. Also impressive is his 1854-D three dollar, AU58 NGC, CAC.

The Leonard Raines Collection, #1 NGC Registry Set of Proof Buffalo Nickels

A remarkably high-quality collection replete with Superb Gem grades and Star designations, the Leonard Raines Collection has no rivals in the NGC Registry. The set of proof Buffalo nickels is short, just eight coins, but it presents challenges seldom met so well. Highlights include the 1915 nickel, PR68 NGC, and the 1936 Type One or Satin Finish, PR68 ★ NGC.

You can join in the Long Beach excitement wherever you are. We offer pre-auction bids through HA.com, mail, fax, and e-mail, as well as day-of bidding by telephone and through our award-winning online system, Heritage LIVE!™ For some collectors, though, nothing replaces the excitement of bidding in person and winning lots from the auction floor. If you are attending the show, make sure to stop by the Heritage booth and say hello.

Good luck!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice President

COLONIALS

1652 Noe-5 Oak Tree Shilling, VF30
Remnants of the Original Die

3001 1652 Oak Tree Shilling VF30 PCGS. Crosby 2-D, Noe-5, W-470, R.2. 73.0 grains. IN at bottom. A relatively plentiful Oak Tree shilling, the Noe-5 die marriage is generally found in a wide variety of grades. This piece, like most, shows evidence of the coinage die in the form of a raised metal ridge at the upper obverse. This is an attractive piece with pleasing silver-gray surfaces and exceptional eye appeal.

The current reference on Massachusetts silver coinage was published by the American Numismatic Society. Christopher Salmon's *The Silver Coins of Massachusetts* features remarkable enlarged photos and exceptional variety descriptions. The Salmon reference has new die variety labels that have yet to catch on with the collectors, but the exceptional work is bound to become a classic numismatic reference.

We are pleased to present such a remarkable example of the popular Oak Tree shilling. Listed on page 39 of the 2013 *Guide Book*. (#20)

Near-Mint 1652 Pine Tree Shilling
Large Planchet, Noe-1

3002 1652 Pine Tree Shilling, Large Planchet AU58 NGC. Crosby 12-I, Noe-1, W-690, R.2. 72.9 gn. Pellets at trunk. A desirable example of this famous Early American silver issue. The caramel-gold and olive-green surfaces shimmer with luster and exhibit the subtle flan wave typical of rocker press emission. Three straight clips, as issued, are at 3, 5, and 9 o'clock. Two edge flaws, as made, are at 12 o'clock and 6:30. The high points display only a trace of wear and there are no post-strike detractors. Clashed on the lower obverse, as is usual for Noe-1. Listed on page 39 of the 2013 *Guide Book*. (#23)

- 3003** 1652 Pine Tree Shilling, Small Planchet — Repaired, Edge Filed — ANACS. VF20 Details. Crosby 14-R, Noe-29, W-930, R.3. An area at 7 o'clock on the obverse, likely a plugged hole, is smoothed, as is the opposite portion at 5 o'clock on the reverse. The edge is obscured by the encapsulation. The pearl-white legends and tree contrast with deep charcoal-gray fields. The obverse is uncentered toward 3 o'clock with nearby letters mostly off the flan. Listed on page 39 of the 2013 *Guide Book*. (#24)

**Thin Planchet XF Elephant Token
LONDON Variety**

- 3004** (1694) London Elephant Token, Thin Planchet XF40 PCGS. Hodder 2-B, W-12040. Most Elephant tokens have a thick planchet, but according to the Whitman Colonial Encyclopedia, "a few are on thin, wide planchets." The thin planchet examples command an exceptional premium, as priced on page 46 of the 2013 *Guide Book*. The present chocolate-brown token is slightly off center toward 7 o'clock with an uneven strike in that area and opposite on the reverse. One area of deep gray toning noted at 12 o'clock. (#58)

- 3005** 1722 Hibernia Halfpenny, Type One, Harp Left AU55 PCGS. CAC. M. 4.4-Be.1, W-12790, R.5. This satiny medium to deep brown halfpenny is close to Mint State but is lightly impressed at the centers and displays minor granularity near the B in HIBERNIA and the lower reverse. Listed on page 44 of the 2013 *Guide Book*. (#167)

- 3006** 1773 Virginia Halfpenny, Period MS64 Red and Brown NGC. Newman 24-K, W-1570, R.1. A mildly prooflike Choice halfpenny with pumpkin-gold fields and steel-gray toning on the portrait of King George. Well preserved and evenly struck. Listed on page 45 of the 2013 *Guide Book*.
From The JG Collection, Part Two. (#241)

- 3007** 1773 Virginia Halfpenny, Period MS64 Red PCGS. Newman 26-Y, W-1680, R.2. Predominantly orange-red with a hint of gunmetal-gray on the high points. Evenly struck and free from abrasions. Both sides display delicate clash marks, as issued. Listed on page 45 of the 2013 *Guide Book*. (#242)

- 3008** 1760 Hibernia-Voce Populi Halfpenny MS62 Brown NGC. N. 4, Z. 2-A, W-1383X, R.1. A late die state with advanced crumbling on POPULI and the base of the bust. This glossy golden-brown copper has lovely surfaces. The obverse has ideal centering, while the reverse is misaligned several degrees toward 1 o'clock. Listed on page 49 of the 2013 *Guide Book*. (#262)

- 3009** 1760 Hibernia-Voce Populi Halfpenny MS62 Brown NGC. N. 9, Z. 6-C, W-1382X, R.1. A "Stern Bust" Voce Populi with glimmering luster, good centering, and dark brown toning. Essentially void of marks and highly attractive. Listed on page 49 of the 2013 *Guide Book*. (#262)

- 3010** 1787 Connecticut Copper, Muttonhead VF35 NGC. M. 1.2-C, W-2720, R.3. As late a die state as this cataloger has seen for the variety, with only traces of the legends left due to extensive lapping. The crude "Topless Liberty" reverse design. The mahogany-brown surfaces show only trivial marks. Listed on page 61 of the 2013 *Guide Book*.
From The JG Collection, Part Two. (#343)

**Choice AU 1787 Connecticut Copper
Mailed Bust Left, Miller 11.1-E**

- 3011** 1787 Connecticut Copper, Mailed Bust Left AU55 PCGS. CAC. M. 11.1-E, W-2870, R.2. Unusually close to Mint State for the type with luster gleaming from protected areas. Mahogany-red and steel-gray compete for territory. No marks are visible, though the centers show minor incompleteness of strike, and a diagonal lamination is noted on the lower reverse. Listed on page 61 of the 2013 *Guide Book*. (#349)

- 3012** 1787 Connecticut Copper, Draped Bust Left AU50 PCGS. M. 32.3-X.4, W-3235, R.2. This well centered example has a bold peripheral strike and moderate incompleteness of impression at the centers. Mahogany-brown with smooth, pleasing surfaces. Listed on page 62 of the 2013 *Guide Book*. (#370)

- 3013** 1788 Connecticut Copper, Mailed Bust Right — Curved Clip at 11:30 — AU53 NGC. M. 2-D, W-4405, R.1. Struck on a clipped planchet, caused when two punches through copper strip overlapped. This lightly circulated chocolate-brown example has a few small spots near the shoulder of the mailed bust. Listed on page 62 of the 2013 *Guide Book*.
From The JG Collection, Part Two. (#397)

**Brockage Obverse 1788 Connecticut
Miller 11-G, VF25**

- 3014** 1788 Connecticut Copper, Mailed Bust Left — Brockage Obverse — VF25 NGC. M. 11-G, W-4510, R.2. Struck between the reverse die and a previously struck example, the reverse is normal while the obverse is a perfect (though lightly struck) brockage of the reverse. The obverse image is incused and reversed, characteristic of a brockage. Toned deep brown with even wear. Imagine the looks this piece received from Early American possessors. Listed on page 62 of the 2013 *Guide Book*.
From The JG Collection, Part Two. (#403)

**Choice AU Mailed Bust Left Miller 11-G
1788 Connecticut Copper**

3015 1788 Connecticut Copper, Mailed Bust Left AU55 PCGS. CAC. M. 11-G, W-4510, R.2. A satiny chocolate-brown Choice AU state copper with well defined and essentially mark-free surfaces. A few degrees off center toward 11 o'clock with the base of the date off the flan. Listed on page 62 of the 2013 *Guide Book*. Population: 3 in 55, 4 finer (4/12). (#403)

3016 1778 Machin's Mills Halfpenny VF35 PCGS. Vlack 11-78A, W-7820, R.3. This deep brown piece has a lightly granular appearance and a few thin field marks, most noticeable at 11 o'clock on the reverse. Listed on page 67 of the 2013 *Guide Book*. Ex: *Indianapolis Central States (Heritage, 4/2001)*, lot 5615. (#466)

3017 1787 Machin's Mills Halfpenny XF45 NGC. Vlack 19-87C, W-7940, R.2. An appealing chocolate-brown example with complete legends due to ideal centering. No detractors are evident. From late dies with crumbling the right obverse. Listed on page 67 of the 2013 *Guide Book*. (#469)

3018 1787 New Jersey Copper, Small Planchet, Plain Shield AU53 PCGS. CAC. M. 32-T, W-5100, R.3. This chocolate-brown and olive representative has a good strike and an absence of relevant marks. Planchet striae is not completely struck out, which affects central details. A better variety, since Maris 43-d and 46-e are the usually encountered die pairs. Listed on page 66 of the 2012 *Guide Book*. (#506)

3019 1787 New Jersey Copper, Serpent Head VF25 PCGS. M. 54-k, W-5295, R.3. The scarce "Serpent Head" variety with a lengthy, curved neck on the horse. A deep brown example with a lightly abraded but moderately granular appearance. A minor straight clip at 6 o'clock is of mint origin. Listed on page 70 of the 2013 *Guide Book*. (#518)

3020 1787 Vermont Copper, BRITANNIA AU50 PCGS. RR-13, Bressett 17-V, R.1. This coin was struck on an oversized flan, and it almost looks as though it is broadstruck. The obverse devices are exceptionally long, as are those that are discernible on the reverse. There is also as an struck depression at the upper left reverse border; the result of an incomplete punch error. Toned deep brown with lighter tan high points. The reverse legend is indistinct, as always due to a lapped die. Listed on page 72 of the 2013 *Guide Book*. Ex: *FUN Signature (Heritage, 1/2003)*, lot 5066. (#554)

3021 1788 Vermont Copper, Bust Right VF20 PCGS. RR-25, Bressett 16-U, W-2195, R.3. A well defined medium brown example with an evenly granular reverse and a few areas of minor porosity on the obverse. Listed on page 72 of the 2013 *Guide Book*. (#563)

3022 1783 Nova Constellatio Copper, Pointed Rays, Small US AU58 ★ NGC. Crosby 2-B, W-1865, R.2. Only a trace of wear appears on the high points of this lovely near-Mint specimen. Both sides have chestnut-brown surfaces with deep olive devices. Listed on page 54 of the 2013 *Guide Book*. (#801)

3023 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 NGC. N. 8-X, W-6750, R.3. The late die state with a funnel-shaped obverse break near 6 o'clock. This walnut-brown Fugio has moderate wear but is problem-free for the grade. Listed on page 87 of the 2013 *Guide Book*. From *The JG Collection, Part Two*. (#883)

**Exceptional MS64 Brown 1787 Fugio Cent
STATES UNITED, Newman 11-X**

3024 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Brown PCGS. CAC. Newman 11-X, W-6790, R.4. A glossy and beautiful near-Gem that boasts a full strike on the sun and refreshingly mark-free surfaces. The rings are prominently clashed on the obverse periphery. Likely once part of the Bank of New York holdings, which deserves credit for the collectibility of high grade examples today. Listed on page 87 of the 2013 *Guide Book*. (#883)

3025 1787 Fugio Cent, UNITED STATES, Cinquefoils XF40 PCGS. CAC. Newman 16-H, W-6920, R.5. A very scarce die pairing of this early Federal-authorized issue. A broad die break joins two rings at 6:30, and the N in BUSINESS is high. The walnut-brown surfaces display occasional minor flan flaws, but there are no relevant marks. Listed on page 87 of the 2013 *Guide Book*. (#889)

**Red and Brown Near-Gem Fugio Cent
Newman 8-B, UNITED STATES**

3026 1787 Fugio Cent, UNITED STATES, Cinquefoils MS64 Red and Brown NGC. Newman 8-B, R.3. Ample orange-red color outlines the devices and legends. Not fully struck on the lower reverse and upper reverse, but otherwise crisp. A whisper of carbon does not distract. The dies are clashed, with a bold incused impression of the sun on the lower reverse. Listed on page 87 of the 2013 *Guide Book*.

Ex: *F.C.C. Boyd, John J. Ford, Jr. Collection, (Stack's, 10/2003)*, lot 249; *Milwaukee Central States (Heritage, 5/2004)*, lot 5060. (#890)

3027 1787 Fugio Cent, New Haven Restrike, Copper MS63 Brown PCGS. CAC. Newman 104-FF. Horatio N. Rust was behind the circa-1859 Fugio "restrike," struck from rusted copy dies with narrow rings on the reverse and a prominent chin on the sun. The "New Haven" pieces have been widely collected since. A sharply struck and well preserved representative. Listed on page 88 of the 2013 *Guide Book*. (#916)

3028 1778-1779 Rhode Island Ship Token, No Wreath, Copper VF25 PCGS. Breen-1139, W-1730, R.3. The intermediate variety with VLUGTENDE removed from the lower obverse, as issued. A walnut-brown representative with clear types though FLAG and the upper half of the island are worn. Listed on page 50 of the 2013 *Guide Book*. (#579)

**Rhode Island Ship Token, AU55
VLUGTENDE Removed**

- 3029** 1778-1779 Rhode Island Ship Token, No Wreath, Copper AU55 NGC. Breen-1139, W-1730, R.3. The original design had the word VLUGTENDE below the ship. That word is translated as "fleeing" and should never have appeared below Admiral Richard Howe's flagship on the obverse of these pieces. A few survive with the original obverse, although most examples, such as this piece, have VLUGTENDE scraped off the coin in an operation that occurred after minting. This pleasing Choice AU specimen has dark brown surfaces with exceptional eye appeal. Census: 2 in 55, 6 finer (4/12). (#579)

**Rhode Island Ship Token, MS62
W-1730, VLUGTENDE Removed**

- 3030** 1778-1779 Rhode Island Ship Token, No Wreath, Copper MS62 Brown NGC. Breen-1139, W-1730, R.3. The obverse depicts Admiral Richard Howe's flagship, while the reverse depicts Conanicut Island in Narragansett Bay, with Continental troops fleeing from the approaching British fleet. Although here designated as copper, this example combines old yellow and olive-brown, with small splashes of corrosion. Lighter tan remains from original mint color on this lovely 18th century colonial issue. (#579)

- 3031** 1789 Mott Token, Thick Planchet, Plain Edge MS62 Brown PCGS. Breen-1020. Late dies for this well known Early American store card. The break from the upper left clock corner is well advanced, the eagle's body is lightly struck, and die crumbling affects peripheral elements. The lustrous medium brown surfaces display minimal post-strike contact. Listed on page 74 of the 2013 *Guide Book*. (#603)

**Original Dies 1796 Castorland Medal
Copper, Plain Edge, MS64 Brown**

- 3032** 1796 Castorland Medal, Copper, Plain Edge MS64 Brown PCGS. W-9140, R.6. An early restrike from the original Paris Mint dies. The reverse shows crumbling near the right handle of the vessel, and a break is present from the rim through the S in PARENS. The borders are strike doubled, but the motifs are intricately struck as well as handsomely engraved. A well preserved mahogany-brown near-Gem. Listed on page 77 of the 2013 *Guide Book*. (#654)

**Reeded Edge Copper 1796 Castorland Medal
Original Dies, MS64 Brown**

- 3033** 1796 Castorland Medal, Copper, Reeded Edge MS64 Brown PCGS. W-9140, R.6. Struck from both original dies, identified by a touching TO in CASTORLAND and a repunched first A in MAGNA. The break at the S in PARENS and die rust at the vessel handle confirm status as a restrike. Lightly strike doubled at the margins, but the motifs are fully impressed. The chocolate-brown surfaces are satiny and exemplary. The Whitman entry does not distinguish between plain and reeded edges and it is undetermined which is rarer. Listed on page 77 of the 2013 *Guide Book*.

- 3034** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR66 Brown PCGS. CAC. Baker-3, W-10370, R.5. The Large 3 in the date identifies the W.S. Lincoln restrike. This gorgeous Premium Gem has an unimprovable strike, with exceptional definition on the central devices. The golden-brown, ice-blue, and rose-red fields are smooth and reflective. Listed on page 80 of the 2013 *Guide Book*. (#685)

**Superb Gem Proof 1783 Washington Cent
Copper Restrike, Brown Surfaces, Baker-3**

- 3035** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge, Baker-3, W-10370, R.5, PR67 Brown PCGS. An early die state that lacks the reverse peripheral crack between 2 and 5 o'clock. The popularity of Washingtonia in the mid-19th century encouraged British entrepreneur W.S. Lincoln to produce his own well-made copy of Baker-2. Precisely struck and virtually flawless. Brick-red with subtle blue-violet and lime-green tints. Listed on page 80 of the 2013 *Guide Book*. Population: 4 in 67 Brown, 0 finer (4/12). Ex: Long Beach Signature (Heritage, 5/2008); Baltimore Signature (Heritage, 3/2009), lot 64. (#685)

**1791 Washington Cent, MS62 Brown
Small Eagle Reverse**

- 3036** 1791 Washington Small Eagle Cent MS62 Brown NGC. Baker-16, W-10630, R.3. This tribute piece was actually produced in England, noting the election of President George Washington, the Revolutionary War hero who defeated the British a decade earlier. An attractive Mint State piece, this large copper has satin luster with deep brown surfaces and hints of tan that is faded from original red. Listed on page 81 of the 2013 *Guide Book*. Census: 6 in 62 Brown, 11 finer (4/12). (#705)
- 3037** 1793 Washington Ship Halfpenny, Copper, Lettered Edge AU55 PCGS. CAC. Baker-18, W-10855, R.4. Medium brown with ice-blue undertones. A minimally circulated example of the popular Washington type. One vertical hair-thin mark above the ear. Coined from a sunken reverse die, customary for the issue. Listed on page 83 of the 2013 *Guide Book*. (#734)

**1781 Libertas Americana Medal, MS61 Brown
Bronzed Copper**

- 3038** 1781 Libertas Americana Medal in Bronzed Copper MS61 Brown NGC. CAC. Betts-615. The obverse inscription of LIBERTAS AMERICANA and the date, 4 Jul 1776, clearly refer to the Declaration of Independence signed that date. The reverse bears the dual dates of October 17, 1777, and October 19, 1781, respectively marking the victories of Major General Horatio Gates at Saratoga, and General George Washington at Yorktown.
- The French produced Libertas Americana medal is arguably the most important historical medal in U.S. numismatics, and examples are eagerly sought. The number known is unclear, although there are probably about two dozen in silver and three to four dozen in bronze that exist today.
- This splendid specimen has reflective fields with chestnut-brown surfaces and a few darker patina spots, with traces of high-point friction. Listed on page 90 of the 2013 *Guide Book*.

HALF CENTS

1793 C-4, B-4 Half Cent, VG8

- 3039** 1793 VG8 PCGS. C-4, B-4, R.3. Attractive tan surfaces change to light blue at certain light angles. Both sides have microscopic surface roughness with a few minuscule dents and other trivial imperfections. A pleasing example for a date or type collector. Our EAC grade Good 5. (#1000)

- 3040** 1793 — Planchet Flaw — NGC Details. Fine. C-4, B-4, R.3. The obverse shows considerable lamination, described as a “planchet flaw” by NGC. The reverse is free of minting defects, while both sides show minor to moderate roughness on the chestnut brown surfaces. Our EAC grade Good 4.(#1000)

1793 C-4, B-4 Half Cent, VF Details

- 3041** 1793 — Corrosion — NGC Details. VF. C-4, B-4, R.3. Although both sides of this medium to dark brown half cent show moderate corrosion, that roughness is rather evenly distributed across both surfaces. The result is reasonable eye appeal. A tiny rim nick is noted on the reverse at 3 o'clock. Our EAC grade VG7. (#1000)

- 3042** 1794 VF25 PCGS. C-4a, B-6b, R.3. The Small Letters Edge is presumed. Manley Die State 4.0, “very scarce.” This chocolate-brown Liberty Cap half cent is void of any corrosion though we note a few thin obverse marks. Our EAC grade Fine 12.
Ex: *St. Louis Central States (Heritage, 5/2005), lot 5045, which realized \$1,840.* (#1003)

1796 C-2, B-2 Half Cent With Pole Obverse

- 3043** 1796 With Pole Genuine PCGS. C-2, B-2, High R.4. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that is corroded.

Probably once buried, this dark brown example has noticeable surface roughness resulting in considerable indistinct details. However, with the exception of HALF, all of the lettering is visible and the design motifs are outlined, showing some hair detail on the obverse. The date is bold and sharp. Our EAC grade Good 4. (#1027)

**1800 C-1, B-1 Half Cent, MS62 Brown
Usual Die State**

- 3044** 1800 MS62 Brown PCGS. C-1, B-1, R.1. Manley Die State 4.0. This piece is a virtual twin to the MS63 Brown NGC coin also in the present sale, both for die state and overall eye appeal. This piece has full cartwheel luster with olive-brown surfaces that are splashed in steel, retaining traces of golden luster. Our EAC grade MS60. Population: 21 in 62 Brown, 8 finer (4/12). (#1051)

**1800 C-1, B-1 Half Cent, MS63 Brown
Only Die Pair**

- 3045** 1800 MS63 Brown NGC. C-1, B-1, R.2. Manley Die State 4.0, the usual state for this die pair. Delicate pinkish luster is visible through medium brown toning with splashes of pale blue on each side. Minor handling marks are evident in the fields and devices on both sides of this piece. Our EAC grade MS60. Census: 15 in 63 Brown, 6 finer (4/12). (#1051)
- 3046** 1805 Small 5, No Stems AU58 NGC. C-1, B-1, R.1. This is a mostly glossy and nicely struck example whose toned surfaces are awash in competing swirls of reddish-brown and mahogany-brown colors. A lamination flake above the T in CENT and a small reverse rim ding at 5 o'clock merit mention. Our EAC grade XF40. Ex: *St. Louis Central States (Heritage, 5/2003), lot 28.* (#1081)
- 3047** 1805 Small 5, Stems Good 6 NGC. C-3, B-3, R.4. The more plentiful of two Small 5, Stems varieties, this example shows typical handling marks for the grade, with smooth and attractive dark brown surfaces. An important opportunity for an advanced collector. Our EAC grade Good 5. (#1087)
- 3048** 1806 Small 6, No Stems MS62 Brown PCGS. CAC. C-1, B-3, R.1. Glimpses of faded red are plentiful, though most of this well struck representative is lavender-brown. Satin luster shimmers over minimally abraded surfaces. Our EAC grade MS60. (#1093)

- 3049** 1807 AU55 PCGS. C-1, B-1, R.1. Nearly full dark brown luster appears on both sides of this late die state piece that shows minimal obverse and reverse border details. Close scrutiny reveals traces of original mint red on the reverse. Our EAC grade AU50. (#1104)

- 3050** 1808/7 VF35 PCGS. CAC. C-2, B-2, R.3. Manley Die State 1.0. Manley notes "this variety is very rare in grades of Very Fine or higher, with only a single Mint State specimen known." This golden-brown example has scattered minor marks and is evenly struck save for softness near OF and the date. Our EAC grade VF20. Population: 5 in 35, 6 finer (4/12). (#1110)

Select 1809/6 Half Cent, C-5

- 3051** 1809/6 MS63 Brown PCGS. CAC. C-5, B-5, R.1. Manley Die State 3.0, "scarce." The sole 1809/6 die marriage. The present chocolate-brown half cent has glossy surfaces and a good strike on the major devices. The upper obverse and lower reverse margins show inexactness of strike. Unabraded save for a faded hair-thin mark above star 7 and a couple of thin lines on the cheek. Our EAC grade MS60. (#1126)

**1811 C-2, B-2 Half Cent, XF45
Late Die State**

- 3052** 1811 XF45 PCGS. CAC. C-2, B-2, Low R.3. Manley Die State 3.0, the scarce late die state, with prominent clash marks on the obverse and delicate reverse die cracks. Although the two varieties of 1811 half cents are usually described as Wide Date or Narrow Date coins, the best attribution point is the position of Star 13. That star is centered between the hair curl and border on the Wide Date coins, and nearly touches a dentil on the Narrow Date coins, such as this piece. This Choice XF specimen is a lovely example with chestnut-brown surfaces and traces of cartwheel luster. Our EAC grade VF35. Population: 14 in 45, 9 finer (4/12). (#1135)

Red Gem 1828 13 Stars Half Cent, C-3

- 3053 1828 13 Stars MS65 Red NGC. C-3, B-2, R.1.** The die defect joining the top left of the H in HALF to the nearby leaf is diagnostic for the reverse and thus the variety. Pre-Coronet half cents with fully Red surfaces are unusual and prized regardless of date, and this 1828 C-3 example should prove fully in line with the rule. While its copper-orange and peach surfaces are not perfect, owing to a touch of amber and lavender mellowing and a flyspeck just behind Liberty's crisply detailed curls, this is an all-around well-preserved coin that has great appeal for type and date collectors alike. Our EAC grade MS63. (#1149)
- 3054 1835 MS64 Red and Brown PCGS. C-1, B-1, R.1.** Manley Die State 2.0. The reverse is mostly fire-red, while the obverse is predominantly gunmetal-gray. Precisely struck and virtually unabraded with prominent clash marks on the field near the chin. Our EAC grade MS63. (#1169)
- 3055 1835 MS64 Red NGC. C-2, B-2, R.1.** Manley Die State 3.0, "scarce." Faint but lengthy die cracks traverse the reverse. This fire-red near-Gem has a hint of steel-gray on the portrait and tiny brown freckles on the reverse. Essentially mark-free with one small strike-through on the jaw. Our EAC grade MS63. (#1170)
- 3056 1854 MS66 Brown NGC. C-1, B-1, R.1.** Light mahogany-brown throughout with coruscating luster and an exquisite strike. Pristine save for three minuscule ticks on the cheekbone, chin, and obverse rim at 4:30. Our EAC grade MS62. (#1230)
- 3057 1855 MS65 Brown PCGS. CAC. C-1, B-1, R.1.** Mahogany-brown and aquamarine toning embraces coruscating mark-free surfaces. Well struck aside from blending on the dentils. A pleasing Gem from the tail end of the denomination. Our EAC grade MS62. (#1233)

LARGE CENTS

- 3058 1793 Chain Periods — Damaged — ANACS. AG3 Details. S-4, B-5, R.3.** This rare introductory cent type has medium brown fields and mahogany-brown devices. The types are outlines and all of LIBERTY is readable. Myriad small marks are evenly spread throughout and correspond to the ANACS designation. Our EAC grade Fair 2. (#91341)
- 3059 1793 Wreath Cent, Vine and Bars — Corrosion — NGC Details. Fine. S-8, B-13, R.3.** A dark lavender-brown representative of this desired first-year cent type. The surfaces are porous but the legends are fully readable aside from the date, which is indistinct except for the 3. Our EAC grade Good 4.

1793 S-10, B-10 Wreath Cent, VF35 Vine and Bars Edge

- 3060 1793 Wreath Cent, Vine and Bars VF35 PCGS. S-10, B-10, R.4.** A small rim imperfection in the die appears on all known examples of the S-10 die pair, affecting the border beads from 2 o'clock to 3 o'clock on the obverse, and that characteristic immediately identifies the variety. This middle circulated grade specimen combines olive and steel patina on slightly rough surfaces with a small mark right of the Y to identify the provenance. The reverse has a few minuscule rim marks. Although a rather common variety, the S-10 is infrequently encountered in higher grades, and this piece is a nice candidate for a type, date, or variety collection. Our EAC grade VF20. (#1347)

1793 S-14, B-17 Cent, AG Details
Bisecting Crack

- 3061** 1793 Liberty Cap — Environmental Damage — Genuine PCGS. AG Details. S-14, B-17, Low R.5. The medium and dark brown surfaces of this Bisecting Crack cent show considerable roughness that masks the existing detail. However, the vertical die crack on the obverse remains clearly visible. Our EAC grade Fair 2. (#1359)

- 3062** 1794 Head of 1794 Fine 12 PCGS. S-54, B-46, R.3. A smooth chocolate-brown cent with good sharpness on the left-side borders and at the centers. The right borders and the fraction are softly impressed. A small edge flaw (as made) is at 4 o'clock on the reverse, and minor edge nicks are noted at 6 o'clock on the obverse and at 2 and 7 o'clock on the reverse. Our EAC grade VG7. (#901374)

- 3063** 1794 Head of 1794 — Surface Damage — Genuine PCGS. VF Details. S-21, B-5, R.3. This mildly granular tan-brown cent displays occasional hairlines and a group of faded and closely spaced pin scratches on the portrait. Well detailed with clear legends and leaves. Our EAC grade VG8.

1794 S-63, B-37 Cent, VF30
Fallen 4

- 3064** 1794 Head of 1794 VF30 PCGS. S-63, B-37, R.2. This Head of 1794 variety is sometimes called the "Fallen 4," since the 4 appears to be low. Actually, the 9 is out of place and a little high. There is also a thick horizontal protrusion from the dentils right of the date. The dark olive surfaces are minutely rough, showing a few small defects. Overall, a pleasing example for the variety specialist. Our EAC grade VF20. (#901374)

1794 S-46, B-36 Cent, VF30
'Crossed E' Reverse

- 3065** 1794 Head of 1794 VF30 NGC. S-46, B-36, R.3. The "Crossed E" of CENT, having a prominent die chip crossing that letter, is diagnostic for the variety. This pleasing chestnut-brown specimen has smooth surfaces with trivial handling marks that include a tiny obverse rim nick at 2 o'clock. Our EAC grade Fine 15. (#901374)

1794 S-63, B-37 Cent, VF30
Fallen 4

- 3066** 1794 Head of 1794 VF30 PCGS. S-63, B-37, R.2. The distinctive "Fallen 4" variety. The name for this variety seems incorrect, as the 4 is on the same line as the 1 and 7, but the 9 is high and out of place. Although the surfaces have light verdigris and minor handling marks, this dark brown example is a pleasing representative. Housed in a green-label PCGS holder. Our EAC grade VF20. (#901374)

1794 S-67, B-59 Cent, XF40

- 3067** 1794 Head of 1795 XF40 NGC. S-67, B-59, R.3. A splendid example of this common Head of 1795 variety, the obverse is smooth chestnut-brown and the reverse is darker chocolate-brown. Both sides have typical handling marks with some small pit marks on the obverse, but the overall appearance is excellent. The reverse has a small rim bump near the U. Our EAC grade VF25. (#1365)

- 3068** 1795 Plain Edge VF30 PCGS. S-76b, B-4b, R.1. This Liberty Cap type coin has golden-brown toning with traces of cobalt-blue at the margins. Void of mentionable marks. Struck slightly off center toward 5 o'clock but the strike is even aside from OF and the right-side reverse dentils. Our EAC grade VF20. (#1380)

3069 1796 Liberty Cap VG10 PCGS. S-84, B-5, R.3. This dark piece exhibits sharp legends, aside from ONE CENT which is faint but legible. Close inspection reveals mild, even granularity, and a few faint pin scratches are right of ONE. Our EAC grade VG8.
Ex: Long Beach Signature (Heritage, 9/2006), lot 145. (#1392)

3070 1797 Reverse of 1797, Stems VF20 PCGS. S-140, B-22, R.1. A medium brown representative with pleasing detail for the VF20 level. Evaluation beneath a lens reveals a few pin scratches on the left side of the wreath and above Liberty's shoulder. Our EAC grade Fine 12. (#1422)

**Very Scarce S-129 1797 Cent
 Stems, Reverse of 1797, VF25**

3071 1797 Reverse of 1797, Stems VF25 PCGS. S-129, B-24, R.5. Both leaf tips are to the right of the second S in STATES. A much better die variety of this second-year Draped Bust date. This dark gray example has impressive definition on Liberty's hair and lacks consequential marks, though both sides are moderately granular. Our EAC grade Fine 15. (#1422)

3072 1798 Second Hair Style VF35 PCGS. S-179, B-37, R.2. The distinctive Sheldon variety with an E over an inverted E in AMERICA. This medium brown cent is well defined and generally unabraded. One small spot at 9 o'clock on the obverse, and the R in AMERICA has a minor depression. Our EAC grade VF25. (#1434)

3073 1798 Second Hair Style — Corrosion — NGC Details. AU. S-166, B-32, R.1. The heavy diagonal reverse die crack from the fraction to the E in UNITED identifies the Sheldon marriage. This cent has little if any actual wear but the brown-gray surfaces are mildly granular with a small area of aqua verdigris west of the C in CENT. Our EAC grade VF25.

3074 1800/1798 Fine 15 PCGS. S-191, B-2, R.3. Die cracks through the ICA in AMERICA confirm the variety. The present minutely granular olive-brown example clearly shows the underdate. A diagonal line near the fraction appears to be a mint-made flan flaw but the obverse displays a few small digs. Our EAC grade VG8. (#1452)

3075 1806 XF40 NGC. S-270, B-1, R.1. The only dies for this scarcer Draped Bust date. A crisp walnut-brown piece, it has been lacquered but detrimental marks are absent. A later die state with swelling throughout the date, as made from a sunken obverse die. Our EAC grade VF25.
Ex: FUN Signature (Heritage, 1/2005), lot 7048. (#1513)

3076 1807/6 Large 7 VF35 NGC. S-273, B-3, R.1. A deep brown Choice VF representative with pleasing sharpness and a few small to moderate obverse marks. The reverse is essentially unabraded. Our EAC grade VF25. (#1528)

**1808 S-278, B-2 Cent, XF45
 First-Year Classic Head Cent**

3077 1808 XF45 NGC. S-278, B-2, R.3. Scarcer than S-279, the most often seen 1808 marriage. A dark walnut-brown representative of the conditionally elusive Classic design. Smooth aside from a couple of ticks near the date and a vertical line beneath the ear. Peripheral elements are softly impressed, but the devices exhibit pleasing definition. Our EAC grade VF35. (#1543)

3078 1812 Small Date XF40 NGC. S-290, B-2, R.1. This dark brown Classic cent has moderate wear on the curls and only a few minor marks on the upper obverse field. Traces of luster gleam from the borders. A conditionally scarce type. Our EAC grade VF30.
Ex: Jerry Kochel Collection (Heritage, 7/2008), lot 1038, which realized \$1,092.50. (#1561)

**1814 Cent, MS62 Brown
 Plain 4, S-295**

3079 1814 Plain 4 MS62 Brown NGC. CAC. S-295, B-2, R.1. Although the obverse has a faint crack, there is no evidence of the die chipping that appeared at Liberty's throat on later die states. A wonderful Mint State piece for a date or type collector, this lustrous golden-biscuit has splashes of darker steel toning. Our EAC grade AU55. Census 17 in 62 Brown, 27 finer (4/12). (#1576)

3080 1820 Large Date MS64 Brown NGC. N-13, R.1. This lustrous Randall Hoard representative offers lovely blended rose, aqua, and gold toning. Mostly void of the spots known for the variety, and nicely struck save for a few star centers. Our EAC grade MS63. (#1615)

**Choice Red 1820 Large Date Cent
Randall Hoard Variety, N-13**

- 3081 1820 Large Date MS64 Red PCGS. N-13, R.1.** The famous Randall Hoard variety is ideal for type collectors who seek a sharply struck Mint State example of the Coronet Head large cent. This near-Gem is fully brilliant with only slight mellowing of the color on each side. The surfaces are smooth and pleasing with a few old, inactive spots. The interesting obverse die break extends through the date and all stars. Housed in a green label holder. Our EAC grade MS63. Population: 9 in 64 Red, 7 finer (4/12). (#1617)

**1824/2 N-1 Cent, AU58
Plentiful Reverse Appearance**

- 3082 1824/2 AU58 PCGS. N-1, R.2.** The overdate obverse was used with two reverse dies to create a common overdate and a rare one. This piece represents the common overdate variety, usually seen with a die crack through the entire legend. Both sides have frosty steel and dark chocolate surfaces with frosty luster and splashes of tan, faded from Mint red. Our EAC grade AU50. (#1639)
- 3083 1838 MS63 Brown PCGS. CAC. N-13, R.2.** Mostly olive-brown with glimmers of cherry-red in design crevices. Unabraded and satiny with pleasing surfaces. Highly attractive for the designated grade. Our EAC grade MS62. (#1741)
- 3084 1839/6 — Environmental Damage — Genuine PCGS. VF Details. N-1, High R.3.** The sole Plain Cords Newcomb variety for the date, since the obverse die was a holdover from 1836. Transition to the Beaded Cords subtype began in 1838. The present cent is dark gray with uniformly lightly granular surfaces. Our EAC grade Fine 12.

**1845 N-11 Cent, MS64 Red and Brown
Condition Census**

- 3085 1845 MS64 Red and Brown PCGS. CAC. N-11, High R.3.** Grellman Die State b. Considerable light orange luster accompanies the medium brown surfaces of this attractive cent. A few minor scratches and other surface marks are noted. This piece ranks in the Condition Census, and may be tied for second finest of the variety. Our EAC grade MS62. (#1863)

**1848 N-21 Cent, MS65 Red and Brown
Lovely Original Mint Red Interspersed**

- 3086 1848 MS65 Red and Brown NGC. CAC. N-21, Low R.4.** Die state B to C, the field within the E in CENT is beginning to crumble, as made. Well struck aside from the upper stars, this attractive Gem has abundant Red color. A small planchet flaw (as struck) beneath the E in ONE is of little import. Our EAC grade MS63. Census: 13 in 65 Red and Brown of all varieties, 7 finer (4/12). Ex: FUN Signature (Heritage, 1/2005), lot 7081. (#1884)
- 3087 1850 MS65 Red and Brown PCGS. CAC. N-7, R.2.** Grellman Die State b. Brick-red outlines design elements, though the open fields and high points are steel-gray. A mark-free Gem. The major motifs are sharply struck. The stars and dentils show incompleteness. Our EAC grade MS63. (#1890)
- 3088 1853 MS64 Red PCGS. N-25, R.1.** Grellman Die State b. An orange-red Choice cent slightly mellowed to steel-gray near the shoulder and above the portrait. Lustrous and nearly free from contact with one small spot beneath the 8 in the date. Our EAC grade MS63. (#1903)

**1855 N-4 Cent, MS65 Red
Upright 55 Logotype**

- 3089 1855 Upright 5s MS65 Red PCGS. CAC. N-4, R.1.** A lustrous peach-red beauty. Well struck on the portrait and wreath although the left side stars lack a complete strike. A glimpse or two of olive obverse toning and a small reverse mark near 1 o'clock are barely worthy of mention. Our EAC grade MS65. Population: 76 in 65 Red, 15 finer (4/12). (#1909)

- 3090 1856 Upright 5 MS65 Red and Brown NGC. CAC. N-6, R.1.** A dusky orange-red Gem with smooth surfaces and a sharp strike on the major devices. The upper stars are typically impressed. Certified in a prior generation holder. Our EAC grade MS62.
Ex: Orlando FUN (Heritage, 1/2002), lot 5498.(#1920)

FLYING EAGLE CENTS

- 3091 1857 MS64 PCGS.** An olive-gold near-Gem with good luster and unabraded surfaces. Prominent clash marks (as coined) within the wreath add further interest. The right borders are lightly struck. (#2016)
- 3092 1857 MS64 PCGS.** Eagle Eye Photo Seal, card included. This sharply struck near-Gem offers dynamic luster and only minor carbon. Marks are inconsequential. One narrow strike-through, as made, rests above the O in ONE.(#2016)
- 3093 1857 MS64 NGC.** Blue-violet and green-bronze shadings lend this near-Gem a distinctive character. Great eye appeal for the first official year of Flying Eagle cent strikings.(#2016)

1857 Flying Eagle Cent, MS65

- 3094 1857 MS65 NGC.** An attractive Gem, this Flying Eagle cent shows some indistinct details, especially at the eagle's tail, and at the right branch of the wreath. However, the surfaces are brilliant and lustrous with hints of gold toning over light tan surfaces. NGC has only certified 14 finer examples (4/12). (#2016)

Gem 1857 Flying Eagle Cent Popular Short-Lived Design

- 3095 1857 MS65 PCGS. CAC.** Including the famous 1856 issue, which many numismatists consider patterns, the Flying Eagle cent was only produced for three years. The 1857 issue enjoyed a large mintage of more than 17 million pieces, but most examples seen are in circulated grades. Gems are scarce and finer specimens are quite rare. This delightful Gem is well-detailed and lustrous, with copper-gold surfaces that show a few microscopic carbon specks. (#2016)
- 3096 1858/7 AU50 PCGS. CAC. Snow-1, FS-301.** The corner of the 7 at top right of the final 8 is evident, and the die dot in the field above the date is plain. Unabraded and attractive with a light impression on the right-side borders.(#2022)

PROOF FLYING EAGLE CENTS

Famous 1856 Flying Eagle Cent, PR62

- 3097 1856 PR62 PCGS Secure. Snow-9.** A sharply struck specimen whose mildly reflective fields provide excellent eye appeal for the designated grade. The obverse is lightly toned pumpkin-gold, and the reverse is dusky with variegated rose and chestnut shades. Only a single carbon fleck is noted, above the O in OF, and mint-made imperfections are confined to a narrow strike-through near the T in UNITED and a minor retained lamination at 7:30 on the obverse. The 1856 Flying Eagle cent introduced the small cent denomination and remains the key date of the series. In the 19th century, possession of an example was considered the passport to an advanced collection. (#2037)

**1858 Flying Eagle Cent, PR65
Large Letters Variety**

- 3098 1858 Large Letters PR65 PCGS. CAC. Snow-PR1.** High Leaves, Closed E in ONE. Proof Flying Eagle cents are undoubtedly one of the most impressive of 19th century type coin, primarily for the same reason the No Stars half dimes are so impressive: Both have large, uncluttered fields that give the coin a medal-like appearance. The strike, of course, is needle sharp and the fields deeply mirrored. The original "white" surfaces of the copper-nickel alloy are still evident, but significant reddish patina overlies each side. Approximately 100 proofs were struck of the Large Letters variant, and it is estimated that perhaps half of that number are known today. (#2042)

INDIAN CENTS

**1859 Indian Cent, MS65
Only 16 Finer at PCGS**

- 3099 1859 MS65 PCGS.** The upper parts of the first three feathers in the headdress are indistinct, as are the lower wreath details on this Gem first-year Indian cent. Both sides exhibit highly lustrous golden-tan surfaces, offering excellent overall eye appeal. PCGS has only certified 16 finer examples (4/12). Destined for a top Registry set. (#2052)
- 3100 1860 MS65 NGC. CAC.** Eagle Eye Photo Seal, no card included. Orange and lime tints abound on this lustrous and well struck Gem. Pristine save for a few pinpoint flecks. Housed in a former generation holder. (#2058)
- 3101 1861 MS65 NGC. CAC.** This golden-brown Civil War Gem displays dynamic luster and exceptional preservation. Boldly struck and desirable. Certified in a prior generation holder. (#2061)

**1861 Indian Cent, MS66
Only 11 Finer PCGS**

- 3102 1861 MS66 PCGS.** Eye-catching reflectivity radiates from both sides of this stunning Premium Gem. Peppered red patina in the centers yields to lighter coloration around the peripheries. There are no marks visible to the unaided eye and only a few nearly microscopic flyspecks are seen on either side. Population: 56 in 66, 11 finer (4/12). (#2061)
- 3103 1862 MS65 PCGS. CAC.** Pale gold, salmon, and lavender tints glimmer on this copper-nickel cent Gem. The strike is decent overall, if a trifle soft at the tips of the feathers. (#2064)
- 3104 1862 MS65 NGC. CAC.** This caramel-gold Gem has dynamic luster and a bold strike. Free from visible detractors. A wonderful example of the copper-nickel type. Certified in a former generation holder. (#2064)

**1862 Indian Cent, MS66
Rarely Finer**

- 3105 1862 MS66 PCGS. CAC.** This highly lustrous Premium Gem has brilliant reddish-gold surfaces with bold design definition on both sides. The frosty surfaces are pristine with no evidence of spots or marks. Opportunities to locate a finer example are few and far between. Population: 58 in 66 (4 in 66+), 8 finer (4/12). (#2064)

- 3106 1863 MS66 NGC.** Lemon overtones on a tan-gold base give this copper-nickel Premium Gem added eye appeal. Well-defined strike for a famously dense alloy. Census: 36 in 66, 2 finer (4/12).
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3105. (#2067)

- 3107 1864 Copper-Nickel MS65 PCGS.** Housed in a green-label PCGS holder, this Gem transitional Indian cent has lustrous golden-tan surfaces with sharp details and satin luster. PCGS has only certified 14 finer (4/12). (#2070)

- 3108 1864 Copper-Nickel MS65 PCGS. CAC.** A final-year copper-nickel Gem with a mix of gold and peach colors. A number of small dotted specks appear within the reverse wreath, but the obverse displays well. (#2070)

- 3109 1864 Copper-Nickel MS65 PCGS. CAC.** Light copper-orange and salmon colors form the base on this final-year copper-nickel cent, though the surfaces exhibit considerable iridescence as well. A luminous Gem with all four of the diamonds completely outlined, if soft. (#2070)

**1864 Copper-Nickel Cent, MS66
Among the Finest at NGC**

- 3110 1864 Copper-Nickel MS66 NGC.** An elegant Premium Gem survivor from the final copper-nickel cent issue, sharply struck with all four diamonds on the ribbon crisply impressed. Copper-orange shadings prevail, though whispers of peach appear at the right obverse margin. Beautifully preserved and a prime candidate for the finest of sets. Census: 17 in 66 (1 in 66 ★), 0 finer (4/12).
Ex: Central States Signature (Heritage, 4/2008), lot 123, which brought \$2,990. (#2070)

- 3111 1866 MS64 Red PCGS. CAC.** Light orange luster appears on both sides of this lovely near-Gem, with no evidence of darker toning. The design elements are boldly defined. Exceptional surfaces have minimal marks and trivial carbon flecks. Population: 48 in 64 (2 in 64+) Red, 28 finer (4/12). (#2087)

**1867/67 Indian Cent, MS64 Red and Brown
Dramatic Repunching**

- 3112 1867/67 MS64 Red and Brown PCGS. CAC. Snow-1, FS-301.** As stated by Rick Snow, "This is one of the top repunched dates in the Indian Cents series. ... It garners a significant premium in all grades. It is virtually unknown in full red color. Planchets used for this variety typically exhibit a streaky woodgrain toning." This aptly describes the appearance of this piece. It retains much original red, but the woodgrain effect is definitely present. The strike is sharp throughout and there are no obvious marks on either side. (#92089)

Near-Gem Red 1867/67 Indian Cent, FS-301

3113 1867/67 MS64 Red PCGS. Snow-1, FS-301. This piece is certified by PCGS merely as an 1867/67, but the bold doubled tops of the 6 and the 7, especially, identify this as the FS-301 *Cherrypickers'* variety rather than the subtler FS-302, also a repunched date but most prominent on the 1. This near-Gem Red example displays bright mint red on each side, but the heavy metal flowlines, especially on the obverse, mark long-in-use dies. Die clashing also appears in the fields, chiefly the left obverse, which shows traces of the wreath from the reverse. The strike is pinpoint-sharp, and only minor signs of contact occur, none noteworthy. (#92090)

3114 1869 MS66 Red and Brown NGC. Excellent detail on the diamonds and the rest of the devices. Though the surfaces undeniably have mellowed, considerable reddish-orange color remains. Census: 29 in 66 Red and Brown, 0 finer (4/12). (#2095)

Premium Gem Brown 1870 Indian Cent Unabraded, Pleasing Surfaces

3115 1870 MS66 Brown NGC. CAC. Eagle Eye Photo Seal. Lovely jade accents ring the rims on each side, more prominently on the obverse, with pecan and purple interiors. No post-strike contact is visible; the interesting anomaly at the top diamond appears to be Mint-caused. A Brown set of Indian (or Lincoln, for that matter) cents in high grade can be a pleasing, profitable pursuit at much lesser cost than for Red examples. Census: 2 in 66 Brown, 0 finer (4/12). (#2097)

3116 1870 MS64 Red and Brown PCGS. Bold N. This low mintage Choice Indian cent has golden-red margins and brown centers. Unabraded and coruscating. A fairly large die lump on the neck is unlisted in the Snow reference. (#2098)

3117 1871 MS64 Brown PCGS. CAC. Bold N. Excellent detail with a hint of woodgrain pattern at the margins, where the color shifts from violet-brown to streaky olive. A fascinating near-Gem beauty from an underrated issue of fewer than 4 million pieces. Population: 32 in 64 Brown, 10 finer (4/12). (#2100)

3118 1871 MS64 Red and Brown NGC. Vastly more Red than Brown with just a few areas of forest-green against a copper-peach backdrop. Excellent detail on diamonds and feathers. (#2101)

3119 1872 AU55 PCGS. CAC. Snow-1, FS-301. Repunched Date. Certified by PCGS with the *Cherrypickers'* variety number and PCGS #37495, this piece shows lustrous golden-brown surfaces with minimal abrasions and the bold repunching at the bottoms of the 1 and 2 that characterize this variety. Nice for the grade.

Sharply Struck 1872 Indian Cent, MS64+ Red

3120 1872 MS64+ Red PCGS. CAC. Bold N Reverse. The 1872 Indian cent is the most elusive in the series in high grade except for the 1877. This piece is quite close to a Gem Red certification, perhaps held back by the minor scattered carbon that appears under a loupe. The surfaces are nearly contact-free and quite sharply struck for this notorious issue, despite the minor softness on TE of STATES. The almond-gold color and generous luster are first-rate. Indian cent specialists will find much to applaud here. Population: 49 in 64 (1 in 64+) Red, 14 finer (4/12). (#2105)

3121 1873 Open 3 MS65 Brown PCGS. This sharply struck Gem is more brown on the obverse, more red on the reverse, with deep green tinges on the high points and no visible carbon. A nice example for the Brown category. Population: 5 in 65 Brown, 1 finer (4/12). (#2106)

3122 1873 Open 3 MS65 Red and Brown PCGS. A decently detailed example of the year's later logotype. Smooth luster is a mix of mahogany and unmellowed copper-gold with occasional woodgrain streaks. Population: 55 in 65 Red and Brown, 3 finer (4/12). (#2107)

3123 1874 MS64 Red NGC. A few tiny die lumps appear on the obverse on Liberty's forehead, cheek, and chin. This near-Gem is well-struck for the issue and shows little distraction. No carbon is evident. Census: 22 in 64 Red, 22 finer (4/12). (#2120)

**1874 Cent, Fiery-Red MS66
One of the Finest**

3124 1874 MS66 Red NGC. Like several other dates from the 1870s, the 1874 has a relatively low mintage and is very scarce in full Red. As of (4/12), NGC has certified just 47 examples as Red, with most of those graded MS64 or MS65. The present lot is just one of three 1874 cents certified as MS66 Red by NGC. It is fully struck and highly lustrous with even fiery-red surfaces. Devoid of abrasions, and carbon is minimal with two minor flecks noted on the eighth feather tip and northeast of the 4 in the date. Faint clash marks are present near the profile and the C in CENT. An unimprovable representative of a conditionally challenging date. (#2120)

3125 1875 MS65 Red and Brown PCGS. CAC. Generous copper-orange fire with only moderate mellowing to violet through the centers; at certain angles the luster is deceptively Red. A quality Gem with decent detail and only minor carbon. Population: 86 in 65 Red and Brown, 3 finer (4/12). (#2122)

3126 1875 MS65 Red and Brown PCGS. CAC. This Gem is a touch more Brown than Red on each side, but the sharp strike and absence of either carbon or contact should make this a potential acquisition for the many fans of this popular and long-running series. Population: 86 in 65 Red and Brown, 3 finer (4/12).
Ex: Long Beach Signature (Heritage, 9/2011), lot 3171. (#2122)

3127 1876 MS64 Red and Brown PCGS. CAC. Glowing golden luster appears beneath brown-freckled surfaces with a decent strike and little evidence of carbon. An elusive date from America's Centennial year. (#2125)

3128 1877 Fine 12 NGC. The overall details are of a Fine coin, though the letters of LIBERTY are more obscured than usual. Glossy surfaces have moderate abrasions but also a cinnamon overtone to enliven the dominant deep brown color. (#2127)

3129 1877 Fine 12 NGC. Shallow N reverse. Extensive but grade-appropriate wear appears on each side of this nut-brown key 1877 Indian cent. A few marks appearing under a loupe are unsurprising. LIBERTY is largely effaced due to wear. (#2127)

3130 1877 VF30 NGC. An ideal midrange representative of this key-date Indian cent, deeply toned blue-brown with violet and faint gold accents. The few marks on each side are entirely grade-consistent. (#2127)

3131 1877 VF30 NGC. Shallow N reverse. The entire LIBERTY is faint but readable on this chocolate-brown midgrade example of the key Indian cent date. There are no signs of carbon or other distractions. (#2127)

3132 1877 — Improperly Cleaned — NGC Details. XF Details. The medium brown color is slightly off on this key date cent, and both sides display a hint of granularity. The ribbon diamonds are worn, but LIBERTY and the shield possess full detail. (#2127)

3133 1877 XF40 NGC. A glossy example, mostly deep brown but with a few blond elements at the margins. With sharply rendered letters in Liberty, this is a thoroughly pleasing example of the key date. (#2127)

3134 1877 XF40 PCGS. Lightly worn with blue-violet influences on chocolate-brown surfaces. A few tiny marks are scattered on and around Liberty's portrait, but these are entirely forgivable. A coin that will satisfy the key-date seeker. (#2127)

3135 1877 — Environmental Damage — NGC Details. XF. A few areas of moderate corrosion are chiefly confined to the obverse border. The wreath and headdress display wear but much inner detail remains. Retoned dark mahogany-brown. (#2127)

3136 1877 XF40 PCGS. This key-date representative has light to medium-brown toning and traces of orange in the protected areas. The design elements are well-defined with most of LIBERTY being strong save for the lower parts of BE. A few small marks are noted on the obverse. A nice addition to a mid-grade circulated Indian cent collection. (#2127)

3137 1877 — Corrosion, Cleaned — NGC Details. AU. The former problem likely begat the latter, as areas of olive and muted copper-pink appear alongside violet-laced corrosion. Nonetheless, as a lightly worn example of a popular key date, this coin has considerable appeal for collectors. (#2127)

3138 1877 — Improperly Cleaned — NGC Details. AU. Shallow N. Unlikely apple-green and lilac-red toning confirms this series key cent is recolored. However, the high points show only slight wear, and the few tiny marks are of little consequence. (#2127)

3139 1877 — Cleaning — Genuine PCGS. AU Details. Shallow N. Retoned deep walnut-brown. A richly detailed example of this famous series key. Only a single mark is present, located near the first A in AMERICA.

3140 1878 MS65 Red and Brown PCGS. CAC. Faded orange and tan hues mingled with soft luster on this attractive Gem, a well-struck piece but far more affordable than a Red example at the same grade. (#2131)

**Red Gem 1885 Indian Cent
Minimal Carbon**

3141 1885 MS65 Red NGC. Impressive copper-orange fire with occasional peach, brick, and apricot elements, the last as a narrow streak crossing from the top of the reverse to the lower right. Well-defined and distinctive, an unusual Red Gem example of this little-saved issue with minimal carbon. Housed in a prior-generation holder. Census: 38 in 65 Red, 2 finer (4/12). (#2153)

- 3142 1886 Type One MS66 Brown NGC. CAC.** Feather points between IC. Slightly more plentiful than the Type Two pieces, with feather between CA. This Premium Gem is a prize for color aficionados, gleaming aqua and emerald in the centers with orange near the peripheries. Super eye appeal. (#2154)
- 3143 1886 Type One MS64 Red PCGS.** Copper-gold and orange shadings progress without slipping into Brown territory on this near-Gem. Well-defined but with minor flyspecks at the margins. Population: 31 in 64 Red, 24 finer (4/12). (#2156)
- 3144 1894 MS65+ Red PCGS. CAC.** Copper-pink and orange luster shimmers on this high-end 1894 cent. Four crisp diamonds crown an impressive strike. Population: 66 in 65 (2 in 65+) Red, 23 finer (4/12). (#2189)
- 3145 1895 MS66 Red NGC. CAC.** Ex: Maine Roll. Sublime copper-orange "fire" dominates the eye appeal of this impressive Premium Gem. Each side is boldly executed save for minor softness on the tips of the feathers in the headdress. We are not familiar with the Maine Roll, but we sure would like to have a roll of these. Ex: *Long Beach Signature (Heritage, 9/2009), lot 114.* (#2192)

**1898 Cent, MS66 Red
Impressive, Original Surfaces**

- 3146 1898 MS66 Red PCGS. CAC.** The 1898 is considered a common date among late-date Indian cents, but there is definitely nothing common about a coin in this condition. The surfaces are remarkably bright and vibrant. The reverse has a more even red color, while the obverse is several shades lighter in the center with more traditional red around the margin. Well struck and seemingly carbon-free. Population: 54 in 66 (1 in 66+) Red, 8 finer (4/12). (#2201)
- 3147 1900 MS66 Red PCGS Secure. CAC.** A stunning Premium Gem, this Indian cent has deep orange luster with frosty surfaces and bold details. Population: 72 in 66 (6 in 66+) Red, 6 finer (4/12). (#2207)
- 3148 1903 MS66 Red PCGS. CAC.** This reddish-orange beauty offers a tantalizing mix of fire and frost. A four-diamond strike and largely unmarked surfaces complete the eye appeal. Population: 68 in 66 (2 in 66+) Red, 5 finer (4/12). (#2216)
- 3149 1909 MS66 Red PCGS. CAC.** Crisply struck and lustrous, this impressive honey-gold Gem has substantial eye appeal despite a few virtually microscopic flyspecks. A quality final-year coin. (#2237)
- 3150 1909-S MS62 Brown PCGS.** A great final-year Indian cent with more copper-orange peripheral color than the typical "Brown" coin. Luminous, intriguing, and housed in a green label holder. (#2238)

PROOF INDIAN CENTS

- 3151 1859 PR63 PCGS. CAC.** This first-year Select specimen is lightly hairlined but has fantastic color across its mirrors. Gold and peach inner shadings give way to blue at parts of the margins. One of 800 pieces struck for the issue (and thus the type). (#2247)

**Concentrically Colored 1867 Cent
PR66 Red and Brown, Prize for Toning Fans**

- 3152 1867 PR66 Red and Brown PCGS. CAC.** Color enthusiasts will go wild over this spectacular Premium Gem proof, showing concentric toning in emerald, magenta, orange, and gold on both sides with full luster throughout. The strike is needle-sharp, further augmenting the bold eye appeal. A marvelous coin for which the Red and Brown designation is woefully inadequate. Population: 7 in 66 Red and Brown, 0 finer (4/12). (#2289)

**1877 Cent, Red and Brown Gem
Always Popular Proof Issue**

- 3153 1877 PR65 Red and Brown NGC.** Even though 910 proofs are estimated to have been struck, proofs from this year have uncommonly strong date pressure because of the scarcity of business strikes. The mirrored fields on this piece retain considerable flash even through the presence of speckled brown patina that dims the otherwise bright red surfaces. The strike is complete throughout and we see no contact marks of note, just a solitary spot in the center of the obverse. (#2319)

**Key 1877 Indian Cent
PR65 Red and Brown**

- 3154 1877 PR65 Red and Brown NGC. CAC.** Bold N reverse. This Gem proof is mighty close to a Red designation, but the obverse under a loupe resolves into scattered areas of pink, orange, yellow, and jade, with only the lower obverse darkening into "Brown" territory. The reverse has some cameo contrast, with a single dark fleck on the right oak leaves. A nice, well-struck example for the grade. (#2319)

**1877 Cent, PR66 Red and Brown
Spectacular Eye Appeal, Bold N Reverse**

- 3155 1877 PR66 Red and Brown PCGS. CAC.** Bold N reverse. The 1877 Indian cent is perennially popular, and this Premium Gem Red and Brown example boasts spectacular eye appeal far beyond the mere demand for the date. Much of the mint luster remains underneath a layer of intermingled pink and purple in the fields, with medium brown devices. Population: 5 in 66 Red and Brown, 0 finer (4/12).
Ex: FUN Signature (Heritage, 1/2004), lot 4481; Portland Signature (Heritage, 3/2004), lot 5134. (#2319)

- 3156 1886 Type One PR66 ★ Red and Brown NGC. CAC.** The lowest feathertip points between the IC in AMERICA, characteristic of the Type One design. Luminous orange-gold, brown, and crimson surfaces exhibit crisply struck design elements and are impeccably preserved. (#2346)

**1887 Cent, PR66 Red
Tied for Finest Known**

- 3157 1887 PR66 Red NGC.** The old saying about "hen's teeth" comes to mind, as in "rarer than." NGC and PCGS combined have graded a total of four PR66 Red coins of this issue, from the original proof mintage of 2,960 pieces. It is seldom indeed that Indian cents from the 1880s are found in such pristine condition with fully red surfaces. Nonetheless this is one such piece, with completely lustrous salmon-pink patina evenly covering each side. The strike is sharp and pleasing. Perusal under a loupe reveals two undistracting contact marks on the Indian's cheek and a single dark fleck in the lower left obverse field, all of which fail to diminish viewer enthusiasm for this elusive and beautiful specimen. Census: 2 in 66 Red, 0 finer (4/12). (#2350)

- 3158 1889 PR65 Red PCGS.** Gem Red proof Indian cents of the 1880s are more elusive than generally thought. This piece has a beautiful blend of saffron and mint-green, well within the Red context. A few tiny flecks appear under a loupe but are undistracting. One for the color enthusiasts, certified in a green-label holder. Population: 15 in 65 Red, 8 finer (4/12). (#2356)

- 3159 1902 PR66 Red PCGS. CAC.** Bright golden-orange surfaces show touches of cherry-red. Boldly struck with near-pristine surfaces, a beautiful proof Indian cent worthy of a generous bid. Population: 27 in 66 Red, 9 finer (4/12). (#2395)

- 3160 1904 PR66 Red NGC.** Both sides are awash in a range of colors from pale yellow to mint-green to deep sunset-orange with excellent luster but some small areas of brownish-gray obverse toning intermixed. The deeper-colored reverse shows a few flecks under a loupe. Despite the minor drawbacks, this is an attractive and well-struck proof. (#2401)

**1904 Cent, PR65 Red Cameo
Sparkling, Deeply Mirrored Surfaces**

- 3161 1904 PR65 Red Cameo PCGS.** The obverse presents a bright copper-gold appearance with mint-green accents, while the reverse is a mixture of rich gold and crimson-magenta color that deepens at the border. Great Cameo eye appeal with minor carbon away from the portrait. Population: 5 in 65 Red Cameo, 3 finer (4/12).
Ex: Palm Beach Signature (Heritage, 3/2006), lot 162. (#82401)

LINCOLN CENTS

- 3162 1909-S VDB MS62 Brown NGC.** A sharp strike and satin luster grace both sides of this tan example with mottled iridescence. A beguiling example of the famous key date. (#2426)

- 3163 1909-S VDB MS62 Brown NGC.** Deep blue-brown and violet through much of each side but with considerable faded copper-gold at the left obverse. A strikingly attractive example of the classic Lincoln cent key. (#2426)

- 3164 1909-S VDB MS62 Brown NGC.** Mushroom-brown and violet hues prevail on this mellow but appealing key-date Lincoln cent. Two medium-sized flyspecks flank the portrait. (#2426)

- 3165 1909-S VDB MS62 Brown PCGS.** Sharply struck and medium brown with a few darker flecks in the upper obverse that appear not to be carbon. Softly glowing luster increases the appeal of this key issue. (#2426)

- 3166 1909-S VDB MS63 Brown PCGS.** This key date is light brown overall, although blushes of lilac toning appear on the reverse. The surfaces are refreshingly free from detracting marks, but a whisper of verdigris occurs on the reverse.
Ex: Dallas Signature (Heritage, 11/2005), lot 292. (#2426)

**Premium Gem 1909-S VDB Lincoln Cent
Brown Surfaces, None Finer at NGC**

- 3167 1909-S VDB MS66 Brown NGC.** Lovely variegated brown and lavender toning swirls about the centers of each side, while a halo of blazing mint-Red luster clings to the rims. A high-end example for the grade, this piece should please the Lincoln cent collector who appreciates originality. Census: 16 in 66 Brown, 0 finer (4/12). (#2426)

- 3168 1909-S VDB MS63 Red and Brown ANACS.** Slightly mellowed red mint luster is well retained on each side on this select key date example, housed in a small size ANACS holder. (#2427)
- 3169 1909-S VDB MS64 Red and Brown NGC.** Rich violet-brown patina overall but with significant pumpkin-orange elements, particularly at the margins. Aside from a few peripheral flyspecks, this key-date cent has few faults of any significance. (#2427)
- 3170 1909-S VDB MS64 Red and Brown PCGS.** This near-Gem is mostly orange with scattered wisps of brown, scarcely visible without a loupe. Generous luster appears on both sides but a small carbon fleck lies on the lower left wheat ear. (#2427)
- 3171 1909-S VDB MS64 Red and Brown NGC.** Considerable faded copper-orange remains on this key-date near-Gem. Violet and green mellowed areas are largely at the margins, and a single carbon spot is noted below the M of UNUM. (#2427)

**Gem Red and Brown 1909-S VDB Cent
Famous Low Mintage Issue**

- 3172 1909-S VDB MS65 Red and Brown PCGS.** This intricately struck and lustrous Gem has ample peach-red that evenly blends with light tan-gray. Devoid of contact, though we note a tiny oval spot at the top of the portrait. The VDB initials are sharp. Encapsulated in an old green label holder. (#2427)

**MS65 Red and Brown 1909-S VDB Cent
Well-Struck and Carbon-Free**

- 3173 1909-S VDB MS65 Red and Brown PCGS.** This almond-gold Gem is only slightly mellowed from a full Red coin, with a slight woodgrain appearance and excellent eye appeal. The designer's initials and the strike throughout are sharp, and even under a loupe there is no sign of carbon. A nice example to represent this key issue. (#2427)

**1909-S VDB Cent, MS65 Red and Brown
Original Woodgrain Streakiness**

- 3174 1909-S VDB MS65 Red and Brown PCGS. CAC.** This Red and Brown Gem S-VDB represents excellent value for the collector. The surfaces are bright red with a hint of yellow, as often seen. The "Brown" part of the grade is from the woodgrain toning over each side. This is common to all 1909 cents, both Indian and Lincoln types, and is from improper mixture of the alloy. This coin's appearance is most likely just how it looked in 1909. (#2427)

**1909-S VDB Cent, MS64 Red
Popular Key Lincoln Cent**

- 3175 1909-S VDB MS64 Red PCGS.** This popular key Lincoln cent is housed in a green-label PCGS holder. A muted orange near-Gem, this example has bold details with frosty luster and lovely blue-green and rose toning. A small carbon spot by the mintmark and a few others on each side prevent a higher grade. (#2428)

Well-Preserved Gem Red 1909-S VDB Cent

- 3176 1909-S VDB MS65 Red PCGS.** The famous 1909-S VDB has the lowest mintage of any business issue of the series. Production was brief due to the placement of the initials, deemed too prominent in that more modest era. The present orange-gold Gem is well-struck and magnificently preserved, with a mattelike texture and good eye appeal. Encapsulated in an old green label holder.
Ex: Dr. John Y. Harper, Jr. Collection / New York Signature (Heritage, 3/2012), lot 3099. (#2428)
-

**1909-S VDB Lincoln Cent, MS65 Red
Sharply Detailed Key Date**

3177 1909-S VDB MS65 Red PCGS. CAC. An attractive Gem specimen of this famous first-year key, with the all-important VDB initials boldly impressed, and the other design elements sharply detailed. The brightly lustrous Red surfaces show some streaks of violet and amber toning. Housed in a green label holder. (#2428)

3178 1909 MS67 Red NGC. Deeply glowing fiery red saturates both sides of this first Lincoln date, struck after the Treasury ordered the designer's initials V.D.B. deleted from the reverse. Needle-sharp strike creates maximum detail that is highlighted by the flawless ember-glowing luster. Here is the Lincoln design as Victor D. Brenner intended it to appear. Undeniable condition rarity. Census: 10 in 67 Red, 0 finer (4/12). (#2431)

3179 1909-S MS66 Red NGC. CAC. Excellent detail with faintly pebbled texture to fresh copper-orange fields. Amazing preservation for more than a century, a feature the winning bidder is sure to appreciate. Census: 60 in 66 Red, 3 finer (4/12). (#2434)

3180 1909-S S Over Horizontal S MS65 Red PCGS. FS-1502. The undermintmark feature is clearly evident with the aid of slight magnification. This well-preserved, first-year variety retains its original red luster, while only the slightest number of ticks can be seen under magnification on this remarkable Gem quality example. (#92434)

**1910-S Cent, MS66+ Red
Only Two Finer PCGS**

3181 1910-S MS66+ Red PCGS Secure. CAC. A highly lustrous Premium Gem, this 1910-S has the distinctive coloration found on the first couple years of S-Mint copper coins. Both sides are frosty and boldly defined with golden-orange luster and faint streaks of deeper orange, sometimes called a "woodgrain" pattern. Microscopic carbon flecks are barely perceptible. Population: 61 in 66 (1 in 66+) Red, 2 finer (4/12). (#2440)

3182 1911-D MS65 Red PCGS. A luminous and largely copper-orange example of the first Denver cent issue, modestly mellowed with violet and showing occasional carbon. The PCGS holder for this Gem has a green label. (#2446)

3183 1911-S MS65 Red and Brown NGC. Blue-violet and copper-peach hues are luminous on each side. The obverse has a thin ring of the latter color around a broad blue-violet centers, while the reverse offers a better blend of the two. (#2448)

**Registry Set Essential 1913 Cent, MS67 Red
One of Six Finest at PCGS**

3184 1913 MS67 Red PCGS. Despite the mintage of more than 76 million pieces in prewar America, the 1913 Lincoln cent is seldom seen even in MS66 Red, where PCGS has seen only 52 submissions (likely not all different coins). The PCGS population in MS67 Red stands at six pieces — about one-tenth as many as the MS66 level, and Superb Gems tend to trade about 10 to 20 times as much as those in MS66.

This piece is fully struck throughout both sides, with no weakness in the usually seen areas. The surfaces are medium orange-gold, mellowing only slightly to a thin arc of violet near the left obverse rim. A few tiny microflecks appear only with the aid of a loupe. A Registry Set essential. Population: 6 in 67 Red, 0 finer (4/12). (#2461)

3185 1914-D AU55 NGC. This well-preserved example is a pleasing chocolate-brown, while several small specks of dark toning are noted on the obverse. (#2471)

**Near-Mint 1914-D Lincoln
Sharply Struck and Lustrous**

- 3186 1914-D AU58 PCGS. CAC.** The second key to the Lincoln cent series, the 1914-D was saved in far smaller (virtually nil) quantities compared to the 1909-S VDB, so top-grade pieces survive more by chance than intervention. This near-Mint State piece displays medium-brown color with much luster remaining, a sharp strike as usual, and no distractions of any sort. (#2471)

Nicely Preserved 1914-D Cent, MS62 Brown

- 3187 1914-D MS62 Brown NGC.** Considerable orange congregates along the borders of this key-date cent, while the device high points show some blue tinge among the prevailing medium brown toning. Scattered marks seem minor for the grade, although the dies are somewhat eroded and an interesting die crack runs down Lincoln's coat, one we have not seen before. (#2471)

**1914-D Cent, MS63 Brown
Reverse Lamination**

- 3188 1914-D — Reverse Lamination — MS63 Brown NGC.** The textured medium olive surfaces, typical of all Mint State 1914-D cents and many other coins of the same period, enjoy a small cigar-shaped planchet lamination on the reverse, diagonally from the N of UNITED down to the first A of AMERICA. A small, perhaps related mark appears on the reverse rim a 9 o'clock. (#2471)

**1914-D Cent, MS64 Brown
Low-Mintage Key**

- 3189 1914-D MS64 Brown NGC.** Despite its low mintage of less than 1.2 million pieces, the 1914-D Lincoln cent was neglected by collectors at the time of issue, and few examples were saved for numismatic purposes. This sharply detailed Choice specimen retains much original red luster under shades of lilac and light brown patina. Census: 98 in 64 Brown, 38 finer (4/12). (#2471)

**Key 1914-D Lincoln Cent
MS64 Red and Brown**

- 3190 1914-D MS64 Red and Brown PCGS. CAC.** Though clearly mellowed by time, this key-date Lincoln cent is untouched by wear and retains considerable golden color along with mahogany and olive hues. The crisply struck example has a handful of flyspecks, above the date on the obverse and on the D of UNITED on the reverse, but few serious abrasions. PCGS has graded 40 numerically finer Red and Brown representatives (4/12). (#2472)

**1915-S Cent, MS66 Red and Brown
Well-Detailed, Lovely Iridescence**

- 3191 1915-S MS66 Red and Brown NGC.** The 1915-S cent is a challenging one to locate in high grades and with significant original color. As pointed out by David Lange in his reference, the surfaces on this piece are "very deep red." There is a tinge of brown as well, and a lovely peripheral accent of olive-green around the obverse. Census: 4 in 66 Red and Brown, 0 finer (4/12). (#2484)

- 3192 1916-S MS65 Red and Brown NGC. CAC.** Appreciable original copper-gold appears alongside the rich violet-blue present elsewhere on this San Francisco Gem. An underrated piece that is housed in a prior-generation holder. (#2493)
- 3193 1917 MS66+ Red PCGS.** Achingly close to the Superb Gem Red level, this 1917 Lincoln is perhaps held back by a touch of strike softness and a few trivial marks. Beautiful almond-gold color and blazing luster. (#2497)
- 3194 1917 Doubled Die Obverse VF35 PCGS. CAC. FS-101.** This *Guide Book* variety example shows die doubling on the RUS in TRUST and the curl of the 9 in the date. The portrait high points display moderate wear, and the chocolate-brown fields and devices are unblemished. (#92495)

**1917-D Cent, MS66 Red
Boldly Struck and Original Surfaces**

- 3195 1917-D MS66 Red PCGS.** Ex: Jack Lee. In his *The Complete Guide to Lincoln Cents*, David Lange highlights several major issues facing the series aficionado seeking a strong example, and among them is the infamous color-strike trade-off, wherein the pieces with the brightest Red surfaces are those most susceptible to weak strikes, while the boldly impressed coins show brown surfaces. The collector who purchases this Premium Gem, however, need not have to choose between strike and color, since the pale copper-gold surfaces are as pleasingly preserved as the boldly detailed devices. Excellent eye appeal. Population: 5 in 66 Red, 0 finer (4/12).
Ex: Jack Lee Estate Lincoln Cent Registry Set (*Heritage*, 12/2008), lot 164, which realized \$14,375. (#2500)

- 3196 1918 MS66 Red PCGS. CAC.** Both sides have pleasing orange-tan color with hints of purple iridescence. Blazing luster and an excellent strike with surfaces that are nearly pristine. A die crack (as struck) runs from the rim to the second T in STATES. PCGS has graded 14 examples as MS67 Red or better (4/12). (#2506)
- 3197 1918 MS66 Red PCGS. CAC.** Copper-gold over the obverse with an apricot turn on the pebble-textured reverse. Great detail and eye appeal, though a carbon spot is noted at the upper tip of the left wheat ear. (#2506)

**1918 Cent, MS67 Red
Notable Registry Set Coin**

- 3198 1918 MS67 Red PCGS.** While the 1918 cent may not be generally regarded as a rarity with a mintage of more than 288 million pieces, it is a surprising condition rarity as a Red Superb Gem. Collectors building Registry Sets will find it an unexpected bottleneck impeding their plans. This handsome example presents a mix of pale peach and copper-gold color overall, enlivened by bold luster showing considerable fire with only a few minute flyspecks apparent after diligent search. Its wealth of fine detail and essentially unmarked surfaces will interest the many numismatists pursuing complete sets of this ever-popular series. Population: 13 in 67 Red, 1 finer (4/12). (#2506)
- 3199 1919 MS67 Red PCGS. CAC.** Strongly struck with fresh luster. The obverse with its pale centers and slightly deeper orange rims is largely carbon-free, though the reverse shows a number of tiny flyspecks. Population: 61 in 67 Red, 15 finer (4/12). (#2515)
- 3200 1919-D MS66 Red and Brown NGC.** Deep blue and violet through wide interiors, though original copper-to-pink hues prevail at the rims, just enough to give the "Red" side its due. Well-defined with minimal carbon. Census: 10 in 66 Red and Brown, 0 finer (4/12). (#2517)
- 3201 1920 MS66 Red PCGS. CAC.** Rich copper-orange color through the fields with a lightening trend at the cores. This well-defined Premium Gem has a few small flyspecks but few flaws otherwise. PCGS has graded just five coins as MS67 Red or better (4/12). (#2524)
- 3202 1920-D MS65 Red NGC.** This orange-red Gem offers light satiny luster. The strike is fairly soft, especially near the ears of wheat, though no signs of carbon are detected on the surfaces of this Denver Mint example. (#2527)

**1920-D Cent, Full Red MS66
Among the Finest Known, Ex: Jack Lee**

- 3203 1920-D MS66 Red PCGS.** Ex: Jack Lee. With a mintage of under 50 million pieces, the 1920-D is a lower-mintage but not necessarily elusive issue. In circulated grades, most collectors can spend a reasonable amount of money and come away contented. The buyer who demands the best, however, is far more difficult to satisfy. David Lange notes that most Mint State examples are of “mediocre quality,” with strike and luster to blame; dies were pushed well beyond the point of optimal retirement, and color anomalies were common even before the coins left the Denver Mint grounds. Perhaps the most memorable commentary on this issue comes from Q. David Bowers, who writes in the *Guide Book of Lincoln Cents* that “Finding a *sharply struck* gem with *original color* [italics his] is almost, but not quite, an impossibility.”

The present coin is tangible proof. The luster of this Premium Gem example is not flashy (a 1920-D that has the appearance of a 1920-P should be checked for an added mintmark), but it is more than adequate. The strike is uncommonly bold and from a desirable earlier die state; the lines in the wheat ears and the details of the portrait are bold. The smooth copper-orange of the obverse gives way to elements of brick-red and lavender on the reverse, the latter color almost approaching violet in areas. With just six MS66 Red examples known to PCGS and none finer (4/10), this 1920-D cent is utterly unsurpassable, a point the Lincoln cent aficionado should remember.

Ex: Jack Lee Estate Lincoln Cent Registry Set, December Signature (Heritage, 12/08), lot 173, which garnered \$25,300. (#2527)

- 3204 1922-D Weak D MS63 Red and Brown PCGS. CAC.** A shadow of the D mintmark is visible on this Select Mint State piece. This variety is sometimes chosen by budget-minded collectors who are unable to afford the five-digit price tag of a similarly graded No D cent. Both sides have considerable orange luster with splashes of greenish toning and “finger-toning” on the reverse. (#3111)
- 3205 1922 No D Strong Reverse VF30 NGC. FS-401.** Die Pair 2. Even wear characterizes this chocolate brown coin, while light toning specks are noted on the reverse. The present coin represents a pleasing example of the most desirable 1922 No D cent variety. (#3285)
- 3206 1922 No D Strong Reverse VF30 NGC. FS-401.** Die Pair 2. A midgrade representative of this desirable *Guide Book* variety. Toned medium brown with an unmarked appearance and pleasing definition on the wheat ears. (#3285)
- 3207 1922 No D Strong Reverse VF35 PCGS. FS-401.** Die Pair 2. An attractive golden-brown key date Cent. A faded thin line above the AM in AMERICA provides the only remotely relevant mark. Ex: New York Signature (Heritage, 6/2005), lot 5132, which realized \$1,955. (#3285)
- 3208 1922 No D Strong Reverse XF40 NGC. FS-401.** Die Pair 2. TRUST and the second 2 in the date are sharp, characteristic of the coveted sans mintmark variety. A lovely chocolate-brown cent with full lines in the wheat ears and no distracting abrasions. (#3285)
- 3209 1922 No D Strong Reverse XF40 NGC. CAC. FS-401.** A typical dark chocolate example of Die Pair 2, the only true 1922 No D cent, this piece has weak obverse details with a bold reverse. (#3285)
- 3210 1922 No D Strong Reverse XF45 PCGS. FS-401.** Die Pair 2. Predominantly chocolate-brown with sea-green undertones. The cheekbone through jaw exhibit wear, but the reverse remains sharp. A moderately abraded example of this popular absent mintmark variety. Ex: Long Beach Signature (Heritage, 2/2006), lot 323, which realized \$3,450. (#3285)
- 3211 1922 No D Strong Reverse XF45 PCGS. CAC. FS-401.** Die Pair 2. TRUST and the final 2 are sharp, as well as the lines in the wheat ears, all characteristics of the coveted Die Pair 2. No examples are known of this variety with any trace of a Denver mintmark, unlike Die Pair 1 or 3. An attractive chocolate-brown Choice XF representative; much nicer than the typically encountered VG-VF example. (#3285)
- 3212 1922 No D Strong Reverse XF45 PCGS. CAC. FS-401.** Die Pair 2. This is the desirable Strong Reverse variety. The obverse has no trace of the mintmark, unlike those from Die Pair One or Three. Due to the nature of the strike, grading is always done by the reverse alone. A desirable representative, deep brown but considerably luminous despite light wear. (#3285)
- 3213 1922 No D Strong Reverse — Cleaned — ANACS. AU55 Details. FS-401.** Die Pair 2. A delightful medium brown specimen with iridescent toning on both sides, nicely recovering from an old cleaning. Scattered handling marks are entirely trivial. (#3285)
- 3214 1925 MS67 Red PCGS. CAC.** Peach-gold at top and bottom with horizontal gold streaks through the centers. This is a captivating Superb Gem with just a few minuscule flyspecks. Population: 57 in 67 Red, 0 finer (4/12). (#2560)

- 3215 1927-S MS64 Red PCGS.** The obverse of this lustrous Choice Mint State cent is light orange and the reverse is medium orange. A few tiny carbon specks on each side are negligible. Only 16 finer Red examples reside in PCGS holders. (#2584)
- 3216 1927-S MS64 Red PCGS. CAC.** Largely copper-orange with a degree of mellowing. This effect is more visible on the reverse, which also has a few flyspecks; the obverse displays well. Housed in a green label. (#2584)
- 3217 1932 MS67 Red NGC.** Primarily copper-gold with a splash of lavender through part of the reverse. Well-defined on the wheat ears, though Lincoln's portrait shows a degree of softness on the high points. Census: 26 in 67 Red, 0 finer (4/12). (#2623)
- 3218 1933 MS66+ Red PCGS.** Glowing orange-gold surfaces are tantalizingly close to a Superb Gem designation on this 1933 cent, among the low-mintage 1932- and 1933-PD quartet. Boldly struck and lustrous, although a small streak of blue appears at the corner of Lincoln's mouth. (#2629)
- 3219 1933 MS66+ Red PCGS. CAC.** If the worn reverse die had been in better shape, this glowing orange-red piece would likely grade MS67. Nonetheless pleasing overall, with a sharp obverse and no sign of carbon. (#2629)

**Select Doubled Die Obverse 1936 Cent
Type One Guide Book Variety**

- 3220 1936 Doubled Die Obverse, Type One MS63 Brown PCGS. FS-101.** Cherrypickers' lists three different varieties of doubled die obverse 1936 cents, but FS-101 certainly has the strongest doubling and is the variety listed in the *Guide Book*. All obverse legends exhibit a distinct spread. This chocolate-brown example is fully struck and satiny with a few unimportant marks and a faint fingerprint on the lower reverse. (#82648)
- 3221 1941 MS67+ Red PCGS.** Ex: Jack Lee. Full luster emanates from blazing orange-gold surfaces that show a bold strike and a few tiny ticks on Lincoln's coat. PCGS has certified only one example finer (4/12). (#2695)

**Gem Red 1941 Doubled Die Cent
FS-103, Glowing Orange-Gold Coin**

- 3222 1941 Doubled Die Obverse MS65 Red PCGS. FS-103.** The doubling is evident only on selected areas: the earlobe, the 1 and 9, T and Y. This is one of the newer doubled dies, created with a weak first hubbing that makes it perceptible only on high-grade specimens such as the present piece. This is a glowing orange-gold example that is fairly well-struck. The obverse is carbon-free; a round gray spot on the coat is not carbon but rather is water-spotting. A few tiny flecks appear under a loupe on the reverse. Population: 2 in 65 Red, 3 finer (4/12). (#37786)
- 3223 1943-D MS68 NGC.** An unimprovable example of the single-year zinc-plated steel type. Fully struck and pristine with vibrant luster and an occasional arc of ice-blue toning.
Ex: *Santa Clara Signature (Heritage, 11/2001)*, lot 5265. (#2714)
- 3224 1955 Doubled Die Obverse — Improperly Cleaned — NGC Details. AU. FS-101.** A sharply detailed key date example with slight wear on the cheekbone and jaw of Lincoln. The pale orange color in protected areas is unnatural, though open areas of the design have toned steel-gray. (#2825)
- 3225 1955 Doubled Die Obverse AU58 NGC. FS-101.** A dusky mahogany-red example with gunmetal-gray toning on the high points. The satiny surfaces are well struck. The obverse is mark-free while the reverse displays a few minute ticks. (#2825)
- 3226 1955 Doubled Die Obverse AU58 NGC. FS-101.** This coruscating key date cent is golden-brown with hints of lime-green. Nicely struck and minimally abraded. Unlike many listed die doubled varieties, no lens is required to notice the separation of the legends. (#2825)
- 3227 1955 Doubled Die Obverse AU58 NGC. CAC. FS-101.** Even a non-collector could see something "off" about this bold doubled die, and many examples were saved with scant or no wear. This example, now with a pleasing blue-brown sheen, just slides into the former category. (#2825)
- 3228 1955 Doubled Die Obverse — Altered Color — NGC Details. Unc. FS-101.** The orange and rose-red color is deceptive but attractive. Crisply struck and unabraded with sweeping cartwheel luster. The most prominent doubled die of the entire Lincoln series. (#2825)

**1955 Doubled Die Obverse Cent MS62
Smooth Brown Example**

- 3229 1955 Doubled Die Obverse MS62 Brown ANACS. FS-101.** Doubling is powerful throughout IN GOD WE TRUST, LIBERTY, and the date. Lincoln's bust shows the somewhat indistinct detail often associated with this classic doubled-die obverse, while the reverse details are uniformly sharp. A pleasing specimen of a dramatic naked-eye variety that introduced thousands of Americans to coin collecting in its day. (#2825)

**1955 Lincoln Cent, MS63 Brown
Doubled Die Obverse**

- 3230 1955 Doubled Die Obverse MS63 Brown PCGS. CAC. FS-101.** Due to a hubbing error, the date, motto, and LIBERTY are all profoundly doubled on this famous *Guide Book* variety. The glossy surfaces of this pleasing Select example display a mixture of light brown and original red color, with slightly subdued mint luster and only minor signs of contact. (#2825)

**1955 Doubled Die Obverse Cent, MS64 Brown
Famous *Guide Book* Error Coin**

- 3231 1955 Doubled Die Obverse MS64 Brown NGC. FS-101.** After many years of inclusion in the *Guide Book* and *Cherrypickers' Guide*, the 1955 Doubled Die Obverse Lincoln cent is the most famous error coin of the series. This pleasing Choice example shows the characteristic doubling on the date, motto, and LIBERTY at a glance. The light brown surfaces retain hints of red color and traces of original mint luster. (#2825)

1958 Cent, Fabulous MS67 Red

- 3232 1958 MS67 Red PCGS.** The 1958 cent is certainly a common one, unless the Registry set collector wants only the finest. And at PCGS the finest is MS67 Red. This piece displays astonishing light red surfaces that are virtually mark-free. Only 19 others have been so graded by PCGS and none are finer (4/12). (#2848)

- 3233 1972 Doubled Die Obverse MS66 Red PCGS. FS-101.** A beautiful orange-red Premium Gem of this prominent *Guide Book* doubled die variety. Precisely struck and thoroughly lustrous with exemplary preservation. Housed in a green label holder. (#2950)

**1979 Lincoln Cent, MS68 Red
Tied for Finest Certified**

- 3234 1979 MS68 Red PCGS.** The Philadelphia Mint coined six billion Lincoln cents in 1979, yet only five pieces have been similarly certified at PCGS (4/12), or one coin for every 1.2 billion pieces minted. This glowing orange Superb Gem has bold design motifs with frosty luster and sensational eye appeal. It is destined for the finest collection. (#2995)

**1983 FS-801 Cent, MS68 Red
Doubled Die Reverse**

- 3235 1983 Doubled Die Reverse MS68 Red NGC. FS-801.** All of the reverse lettering is boldly doubled on this variety. Both sides show extensive bubbles from imperfect copper plating on the zinc planchet, seemingly pristine pumpkin-orange Superb Gem. Well struck aside from a hint of weakness on STATES. Census: 9 in 68 Red, 0 finer (4/12). (#3056)

3236 1995-D MS68+ Red PCGS. Both sides of this piece are essentially immaculate, as might be expected from the grade; the only distraction (other than the new hub design) is a round water spot on Lincoln's coat. A blazing orange-gold coin. Population: 61 in 68 (1 in 68+) Red, 1 finer (4/12). (#3130)

PROOF LINCOLN CENTS

3237 1909 PR65 Red and Brown PCGS. Yellow and peach surfaces overall with only slight mellowing. This Red and Brown Gem matte proof has excellent texture and detail. PCGS has graded 29 examples as PR66 Red and Brown or better (4/12). (#3304)

3238 1910 PR65 Red and Brown PCGS. Deep blue and lilac toning appears at the central obverse and across the reverse on this burnt-orange Gem Lincoln cent. The satiny and lustrous surfaces exhibit a few trivial carbon flecks that are expected for the grade. Population: 49 in 65 Red and Brown, 24 finer (4/12). (#3307)

3239 1911 PR64 Red PCGS. Gold-to-orange color over the reverse and at the edges of the obverse, though the interior of the obverse has duskier hues rooted in brick-red. Minor disturbances of the matte surface account for the grade. Population: 22 in 64 Red, 35 finer (4/12). (#3311)

3240 1912 PR66 Brown NGC. Deeply toned surfaces reveal blue-rooted iridescence at the proper angle to the light. A subtle matte proof that will reward the contemplative collector. Census: 10 in 66 Brown, 3 finer (4/12). (#3312)

1912 Cent, PR65 Red and Brown Scarce With Any Red

3241 1912 PR65 Red and Brown PCGS. CAC. The 1912 is considered third rarest in the matte proof series. Coins with original mint red are scarce, and this piece displays full red on the obverse. It is only on the reverse that lime-green combines with light brown to produce light iridescence. Lightly spotted on each side. Population: 42 in 65 Red and Brown, 14 finer (4/12). (#3313)

1912 Cent, PR65 Satiny Matte Proof

3242 1912 PR65 Red PCGS. An impressive Gem Matte proof with satiny, rather than sandblast, surfaces. A bold strike creates high, squared rims with full details on both sides. The brilliant orange surfaces host a few splashes of deeper orange and slight lilac toning, the latter confined to the rims. Population: 17 in 65 Red, 1 finer (4/12). (#3314)

3243 1913 PR66 Red and Brown NGC. Ex: Childs. Mostly brick-red with glimpses of jade-green at the obverse periphery. Fully struck and satiny. A pristine Premium Gem.
Ex: Walter H. Childs Collection (*Bowers and Merena*, 8/1999), lot 80; Long Beach Signature (*Heritage*, 10/2001), lot 5673. (#3316)

Near-Flawless Superb Gem Red Proof 1913 Cent

3244 1913 PR67 Red NGC. The large production of proof cents from this year, 2,983 pieces, was undoubtedly due to the interest and popularity of the Buffalo nickel. Both coins were sold in minor proof sets by the Mint. Since matte proofs were wrapped in tissue paper they rapidly turned from their original mint red. This is a magnificent, full Red example that has just a tinge of lime-green on the obverse. The surfaces are as close to flawless as we have seen on any matte proof in some time. Census: 5 in 67 Red, 0 finer (4/12).
Ex: FUN Signature (*Heritage*, 1/2012), lot 4425. (#3317)

3245 1915 PR65 Red and Brown NGC. Olive, rose, and violet-blue hues mingle on this sharply struck Gem proof. Gorgeous texture and solid preservation for the issue make for a quality specimen. Census: 26 in 65 Red and Brown, 21 finer (4/12). (#3322)

1916 Red and Brown Gem Matte Proof Considerable Remaining Mint Red

3246 1916 PR65 Red and Brown PCGS. The 1916 matte proof cents and nickels always attract attention as each is the key to the short-lived matte proof series. Of the 600 proofs struck, relatively few show red mint luster as proofs were all wrapped in tissue paper at the Mint and the sulfur in the paper caused them to lose their original color quickly. This example retains considerable mint red, especially around the devices on each side. Few contact marks or specks are seen, even when examined with a loupe. (#3325)

1916 Lincoln Cent, PR66 Red and Brown
One of a Handful Certified

3247 1916 PR66 Red and Brown NGC. Lincoln cent specialists have long questioned why this date in matte proof, with 600 coins struck, is as elusive as the statistically rarer first-date proofs, 1909 VDB, which saw 420 pieces struck. Another unanswered mystery is why there has been such great difficulty in obtaining matte proof 1916 cents in any of the higher grade ranges. The new-style matte proofs adopted by the Philadelphia Mint were inspired by British examples first struck in 1902, but these innovative pieces proved lastingly unpopular with American collectors, who greatly preferred the more familiar if older-style brilliant proofs. David Lange, a recognized student and researcher of early 20th century U.S. coins, suggested in 1996 that many examples of this date were probably unsold and routinely melted at year's end as unwanted remainders. This remarkable Premium Gem NGC survivor is a coin of more than usual interest and importance to the numerous collectors who specialize in the Lincoln cent series. Much of this coin's beauty derives from the subtly blended crimson-red and medium brown colors that sweep over both sides, lightening to tan-gold in the upper left obverse field and on the reverse at the legend UNITED STATES OF AMERICA. The fine-grained, matte-textured surfaces are wonderfully free of the minor blemishes that often impact grading of vulnerable matte proofs, and all of the devices boast razor-sharp definition throughout. Census: 12 in 66 Red and Brown, 2 finer (4/12).

Ex: FUN Signature (Heritage, 1/2003), lot 5785. (#3325)

3248 1936 Type One—Satin Finish PR65 Red and Brown NGC. Glittering satin semireflectivity with a mix of violet and orange-brown surfaces. A beguilingly appealing Gem specimen that was one of the first proof cents struck after a two-decade hiatus. Census: 27 in 65 Red and Brown, 7 finer (4/12). (#3331)

3249 1936 Type One — Satin Finish PR65 Red and Brown PCGS. The obverse of this reflective Gem proof is light orange, while the reverse exhibits emerald and violet toning. Virtually pristine with a few small spots on each side. Population: 28 in 65 Red and Brown, 4 finer (4/12). (#3331)

**Satin Finish PR67 Red and Brown
1936 Cent, Ex: Childs**

3250 1936 Type One — Satin Finish PR67 Red and Brown NGC. Ex: Childs. On its own, the orange-gold reverse is Red, though the lilac and rose obverse is Red and Brown. A razor-sharp and immaculate specimen. Since Walter Childs died in 1906, the present coin was presumably obtained by his son and heir, Charles Frederick Childs, better known for his purchase of the finest known 1804 dollar. Ex: *Walter H. Childs Collection (Bowers and Merena, 8/1999), part of lot 85.* (#3331)

**Gem Red Proof Type One 1936 Cent
First-Year Satin Finish Example**

3251 1936 Type One — Satin Finish PR65 Red PCGS. CAC. Uniform copper-gold color bathes the obverse of this luminous Gem proof, ceding to variegated copper-gold and crimson on the reverse. The strike is sharp while not absolute. Satiny surfaces reveal just a few minuscule light flecks. Housed in a first generation holder. Population: 51 in 65 Red, 25 finer (4/12). Ex: *Long Beach Signature (Heritage, 2/2009), lot 579.* (#3332)

3252 1936 Type Two — Brilliant Finish PR66 Red and Brown NGC. Iridescent ruby-red, purple, and tan-brown colors swirl on nearly pristine surfaces. A boldly struck Premium Gem proof, highly elusive in this lofty grade. Census: 8 in 66 Red and Brown, 2 finer (4/12). (#3334)

**1936 Brilliant Finish Cent, PR66 Red
Highly Reflective Fields**

3253 1936 Type Two — Brilliant Finish PR66 Red PCGS. CAC. This appearance of this coin leaves no doubt about which finish it was struck in. The fields are highly reflective. The surfaces are undimmed by the passage of the decades with cherry-red color from rim to rim. Each side presents an almost unmarked appearance. Population: 33 in 66 Red, 2 finer (4/12). Ex: *Santa Clara Signature (Heritage, 11/2001), lot 5274.* (#3335)

*Mint Director Nellie Tayloe Ross
and President Roosevelt, 1935*

**1936 Brilliant Finish Cent, PR66 Cameo
Single Finest Certified at PCGS**

- 3254 1936 Type Two — Brilliant Finish PR66 Cameo PCGS. CAC.** The Mint resumed proof set offerings in 1936 after a two-decade hiatus. The collecting public was preoccupied with the Commemorative craze at the time, and this initial proof offering gathered little attention. A small mintage of 5,569 proof Lincoln cents was accomplished, split between the Satin finish and Brilliant types. The present coin is a magnificent example of the second type, with sharply detailed design elements and surfaces that are virtually free of post-striking impairments. The all-brilliant finish of these coins resulted in a lack of field/device contrast on most examples, and this coin is one of only three specimens certified Cameo at PCGS. Both sides display visually appealing golden-orange patina. Population: 1 in 66 Cameo, 0 finer (4/12). (#83335)

**1952 Lincoln Cent, PR67 Red Cameo
Only One Finer Coin at PCGS**

- 3255 1952 PR67 Red Cameo PCGS Secure.** The blazing orange-red surfaces of this spectacular Superb Gem are deeply mirrored, contrasting boldly with the sharply detailed design elements to produce the coveted Cameo effect. This piece is one of the finest survivors from a mintage of 81,980 proofs. Population: 22 in 67 Cameo, 1 finer (4/12). (#83365)

**1954 Deep Cameo Cent, PR68
Sharply Contrasted, Lovely Color**

- 3256 1954 PR68 Deep Cameo PCGS.** While moderately contrasted and lower-graded 1954 cents are relatively available, at this level the air thins rapidly. When both services' Deep/Ultra Cameo cents are combined the total is only seven pieces. The contrast is undeniable on each side of this seemingly perfect coin. The obverse displays rich, even reddish color, while the reverse is several shades lighter. Population: 4 in 68 Deep Cameo, 0 finer (4/12). (#93371)

PROOF TWO CENT PIECES

**Fully Struck 1866 Two Cent Piece
PR66 Red and Brown Cameo**

- 3257 1866 PR66 Red and Brown Cameo NGC.** Sun-gold and rose-red shades alternate across both sides, with the deepest color at the reverse center. Fully struck and nicely mirrored with exemplary preservation. Just 725 proofs were struck, and NGC has yet to certify an example as PR67 or finer. (#3631)
- 3258 1871 PR64 Red and Brown NGC. CAC.** Mostly peach-red with hints of mauve toning on the high points and open fields. A fully struck and flashy near-Gem. TRUST is die doubled, as always on proofs of this date. (#3646)

- 3259 1871 PR65 Red and Brown PCGS. CAC.** Pinkish-tan fields complement brownish devices on the obverse of this Gem proof, while the orange and brown mingle a bit more on the reverse. No carbon or contact is evident. Population: 74 in 65 Red and Brown, 13 finer (4/12). (#3646)

**Select Red and Brown Proof 1873 Two Cent
Closed 3 Original Example**

- 3260 1873 Closed 3 PR63 Red and Brown NGC.** Much reflective mint orange dominates the fields on each side, interspersed with bits of brown, although the devices are largely brown on this attractive coin. The surfaces are relatively contact-free and well-struck but a carbon spot appears near the lower reverse rim. One of the original Closed 3 proofs; the Open 3 pieces are rare restrikes. (#3652)

THREE CENT SILVER

- 3261 1851 MS66 PCGS.** Frosty silver surfaces have faint suggestions of blue and green. This is a charming first-year Premium Gem, somewhat pillowy in its detail but a quality type coin nonetheless. PCGS has graded just 11 examples as MS67 or better (4/12). (#3664)
- 3262 1851-O MS64 PCGS. CAC.** This frosty and fully brilliant Choice Mint State piece represents the first year of the denomination, and the only coinage of the denomination away from the Philadelphia Mint. Delicate champagne toning is more obvious on the reverse. The strike is typically indistinct, and the surfaces have the usual quota of minuscule marks. (#3665)

**1854 Trime, MS65+
Only Eight Finer Coins at PCGS**

- 3263 1854 MS65+ PCGS. CAC.** A nominal mintage of 671,000 three cent silver pieces was achieved in 1854. The issue is very scarce, bordering on rare, at the Gem level. Spectacular shades of green and amber toning visit the well-preserved surfaces of this high-end Gem, creating exceptional eye appeal. Vibrant mint luster and sharply detailed design elements add to the appeal. Population: 49 in 65 (4 in 65+), 8 finer (4/12). (#3670)

- 3264 1862/1 MS66 PCGS. FS-301.** The underdigit 1 is visible along the left side of the 2. Both sides are bathed in cartwheel luster, and display the faintest touch of light tan color. Well struck, save for softness in the leaves. Devoid of mentionable marks. Population: 64 in 66, 12 finer (4/12). (#3681)

- 3265 1862 MS66 ★ NGC.** A lovely specimen with light obverse and reverse clash marks, this Premium Gem has a light silver center on the obverse, within a frame of vivid cobalt-blue and russet toning. The reverse is mostly brilliant with peripheral iridescence. (#3680)

1872 Three Cent Silver, MS66 ★

- 3266 1872 MS66 ★ NGC. CAC.** The majority of three cent silver pieces coined after 1862 were proofs, and business strikes combine low mintages with low survival rates, creating important rarities in the series. This 1872 has prooflike surfaces with intense blue and iridescent toning over brilliant luster. Only one numerically finer example is NGC certified with a grade of MS67 Prooflike. Census: 5 in 66 (1 in 66 ★), 0 finer (4/12). (#3693)

PROOF THREE CENT SILVER

- 3267 1861 PR65 NGC.** Deeply toned with blue-violet patina overall that blossoms into violet-rose at part of the upper reverse. Faint glimmers of reflectivity appear at certain angles to the light. Census: 14 in 65, 10 finer (4/12). (#3710)
- 3268 1864 PR65 NGC. CAC.** Blues and greens prevail in the patina, though glimpses of gold also are present. An attractive Civil War-era Gem proof from an issue of only 470 pieces. (#3714)
- 3269 1869 PR64 NGC. CAC.** The deeply reflective fields of this Choice proof silver three cent piece are attractively toned in shades of pale gold and ice-blue. The design elements are sharply detailed throughout. Census: 49 in 64, 66 finer (4/12). (#3719)

THREE CENT NICKELS

- 3270 1866 MS66 PCGS.** This second-year Premium Gem was struck from heavily clashed dies. Green-gold overtones are prominent, though a few windows into fresh nickel-white are present. Population: 23 in 66, 2 finer (4/12). (#3732)
- 3271 1881 MS66 NGC. CAC.** Satiny overall with glimpses of blue and gold against the pale nickel-white base. Better-defined than often seen on the reverse wreath. Census: 13 in 66, 0 finer (4/12). (#3749)

PROOF THREE CENT NICKELS

**1865 Three Cent Nickel, PR65 Cameo
Brilliant and Nicely Contrasted**

- 3272 1865 PR65 Cameo PCGS.** This initial year of the three cent nickel series enjoys additional popularity and attention when offered, because of the notably low mintage of 500 or so proofs. This brilliant example displays deep mirroring in the fields with significant mint luster over the devices, the combination of both yielding the desirable cameo effect seen here. (#83761)

**Gem Cameo Proof 1865 Three Cent Nickel
Repunched First-Year Date**

- 3273 1865 PR65 Cameo PCGS.** While mintage figures for proofs are sketchy in the early years of the three cent nickel, the 1865 ranks as an issue with one of the lowest production figures, estimated at just 500 pieces. Deep golden-rose patina graces the moderately reflective surfaces of this Gem, and the devices supply beautiful contrast. The date was entered too far left, then corrected, showing as repunching on the top of the 6, the most frequently seen dies. An appealing Cameo proof specimen from the first year of the series. Population: 30 in 65 (1 in 65+) Cameo, 32 finer (4/12).
Ex: FUN Signature (Heritage, 1/2007), lot 1988; ANA Signature (Heritage, 8/2007), lot 317. (#83761)

- 3274 1867 PR65 PCGS.** An intricately struck Gem with dappled chestnut-gold and olive-green patina. A few minute flecks near the profile are all that limit the grade. Only 625 proofs were delivered. Certified in a green label holder. (#3763)
- 3275 1867 PR65 ★ Cameo NGC.** It is a testament to this coin's all-around eye appeal that it can have a sizable planchet defect on Liberty's cheek and still receive a Star designation. Boldly contrasted surfaces are minimally toned with only a hint of green-gold at the obverse rim. (#83763)
- 3276 1867 PR65 Cameo NGC. CAC.** Sharply defined, satiny gray devices float across deeply mirrored fields. This highly appealing Gem represents a conditionally elusive issue. Examples of the first decade are elusive with contrast, and NGC has only certified 55 finer examples (4/12). (#83763)
- 3277 1868 PR65 Cameo PCGS.** Minor purple patina at the top of the obverse does not interfere with the strong contrast of this Gem, which is boldly struck and otherwise untuned. Great eye appeal. Population: 30 in 65 (1 in 65+) Cameo, 12 finer (4/12). (#83764)
- 3278 1868 PR65 Cameo PCGS.** A light golden overtone dominates the eye appeal of this moderately contrasted Gem Cameo proof. A few tiny milky dots and planchet defects dot the fields. Population: 30 in 65 (1 in 65+) Cameo, 12 finer (4/12). (#83764)

**1868 Three Cent Nickel, PR67 Cameo
Among the Finest Certified Specimens**

- 3279 1868 PR67 Cameo NGC.** From a tiny mintage of 600 pieces, this remarkable Superb Gem proof three cent nickel displays bold Cameo contrast between the deeply reflective fields and the sharply detailed devices. The pristine surfaces show just a few hints of pale gold toning. Census: 10 in 67 Cameo, 0 finer (4/12). (#83764)

- 3280 1869 PR64 Deep Cameo PCGS. CAC.** Outstanding contrast on both sides. The frost is elegant and thick aside from a single area atop Liberty's cheek, not entirely coincidental with the PR64 Deep Cameo designation. Population: 7 in 64 Deep Cameo, 19 finer (4/12). (#93765)

- 3281 1870 PR65 Cameo PCGS. CAC.** A highly reflective surface is noted on this boldly struck proof example. While bold white surfaces prevail, a hint of toning is noted at 9 o'clock on the obverse, and a small planchet flaw is visible under magnification after the first Roman numeral. Population: 27 in 65 Cameo, 7 finer (4/12). (#83766)

- 3282 1870 PR65 Cameo PCGS. CAC.** This silver-gold example shows soft luster along with good contrast and a couple of tiny ticks that preclude an even finer grade but fail to dampen the considerable eye appeal. The reverse die is rotated about 20 degrees counterclockwise. (#83766)

**Superb Gem Cameo 1871 Three Cent Nickel
Uniform Brilliance**

- 3283 1871 PR67 Cameo NGC.** The surfaces approach technical perfection on this completely snow-white, untuned proof. The fields are exceptionally deep in their mirrored reflectivity, the devices are nicely frosted, yielding a pronounced cameo effect overall. This piece is tied with only one other (also at NGC) as the finest Cameo examples of this date (4/12). (#83767)

- 3284 1872 PR66 NGC.** One of 950 proofs struck in this year. This piece is curiously soft on the lower hair curls as well as the leftmost column of the denomination, while the fields are also a bit frosted, pointing to a late die state. The generally brilliant surfaces show just the slightest streaky golden patina on the lower obverse. Census: 22 in 66, 0 finer (4/12). (#3768)

- 3285 1873 Closed 3 PR65 Cameo PCGS.** Bold with glassy fields and frosted devices. Stark cameo contrast is evident on both sides. Several tiny contact marks on the cheek and a pinscratch near the base of the first I on the reverse restrict the grade. Population: 45 in 65 (1 in 65+) Cameo, 11 finer (4/12). (#83769)

**Gem Cameo Proof 1877 Three Cent Nickel
Series Key, Proof-Only Strike**

- 3286 1877 PR65 Cameo NGC.** The proof-only key to the three cent nickel series, the 1877 was struck to the net extent of 900 pieces according to the current *Guide Book*, or 510 according to the *Breen Proof Encyclopedia*. Either way this is a desirable example, a solid Gem showing light gold patina, no distractions, and moderate contrast. Ex: Dallas Signature (Heritage, 11/2005), lot 478. (#83773)

3287 1878 PR66 PCGS. CAC. Faint glimmers of gold appear over watery mirrors. This Premium Gem proof has appreciable but not Cameo-level contrast, not uncommon for this proof-only date. Population: 85 in 66 (3 in 66+), 13 finer (4/12). (#3774)

**Superb Gem Proof 1878 Three Cent Nickel
No Finer Coins at NGC**

3288 1878 PR67 NGC. Of the 2,350 proof three cent nickels struck in 1878, most examples seen have incomplete detail in the bridge of Liberty's nose and the ends of the ribbon bow, due to excessive die polishing. This well-preserved Superb Gem displays slightly reflective fields with just a touch of gold and gray toning. Census: 18 in 67, 0 finer (4/12). (#3774)

3289 1878 PR66 Cameo PCGS. The second of three proof-only issues for this series, represented by a pleasing Premium Gem Cameo proof. Aqua patina over the shining fields enhances the contrast. Population: 70 in 66 (1 in 66+) Cameo, 14 finer (4/12). (#83774)

3290 1878 PR67 Cameo NGC. The second of two back-to-back proof-only issues in the three cent nickel series, here represented by a well-contrasted Superb Gem proof with silver-white, distraction-free surfaces. On the verge of Deep Cameo. Census: 25 in 67 Cameo, 1 finer (4/12). (#83774)

3291 1879 PR67 Cameo NGC. Radiant ice-white devices contrast with gleaming mirror-fields. Well-defined with just a few tiny breaks in the obverse frost. Census: 23 in 67 Cameo, 6 finer (4/12). (#83775)

3292 1880 PR66 Cameo NGC. The design elements are exquisitely struck with all of the lines in the III visible. Cameo surfaces have only minor peripheral green-gold patina. A small depression of undetermined origin is noted in Liberty's hair just above the ribbon. Census: 16 in 66 Cameo, 4 finer (4/12). (#83776)

3293 1881 PR67 NGC. This brilliant Superb Gem has moderately mirrored fields around satin devices that combine to present slight cameo contrast. The bold devices are fully defined. Census: 48 in 67, 7 finer (4/12). (#3777)

3294 1881 PR67 Cameo NGC. This impressively preserved Cameo Superb Gem displays razor-sharp details throughout and few faults, no matter how tiny. Golden overtones are more prominent on the obverse. Census: 27 in 67 Cameo, 8 finer (4/12). (#83777)

3295 1882 PR67 Cameo PCGS. Solidly defined and moderately reflective with attractive contrast. Light gold and lavender patina graces the fields, while the devices remain nickel-frosty. Population: 55 in 67 (2 in 67+) Cameo, 5 finer (4/12). (#83778)

3296 1883 PR67 Cameo PCGS. Moderately field-motif contrast is evident on both sides of this Superb Gem Cameo. Sharply struck with complete delineation in the lines of the III and impeccably preserved throughout. Population: 36 in 67 Cameo, 0 finer (4/12). (#83779)

3297 1883 PR67 Cameo PCGS. CAC. Virtually untuned with all the flashiness that one would expect of the assigned grade, aided by a fair degree of contrast primarily on the obverse. PCGS has graded no PR68 Cameo or better coins (4/12). (#83779)

3298 1885 PR67 Cameo NGC. CAC. Well-contrasted surfaces show a slight pinkish cast amid glowing luster. A tiny tick above the coronet appears to be a Mint-made planchet flaw, as struck. Census: 11 in 67 Cameo, 0 finer (4/12). (#83781)

**Sole Finest Deep Cameo
1886 Three Cent Nickel, PR66**

3299 1886 PR66 Deep Cameo PCGS. The 1886 three cent nickel is a proof-only issue from a seemingly substantial mintage of 4,290 coins. However, the present Premium Gem is the single finest Deep Cameo proof that PCGS has certified (4/12). This example offers brilliant light gray surfaces with subtle iridescence. Deeply mirrored fields frame the lustrous devices. (#93782)

3300 1887 PR65 Cameo NGC. A pleasingly contrasted proof Gem with faint golden color sprinkled across both sides. A planchet flaw appears on the rim between UNITED and STATES and a wispy die striation visits the left reverse field. Census: 4 in 65 Cameo, 0 finer (4/12). (#83783)

3301 1889 PR67 Cameo PCGS. The deeply mirrored fields of this virtually pristine representative show outstanding contrast against the ivory-white devices. This fully struck Superb Gem exhibits impressive eye appeal. One of 3,436 proofs struck in the final year of the series and denomination. Population: 18 in 67 Cameo, 1 finer (4/12). (#83786)

SHIELD NICKELS

3302 1866 Rays MS64 PCGS. A luminous Choice representative of the nation's first circulating five cent copper-nickel issue, predominantly cloud-gray with a dot of reddish-brown toning at the left shield. Well struck overall, though the stars on the reverse show softness. Ex: *Dallas Signature (Heritage, 11/2007), lot 218.* (#3790)

3303 1866 Rays MS64 PCGS. Light nickel-blue and olive-gold toning enriches this first-year Shield nickel, one of only two issues for the design to feature rays between the reverse stars. Decent detail overall, if a bit lacking on the centrils. (#3790)

3304 1866 Rays MS65 PCGS. This is a nice, gleaming, silver-white Gem of the first-year Rays Shield nickel, showing some of the challenge the Mint faced in striking such a hard metal on each side — but no post-strike distractions appear. PCGS has seen only 27 submissions finer (4/12). (#3790)

3305 1866/1866 Rays MS65 NGC. FS-301. Certified as such by NGC, the present Gem displays the quadruply offset entire date that characterizes this bold *Cherrypickers'* variety. Steel-gray surfaces show subdued luster and some interesting peripheral die cracks.

3306 1876 MS65 PCGS. CAC. Better-defined than usually seen, though this coin's obverse die cracks and swirling luster make a Mint State origin conclusive. Faint gold-orange and blue overtones give this Gem great eye appeal. Population: 38 in 65, 8 finer (4/12). (#3805)

3307 1881 AU58 PCGS. CAC. A lightly rubbed but attractive near-Mint example with green-gold and blue elements. Sharply struck for this noted key issue with a five-figure mintage. (#3811)

**Gem 1883/2 Shield Nickel
Prominent FS-302 Overdate**

3308 1883/2 MS65 NGC. FS-302. Much of the curve of the underdigit 2 is evident to the left and inside of the 3 in the date. Two jagged die cracks near the date also confirm the variety. *Cherrypickers'* recognizes five different die varieties, although FS-301 and FS-302 are the two most prominent. The present highly lustrous Gem has a brilliant obverse and pastel rose-red and lime-green toning on the reverse. Well struck and only minimally abraded. (#3814)

3309 1883 MS66 NGC. The 1883 Shield nickel was saved as the last of its kind, along with the much-publicized No Cents Liberty nickel of the same date. High grade examples such as the present Premium Gem are affordable. The present coin is lustrous and lightly toned with pleasing preservation. (#3813)

3310 1883 MS66 NGC. Green-to-gold tints visit the margins, while the interiors are pale nickel-gray. A pleasing Premium Gem from the final year of the Shield design, uncommonly well-defined. (#3813)

3311 1883 MS66 PCGS. CAC. Myriad die cracks appear on the shattered reverse of this final-year Shield nickel. Both sides have impressive light gray surfaces with brilliant and frosty luster. PCGS has only certified nine finer (4/12). (#3813)

PROOF SHIELD NICKELS

3312 1866 Rays PR61 NGC. The fields are moderately reflective, a not-uncommon occurrence for an early nickel product, and each side is covered with gray patina with underlying golden. Minor planchet flaking can be seen with a loupe. (#3817)

**Two-Toned 1866 Rays Shield Nickel
PR66 Cameo, First-Year Type**

3313 1866 Rays PR66 Cameo NGC. The first year of the issue that would bring the term "nickel" to its modern meaning of "five cent piece," the 1866 Rays is a two-year type along with the 1867 Rays, the latter far rarer in proof format. This Premium Gem 1866 Rays boasts lovely surfaces with good contrast and tinges of alternating rose and olive. The few tiny flecks appearing under a loupe are minor. Census: 27 in 66 Cameo, 9 finer (4/12). (#83817)

3314 1867 No Rays PR64 PCGS. The far more available proof Shield nickel type for the year. This near-Gem representative has moderate mirrors under light gold and lavender-blue patina. Great charm. (#3821)

**Reflective 1867 No Rays Nickel
PR66 Cameo**

3315 1867 No Rays PR66 Cameo NGC. The 1867 Rays Shield nickels are extreme rarities despite the existence of some apparent restrikes, while the 1867 No Rays are more available but still elusive in the higher proof grades. The present Premium Gem shows excellent contrast with deeply reflective fields. Lovely accents of ineffable jade and sunset-orange add to the broad eye appeal. Census: 8 in 66 Cameo, 1 finer (4/12). (#83821)

3316 1870 PR65 Cameo NGC. Impressively mirrored with considerable partial patina in canary-gold and related shades. Great contrast through the toning and eye appeal to match. Census: 17 in 65 Cameo, 15 finer (4/12). (#83824)

3317 1871 PR65 Cameo PCGS. A brilliant Gem that has unusually high contrast and reflectivity for this issue. One of approximately 960 specimens coined. Population: 19 in 65 Cameo, 11 finer (4/12). *Ex: Dallas Signature (Heritage, 10/2006), lot 434.* (#83825)

3318 1873 Closed 3 PR66+ NGC. Golden overtones edged in lavender glisten on this high-end Closed 3 proof Shield nickel. Excellent detail and appreciable obverse contrast, though the reverse is more subdued. Census: 35 in 66 (1 in 66+), 5 finer (4/12). (#3827)

3319 1874 PR66 NGC. Light nickel-gray with gold-to-peach toning at the upper obverse and peripheral reverse. Reflectivity is slightly subdued, but the sharpness of strike is unmistakable. One of 700 specimens struck. Census: 43 in 66 (2 in 66+), 4 finer (4/12). (#3828)

3320 1874 PR66 Cameo PCGS. CAC. Significantly contrasted with considerable mirrors and hints of blue and gold color. An area of striking weakness is noted on the star at the CA of AMERICA. Population: 12 in 66 Cameo, 2 finer (4/12). (#83828)

3321 1876 PR66 Cameo NGC. CAC. Pastel yellow and blue-violet obverse hues take on new, electric forms across the reverse. A gleaming specimen that offers appreciable field-device contrast through the impressive toning. Census: 33 in 66 (3 in 66+) Cameo, 3 finer (4/12). (#83830)

1876 Centennial-Year Nickel, PR66 Ultra Cameo

3322 1876 PR66 Ultra Cameo NGC. Quite some time passed before Mint officers and workmen discovered the secret to coinage of the nickel composition. Starting the second decade of production, most of the problems had been resolved. This impressive Premium Gem is fully brilliant and exhibits amazing field-device contrast on each side. Census: 0 in 66 Ultra Cameo, 0 finer (4/12). (#93830)

Well-Struck Gem Proof 1877 Shield Nickel

- 3323 1877 PR65 NGC.** The 1877 three cent nickel, five cent nickel, and twenty cent piece are all proof-only issues, although the last is often forgotten. The *Guide Book*, *Breen's Proof Encyclopedia*, and the Bowers series *Guide Book* all differ on the number of proofs that were issued, ranging from 510 to 1,250. In any case there are few surviving finer than this Gem proof, a well-struck piece with rose tinges and no distractions. NGC has seen 42 submissions finer (4/12). (#3831)

1877 Shield Nickel, PR66 Only Five Finer NGC Coins

- 3324 1877 PR66 NGC.** Only 510 proof Shield nickels were struck in 1877, and no business-strike coins were minted. This delightful Premium Gem displays pale gold and lavender toning over slightly reflective fields and sharply detailed design elements. Eye appeal is outstanding. Census: 37 in 66, 5 finer (4/12). (#3831)
- 3325 1878 PR61 NGC.** From a proof-only mintage of 2,350 pieces, this well-detailed and slightly reflective Shield nickel shows a few minor contact marks and pleasing pale gold toning on both sides. (#3832)
- 3326 1878 PR66 NGC.** A pleasing proof-only piece with blue tints toward the margins and pastel-yellow interiors. Sharply struck with considerable underlying reflectivity and eye appeal in spades. (#3832)
- 3327 1878 PR66 PCGS. CAC.** An iridescently toned proof-only Premium Gem. Lime-green, peach-gold, and plum-mauve shades drape satiny and razor-sharp surfaces. The second 8 in the date is repunched. Encapsulated in an old green label holder. (#3832)
- 3328 1879 PR66+ NGC.** A slightly porous planchet impedes the full radiant flash from the polished fields. Otherwise, this would be a Cameo, and it nearly is anyway. The surfaces are exceptionally well preserved with no obvious contact marks. (#3833)
- 3329 1881 PR66 PCGS. CAC.** A blend of pale aqua, gold, sunset-orange, and pink patina graces the carefully preserved surfaces of this needle-sharp proof nickel. With a mintage of 3,575 pieces, the 1881 ranks as one of the more available Shield nickel proofs, though the issue's association with a low-mintage circulation-strike issue elevates its value. (#3836)

LIBERTY NICKELS

1884 Liberty Nickel, MS66 Highly Lustrous and Fully Struck

- 3330 1884 MS66 PCGS.** The nearly brilliant surfaces show just the slightest tinge of golden patina when closely examined, and the strike is full throughout including the left ear of corn. It would be difficult to better this coin for type purposes, especially among the early dates in the Liberty nickel series. Population: 20 in 66 (2 in 66+), 0 finer (4/12). (#3845)
- 3331 1887 MS65 NGC.** Pastel mauve, green, and yellow hues grace most of the obverse, while the reverse is toned vivid orange, pale green, and light olive. Well-defined with just a few trivial surface flaws. Census: 75 in 65, 17 finer (4/12). (#3848)
- 3332 1893 MS65 PCGS.** Light gold and peach overtones spread across much of this Gem Liberty nickel. The interior details are solid, though the obverse stars and lower wreath are soft. Population: 77 in 65 (1 in 65+), 15 finer (4/12). (#3854)
- 3333 1894 MS65 NGC.** Green-gold and orange at the margins with the silver-blue at the reverse interior deeper than that of the obverse. Decently struck overall but with weakness on isolated stars and the lower wreath. Census: 58 in 65, 23 finer (4/12). (#3855)
- 3334 1907 MS66 PCGS Secure.** A highly lustrous Premium Gem, this 1907 nickel has brilliant light gray surfaces with splashes of delicate gold toning that is slightly deeper on the reverse. Population: 27 in 66 (2 in 66+), 0 finer (4/12). (#3868)

1912-S Nickel, MS64+ The Only S-Mint Liberty Nickel

- 3335 1912-S MS64+ PCGS. CAC.** A single tick on Liberty's cheek is the only mentionable mark on this near-Gem 1912-S Liberty nickel. The strike and luster are both typical of the issue, with satiny gray surfaces that host champagne on the obverse and peripheral gold on the reverse. (#3875)

**1912-S Liberty Nickel, MS64+
Popular Series Key**

- 3336 1912-S MS64+ PCGS. CAC.** Except for the clandestine 1913 issue, the Liberty Head design was retired after 1912, and the San Francisco Mint delivered a memorably low mintage of just 238,000 nickels in this final year. This high-end Choice example is well-detailed and lustrous, with attractive accents of gold and lavender toning. (#3875)

**1912-S Liberty Nickel, MS65+
Final-Year Low-Mintage Issue**

- 3337 1912-S MS65+ NGC.** A high-end Gem specimen from the last year of the Liberty Head design, this spectacular example displays vibrant mint luster and sharply detailed design elements on the obverse, with just a touch of softness on the wreath on the reverse. From a mintage of just 238,000 pieces. Census: 93 in 65+, 6 finer (4/12). (#3875)

PROOF LIBERTY NICKELS

- 3338 1886 PR65 NGC.** Light gold, blue, and lavender elements mingle on this low-contrast but high-mirror Gem proof. Great eye appeal for an issue in better demand due to the low mintage of the corresponding business strike. (#3884)
- 3339 1888 PR66 Cameo NGC.** Brightly mirrored with appreciable, if not stark contrast between fields and devices. Even after several years of the major grading services recognizing the cameo designation, precious few 1888 Nickels have been certified as such. Census: 2 in 66 Cameo, 1 finer (4/12). (#83886)
- 3340 1890 PR65 Cameo PCGS. CAC.** This lovely Gem Cameo proof has brilliant light gray surfaces with fully and deeply mirrored fields framing the sharply defined devices. Population: 25 in 65 (2 in 65+) Cameo, 6 finer (4/12). (#83888)
- 3341 1891 PR66 Cameo NGC.** Completely untuned and deeply reflective in the fields with frost-white devices. Several lintmarks are noted in the left obverse field but do not affect the technical grade. Census: 27 in 66 Cameo, 3 finer (4/12). (#83889)

**1891 Liberty Nickel, PR67+ ★ Cameo
Just Two Finer Specimens at NGC**

- 3342 1891 PR67+ ★ Cameo NGC.** Of the 2,350 proof Liberty nickels struck in 1891, only a few survivors can match the quality and visual appeal of this exquisite Superb Gem. The reflective fields contrast boldly with the sharply detailed frosty devices and the surfaces are enhanced by shades of pale green and lavender-gray patina. Census: 3 in 67+ ★ Cameo, 2 finer (4/12). (#83889)

- 3343 1893 PR66 Cameo NGC.** Boldly detailed and flashy with distinct interior contrast and only a hint of cartwheel in the luster. Pale peripheral glimpses of golden patina accent faintly nickel-blue interiors. A few small flaws and contacts appear within the reverse wreath. Census: 32 in 66 (1 in 66+) Cameo, 7 finer (4/12). (#83891)
- 3344 1897 PR66 PCGS. CAC.** Both sides remain flashy through green-gold, pink, and silver-blue patina. This well-defined Premium Gem has a single noteworthy flyspeck at the bottom of the wreath. Population: 55 in 66, 21 finer (4/12). (#3895)
- 3345 1897 PR67 Cameo NGC.** Sharply struck with elegant contrast between the lemon-kissed moderate mirrors and the subtly frosted devices. Impressive visual appeal and preservation for this mid-series issue. Census: 7 in 67 Cameo, 4 finer (4/12). (#83895)
- 3346 1898 PR65 PCGS.** Light blue and violet patina overall with a peach core on the obverse. This flashy Gem proof has a sharp strike. The holder shows light scratches, particularly over the reverse, that should not be interpreted as damage on the coin. (#3896)

**1901 Liberty Nickel, PR68 ★
Tied for Finest Certified**

- 3347 1901 PR68 ★ NGC.** This flashy proof striking has almost no contrast between the fields and devices, as one would expect from this date. The surfaces sparkle with intense reflectivity and die polish, and there are almost no post-striking impairments present on this lovely coin. This proof presents as a brilliant coin, but close examination shows it actually has a pale overlay of ice-blue toning with a dash of golden at the bottom of the reverse. Census: 2 in 68 (2 in 68 ★), 0 finer (4/12).
Ex: Long Beach Signature (Heritage, 9/2003), lot 6072. (#3899)
- 3348 1909 PR67 NGC.** Fully struck and pristine with variegated pastel toning on both sides. Lilac color near the centers yields to gold and green patina closer to the peripheries. A highly attractive and exquisitely preserved Superb Gem proof. Just 4,763 were minted. Census: 80 in 67, 6 finer (4/12). (#3907)

**1910 Liberty Nickel, PR67 Cameo
Only Two Finer Coins at PCGS**

- 3349 1910 PR67 Cameo PCGS. CAC.** From a mintage of 2,405 pieces, this magnificent Superb Gem proof Liberty Head nickel has few peers among the surviving population. The design elements are sharply detailed and frosty, contrasting with the pristine fields that show a combination of satiny mint luster and mirrored reflectivity. Population: 11 in 67 Cameo, 2 finer (4/12). (#83908)
-

BUFFALO NICKELS

- 3350 1913 Type One MS67 PCGS.** A softly struck but beautiful example struck from heavily eroded and thus frosted dies. Bold yellow and lighter lavender elements enrich the obverse, while the reverse shows the former color almost exclusively. PCGS has graded just 12 pieces as MS68 or better (4/12). (#3915)
- 3351 1913 Type One MS67 PCGS.** Fantastic rainbow toning dominates the eye appeal of this Superb Gem type coin. Bold magenta and yellow hues form the leading edge that shades into the blue-to-violet toning covering much of each side. PCGS has graded just 12 examples as MS68 or better (4/12). (#3915)
- 3352 1913-S Type Two MS64 NGC.** The radiant mint luster is covered with light powder-blue toning. Not quite fully struck, but remarkably clean for the grade. (#3923)
-

**1914/3 Nickel, Near-Mint Example
Early Die State**

- 3353 1914/3 AU58 PCGS. FS-101.** This near-Mint example offers strong evidence to those who still doubt that this is a legitimate overdate. The remains of the underdigit 3 can easily be seen to the left and right of the top of the 4, and the angle of the downstroke of the 3 is also sharply defined. Even reddish-golden toning covers each side and significant amounts of mint luster remain as well. Population: 18 in 58, 32 finer (4/12). (#93924)
-

- 3354 1914-D MS65 PCGS Secure.** Delicate violet, gold, and blue toning appears on both sides of this frosty Gem, with fully underlying luster and exceptional eye appeal. PCGS has certified 45 finer (4/12). (#3925)

- 3355 1915-S MS64 PCGS. CAC.** It is easy to see why this coin received CAC endorsement. The surfaces are strongly suggestive of an even higher grade, the strike is as complete as one is likely find on an early Buffalo nickel, and each side displays bright, satiny mint luster over the matte-like finish. (#3929)
-

**1916 Buffalo Nickel, Fine Details
Rare Double Die Obverse**

- 3356 1916 Doubled Die Obverse — Corrosion — NGC Details. Fine. FS-401.** The 1916 Doubled Die Obverse Buffalo nickel is a rare variety and collectors avidly pursue examples in all grades and conditions. The obverse die is doubled to the southeast, with the doubling most prominent on the date. Even on worn specimens, like the present coin, the undertype 6 is easily seen. (#3931)
-

**1918-D Buffalo Nickel, MS66
Only One Certified Finer**

- 3357 1918-D MS66 PCGS.** A stunning Premium Gem, this 1918-D nickel is destined for the finest Registry set. Both sides have brilliant satin luster beneath pastel gold toning, with light gray at the centers. The strike is bold and the surfaces are pristine. Population: 22 in 66, 1 finer (4/12). (#3938)
-

- 3358 1918/7-D Good 4 PCGS. FS-101.** A revered coin for many collectors, the overdate remains clear on this well-worn example. An even gray patina covers the coin, with a small planchet lamination at 4 o'clock helping to pedigree this piece. (#3939)

- 3359 1918/7-D Good 6 NGC. FS-101.** This piece exhibits an even golden-gray patina. A perennial favorite for many collectors, this coin offers the perfect opportunity to acquire a pleasing, low-grade example. (#3939)

- 3360 1918/7-D VG8 PCGS. FS-101.** The crossbar and downstroke of the all-important underdigit 7 is obvious from their thickness within the 8. All four date digits are present, and the stone-gray surfaces are unabraded and only minutely granular. One small retained lamination above the lips.
Ex: Fort Worth Signature (Heritage, 3/2010), lot 491, which realized \$1,380. (#3939)

- 3361 1918/7-D — Whizzed — ANACS. VF20 Details. FS-101.** The impaired surfaces of this piece have numerous challenges, including old scratches that are reminiscent of lamination, along with simulated luster, and other issues. (#3939)

Rare XF 1918/7-D Nickel

- 3362** 1918/7-D XF40 PCGS. CAC. FS-101. The upper right corner of the 7 is obvious, as is the thickness of the crossbar and downstroke. Presumably, the same mint worker was also responsible for the 1918/7-S quarter, also caused when a working die was made from working hubs with two different dates. The present key date nickel has dove-gray toning and an absence of visible marks. (#3939)

**Lightly Worn AU53 1918/7-D Nickel
The Overdate Classic**

- 3363** 1918/7-D AU53 NGC. FS-101. The 1918/7-D nickel is the result of a dual-hub error, in which two working hubs (raised surface) with differing final digits were mixed up between annealings or work-hardening of a single working die (incuse surface). This is the source of the overdates from the early to middle 20th century. the same phenomenon was also responsible for the 1960 Large Date over Small Date and Small Date over Large Date cents.

Modern technology precludes such occurrences, but it was developed far too late to stop this Denver overdate. Both sides of the AU53 representative offered here are sharply detailed, aside from the worn and slightly weak high points. Both sides are richly toned gunmetal-gray with aspects of violet and gold, and soft luster filters through. A noteworthy coin in all respects. (#3939)

-
- 3364** 1918-S MS61 NGC. Wartime strike exhibits some weakness at the centers of this James Earle Fraser design. Surfaces show somewhat subdued luster as sometimes seen but the overall appeal is undeniable. Census: 29 in 61 (4/12). (#3940)

**Gem 1918-S Nickel
Conditionally Scarce Early Issue**

- 3365** 1918-S MS65 PCGS. CAC. The 1918-S nickel is a rarity in Gem condition, and PCGS has certified just one numerically finer example (4/12). To make this coin's Registry-worthy status all the more impressive, it is housed in a green label holder (which also bears a richly deserved CAC sticker). Toning appears mainly at the borders, where gold and apricot hues extend slightly into the fields, while the interiors are mainly pale gray with perhaps a hint of blue. Decently if not fully struck and a great representative of a San Francisco issue that is seldom found so fine. (#3940)

**1920-S Nickel, MS64+
Above Average Strike**

- 3366 1920-S MS64+ PCGS. CAC.** This amazing near-Gem exhibits an above average strike, with a bold date and complete LIBERTY, although the tops of some letters are a trifle weak. The bison's hind leg is positioned opposite LIBERTY, and is flat but fully outlined. Faint splashes of gold toning are noted on each side. PCGS has only certified 18 finer (4/12). (#3946)

**Gem 1920-S Buffalo Nickel
Only One Finer Coin at NGC**

- 3367 1920-S MS65 NGC.** The 1920-S is a well-known strike rarity in the series. Striking definition generally varies from "weak" to "adequate." It is rarely located with the detailing seen on this piece. The strike on the bison's head is almost complete, as is the tail. Strong detailing is also seen on the Indian's braid on the obverse. The surfaces have bright, satiny mint luster that greatly enlivens the patina. The centers are pale lilac and rose with deeper iridescence around the margins. We see no abrasions that are worthy of mention on this lovely example. Similar examples have traded in the \$14,000 to \$17,000 range over the past two years. Census: 14 in 65, 1 finer (4/12). (#3946)

- 3368 1921-S XF45 PCGS. CAC.** Sage and mustard-gold shadings drape this Choice XF representative of the challenging 1921-S issue. Softness of strike and wear have flattened the bison's shoulder, though the horn is complete save for the tip. (#3948)
- 3369 1921-S AU58 PCGS.** Green-gold and sage shadings shift across each other on this near-Mint representative. Better-defined than often seen for a Roaring Twenties mintmarked issue with just a touch of rub on still-luminous surfaces. (#3948)
- 3370 1921-S AU58 PCGS. CAC.** Bronze and lavender-violet overtones prevail on this modestly rubbed S-mint Buffalo nickel. Luminous surfaces are largely mark-free, and the eye appeal is strong. (#3948)
- 3371 1923-S MS64 PCGS.** In some ways, this Choice Mint State nickel is typical for its issue. Both sides exhibit significant die wear and a soft strike, as well as the subtle luster that characterizes so many branch mint issues of the 1920s. Yet the pale rose, gray, and gold patina of this piece allows its eye appeal to overcome such flaws. (#3950)
- 3372 1923-S MS64 NGC. CAC.** A bold strike and exceptional eye appeal are evident on this Choice Mint State piece. Both sides are delicately toned over satin luster, the obverse primarily powder-blue, the reverse light gold. (#3950)

**1925-D Nickel, MS66
Lustrous and Contact-Free**

- 3373 1925-D MS66 PCGS.** The 1925-D Buffalo nickel is a conditional rarity, one seldom seen in the top states of preservation and an issue that is decidedly difficult to find with a sharp strike, much less a full one. The present Premium Gem 1925-D is in remarkably good shape, showing no mentionable signs of contact even under a loupe. Radiant luster also increases the eye appeal, with lovely tinges of pink and gold more prominent on the reverse. The strike, however — or, more accurately, the state of the dies that produced the strike — is no more than adequate. Even though there is a full horn, for example, it is just barely so, and discernible softness appears on the high points: the braid and cheek on the obverse, the bison's shoulder on the reverse. Metal flowlines appear around the reverse at the extreme margins. Population: 7 in 66, 0 finer (4/12). (#3955)

**Near-Gem 1925-S Nickel
Above-Average Strike, Good Color and Luster**

- 3374 1925-S MS64 PCGS. CAC.** The strike is above-average for the issue on this near-Gem 1925-S, even though each side still shows some softness. The digits in the date are full, however, as is the bison's horn, and there are no mentionable marks amid good luster and attractive pinkish-gold color. PCGS has seen 23 submissions finer of this conditional and strike rarity — all but one of them in MS65 (4/12). (#3956)

**Rare Gem 1925-S Nickel
Only Two Finer Coins at NGC**

- 3375 1925-S MS65 NGC.** From a substantial mintage of more than 6.2 million pieces, the 1925-S Buffalo nickel was not heavily saved by contemporary collectors. In addition, the issue was not produced to a high standard of quality and is known for weak strikes and subpar luster. As a result, the 1925-S is rare in Gem condition and virtually unobtainable any finer.

This attractive Gem shows a little of the typical softness on the Indian's hair and the bison's shoulder, but the strike is much sharper than usually seen, with a well-formed mintmark. Strong mint luster is evident beneath attractive shades of champagne-gold and ice-blue toning and eye appeal is exceptional. Census: 21 in 65, 2 finer (4/12). (#3956)

Premium Gem 1925-S Buffalo Nickel
None Certified Finer

- 3376 1925-S MS66 NGC.** Dave Bowers shares this insight about the 1925-S issue in *A Guide Book of Buffalo and Jefferson Nickels*: "It is possible to buy a gorgeous Mint State 1925-S nickel with rich luster and superb eye appeal, but you will be on your own." He also notes:

"The 1925-S nickel is complex, especially in Mint State, because certified examples are identified only as MS64, MS65, and so on. In reality, a few are simply miserable strikes, with flatness of certain date numerals and the lettering at the bottom of the reverse. Others are weak in the usual places—the center of both sides and on the bison's fur. Still others masquerading as 'Mint State' are dull, cleaned coins that have been doctored by adding toning."

Although the strike of this piece is typical, with soft obverse details and bold reverse details, the aesthetic appeal is higher than normal, due to the frosted nickel-gray surfaces that exhibit pale champagne toning. This piece ranks as one of the finest examples known, with only one other Premium Gem certified at NGC and one at PCGS, and there are none finer (4/12).

Ex: ANA Signature (Heritage, 7-8/2008), lot 1578; Long Beach Signature (Heritage, 6/2010), lot 417, where it realized an amazing \$100,000. (#3956)

Elusive 1926-S Nickel, MS64
Seldom Seen Finer

- 3377 1926-S MS64 PCGS.** As the only regular-issue Buffalo nickel to have a sub-1 million-coin mintage, the 1926-S is remarkably popular regardless of condition, but especially in better circulated grades and Mint State. The 1926-S remains available for a price into the Select level, but MS64 coins are conditionally scarce; Gems are rare. This luminous near-Gem has pale blue, lavender, and yellow tints over quicksilver fields and softly struck, minimally marked devices. A medium-sized fleck is noted at the rim, due south of the portrait's chin, one of the few distinguishing features. PCGS has certified 11 numerically finer examples (4/12).
Ex: New York Signature (Heritage, 3/2012), lot 3199. (#3959)
-

Iridescent-Toned 1927-S Buffalo Nickel, MS64+

- 3378 1927-S MS64+ NGC. CAC.** Attractive iridescent toning in shades of saffron, jade, and fire-red graces each side of this near-Gem Buffalo nickel. This piece shows a decent strike, and only a sprinkling of light marks precludes an even finer grade. NGC has graded 17 examples as MS65 or better (4/12). (#3962)
-

- 3379** 1929-D MS66+ PCGS. CAC. Green-gold and blue tints give this high-end Denver nickel great eye appeal. Strongly swirling luster and an above-average reverse strike also are key. Population: 47 in 66 (1 in 66+), 1 finer (4/12). (#3967)
- 3380** 1930-S MS66 PCGS. CAC. Though softly struck in the centers, this Premium Gem has great eye appeal, thanks to great quicksilver luster under light blue-to-green patina. A carefully preserved example. (#3970)

MS68 1937-D Buffalo Nickel
Amazing Concentric Toning

- 3381** 1937-D MS68 NGC. The regular-issue 1937-D Buffalo nickel is an issue that will never be rare, but it does bask in the reflected glow from its illustrious variety sibling, the 1937-D Three-Legged Buffalo. It is also, for some reason, an issue that occasionally appears with stunning patina and remarkably well-preserved surfaces, as is the case with this MS68 NGC example. (the same is true of the 1938-D Buffalo issue that followed it; both were heavily hoarded in roll quantities due to the impending issue of the 1938 Jefferson nickels, and it is likely that Mint State rolls survive to this day.) This amazing coin boasts concentric rings of lavender in the center, radiating outward to saffron, sunset-orange, magenta, and emerald at the rims, with a similar color palette on both sides. Well-struck surfaces are free of all but trivial marks. Census: 2 in 68 (1 in 68 ★), 0 finer (4/12). (#3981)
-

- 3382** 1937-D Three-Legged AU55 PCGS. FS-901. A collector favorite almost from the time it was released, the Three-Legged 1937-D nickel is arguably the most popular die state variety of all time. This still-luminous piece is lightly worn under rich gold-orange and gray patina. (#3982)
- 3383** 1937-D Three-Legged — Cleaned — ANACS. AU55 Details. FS-901. Light to medium golden-tan patina embraces this satiny and momentarily circulated key date nickel. The cleaning is hardly noticeable, but we note a single hair-thin mark on the bison's flank. (#3982)
- 3384** 1937-D Three-Legged AU58 NGC. FS-901. Gunmetal-gray and almond-gold enrich this satiny near-Mint key date nickel. Minimally abraded and attractive with an area of lavender toning near E PLURIBUS UNUM. (#3982)

1937-D Three-Legged Buffalo Nickel
Select Mint State

- 3385** 1937-D Three-Legged MS63 PCGS. CAC. FS-901. The existence of more Mint State 1937-D Three-Legged Buffalo nickels than in earlier times is easily explainable due to its popularity, which caused the many surviving rolls of 1937-Ds to be scoured for examples. This Select piece shows glints of pink and gold over surfaces that are still largely gray, with excellent eye appeal and few marks. (#3982)
-

1937-D Three-Legged Buffalo Nickel Sparkling Gem Example

3386 1937-D Three-Legged MS65 PCGS Secure. FS-901. David Lange makes some comments in *The Complete Guide to Buffalo Nickels* concerning the 1936-D 3-1/2 Legged Buffalo variety that could equally well apply to the 1937-D Three-Legged:

“I have mixed feelings about the popularity of varieties that result from later states of a die that originally was normal. Under this heading fall other popular issues such as the 1922 ‘No D’ cent and the many ‘two-feather’ Buffalo Nickels. While certainly collectable as novelties, I believe that too much value is placed on their significance with respect to the minting process. Obviously, from the prices quoted here, mine is a minority opinion, and this issue is very high on the want lists of series specialists and variety collectors in general. Upon gaining acceptance into the online certified registries maintained by NGC and PCGS, this demand only grows.”

This is a fairly astonishing statement, although to his credit Lange admits to his view being a “minority” one. The absence of certain features on an otherwise-normal coin—the D on a Lincoln cent issue known to have been made only in Denver, the foreleg of a bison—is part of the *essential appeal*, the interesting *wrongness*, of many similar errors that also include the several Two Feathers Buffalo nickel varieties.

Although the reverse is rightly studied intently on the 1937-D Three-Legged nickel, both sides have numerous interesting die markers that reward further study—the stream of raised dots between the bison’s legs has inspired numerous crude epithets, but the mangy tail, a missing portion of the bison’s beard, and several obverse die markers all contribute further to a high interest factor.

This Gem is sure to appeal to the ambitious Buffalo nickel collector. Ample frosty luster graces the surfaces, which are pale nickel-gray where not lightly toned peach and pink. Decidedly above-average definition and preservation combine for uncommon eye appeal. PCGS has graded just six numerically finer examples (4/12).

Ex: ANA Signature (Heritage, 8/2010), lot 3057. (#3982)

1937-D Buffalo Nickel, MS65 Famous Three-Legged Variety

3387 1937-D Three-Legged MS65 PCGS Secure. CAC. FS-901. The result of a die-polishing error, the 1937-D Three-Legged Buffalo nickel is one of the most famous coins of the 20th century, and the issue is avidly pursued by collectors in all grades and conditions. Although the popular Three-Legged Buffalo's name derives from the missing front left (facing) leg, curiously, the hoof on that leg is still present. Despite the many bogus examples present in the marketplace — this is one variety that should always be purchased certified, never raw — there are many other die diagnostics on each side that characterize examples of the genuine variety. We have enumerated those die diagnostics many times before and will not repeat them here. But to seasoned collectors, the issue has a special “look” in any case that no doctored-up 1937-D nickel with removed leg can emulate.

The dies on both sides were in a rather advanced state of erosion, giving the overall level of detail a somewhat weatherbeaten appearance and leaving many fine die markers throughout both side. Of course, it is well-known that the Three-Legged variety was created through the overzealous lapping of the reverse die, which had clashed with the obverse. The die preparation resulted in the removal of the bison's foreleg.

The advanced die state also left the die showing some slight microporosity that tends to produce rather diffuse luster on Three-Leggers, even those in the high Mint State grades. Although some have better luster than others, we do not recall ever seeing a Three-Legged Buffalo with the kind of blazing luster sometimes found, for example, on a high-grade 1938-D Buffalo.

The inclusion of this variety in PCGS Registry Sets for both Complete Varieties and Major Varieties has greatly increased the already significant demand for high-grade specimens in recent years. This delightful Gem features well-detailed design elements and satiny mint luster, with a few hints of pale gold and ice-blue toning. Eye appeal is outstanding. Population: 51 in 65 (1 in 65+), 6 finer (4/12). (#3982)

1938-D/S Buffalo Nickel, MS68
None Certified in Higher Numeric Grades

- 3388 1938-D/S MS68 NGC. FS-511.** There are several overmintmarked dies, but this is the most significant among them, since the S mintmark can be seen both above and within the D mintmark, which is repunched at the base. This is the variety photographed on page 134 of the 2013 *Guide Book*. The present coin, however, is even more noteworthy for its remarkable toning. Both sides are bathed in vivid lemon-gold, fire-red, lilac, and gunmetal shades. The lustrous surfaces are virtually immaculate, and the strike is good with only slight blending on selected peripheral elements such as the curve of the tail. The present coin was the first 1938-D/S to be graded MS68 by NGC, although over the past ten years it has been joined by five others, with 1 graded MS68 ★ (4/12).
Ex: Robert Moreno Collection (Bowers and Merena, 4/2005), lot 376, which realized \$11,213. (#3985)

PROOF BUFFALO NICKELS

1913 Buffalo Nickel, PR67 ★
Short-Lived Type One Design

- 3389 1913 Type One PR67 ★ NGC.** Powder-gray and plum-red central shades are framed by brighter lemon-gold and cherry-red tints. A well-struck rendition of this ephemeral type, struck for only a portion of 1913. Apparently, the Mint wanted to protect the denomination from wear, although less regard was given to the date, which was also a design highpoint. NGC has certified just five proof Type One 1913 Buffalo nickels with a Star designation, one at the PR66, and two at the PR67 and PR68 levels (4/12).
From The Leonard Raines Collection. (#3988)

1913 Type Two Buffalo Nickel, PR67
Gleaming Satin Mirror Surfaces

- 3390 1913 Type Two PR67 NGC.** This glowing pinkish-gold, satiny example of the first-year Type Two design is virtually pristine and shows none but the most trivial signs of contact. It will certainly appeal to collectors of proof coinage and seekers of first-year-of-type specialists. NGC has certified only five numerically finer examples (3/11).
From The Leonard Raines Collection. (#3990)

1914 Buffalo Nickel, PR66

- 3391 1914 PR66 PCGS. CAC.** The satin surfaces and bold strike with full definition point to the proof status of this lovely Premium Gem. Both sides have full brilliance shining through vivid gold toning with traces of bluish-violet accents on each side. PCGS has certified 80 finer examples (4/12). (#3991)

**1914 Buffalo Nickel, PR67 ★
Popular Matte Proof Issue**

- 3392 1914 PR67 ★ NGC.** This Superb Gem proof is among the finest and most attractive matte proof nickels we have seen. Fully struck with satiny gray luster and accents of wispy gold and lilac toning that are more vibrant on the reverse. Census: 5 in 67 ★, none finer with a Star designation (6/10).
Ex: Central States Signature (Heritage, 5/2007), lot 1670. From The Leonard Raines Collection. (#3991)

**PR68 1915 Nickel
Superlative Color and Eye Appeal**

- 3393 1915 PR68 NGC.** This is a spectacular Superb Gem example of the next-to-last Buffalo nickel proof issue, struck in the quantity of 1,050 coins. It is a certainty, despite the mintage figure, that few survive in as pristine a state of preservation or with such remarkable eye appeal. The surfaces are contact-free and boast a razor-sharp strike, as expected. More importantly, the center obverse displays remarkable ice-blue patina that complements golden-brown rim accents. The reverse offers similar colors but somewhat more evenly intermingled. A few minor flecks appear below the bison's head but fail to detract from this marvelously attractive coin. Census: 3 in 68, 1 finer (4/12).
From The Leonard Raines Collection. (#3992)

**Premium Gem Proof 1916 Buffalo Nickel
Last Matte Proof Issue**

- 3394 1916 PR66 NGC.** Only 600 matte proof Buffalo nickels were struck in 1916, making the issue scarce-to-rare in all grades. The present coin is a delightful Premium Gem, fully struck, with satiny mint luster and attractive gold and ice-blue patina. Eye appeal is extraordinary. Census: 51 in 66, 19 finer (4/12).
From The Leonard Raines Collection. (#3993)

- 3395 1936 Type One—Satin Finish PR66 NGC. CAC.** Incredible design definition is the rule for these Satin Finish proof coins. This Premium Gem has pristine nickel-gray surfaces with splashes of gold toning. (#3994)
- 3396 1936 Type One—Satin Finish PR66 PCGS. CAC.** The satin surfaces are virtually defect-free and carbon-free. Just the slightest tinge of pale golden-rose toning is seen over each side. Premium quality. (#3994)
- 3397 1936 Type One—Satin Finish PR67 PCGS. CAC.** The satin surfaces are remarkably bright and radiant. Each side displays slight golden patina and there are no noticeable contact marks. (#3994)

**1936 Type One Nickel, PR68
Satin Finish Proof**

- 3398 1936 Type One—Satin Finish PR68 NGC.** A brilliant Superb Gem that has the precise strike and dazzling satin luster consistent with its specimen status. Inspection beneath a strong lens is unable to locate any imperfections. Proof Buffalo nickels were struck for only a select number of years, with 1936 as the only date with a satin finish. Census: 24 in 68, 0 finer (4/12). (#3994)

**1936 Type One Nickel, PR68
Satin Finish Proof**

- 3399 1936 Type One—Satin Finish PR68 NGC.** A phenomenal example of this popular issue in Superb proof condition. The entire coin is draped in delicate pastel blue and fiery orange-gold. The reflective fields are pristine and show virtually no sign of contact, and the strike is perfectly in order as expected for a proof. Struck in the Satin finish, with slight texturing in the fields which gives the entire coin more of an even appearance, as opposed to the boldly mirror fields contrasting heavily with the devices as seen on other proofs. An exciting and impressive coin for the specialist who demands one of the absolute finest to survive. Census: 24 in 68, 0 finer (4/12). (#3994)

**1936 Buffalo Nickel, PR68 ★
Satin Finish Proof**

- 3400 1936 Type One—Satin Finish PR68 ★ NGC.** The Mint resumed its program of annual proof set offerings in 1936, and a mintage of 4,420 Buffalo nickels was achieved. The first coins produced (called Type One examples) featured a satin finish, like the present coin, while later issues (Type Two) were all brilliant. This example is fully struck, with spectacular golden-brown, ice-blue, and violet toning. Census: 2 in 68 ★, 0 finer (4/12).
From The Leonard Raines Collection. (#3994)

**1936 Buffalo Nickel, PR68
Satin Finish, Only One Finer Coin at PCGS**

- 3401 1936 Type One—Satin Finish PR68 PCGS. CAC.** The Type One or Satin Finish pieces of 1936 were the first widely distributed proof Buffalo nickels in two decades. Unfortunately, contemporary collectors still preferred the brilliant finish proofs, and complaints caused the Mint to switch to that style later in the year. Present-day collectors appreciate the quality of the Satin finish examples, which are harder to locate than their Type Two counterparts. This richly toned piece ranks among the finest survivors. Exquisitely detailed devices emerge from shining, satiny fields. Pale ice-blue patina graces the centers, while deeper gold and peach shadings prevail near the rims. Virtually flawless and undeniably appealing. PCGS has graded only one finer example (4/12). (#3994)

- 3402 1936 Type Two—Brilliant Finish PR64 NGC. CAC.** Brilliant throughout, the surfaces are dazzling and the fields deeply reflective. A few tiny flecks of carbon can be found when the coin is closely examined. (#3995)

- 3403 1936 Type Two—Brilliant Finish PR66 PCGS. CAC.** The depth of mirroring in the fields is not necessarily the focus on this coin. Rather the primary focal point is the lovely pale rose toning in the centers and peripheral powder-blue color. Each side looks to be carbon-free. (#3995)

**1936 Type Two Buffalo Nickel, PR67 ★
Only 15 Finer at NGC**

- 3404 1936 Type Two — Brilliant Finish PR67 ★ NGC.** Unbroken deep mirrors gleam over both sides of this Superb Gem specimen, whose exceptional eye appeal NGC recognized with the coveted Star designation. Hints of delicate canary-yellow and sky-blue enrich the peripheries for additional visual distinction. The finest Star-designated example. Census: 4 in 67 ★ (1 in 67+), 15 numerically finer (4/12).
Ex: Central States Signature (Heritage, 4/2011), which realized \$4,887.50.
From The Leonard Raines Collection. (#3995)

**1936 Buffalo Nickel, PR67
Brilliant Mirrored Finish**

- 3405 1936 Type Two—Brilliant Finish PR67 PCGS. CAC.** This is an awesome piece with razor-sharp striking details, highly reflective fields, and seemingly pristine surfaces. Lange notes that this is the most readily available proof Buffalo nickel, despite a mintage of 4,420 coins which he refers to as minuscule by the standards of recent decades. Housed in a green-label PCGS holder. (#3995)

- 3406 1937 PR65 NGC.** A strongly reflective example of the last proof Buffalo nickel issue, toned pale gold overall with slightly deeper color on the reverse. Great all-around appeal. (#3996)

Immaculate PR66 1937 Nickel

- 3407 1937 PR66 NGC. CAC Gold Label.** The seldom-seen Gold CAC seal indicates that firm believes the coin exceeds its designated grade. Housed in an older generation holder. This high grade proof nickel has light honey-gold toning and a pristine carbon-free appearance. The strike is crisp despite slight incompleteness on the hair above the braid. (#3996)

- 3408 1937 PR67 NGC.** Exactingly struck, minimally toned, and profoundly gleaming. The reverse of this Superb Gem proof even shows a suggestion of contrast. NGC has graded 38 examples as PR68 or better (4/12). (#3996)

- 3409 1937 PR67 NGC. CAC.** Deeply mirrored fields transform this immaculate Superb Gem proof 1937 Buffalo nickel into a possible centerpiece for some landmark collection. One of only 5,769 pieces struck in the second year of renewed proof coinage. NGC has seen only 42 submissions in 68, including four in 68 ★ (4/12). (#3996)

- 3410 1937 PR67 NGC. CAC.** This essentially untoned Superb Gem proof Buffalo exhibits the razor-sharp definition hoped for in a quality proof strike. Both sides exhibit satisfying contrast of devices and mirror fields. The preservation and eye appeal are top-notch. This was the final year of the proof Buffalo coinage with 5,769 struck, although 1938-D business strikes were made. NGC has certified only 38 finer coins (4/12).
Ex: Long Beach Signature (Heritage, 5/2008), lot 1361. (#3996)

**1937 Buffalo Nickel, PR68
None Finer at NGC**

- 3411 1937 PR68 NGC.** The Buffalo design was retired after 1937 and type collectors find a nice proof example of this date extremely attractive. The mintage was only 5,769 pieces, but the 1937 is still the most available Buffalo nickel in proof format. This magnificent PR68 example is fully struck, with deeply mirrored fields and no mentionable distractions. Census: 38 in 68, 0 finer (4/12).
From The Leonard Raines Collection. (#3996)

**1937 Nickel, PR68
None Finer at NGC**

- 3412 1937 PR68 NGC.** Brilliant nickel-gray surfaces combined satin devices with deeply mirrored fields. Exceptional eye appeal is the result, with a hint of cameo contrast on each side. This amazing Superb Gem proof is destined for an advanced type set or Buffalo nickel collection. Census: 38 in 68, 0 finer (4/12). (#3996)

**1937 Nickel, PR68
Tied for Finest at NGC**

- 3413 1937 PR68 NGC.** Brilliant proof Buffalo nickels were only coined in 1936 and 1937, with surviving Superb Gems enjoying substantial demand today. Few can equal this amazing piece. Both sides are free of carbon, with vivid gold and iridescent toning over the deeply mirrored fields and boldly detailed devices. Census: 38 in 68, 0 finer (4/12). (#3996)

JEFFERSON NICKELS

- 3414 1938-D MS67 Full Steps PCGS.** Chestnut-gold with glimpses of lilac on both sides. Beautifully void of marks, and a popular low mintage issue that is rarely seen with a sharp strike. Population: 33 in 67 Full Steps, 0 finer (4/12). (#84001)
- 3415 1939 Reverse of 1940 MS67 Full Steps PCGS.** The 'straight steps' Reverse of 1940. This Superb Gem shows glints of ice-blue and gold with a bold strike and near-impeccable preservation, save for a slanting mark near the center of Monticello. Population: 27 in 67 Full Steps, 0 finer (4/12). (#894003)

Gem D Over Horizontal D 1942-D Nickel Among Finest Certified

- 3416 1942-D D Over Horizontal D MS65 PCGS. FS-501.** Light almond-gold toning visits this lustrous and nearly pristine Gem. The strike is full except on the steps. The D over Horizontal D variety is surprisingly rare, and if the Jefferson nickel series ever approaches the popularity of the Lincoln cent, there will not be enough quality Uncirculated examples to go around. Population: 7 in 65, 0 finer (4/12). (#4015)

1957-D Nickel, MS66+ Full Steps The Finest PCGS Certified

- 3417 1957-D MS66+ Full Steps PCGS.** A satin Premium Gem, this piece is boldly defined with lovely gold, blue, and lavender toning on each side. The strike is bold with five and a half steps visible on the reverse. A stunning example and the only Plus designated MS66 Full Steps piece that PCGS has certified. Population: 9 in 66 (1 in 66+) Full Steps, 0 finer (4/12). (#84062)

EARLY HALF DIMES

1792 Half Disme, VF25 Historic First Year of the Denomination

3418 1792 Half Disme, Judd-7, Pollock-7, R.4, VF25 PCGS.

Deep dove-gray toning consistently drapes both sides of this desirable early Federal silver issue. A thin, curved scratch is present from the N in INDUSTRY to the underside of Liberty's jaw. A significantly lesser thin mark crosses the cheek, and a small dig affects the top of the forehead and causes a slight wave to the piece. Much of the eagle is softly struck, but relatively sharp definition on the tail feathers and the left (facing) wing affirms that the piece has avoided heavy circulation wear. Liberty's hair near the ear is blunt, although the curls at the top of the head and above the shoulders retain splendid inner detail. The peripheral legends are generally sharp.

The 1792 half dime is the best known among the several experimental pieces of various denominations dated that year. These were not struck at the first Philadelphia Mint, since that facility did not open until 1793. They are believed to have been struck in cellar of sawmaker John Harper. The engraver was possibly John Birch, since the 1792 cent that bears his name has an effigy similar to that seen on the half dime. Henry Voigt and Joseph Wright are also engraver candidates. Legend states that the portrait is none other than Martha Washington, but there is no such contemporary evidence. We do know that the issue is associated with then Secretary of State Thomas Jefferson. Jefferson recorded in his logbook that he took delivered 75 dollars of silver bullion to "the Mint" and two days later received "1,500 half dismes of the new coinage." Tradition has it that these pieces came from President Washington's silver, and were dispersed by Washington himself. There is little doubt that the issue was referred to by Washington in his November 6 address to Congress, when he mentioned the "small beginning in the coinage of half-dimes."

Ex: Dallas Signature (Heritage, 7/2006), lot 526. (#11020)

- 3419** 1794 — Damaged, Bent — ANACS. VF20 Details. V-4, LM-4, R.4. A late die state with numerous heavy cracks on the upper reverse. This medium gray early half dime has a pair of deep marks on the reverse margin that likely account for the slightly wavy surfaces. (#4250)

**1794 V-4, LM-4 Half Dime, MS63
Struck in 1795**

- 3420** 1794 MS63 NGC. V-4, LM-4, R.4. The last of four 1794 die varieties that were all struck in 1795. The first recorded delivery of half dimes, following the 1792 half dimes, was dated March 30, 1795, indicating that 7,756 coins were actually minted just a few days earlier. Five additional deliveries that year were recorded from June 12 through November 26. It is impossible to know exactly how many of those coins were dated 1794 and how many were dated 1795. Also unknown is whether any 1795 half dimes were struck in 1796.

Today's survival of Flowing Hair half dimes consists of about 25% 1794 and 75% 1795. Applying that survival to the total 1795 mintage suggests that slightly more than 20,000 1794 half dimes were produced, or almost exactly the 20,856 coin total of the March 30 and June 12 deliveries.

The obverse, used only for this variety, has a crack from Star 10 to Liberty's nose and ear, along with other die defects. The reverse, used for the third and final time, has delicate die cracks, including one through the D and wreath, to the left (facing) wing and eagle's breast. A lovely Select Mint State piece, this half dime is mostly gold toned with splashes of light blue. Census: 12 in 63, 26 finer (4/12). (#4250)

- 3421** 1795 Good 6 PCGS. V-8, LM-7, R.6. This rare variety half dime exhibits rich gray toning and lacks consequential marks. Peripheral elements are generally bold with the exception of star 5 to 8 and the tops of RICA. (#4251)

**1795 Half Dime, XF40
Rare V-2, LM-3 Variety**

- 3422** 1795 XF40 NGC. V-2, LM-3, R.5. Star 1 joins the tip of curl 2; the reverse shows two inner berries with a single berry below the eagle's left wing. A vertical die crack bisects Liberty's head. This reverse shows denticles at the left extended into straight lines that overlap ITED of UNITED. The devices stand out from the gray-gold field toning on this well-struck example of the Flowing Hair coinage. From The JG Collection, Part Two. (#4251)

**1795 Half Dime, AU58, V-9, LM-5, R.6
Finest We Have Ever Offered**

- 3423** 1795 AU58 NGC. V-9, LM-5, R.6. Six curls appear at the rear of Liberty's hair, and star 15 nearly touches the bust. On the reverse, there are two inner and one outer berry under the eagle's left (facing) wing. Our Permanent Auction Archives, which date back to 1993, reveal five prior sales (including the present example) of the very rare V-9, LM-5 die marriage in Heritage auctions. An XF40 NGC coin brought \$4,887.50 in 2005, an XF45 NGC coin brought \$5,175 in 2007, and this piece in its last appearance brought \$7,762.50. The surfaces are lightly toned, pearl-white aside from minor rose-gold toning near the rims. Luster fills the hair and wings, and no marks are consequential. An important opportunity for the early die variety specialist. Ex: ANA Signature (Heritage, 3/2011), lot 3299. (#4251)

**Rare 13 Stars 1797 Half Dime
V-1, LM-4, XF40**

- 3424** 1797 13 Stars XF40 PCGS. V-1, LM-4, R.5. A rare variety that is seldom seen in any grade and offered even less frequently, the V-1 or LM-4 is the sole use of the 1797 13 Stars obverse and forms its own *Guide Book* variety, ratcheting up collector demand for examples in all grades. The obverse of this quality XF40 representative is especially well-defined, though the center of the eagle's breast and left (facing) wing are a touch soft on the reverse. The high points of each side are silver-gray with russet toning surrounding the devices and within the recesses, the russet edged in gold. (#4260)

**1797 V-2, LM-1 Half Dime, XF45
15 Stars Obverse**

- 3425** 1797 15 Stars XF45 NGC. V-2, LM-1, R.3. Most students of the early half dimes believe that the 1797 coins with 15 obverse stars were the first half dimes mintage in that year. The 16 stars coins were next, and the 13 stars pieces were last, after Mint officials realized they could no longer add more stars for each state. This pleasing light gray example has modest wear, with minor surface marks on each side, as expected for the grade. Minimal dark verdigris adheres to the obverse and reverse surfaces. (#4258)

- 3426** 1800 Fine 15 NGC. V-1, LM-1, R.3. Deep russet-brown toning blankets this scarce Heraldic Eagle type coin. The rims exhibit marks at 6 o'clock on the obverse and 12 o'clock on the reverse, and the strike shows the usual softness on the reverse stars opposite the bust tip.
From The JG Collection, Part Two. (#4264)

**1800 V-1, LM-1 Half Dime, MS63+
LIBERTY Obverse**

- 3427** 1800 MS63+ PCGS. V-1, LM-1, R.3. The obverse die has a normally formed R in LIBERTY on this Select Mint State specimen. Three obverse dies, one with a broken R, and two reverse dies were used to coin four varieties of 1800 half dimes. V-1 and V-2 are available in all grades including Mint State, while V-3 and V-4 are rare in any grade, with less than a dozen known of each.
Both sides of this specimen exhibit satin mint luster with a few trivial hairlines and other minor marks. The obverse is vivid gold with splashes of sky-blue toning, while the reverse is light gray with delicate iridescent overtones. A splendid specimen representing the first year of issue for the Heraldic Eagle design on half dimes. Population: 19 in 63 (3 in 63+), 18 finer (4/12). (#4264)

1800 V-2, LM-3 Half Dime, AU50
LIBEKTY Obverse

- 3428 1800 LIBEKTY AU50 NGC. V-2, LM-3, R.4.** The four varieties of 1800 include two LIBEKTY varieties and two other LIBEKTY varieties. Each type includes one common variety and one rare variety. A late die state, this piece has a small rim break left of the date. This delightful light gray specimen has considerable luster with splashes of light gold and pale blue toning on each side. Census: 3 in 50, 19 finer (4/12). (#4265)

- 3429 1801 — Scratches — NGC Details. VF. V-1, LM-2, R.4.** Two parallel pinscratches cross Liberty's cheek and cleavage. Toned deep charcoal-gray and golden-brown. Struck a few degrees off center toward 9 o'clock with soft definition on the left-side margins, which lack the protection of a rim.
From The JG Collection, Part Two.(#4267)

BUST HALF DIMES

- 3430 1831 MS65 NGC. V-1, LM-6, R.1.** Beautifully patinated with "rainbow" shades of plum-red, cobalt-blue, and orange-gold. The obverse has slightly more dramatic shades than the reverse, which has an untoned center. Crisply impressed and flashy with exceptional eye appeal.(#4278)

Pristine MS66+ 1833 Half Dime
V-7, LM-1

- 3431 1833 MS66+ PCGS. CAC. V-7, LM-1, R.3.** This fully struck Premium Gem displays exemplary luster and lovely peripheral dappled golden-russet and forest-green patina. The open fields and devices are pearl-gray. A pristine and beautiful Capped Bust type coin. Population: 18 in 66 (1 in 66+), 8 finer (4/12). (#4280)

1835 V-4, LM-7 Half Dime, MS66
High Condition Census

- 3432 1835 Large Date, Large 5C MS66 PCGS. CAC. V-4, LM-7, R.3.** The authors of the *Federal Half Dimes* note that high grade examples of this die pair are difficult to locate and cite the appearance of an MS65 specimen in a 1990 auction as one of the finer pieces known to them. This Premium Gem, fully brilliant with frosty silver luster and virtually no evidence of toning, is certainly a condition census specimen, and may be the finest known. (#4282)

SEATED HALF DIMES

- 3433 1838 Large Stars, No Drapery MS66 NGC.** Rose, violet-blue, and sea-green shadings mingle on this frosty Premium Gem. An impressively preserved early half dime that was struck from a late die state showing erosion and clash marks. Census: 47 in 66, 20 finer (4/12).(#4317)
- 3434 1853 Arrows MS65 PCGS.** This sharply struck example shows the die clashing that is so commonly seen on such a well-struck example. Steel-gray covers both sides of the coin while luster shines through.(#4356)
- 3435 1855-O Arrows MS64 NGC.** Gold-orange patina liberally splashed with cerulean and midnight-blue is this near-Gem's greatest asset. The warm luster of the obverse gains a flashy element under the reverse toning. Census: 14 in 64, 27 finer (4/12).(#4361)
- 3436 1856 MS65 NGC.** Few border details are visible on either side, with partial dentilation at the lower reverse. This frosty and brilliant Gem has full silver luster with splashes of pale gold toning. Census: 61 in 65, 46 finer (4/12).(#4363)
- 3437 1857 MS66 PCGS. CAC.** Frosty with blue-gray and green-gold hues on the obverse, the latter color prevailing on the reverse. A carefully preserved half dime, bluntly struck at the margins but decently detailed on the interiors. Population: 19 in 66 (1 in 66+), 3 finer (4/12).(#4365)
- 3438 1858 MS66 PCGS. CAC.** Concentric bands of green-gold, orange-rose, and blue converge on reasonably large centers. Lively luster swirls under the patina on this captivating Premium Gem. Population: 44 in 66 (2 in 66+), 12 finer (4/12).(#4367)

**Superb Gem 1858 Half Dime
Multicolor Patina, Unmarked Surfaces**

3439 1858 MS67 NGC. The large mintage of 3.5 million pieces resulted in marvelous high-grade survivors such as this Superb Gem, an unmarked piece with variegated rose, gold, and aqua patina over reflective surfaces. Minor recutting appears on the 1 and last 8 in the date. A well-struck and delightful type coin. Census: 21 in 67, 3 finer (4/12). (#4367)

3440 1859 MS65 PCGS. CAC. Each of the hollow-point stars are boldly detailed on this splendid Gem. The upper left branch of the wreath is poorly defined. Frosty luster is visible beneath silver-gray patina with splashes of iridescent toning. Population: 20 in 65, 38 finer (4/12). (#4371)

3441 1860 MS67 NGC. The obverse shifts starkly from bronze at bottom left to silver-pink elsewhere, while the reverse has a mix of green-gold, orange, and silver-blue shadings. A quality Superb Gem with subtly frosted luster. Census: 23 in 67, 5 finer (4/12). (#4377)

3442 1862 MS66 NGC. Produced early in the Civil War, this brilliant Premium Gem half dime exhibits heavy clash marks on both sides. The surfaces are fully lustrous and satiny with no evidence of toning. Census: 41 in 66, 23 finer (4/12). (#4381)

3443 1871 MS66 NGC. Both sides of this high-end half dime are distinctly toned. The reverse has broad waves of blue and violet-silver, while the reverse has an upper gold-orange arc and lustrous light gray below it. Census: 17 in 66, 3 finer (4/12). (#4398)

3444 1872-S Mintmark Below Bow MS66 PCGS. CAC. Delicately toned with a mix of green-gold, silver-blue, and lavender elements. Decently detailed for its time and an attractive Premium Gem. Population: 50 in 66 (2 in 66+), 7 finer (4/12). (#4401)

3445 1873 MS65 NGC. This Gem represents the final year of coinage for the half dime, this example showing brilliant mint frost beneath dark iridescent toning on each side. The upper left portion of the wreath is flat, with all other details showing strong definition. Census: 18 in 65 (1 in 65+), 7 finer (4/12). (#4404)

PROOF SEATED HALF DIMES

**1858 Half Dime, PR65 Cameo
Seldom Finer**

3446 1858 PR65 Cameo NGC. The Philadelphia Mint marketed proof coins to collectors for the first time in 1858. The mintage is unknown, although usually estimated at 200 to 300 coins. Survivors are rare, and seldom equal this piece. Both sides are deeply iridescent with fully mirrored fields and obvious cameo contrast. Census: 2 in 65 Cameo, 2 finer (4/12). (#84437)

3447 1859 PR63 PCGS. A heavily but attractively toned example of this scarce one-year type with hollow-centered stars and slightly reworked figure of Liberty. Sharply struck and free of noticeable planchet defects with a pleasing reverse and an obverse that has just a couple of small contact marks. (#4438)

**PR65+ Cameo 1859 Half Dime
Single-Year Design Subtype**

3448 1859 PR65+ Cameo PCGS. CAC. The 1859 half dime is a one-year subtype that features hollow-centered stars on the obverse and a modified figure of Liberty. The "transitional" 1860 and 1861 half dimes use the same obverse design but pair it with a cereal wreath reverse. This hairline-free Gem proof has delicate gold patina, an unbroken wire rim on each side, and a razor-sharp strike. The few minuscule lintmarks are strictly of mint origin. (#84438)

**1861 Half Dime, PR65 Cameo
Richly Toned Original Surfaces**

3449 1861 PR65 Cameo PCGS. CAC. Attractive original toning includes silver-white centers, radiating outward through amber-gold and steel-blue near the rims. Considerable field-device contrast is present, and only insignificant marks can be found even under magnification. A couple of lintmarks appear in the exergue. A splendid example of this scarce issue of 400 proofs. Population: 5 in 65 Cameo, 1 finer (4/12).

Ex: Central States Signature (Heritage, 4/2010), lot 492, which brought \$4,887.50. (#84444)

3450 1862 PR65 PCGS. The 1862 is a scarce issue with only 550 proofs minted. This is a pleasing example with deeply mirrored fields and each side draped in golden-rose and occasional glints of blue. Fully struck, as expected. Population: 25 in 65, 16 finer (4/12). (#4445)

3451 1863 PR65 NGC. CAC. The centers of this Gem proof offer iridescent blue and deep lilac, radiating outward to lemon-yellow and copper-orange in a brilliant sunset display. Richly toned yet strongly mirrored, a great survivor from an issue of just 460 pieces. Census: 21 in 65, 19 finer (4/12). (#4446)

3452 1866 PR65 PCGS. Green-gold and blue patina is dappled over each side of this Gem proof, though the reverse concentrates the latter color in the center. Excellent reflectivity through the toning. Population: 20 in 65, 11 finer (4/12). (#4449)

3453 1869 PR65 NGC. Richly toned on both sides over strong reflectivity. The green-gold and cerulean shadings are dappled on the obverse but better-sorted on the reverse. Census: 36 in 65, 24 finer (4/12). (#4452)

**Silver-White, Blatantly Contrasted
1869 Half Dime, PR67 Cameo**

3454 1869 PR67 Cameo NGC. The 1869 half dime had a reported proof mintage of 600 coins, and this piece is a miraculous survivor of that small production, totally silver-white and blatantly contrasted. Only under a loupe do a few small, straight contact marks appear, not in the least distracting. Census: 5 in 67 Cameo, 1 finer (4/12). (#84452)

**1871 Half Dime, PR66+ Cameo
Beautiful Peripheral Iridescence**

3455 1871 PR66+ Cameo PCGS. CAC. With a mintage of 960 proofs, it would seem that the 1871 half dime would be relatively available. However, it is less frequently seen than expected because many unsold proofs were melted in July 1873. This is a wonderful piece that has brilliant centers on each side that are surrounded by multicolored iridescence at the margins. The fields show a high degree of die polish and project strong mirroring. Population: 8 in 66 (3 in 66+) Cameo, 2 finer (4/12). (#84454)

**Elusive 1873 Half Dime, PR66 Cameo
Brilliant Silver-White Surfaces**

3456 1873 PR66 Cameo NGC. The survival of the 1873 half dime proofs is certainly far smaller than the 600 reportedly struck, as many were melted later in that same year. This brilliant silver-white piece is well-contrasted but displays a few tiny contact marks only under a loupe that preclude an even finer grade. All proofs struck were of the Closed 3 type. Census: 6 in 66 Cameo, 2 finer (4/12). (#84456)

EARLY DIMES

3457 1796 — Mount Removed — NGC Details. Fine. JR-2, R.4. A granular and slightly bright slate-gray example of the desirable introductory two-year Small Eagle type. Subtle evidence of a repair is noted near 9 o'clock on each side. (#4461)

**XF Details 1796 Dime
Very Scarce JR-3 Marriage**

3458 1796 — Mount Removed, Improperly Cleaned — NCS. XF Details. JR-3, R.5. Tooled mounts are prominent at 5 and 7 o'clock on the reverse. The cream-gray surfaces are faintly hairlined and slightly cloudy. Nonetheless a well defined example of this important first-year issue. A better die variety, tied for second place with JR-5 behind the presently unique JR-7. (#4461)

1796 JR-6 Draped Bust Dime, MS64
Reflective, Sharply Struck Surfaces
Superlative Technical and Aesthetic Quality

3459 1796 MS64 NGC. U.S. dime coinage began in 1796, while half dime coinage commenced in 1794. The first circulating dime design, which this piece represents, is a Draped Bust (1796-1807), 15 Star obverse type, combined with the Small Eagle reverse, which would last only through 1797.

The present JR-6 dime, certified at the near-Gem level by NGC, is a variety easily identified by the wide LIBERTY on the obverse, Obverse 5 in the John Reich Collectors Society dime book and the only one that shows no letters touching in LIBERTY. This obverse has been called the “Hyphenated Date” for the long die crack running horizontally through the 1 and 7 in the date, quite heavy on this piece. In later die states, as here, a second vertical crack progresses from the rim upward through the ball of the 9 and the left side of its loop to the bust, ending at the lower drapery folds. Another runs left from the 1 into the field near star 1. Three cracks emanate from star 4 to the rear of Liberty’s hair, and yet another from star 8 to the hair. A curious small depression in the left field near those numerous die cracks at star 4 may be either some anomaly that was in the die, or a bulge in the planchet itself; it is difficult to determine the source.

The reverse shows a leaf tip under the left side of the second T in STATES, and leaves touch the first A, the R, and the I, all in AMERICA. The reverse die state is late as well, with the most prominent crack running from the upper eagle’s breast through the left (facing) wing, the upper left wreath, to the rim between S and T in STATES. Other small die cracks appear.

This piece is interesting due to the advanced die states observed, but it is also quite lovely from an aesthetic viewpoint, with much prooflike reflectivity throughout the fields on both sides. The John Reich book comments that early strikes are prooflike; perhaps the dies could have been repolished at some point (or used more than once). Moderate patina is deeper on the obverse, a mix of blue, green, and pink at the center, while the reverse shows more pinkish-gold at the center. A small planchet indent appears on the reverse between the left stem and lowest leaf, and a couple of other minor contact marks are in keeping with the grade.

The strike is quite meticulous, bringing up a wealth of detail on Liberty’s hair, the star centrils, the eagle’s breast (even in the often-weak center), and the denticles as well. It is difficult to say if this piece was intended as a presentation strike or not, but the reflective surfaces display marvelous quality in any case.

The last JR-6 in this grade that we offered, an MS64 PCGS example, traded hands at \$69,000 (Long Beach Signature, Heritage, 2/2012, lot 3304). (#4461)

3460 1802 Fair 2 PCGS. JR-2, R.5. A dove-gray example of this rare Heraldic Eagle date. Three-quarters of the date is sharp, though only the IB in LIBERTY is clear. The bust is mostly outlined. The reverse appears Good except for the lower right quadrant, which is well worn. (#4472)

3461 1805 4 Berries VF35 NGC. JR-2, R.2. Iridescent ocean-blue, lavender, and stone-gray toning embraces this nicely defined Choice VF early silver type coin. Abrasions are nearly absent, though the strike is a bit soft on the eagle's shield, which also exhibits light mint-made roller marks. (#4477)

BUST DIMES

3462 1820 Medium 0 AU58 NGC. JR-6, R.3. Apple-green peripheries encompass chestnut-gold and slate centers. This momentarily circulated representative offers ample luster and is devoid of visible abrasions.

From The JG Collection, Part Two. (#4492)

3463 1822 Good 4 NGC. JR-1, R.4. The sole die pair for the year and very scarce in any grade. This piece is well worn with a degree of reverse rim merging, but the date and devices are clearly outlined. The sides show a blend of slate-blue, gold-gray, and lilac patina.
Ex: FUN Signature (Heritage, 1/2010), lot 676, which realized \$1,443.25. (#4497)

1825 JR-1 Dime, MS65+ Possibly the Finest JR-1 Dime

3464 1825 MS65+ NGC. JR-1, R.4. The A in STATES is boldly doubled to the left on this reverse that is shared with JR-3. The left edge of the curl is over the center of the 5 on JR-1, and over the right side of the 2 on JR-3. The emission sequence for 1825 dimes appears to be JR-1, JR-2, JR-3, JR-1 (again), JR-4, and JR-5. The early die state of this piece suggests that it was part of the first group of 1825 dimes coined early in the year.

This impressive Gem is one of about a dozen similar examples for all 1825 dime varieties combined. The border details are indistinct, but the central design motifs are bold. Both sides have frosty luster beneath lovely gold and iridescent toning. Census: 8 in 65 (1 in 65+), 2 finer (4/12), for all 1825 varieties. (#4503)

Lightly Toned MS64 1827 Dime, JR-6

3465 1827 MS64 NGC. JR-6, R.2. A repunched second T in STATES attributes this nearly pristine Capped Bust dime. Lustrous with lightly toned centers and speckled sea-green margins. A hair-thin mint-made retained lamination across the upper reverse adds interest. The upper half of the eagle and the curls near the shoulder are lightly brought up. (#4504)

3466 1830 Medium 10C MS62 NGC. JR-3, R.3. A lavender-brown and gunmetal-blue dime with lighter dove-gray toning near the profile. Only a few small marks are visible beneath a loupe. (#4516)

3467 1830 Medium 10C MS62 NGC. JR-3, R.3. A mildly prooflike Capped Bust dime with almond-gold and stone-gray toning. Crisply struck and attractive with a smooth reverse and a few wispy marks above the date and near star 11. (#4516)

1830 JR-3 Dime, MS64 Medium 10C

3468 1830 Medium 10C MS64 PCGS. CAC. JR-3, R.3. This scarce variety is typically found in higher circulated grades, while a few Mint State pieces survive, including this Choice specimen that is likely a condition census candidate. Both sides are deeply toned in original golden-brown with splashes of iridescence. Population: 27 in 64, 19 finer (4/12), for all 1830 varieties. (#4516)

3469 1834 Small 4 MS63 NGC. JR-7, R.2. The sole Small 4 variety, better recognized by its long crossbar. This satiny representative has medium lilac-gray and straw-gold toning. Precisely struck with a smooth appearance. (#4525)

Toned Near-Gem 1834 Dime Large 4, JR-1

3470 1834 Large 4 MS64 NGC. JR-1, R.1. This fully struck and satiny Choice dime displays richly blended golden-brown and stone-gray toning that deepens at the borders. Virtually pristine aside from a few nearly imperceptible hairlines near the bust tip. For all 1834 varieties combined, the NGC Census is: 47 in 64, 29 finer (4/12). (#4526)

SEATED DIMES

3471 1838 Large Stars MS65 NGC. A richly toned Gem with bronze and light gray patina, the former dominating the obverse and the latter more prominent on the reverse. More luminous than blazing, though a well-defined and attractive coin. Census: 49 in 65, 38 finer (4/12). (#4568)

3472 1838 Large Stars MS66 NGC. Sea-green and blue hues are prominent on each side of this Large Stars Premium Gem, though the obverse adds gold and silver in a "wedge" down from the top. Amazing eye appeal for this early Seated dime issue. Census: 28 in 66, 10 finer (4/12). (#4568)

1839 Dime, Nicely Toned MS65+ Fortin-106a

3473 1839 No Drapery MS65+ NGC. Fortin-106a, R.3. Various interesting die cracks, including a vertical crack across Liberty's head, lack the attribution. This satiny early Seated dime is generally toned light golden-gray but displays lilac, cobalt-blue, and sea-green near the rims. Precisely struck and unabraded with a hint of lavender patina on Liberty's thigh and the ME in DIME. (#4571)

Stunningly Toned, Precisely Struck 1839 No Drapery Dime, MS67

3474 1839 No Drapery MS67 NGC. It is difficult to imagine a more attractive example of the 1839 No Drapery dime than the present toned Superb Gem, one of 12 such at NGC with eight finer (4/12). Deep gold-ochre patina prevails on each side, deepening to amber in some areas and complementing glints of blue and lilac near the rims. The surfaces show a pebbled appearance, probably from dies long in use, but the strike is impeccable even if some softness appears at the denticles, likely the byproduct of die erosion as well. (#4571)

3475 1840 No Drapery MS64 PCGS. The drapery from Liberty's elbow was polished away on this variant. Deep blue and violet outer toning yields to gray at the central obverse and rose on the inner reverse. Population: 13 in 64, 12 finer (4/12). (#4573)

3476 1841 MS64 PCGS. CAC. Lighter green and deeper blue hues crash into each other on this near-Gem with swirling luster. Occasional rose-gold accents add to the appeal. Population: 16 in 64, 8 finer (4/12). (#4579)

**Small O Transitional Reverse 1841-O Dime
Key New Orleans Variety, FS-901**

- 3477 1841-O Transitional Reverse, Small O PCGS Secure Genuine. Fortin-102, FS-901, R.7.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned. The slate-gray surfaces are subdued but well defined and smooth save for a brief scratch on the reverse near 4 o'clock.

The Open Bud reverse was introduced in 1841, making the Closed Bud reverse obsolete. Nearly all 1841-O dimes have the Open Bud reverse, but leftover dies were used at New Orleans in 1841, since surviving Closed Bud examples exist. They are rare, yet have two mintmark style varieties, a Small O and Large O. The Large O is very rare yet more available than the Small O variety, which is extremely rare.

- 3478 1843-O — Cleaned — ANACS. XF45 Details.** The fields and devices are slate-white while the margins display deeper tan-gray toning. Mildly glossy from cleaning. A scant 150,000 pieces were struck, a great reduction from the production of the '41-O and '42-O, which each exceeded 2 million pieces. (#4584)

**Gem 1845 Seated Dime, Fortin-103
Triple-Punched 5, Repunched 4**

- 3479 1845 MS65 NGC. Fortin-103.** Triple-punched 5, repunched 4, die crack rim to R in AMERICA. Die chips are visible around stars 3 through 6. The Fortin-103 variety is one of the Gerry Fortin Top 100 die pairings. Mottled sky-blue and pinkish toning on each side gives this Gem business strike even more character and eye appeal. A few tiny, scattered marks are consistent with the grade on this needle-sharp piece. We note that the Gerry Fortin coin depicted on www.SeatedDimeVarieties.com is an AU58 PCGS example. This piece is clearly finer. For the date, Census: 9 in 65, 7 finer (4/12). (#4586)

**1846 Seated Dime, AU53
Lowest-Mintage Stars Obverse Issue**

- 3480 1846 AU53 NGC.** Despite all the promotion that the 1844 dime received, the 1846 is the lowest-mintage Stars Obverse issue at 31,300 pieces, and the average certified survivor is apt to grade only VF25-30 or so. (The half dime of the same year is also the lowest-mintage issue of the type.) This AU53 example is silver-white, with a good strike and only a few stray contact marks. Census: 2 in 53, 2 finer (4/12).

Ex: Long Beach Signature (Heritage, 9/2010), lot 3631; FUN Signature (Heritage, 1/2011), lot 3296; Central States Signature (Heritage, 4/2011), lot 3280. (#4588)

- 3481 1853 Arrows MS65 NGC.** Blue, violet, and apricot-gold toning enriches each side. The last color appears in a small window at the bottom right on the obverse but has a wide half-moon wedge on the upper reverse. (#4603)

- 3482 1856 Small Date MS65 NGC.** Gold-to-green and blue patina is more opaque on the obverse. The reverse offers most of the luster-play, subtle but sparkling. An attractive Small Date Gem. Census: 19 in 65, 8 finer (4/12). (#4609)

- 3483 1857 MS65 PCGS. CAC.** Silver-frost interiors have rich patina around, loose rainbow arcs around the obverse with an orderly progression of blue, indigo, and reddish-gold on the reverse. An eye-appealing type coin for the Stars on Obverse Seated dime. Population: 17 in 65, 2 finer (4/12). (#4614)

**1859 Stars Obverse Dime, MS66
Last of the Design**

- 3484 1859 MS66 PCGS. CAC.** Fully original and highly attractive pewter-gray surfaces host splashes of blue and pale gold on this frosty Premium Gem. The strike is soft in places, perhaps preventing a higher grade. This amazing coin will capture the attention of all who view it. Population: 18 in 66 (2 in 66+), 15 finer (4/12). (#4619)

- 3485 1860-O VG10 NGC.** An attractive example of this challenging antebellum issue, mintage 40,000 pieces. Varying grays, deepest at the margins and lightest at the worn high points, lend a sense of contrast. All letters of LIBERTY are readable, though the Y is weak. Census: 1 in 10, 33 finer (4/12). (#4632)

**Midgrade 1860-O Seated Dime, VF30
Last O-Mint Dime Before the Civil War**

- 3486 1860-O VF30 NGC.** The present cataloger remembers studying a *Guide Book* perhaps 40 years ago and remarking how noteworthy the 1860-O dime was: last O-mint dime before the Civil War, a low-mintage issue of 40,000 coins, the first year of the Legend Obverse type, an issue clearly in demand even in Good condition. Today the 1860-O is just as noteworthy. This VF30 example displays deep gold-gray patina with the expected moderate wear but no marks that require special mention. A nice coin for a midgrade Seated dime set. (#4632)

Unabraded Medium-Gray 1860-O Dime, VF30

- 3487 1860-O VF30 PCGS. CAC.** The medium-gray surfaces display the expected moderate wear on this VF30 piece, but there are no singular marks, unusual for a midgrade circulated example. The low mintage of 40,000 coins for the 1860-O dime has made it a memorable issue for a long time, as has its status as the last O-mint pre-Civil War dime. (#4632)

**Silver-Gray XF 1860-O Dime
Mintage 40,000 Coins**

- 3488 1860-O XF40 PCGS.** The Legend Obverse dimes were the prevailing design from 1860 to 1873 and again from 1875 until the Seated design concluded in 1891, but the low-mintage 1860-O, at 40,000 coins, was the only O-mint issue of the subtype before the Civil War in 1861 ended coinage at New Orleans until 1879, making silver dollars, eagles, and double eagles. Then in the last year of the Seated dime series in 1891, New Orleans again struck dimes, making the Legend Obverse O-mint Seated dime series a two-coin set. This XF example is silver-gray with the moderate wear expected but few marks; some buildup appears around some of the peripheries, especially the lower left reverse. Population: 7 in 40, 10 finer (4/12). (#4632)

- 3489 1861 MS65 NGC.** Light bluish-gray patina blankets the surfaces of this well-detailed Seated Liberty dime, from the first year of the Civil War. Only a few minor signs of contact are evident. Census: 21 in 65, 12 finer (4/12). (#4633)

**Rare 1863 Seated Dime, MS63
Fortin: High R.5 in Mint State**

- 3490 1863 MS63 PCGS.** The 1863 Seated dime issue is difficult and rare in Mint State, Gerry Fortin rating it at High R.5, or 31-45 surviving. This Select coin displays deep olive, aqua, and pinkish patina over surfaces that show a good strike (save for the bowknot). A small contact mark appears between the two E's on the reverse. Population: 8 in 63, 14 finer (4/12). (#4637)

- 3491 1864 MS62 PCGS.** Deep forest-green and lighter green-gold shadings outline the rims and central devices. Light gold-to-gray patina graces diffusely reflective fields. Fewer deep abrasions than expected for this issue of just 11,000 business strikes. Population: 5 in 62, 24 finer (4/12). (#4639)

- 3492 1866 MS62 PCGS.** Silver-gray at base, a color that prevails through the centers, with gold, wine, and blue-violet outer hues. The obverse luster is faintly reflective, that of the reverse frosty. Population: 7 in 62, 25 finer (4/12). (#4643)

- 3493 1867-S AU58 PCGS.** Luster is strong on both sides, semireflective on the obverse and swirling on the reverse. Light blue and gold accents visit pale gray surfaces that show the slightest rub. Population: 4 in 58, 10 finer (4/12). (#4646)

**1873 FS-2101 Arrows Dime
Doubled Die Obverse**

- 3494 1873 Arrows Genuine PCGS. FS-2101.** Doubled Die Obverse. Prominent doubling is visible on the shield of this impressive and rare variety. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been cleaned with light corrosion. Both sides have pewter-gray surfaces with hints of gold, and with additional emerald-green on the reverse. (#4665)

**1873-CC Arrows Seated Dime, VG8
Challenging Key Date**

- 3495 1873-CC Arrows VG8 NGC.** Only 18,791 dimes were struck in Carson City in 1873, making this one of the premier absolute and condition rarities in the series. More than that, the 1873-CC and 1874-CC are often found cleaned and/or impaired. Heavy wear is seen over the devices on each side of this piece, and each side is toned in shades of dove-gray in the fields with lighter silver devices. Census: 4 in 8, 28 finer (4/12). (#4666)

**1874-CC Arrows Dime, Fine 12
Sought-After Key Date**

- 3496 1874-CC Arrows Fine 12 NGC.** Discounting the uncollectible 1873-CC No Arrows issue, the 1874-CC Arrows Seated Liberty dime is the uncontested key to the series. According to Mint records, only 10,817 pieces were struck, all from the same dies. The issue is scarce-to-rare in any grade, and many examples are seen with surface problems. The arrows at the date, a short-lived two-year design feature, were indicative of a weight change instituted the previous year.

The present coin is an evenly worn Fine 12 specimen that retains all major design elements in outline and a significant amount of interior detail. The light gray surfaces are problem-free, with no large abrasions or rim bruises. Census: 2 in 12, 7 finer (4/12). (#4669)

-
- 3497 1875 MS65 PCGS. CAC.** Green-to-gold toning over the obverse with a shift toward blue in the reverse patina. This luminous Gem is well-struck overall, if softly defined on Liberty's head, and pleasing overall. Population: 38 in 65, 29 finer (4/12). (#4672)

**Stunning 1876-S Dime, MS66
Centennial San Francisco Issue**

- 3498 1876-S MS66 PCGS. CAC.** Type One Reverse. This stunning Centennial S-mint dime issue is a fitting celebration of the San Francisco Mint as well, displaying pink, gold, and aqua patina on each side with generous luster. There is no apparent post-strike contact, although a small staple-shaped strikethrough occurs at the right corner of the bowknot. Tiny die cracks appear around the date. The mintmark is an elongated rectangle. (#4681)

**1878-CC Dime, Premium Gem
Lightly Toned Condition Rarity**

- 3499 1878-CC MS66 PCGS. CAC.** This wonderfully preserved Carson City dime displays semireflective fields bathed in pale silver with a dusting of palest green-gold at the margins. Here is an excellent example of the final dime coinage of this historic Western branch mint. This is Breen's Type 1, showing the E in ONE nearly touching the wreath. Both Liberty and the reverse wreath are sharply defined and enriched by abundant mint frost. This coin is a condition rarity, ranking as one of the finest survivors of the 200,000 pieces struck. After this date, Carson City production was focused on silver dollars, notably the newly adopted Morgan pieces and some gold coinage, to the exclusion of silver minor coins. Population: 3 in 66, 1 finer (4/12). (#4686)

- 3500 1879 MS66 PCGS. CAC.** Flashy luster is largely silver-white but has splashes of green-gold along parts of the rims. A well-defined Premium Gem that is housed in a green label holder. Population: 52 in 66 (3 in 66+), 23 finer (4/12). (#4687)
- 3501 1880 MS65 PCGS. CAC.** An attractive Gem Seated dime from a mintage of just 36,000 pieces. The well-detailed design elements complement reflective surfaces that show hints of gold and amber toning. Population: 24 in 65, 33 finer (4/12). (#4688)
- 3502 1881 MS65 PCGS.** Both sides have frosty silver centers. The obverse has stark blue-green outlines at the periphery, while the reverse has a dappled partial rainbow of the cool colors at the margins. Population: 8 in 65 (1 in 65+), 6 finer (4/12). (#4689)
- 3503 1884 MS66 NGC.** A frosty and brilliant Premium Gem with full luster beneath light gold toning and deeper iridescence near the borders. A common date that is seldom encountered so fine. Census: 37 in 66 (1 in 66+), 26 finer (4/12). (#4692)
- 3504 1885 MS66 PCGS. CAC.** Dappled green-gold, pink-rose, and blue hues mingle on this attractive Premium Gem. Type collectors who favor toning will find plenty to love with this lot. Population: 24 in 66 (1 in 66+), 9 finer (4/12). (#4694)
- 3505 1891-O MS65 NGC.** Frosty silver with gold-orange elements on the periphery. This final-year New Orleans Seated dime has localized striking weakness but broad eye appeal. Census: 26 in 65, 8 finer (4/12). (#4707)

PROOF SEATED DIMES

No Stars Superb Gem Proof 1837 Dime One of 30 Specimens Struck

3506 1837 No Stars PR67 NGC. Greer-102. Shortly after William Kneass began the project of redesigning the Capped Bust coinage, he suffered a debilitating stroke. Christian Gobrecht carried on for him and finished the redesign based on sketches by Kneass and artists Thomas Sully and Titian Peale. For presentation purposes, 30 proof dimes of the new design were struck on June 30, 1837. All legitimate 1837 proofs are of the Large Date variety. They all also show a diagnostic die scratch on the reverse from the rim above the first T in STATES, as well as a faint die scratch through the ES and O in STATES OF.

The No Stars design has a simple beauty unlike almost any other U.S. coin; thanks to the uncluttered fields, the obverse has the appearance of a medal. As beautiful as the No Stars dime is as a business strike, in proof format it is truly stunning. The fields on this Superb Gem proof are deeply mirrored and the devices have flawlessly sharp definition. Virtually flawless surfaces are gold, orange, and rose overall with areas of deep blue dotting the lower reverse and a silvery patch between Liberty's head and the cap. Contrast is minor, but overall eye appeal is high.

The certified populations in lower grades are all but useless due to resubmissions, but the extreme condition rarity of this issue at the Superb Gem level is obvious. The current NGC *Census Report* lists only one PR67 example with none finer (4/12), though an additional NGC coin so certified appears in Goldberg's, 9/2007, lot 2585.

Ex: Long Beach (Heritage, 5/2003), lot 5764. (#4718)

**Rare Choice Proof 1856 Dime
Small Date Obverse**

- 3507 1856 Small Date PR64 NGC.** The obverse is die doubled directly south with the doubling plainest among the lower skirt details and at LIBERTY and the shield. Fully struck and flashy with rich apricot-gold toning. The mintage of the proof 1856 is unknown but unquestionably very low. Third party populations have been skewed by repeated submissions; the present lot comes with nine inserts from prior encapsulations. (#4745)
- 3508 1863 PR65 NGC.** The obverse of this coin is delicately toned, while the reverse exhibits gold-gray and cobalt-blue toning. A well-struck Civil War-era proof. Census: 17 in 65, 29 finer (4/12). (#4756)
- 3509 1864 PR65 NGC.** This brilliant Gem has moderately reflective fields and the devices show significant mint frost. A trouble-free type coin. Census: 27 in 65, 15 finer (4/12). (#4757)
- 3510 1866 PR64 Cameo NGC.** Strong reflectivity and contrast with gold and crimson toning at parts of the rims. A light line between Liberty's head and the hand supporting her pole contributes to the grade. Census: 10 in 64 Cameo, 26 finer (4/12). (#84759)
- 3511 1869 PR64 Cameo PCGS. CAC.** Green-to-gold outer toning extends partway into the fields on this near-Gem Cameo specimen. Silver interiors show pleasing contrast. Population: 10 in 64 (1 in 64+) Cameo, 8 finer (4/12). (#84762)
- 3512 1871 PR64+ NGC.** This gleaming proof has low contrast but highly visible patina, green-gold at the margins with rich blue-to-violet inner hues. Sharply struck and just a few faint flaws away from full Gem proof status. Census: 32 in 64 (1 in 64+), 33 finer (4/12). (#4764)

**1872 Dime, PR66 Cameo
Two-Sided Concentric Patina**

- 3513 1872 PR66 Cameo PCGS. CAC.** The centers on each side of this attractively toned and well-contrasted Premium Gem proof show typical pinkish-gold color with radiant luster, but a thin iridescent ring around each side puts this piece on the top shelf, aesthetically speaking. The obverse features cobalt-blue and magenta, while the reverse is iridescent multiple colors. A superlative example for a type set. Population: 4 in 66 Cameo, 1 finer (4/12). (#84765)
- 3514 1873 No Arrows PR64 Cameo PCGS Secure. CAC.** Mirrored fields with traces of vivid green and blue toning contrast boldly with the frosty devices on this attractive Choice example. Population: 11 in 64 Cameo, 11 finer (4/12). (#84766)

**PR65 Cameo 1873 Arrows Dime
Gorgeous Partial Toning**

- 3515 1873 Arrows PR65 Cameo PCGS. CAC.** Both sides are largely silver, but peripheral arcs of lavender, blue, and olive occupy significant space as well. The toning has minimal influence on the profound field-to-device contrast. A few tiny contact marks mixed with small as-made planchet flaws render this coin "merely" a Gem, though a gorgeous one at that. (#84769)
- 3516 1879 PR64 Cameo NGC. CAC.** The borders exhibit light gold toning on this lovely near-Gem Cameo proof. Both sides have full mirrors accompanying satin devices. Census: 18 in 64 Cameo, 29 finer (4/12). (#84776)
- 3517 1883 PR64+ Cameo NGC. CAC.** Both sides of this near-Gem Cameo proof exhibit virtually full silver brilliance with only slight blue and gold toning at the lower obverse. This is a highly appealing specimen for a type set or specialized collection. Census: 12 in 64 (1 in 64+) Cameo, 29 finer (4/12). (#84780)
- 3518 1884 PR65 NGC.** This well struck Gem proof displays iridescent rose-gold and ocean-blue patina. The fields are both flashy and satiny. Housed in a pre-hologram holder. One of only 875 proofs produced. (#4781)
- 3519 1884 PR65 PCGS. CAC.** Blues and greens prevail on the obverse, while the reverse is more inclined to gold and rose. Both sides offer strong underlying luster and generous eye appeal. Population: 50 in 65, 46 finer (4/12). (#4781)
- 3520 1884 PR66 PCGS.** Light blues and greens prevail on this pleasing Premium Gem proof. Minor contrast remains visible, though the effect is too modest for a Cameo designation. Population: 32 in 66, 14 finer (4/12). (#4781)
- 3521 1884 PR65 ★ Cameo NGC.** Plum-red, apple-green, and straw-gold adorn the right margins of this flashy Gem, which features icy devices and darkly reflective fields. Nicely struck with imposing eye appeal. Just 875 proofs were issued, and this coin absolutely earns its Star. (#84781)
- 3522 1891 PR66 Cameo PCGS.** This final-year proof has considerable field-device contrast and strong mirrors. Light green-to-gold patina is visible at the obverse margins and over much of the reverse. Population: 5 in 66 Cameo, 3 finer (4/12). (#84788)

BARBER DIMES

- 3523 1892 MS66 NGC.** Saturated gold-green, emerald, sapphire, and amethyst hues enrich swirling luster. This fantastic first-year dime would make a great addition to a toned type set. Census: 64 in 66, 20 finer (4/12). (#4796)
- 3524 1897-O MS62 NGC.** Peach, rose, and violet hues mingle over a medium-gray base on this satiny O-mint dime. Wispy abrasions down Liberty's neck contribute to the grade. (#4813)
- 3525 1900-O MS63 PCGS.** This turn-of-the-century O-mint dime has frosty luster with hints of gold and orange on the margins of otherwise silver surfaces. Wispy marks down Liberty's cheek have sizable influence on the grade. Population: 8 in 63, 28 finer (4/12). (#4822)

**1904-S Dime, Near-Gem Example
Scarce, Lower-Mintage Issue**

3526 1904-S MS64 PCGS. CAC. This better-date Barber dime had a mintage limited to only 800,000 pieces, few of which are finer than this piece. Each side shows subdued mint frost and the otherwise brilliant surfaces have just a hint of peripheral color. The strike is strong and there are few obvious abrasions on either side. Population: 13 in 64, 17 finer (4/12). (#4834)

3527 1905-O MS65 PCGS. Mottled violet and gold, with deep blue scattered across the reverse. Matte-like luster, a tiny disturbance is seen on Liberty's cheek. Population: 19 in 65, 23 finer (4/12). (#4836)

3528 1906-O MS65 PCGS. CAC. Although not a full strike, this Gem Barber dime is sharper than the typical New Orleans product. Both sides are frosty with luster shining through the deep gold, lilac, and blue toning. Population: 37 in 65, 25 finer (4/12). (#4840)

3529 1908-S MS64 PCGS. Green-gold along the rims with blue-green and sage centers. This near-Gem example has great eye appeal and preservation for its issue of just over 3.2 million pieces. Population: 20 in 64 (1 in 64+), 39 finer (4/12). (#4849)

3530 1914 MS66 PCGS. CAC. Dappled golden-brown covers portions of each side. The design features are well struck throughout, and the lustrous surfaces display just a few minute marks on Liberty's neck. Only five pieces have been graded higher by PCGS (4/12).
Ex: Central States Signature (Heritage, 5/2005), lot 6683. (#4865)

PROOF BARBER DIMES

3531 1892 PR65 NGC. CAC. This Gem proof first-year Barber dime is deeply toned with concentric rainbow iridescence and exceptional eye appeal. (#4875)

**1892 Barber Dime, Cameo PR67
Extraordinary Visual Quality**

3532 1892 PR67 Cameo NGC. The beginning of the new Charles E. Barber dime design saw a mintage of 1,245 proofs, many preserved for present-day collectors, including some examples with cameo contrast. Needless to say, Superb Gem Cameos, such as the present glittering specimen, are vastly more elusive. Frosty, microscopically detailed reliefs stand out boldly in contrast to deeply mirrored fields. Only a hint of incipient light milky-gray can be seen on the reverse. Census: 13 in 67 Cameo, 0 finer (4/12).
Ex: Long Beach Signature (Heritage, 5/2008), lot 143; Long Beach Signature (Heritage, 5/2009), lot 542. (#84875)

3533 1898 PR66 PCGS. CAC. This is a splendid type coin that has extraordinarily deep mirrors in the fields. This brightness enhances the rich golden-rose and pale blue toning. (#4882)

**1898 Barber Dime, PR67 Cameo
Fully Struck With Variegated Toning**

3534 1898 PR67 Cameo PCGS. CAC. Portions of this deeply reflective, well-contrasted coin are untuned, while the obverse shows a band of iridescent toning amidships, and the reverse displays aqua and russet near the lower rim. This fully struck Superb Gem reveals no sign of contact, even under a loupe. Population: 8 in 67 Cameo, 3 finer (4/12). (#4882)

**1900 Dime, PR67 Cameo
Richly Toned and Deeply Reflective**

3535 1900 PR67 Cameo NGC. Original teal and sage rim toning cedes to pinkish-gold in the centers of this attractive Superb Gem Cameo proof 1900 Barber dime, one of 912 produced for this turn-of-the-odometer date. The reverse displays more consistent but equally attractive honey-gold color, and the strike is impeccable. Census: 10 in 67 Cameo, 3 finer (4/12). (#84884)

3536 1902 PR65 PCGS Secure. The obverse is richly toned blue, green, and gold. The reverse has a strong silver center narrowly ringed in gold-orange and azure. A striking Gem. Population: 24 in 65, 21 finer (4/12). (#84886)

3537 1904 PR65 NGC. Strongly reflective with appreciable though not Cameo-level contrast. Green-gold tints grace the margins of the obverse with a touch more extension on the reverse. Census: 42 in 65, 38 finer (4/12). (#4888)

3538 1905 PR65 NGC. Blue hues prevail in the centers on each side of this reflective Gem proof. The obverse is edged in green, while the reverse has violet border color. Census: 36 in 65, 54 finer (4/12). (#4889)

3539 1905 PR66 PCGS. This well-preserved example exhibits cobalt-blue, lime-green, and violet reflecting from deeply toned proof surfaces. Sharply detailed throughout, this example shows no signs of contact. (#4889)

3540 1907 PR64 Cameo PCGS. CAC. This amazing Choice Cameo proof has boldly defined central devices with light silver surfaces that host delicate gold and russet toning. Both sides have fully mirrored fields and satiny devices. Population: 10 in 64 (3 in 64+) Cameo, 11 finer (4/12). (#84891)

**1911 Dime, Bright PR67
Considerable Contrast Evident**

- 3541 1911 PR67 NGC.** This low-mintage date is always popular, especially when it can be located at or near the price of a type coin. This is a splendid proof striking. Both sides are completely free from color and shine with uncommon radiance with strong contrast noted between the fields and devices. A few tiny planchet flakes are noted in the reverse fields. Census: 17 in 67 Cameo, 7 finer (4/12). (#4895)

MERCURY DIMES

- 3542 1916-D VG8 NGC.** Medium-silver color with pale lilac toning on the obverse. Although extensively worn, all of the design elements are fully outlined with a few internal details. The borders are complete and sharp, the mintmark bold. (#4906)
- 3543 1916-D Fine 12 NGC.** This key-date Mercury dime enjoys great demand in every grade from About Good to Mint State. The present specimen has pleasing light gray surfaces with hints of blue and pale gold toning. Faint hairlines and circulation marks are only visible with a loupe. (#4906)

Key-Date 1916-D Dime, Fine 15

- 3544 1916-D Fine 15 PCGS.** Steel-gray with a splash of deeper crimson and velvet green on the upper obverse. Each side is well defined for an extensively circulated coin and this is a well-preserved example of this popular key date issue. An excellent choice for the date collector.
Ex: Long Beach Signature (Heritage, 9/2005), lot 2487. (#4906)

**AU Details 1916-D Mercury Dime
Affordable and Pleasing**

- 3545 1916-D— Improperly Cleaned — NGC Details. AU.** The noted cleaning has left the fields hairlined and a bit overbright on the obverse. The piece is starting to retone, particularly on the reverse, and to take on a more pleasing appearance. The Details grade makes this piece considerably more affordable at this level, perhaps fitting into a mostly Mint State set. This key issue should find a plethora of eager bidders.

Uncirculated 1916-D Dime, Full Bands

- 3546 1916-D MS61 Full Bands NGC.** The 1916-D Mercury dime is a wildly popular issue in a series that is a favorite of legions of collectors, and by far the most commonly encountered grades for the issue are Almost Good, Good, and Very Good. Collectors seek high-grade circulated examples with uncommon fervor, as even an MS63 non-Full Bands example will put the collector well up into the five-figure range, as a rule. The 1916-D dime is in many ways similar to the 1893-S Morgan dollar, the undisputed key to the series and sought in any conceivable grade collectors can afford. The brightly lustrous, mattelike surfaces on this Uncirculated example display a light accent of golden peripheral color on the obverse, while the reverse is more deeply toned in cobalt-blue and reddish tints. Lightly marked on Liberty's face. (#4907)

**1916-D Dime, MS62 Full Bands
Key First-Year Mercury**

3547 1916-D MS62 Full Bands PCGS. Wispy gold toning on the obverse does little to diminish the brilliant silver surfaces of this frosty MS62 Full Bands piece. The design elements are sharp except for the high points of the obverse, which are slightly blunt. All reverse details, including the central bands, are crisp.

The 1916-D Mercury dime is coveted as a key date in all grades. This piece, near the lower end of the Mint State scale, provides an excellent opportunity for the specialist to acquire an attractive coin at a price level more reasonable than other higher-grade coins.
Ex: *Long Beach Signature* (Heritage, 9/2007). (#4907)

**Patinated MS67 Full Bands 1917 Dime
Ex: Joshua II**

3548 1917 MS67 Full Bands PCGS. CAC. Though more than 55 million pieces were struck for this Philadelphia issue, spurred by America's increasing entanglement with (and eventual entry into) World War I, the date remains highly elusive at the intersection of Full Bands definition and Superb Gem preservation. This is one of the few, boldly struck with intense luster beneath dappled gold, lavender, and robin's-egg-blue toning. Population: 17 in 67 (1 in 67+) Full Bands, 0 finer (4/12).

Ex: *Joshua II Collection of Mercury Dimes, #1 All-Time Finest PCGS Registry Set* (Heritage, 8/2010), lot 4492, which realized \$6,325. (#4911)

3549 1919 MS66 Full Bands PCGS. CAC. Rich gold-orange and forest-green hues saturate much of the margins, but the interiors are largely clear and silver-white. A well-defined and attractive Philadelphia piece. Population: 56 in 66 (2 in 66+) Full Bands, 9 finer (4/12). (#4923)

**Choice 1919-D Mercury Dime
Toned Example With Full Bands**

3550 1919-D MS64 Full Bands NGC. Attractive shades of ice-blue and champagne-gold toning enhance the surfaces of this impressive Choice Mercury dime. Sharply detailed design elements, with Full Bands definition on the fasces, and vibrant mint luster add to the considerable eye appeal. The 1919-D is seldom encountered in higher grades, and Full Bands examples are especially challenging. Census: 41 in 64 Full Bands, 6 finer (4/12). (#4925)

**Uncommonly Seen 1919-D Dime
MS64 Full Bands**

- 3551 1919-D MS64 Full Bands PCGS.** The 1919-D Mercury dime is a strike and condition rarity, common only in the the lowest circulated grades, seldom seen with Full Bands and infrequently in Gem condition. This piece is a deviation from the norm, displaying fully split and rounded bands. Pinkish-gold patina and radiant luster over mattelike surfaces put this coin in the top rank of survivors. Population: 71 in 64 (2 in 64+) Full Bands, 18 finer (4/12). (#4925)

Seldom-Seen 1919-S Dime, MS63 Full Bands

- 3552 1919-S MS63 Full Bands PCGS.** Both a condition and strike rarity, the 1919-S Mercury dime seldom appears in Mint State even without the Full Bands designation. This Select example boasts prevailing golden hues with lavender punctuation marks in the obverse field, while the reverse tends to deeper russet patina amid pinkish-gold. Population: 13 in 63 Full Bands, 58 finer (4/12). (#4927)

- 3553 1920-D MS64 Full Bands NGC.** Rose, gray, emerald, and magenta hues alternate on each side of this stunning near-Gem, with soft, satin luster and a bold strike. Tiny contact marks on the fascies define the grade but fail to dampen the eye appeal. (#4931)

**Premium Gem 1920-D Dime
Rare Full Bands Specimen**

- 3554 1920-D MS66 Full Bands NGC.** The position of the 0 in the date so close to the rim caused many striking problems for this issue, and this example shows traces of the "fade away" effect on that digit. Otherwise, this specimen is sharply detailed, with Full Bands definition and vibrant mint luster. Attractive shades of pale gold and ice-blue toning accent the pristine surfaces. The 1920-D is rare in Premium Gem Full Bands condition. Census: 7 in 66 Full Bands, 3 finer (4/12). (#4931)

**Gem Full Bands 1920-S Dime
Mottled Obverse Toning**

- 3555 1920-S MS65 Full Bands NGC.** The 1920-S dime is a difficult issue to obtain in Full Bands but this piece is no problem, showing full division on both the central and diagonal bindings of the fascies. The obverse shows spectacular mottled toning that runs the gamut from lemon-yellow to magenta, with those colors and jade-green predominant. The reverse shows similar hues around the periphery. Charming and elusive. Census: 18 in 65 Full Bands, 4 finer (4/12). (#4933)

- 3556 1921 AU58 PCGS. CAC.** Green-to-gold patina largely sticks to the rims, leaving the centers open and predominantly silver-to-gray. Just a touch of rub separates this semikey Mercury dime from a more expensive Mint State grade. Population: 27 in 58, 10 finer (4/12). (#4934)

- 3557 1921 MS61 Full Bands ANACS.** The obverse is largely silver-to-blue, rimmed in orange, the last color covering much of the reverse. A sharply struck example of the popular semikey date, housed in a small-format holder. (#4935)

**Pearl-Gray, Lustrous 1921 Dime
Select Full Bands**

- 3558 1921 MS63 Full Bands PCGS.** The surfaces are highly lustrous and show little trace of color other than silver-white to pearl-gray on this Select Full Bands 1921 dime. A loupe reveals a couple of minor contact marks on the obverse, but the reverse on its own would likely garner a finer grade. The crucial central bands are fully split even if not completely rounded. (#4935)

**1921 Dime, Near-Gem Full Bands
Lightly Toned and Lustrous**

- 3559 1921 MS64 Full Bands PCGS. CAC.** Dies long in use have created some metal flowlines that create a satiny appearance over cartwheel luster, and remnants of old clash marks appear on the reverse in the right field. The surfaces are largely silver-white but show accents of rose and ice-blue along with a good overall strike. Both 1921 Mercury dime issues are perennially popular, and far more available than the 1916-D in high grade. (#4935)

**Pristine 1921 Dime, MS66 Full Bands
Light Pink and Blue Patina**

- 3560 1921 MS66 Full Bands PCGS. CAC.** Shades of ice-blue and pink dominate amid the pearlescent gray on this stunning Premium Gem 1921 dime. Careful searching with a loupe fails to reveal any mentionable sign of postmint contact. PCGS has certified 35 submissions in this grade and a mere two finer (4/12). (#4935)

-
- 3561 1924 MS66 Full Bands PCGS. CAC.** Faint champagne toning is evident on the brilliant silver surfaces of this boldly defined Premium Gem. The surfaces of this eye appealing specimen are pristine. Population: 71 in 66 (1 in 66+) Full Bands, 15 finer (4/12). (#4943)

- 3562 1924-D MS65 Full Bands PCGS.** A lovely Gem with bold design definition that includes crisp central bands, this piece exhibits light champagne toning over both sides with a few specks of deeper toning. (#4945)

- 3563 1924-D MS66 Full Bands PCGS.** Radiant mint luster rolls around each side of this remarkably clean Premium Gem. There are no obvious or mentionable abrasions. The fields show the crinkly evidence of metal flow around the margins. Fully struck with complete horizontal and diagonal band details. Population: 35 in 66 Full Bands, 9 finer (4/12). (#4945)

- 3564 1924-S MS63 Full Bands PCGS.** This satiny Select Mint State piece has wispy champagne toning with splashes of sky-blue on each side. Sharply struck and attractive despite faint hairlines visible under magnification. (#4947)

- 3565 1924-S MS64 Full Bands NGC.** Blue and pink-gold overtones are faint but pleasing on this well-defined near-Gem. A light, stuttering line of marks on Liberty's cheek almost solely defines the grade, as the surfaces are clean elsewhere. Census: 39 in 64 Full Bands, 6 finer (4/12). (#4947)

**1924-S Dime, MS64 Full Bands
Conditionally Scarce S-Mint**

- 3566 1924-S MS64 Full Bands PCGS. CAC.** Caramel-gold toning adorns this unabraded and coruscating Choice Mercury dime. Well struck throughout, although a few leaves of the olive branch are "floating" due to a lapped reverse die. Another scarce branch mint issue from the 1920s. PCGS has certified only 17 pieces finer with Full Bands (4/12).

Ex: Central States Signature (Heritage, 4/2008), lot 683; FUN Signature (Heritage, 1/2010), lot 799. (#4947)

-
- 3567 1925-D MS64 Full Bands NGC.** Green-gold, light gray, and silver-blue patina enriches this sharply struck near-Gem. Unusual all-around quality for this challenging Denver issue. Census: 57 in 64 Full Bands, 34 finer (4/12). (#4951)

- 3568 1925-S MS64 Full Bands PCGS.** Original russet-red, cobalt-blue, and golden-brown patina appears on the lower obverse. The reverse is essentially untuned. Lustrous and well struck, only the lower diagonal banding on the fasces shows partial incompleteness. Carefully preserved and free of obvious distractions, with a couple of faint marks noted on Liberty's jaw. (#4953)

- 3569 1925-S MS64 Full Bands PCGS. CAC.** This is a more affordable version of this well-known strike rarity that would cost much more if a Gem example was necessary for a set. Each side is brilliant and displays dazzling mint luster. Very lightly abraded on the reverse. (#4953)

- 3570 1926-D MS65 Full Bands PCGS. CAC.** Wisps of gold toning visit this highly lustrous and needle-sharp branch mint Gem. Perusal with a lens is unable to find any obvious abrasions. Population: 80 in 65 Full Bands, 26 finer (4/12).
Ex: Houston Signature (Heritage, 12/2009), lot 465. (#4957)

**1926-D Dime, MS66 Full Bands
Only One Coin Finer at PCGS**

-
- 3571 1926-D MS66 Full Bands NGC.** *Ex: Dan Miller.* The 1926-D Mercury dime boasts a fairly low mintage of 6.8 million pieces, and finding an example with Full Bands and sharply detailed peripheral lettering is quite challenging. This spectacular Premium Gem possesses both of those attributes, along with vibrant mint luster and pristine surfaces. Census: 9 in 66 Full Bands, 1 finer (4/12). (#4957)

**1927-D Dime, Gem Full Bands
Conditionally Challenging Issue**

3572 1927-D MS65 Full Bands NGC. While not one of the great condition rarities from the 1920s, the 1927-D is nevertheless a challenging issue to locate in Gem condition and with Full Bands. This is a brightly lustrous example that has just a hint of light reddish patina on each side. No obvious or detracting marks can be located on either side. Census: 8 in 65 Full Bands, 5 finer (4/12). (#4963)

3573 1927-S MS63 Full Bands PCGS. A few small splashes of dark iridescence appear on each side of this fully lustrous and otherwise brilliant silver Select Mint State dime. Light die polish is evident in the obverse field. (#4965)

3574 1929 MS67 Full Bands PCGS. Glimpses of champagne-gold and ice-blue adorn the lustrous surfaces of this Superb Gem. Sharply struck design elements culminate in Full Bands. A nicely preserved piece. Population: 56 in 67 (1 in 67+) Full Bands, 0 finer (4/12). Ex: *Summer FUN Signature (Heritage, 7/2009), lot 411.* (#4973)

3575 1929 MS67 Full Bands PCGS. CAC. Lightly dappled chestnut-gold and cream-gray patina visits this lustrous, pristine, and sharply struck Superb Gem. Certified in a green label holder. Population: 56 in 67 Full Bands (1 in 67+ Full Bands), 0 finer (4/12). (#4973)

3576 1929-S MS66+ Full Bands PCGS. CAC. Deeply glowing caramel-gold swirls across both sides of this boldly reflective coin, which displays a remarkably precise strike and a fullness of detail seldom seen but often sought. Struck just as the Depression began hammering the nation's economy. PCGS has certified only 27 finer coins (4/12). (#4977)

3577 1929-S MS67 Full Bands NGC. Immaculate silver luster is contained within precise, high outer rims that frame an exacting and fully detailed strike. Diamond-sharp Full Bands definition is evident on the fasces that dominate the reverse. Here is a real condition rarity worthy of the closest examination. Census: 11 in 67 Full Bands, 0 finer (4/12). (#4977)

3578 1931-D MS67 Full Bands PCGS. CAC. An amazing Superb Gem with brilliant and frosty silver luster, exhibiting pristine surfaces and bold design motifs. A few splashes of deep gold toning appear on the obverse, with no reverse toning. Population: 43 in 67 (1 in 67+) Full Bands, 0 finer (4/12). (#4985)

Two-Toned 1936 Dime, MS68 Full Bands

3579 1936 MS68 Full Bands PCGS. The obverse is pristine, untoned silver-gray and shows fine-grained, mattelike surfaces, but the reverse is the star of the show, displaying waves of beautiful lavender, orange-ochre, and violet patina. Search long with a loupe; no distracting marks will be found on this piece, although a couple of tiny ticks appear on the upper fasces. Some "fadeaway" occurs on the 36 in the date, a design flaw traceable to Adolph A. Weinman. Population: 13 in 68 Full Bands, 0 finer (4/12). (#4999)

3580 1938 MS67+ Full Bands PCGS. Frosty silver luster with golden elements of varying strength through the fields. Crisply detailed with great preservation even by Superb Gem standards. PCGS has graded just 10 pieces as MS68 Full Bands or better (4/12). (#5011)

**1938-D Mercury Dime, MS68 Full Bands
None Certified Finer**

3581 1938-D MS68 Full Bands PCGS. This magnificent Mercury dime displays sharply detailed design elements, with Full Bands definition on the fasces and intricate detail in the hair and wing feathers. The pristine surfaces emit vibrant mint luster and a few hints of pale gold and ice-blue toning. Population: 11 in 68 Full Bands, 0 finer (4/12). (#5013)

Impeccable MS68 Full Bands 1940 Dime

3582 1940 MS68 Full Bands PCGS. This marvelous Superb Gem displays as brilliant, but a loupe reveals considerable scattered glints of pastel gold, ice-blue, and lavender throughout both sides, more perceptible on the reverse. The surfaces show a fine-grained, mattelike appearance and an excellent strike, just short of full. Population: 19 in 68 Full Bands, 0 finer (4/12). (#5023)

3583 1940-S MS67+ Full Bands PCGS. Light blue and green-gold tints cover much of each side, while the left obverse and reverse also show partial coverage in richer reddish-brown. Sharply struck and carefully preserved, even by Superb Gem standards. PCGS has graded just four pieces as MS68 Full Bands or better (4/12). (#5027)

Top-Rung 1941-D Dime, MS68 Full Bands

3584 1941-D MS68 Full Bands PCGS. PCGS has certified less than two dozen examples of this issue at the MS68 level, specifically 21 submissions, with none finer (4/12). This piece displays fine-grained, mattelike surfaces that alternate areas of blue and lavender, with fully struck and rounded central bands. An essential for a top Registry Set. (#5031)

3585 1942/1 AU53 NGC. FS-101. Dusky gold patina overlays the prominent cream-gray color. Substantial mint luster rolls over the lightly marked surfaces. The underdigit 1 is very sharp and can be seen with the unaided eye.
Ex: Dr. Kurt Peters Collection (Heritage, 6/2005), lot 5907, which realized \$1,092.50. (#5036)

3586 1942/1 AU58 NGC. FS-101. A bold overdate dominates the sharply defined obverse of a major World War II variety discovered after the coins had been in active circulation, drastically reducing the number of Mint State pieces remaining for collectors. (#5036)

3587 1942/1 AU58 NGC. FS-101. Light straw-gold and pearl-gray toning enriches this lustrous and minimally marked key date dime. Light friction on the cap, curls, and fasces are all that denies a Mint State assessment. (#5036)

3588 1942/1-D AU55 ANACS. FS-101. Denver's is the more obscure but more challenging 1942-dated dime overdate, at least in better grades. This modestly worn example, housed in a small-format holder, has a mix of orange, gold, gray, and blue hues over soft luster. (#5040)

Choice 1945 Mercury Dime Scarce Example With Full Bands

3589 1945 MS64 Full Bands PCGS. According to David Lange, the 1945 Mercury dime is the rarest date of the series with Full Bands. This attractive Choice specimen has been awarded the Full Bands designation, despite a touch of softness on the central reverse. The lustrous surfaces show traces of pale gold toning. Housed in an old green label holder. Population: 43 in 64 Full Bands, 51 finer (4/12). (#5057)

PROOF MERCURY DIMES

3590 1936 PR65 NGC. Strongly patinated over liquid mirrors, light silver-gray and gold-orange at the base with dappled caramel, ruby, and violet elements. A sharp and distinctive Gem from the first and most challenging proof Mercury dime issue. (#5071)

3591 1936 PR65 NGC. Gleaming fields and crisply detailed devices give this gold-rimmed Gem a gorgeous aura. The 1936 was the first proof Mercury dime issue and had the smallest mintage by far, just 4,130 pieces. (#5071)

3592 1936 PR65 PCGS. CAC. Sharply detailed throughout, with deeply mirrored fields that show a few hints of green, gold, and gray toning. Only 4,130 proof Mercury dimes were struck in 1936. (#5071)

3593 1936 PR65 PCGS. CAC. A stunning Gem proof representing the first proof Mercury dime. Both sides are fully brilliant with no evidence of toning. An important opportunity for an advanced collector. (#5071)

3594 1936 PR66 PCGS. CAC. From the lowest mintage proof date of the type, the present representative displays light straw-gold and ice-blue toning. Intricately struck and immaculate. Encapsulated in a green label holder.
Ex: Long Beach Signature (Heritage, 6/2002), lot 5738, which realized \$2,645. (#5071)

Superb Gem Proof 1936 Mercury Dime

3595 1936 PR67 PCGS. A light golden tinge is the only discernible color on this immaculate Superb Gem proof 1936 dime, the first year of modern proof coinage. A loupe reveals merely a bold strike over reflective surfaces with absolutely no distractions. Population: 43 in 67, 1 finer (4/12). (#5071)

1937 PR68 Dime None Finer

3596 1937 PR68 PCGS. Crystal-like, deeply mirrors are virtually untuned and sparkling with brilliant silver surfaces and wisps of iridescent toning. As close to perfection as one could expect. No finer pieces are certified at PCGS or NGC. Population: 24 in 68, 0 finer (4/12). (#5072)

3597 1938 PR67+ PCGS. CAC. Excellent reflectivity and preservation under considerable patina. Silver and milky hues are most visible at the centers, while gold-orange and blue are the most prominent peripheral colors. PCGS has graded just eight pieces as PR68 or better (4/12).(#5073)

3598 1939 PR68 ★ NGC. Profoundly mirrored with just a hint of blue in the gleaming silver of the fields and a suggestion of green-gold at the right reverse rim. Neither NGC nor PCGS has graded a PR69 example of this issue, making this PR68 ★ piece a coin of special importance.(#5074)

ROOSEVELT DIMES

3599 1950-S MS68 PCGS. This incredibly well-preserved Roosevelt dime displays satiny mint luster under shades of green, gold, lavender, and lilac toning. Population: 9 in 68, 0 finer (4/12).(#5096)

3600 1983-D MS68 NGC. This magnificent 1983-D Roosevelt dime is tied with one other coin for the title of “Finest Certified” in the combined population report (4/12). Fully struck and brightly lustrous, a virtually perfect coin.(#5165)

SMS ROOSEVELT DIMES

1966 SMS Dime, MS68 Ultra Cameo Blatant Surface Contrast

3601 1966 SMS MS68 Ultra Cameo NGC. Few of the Special Mint Set coins of any denomination can achieve sufficient contrast to merit the Ultra Cameo designation. This piece is one of only two Ultra Cameo pieces at NGC, with two finer in MS69 Ultra Cameo (4/12). This is an essentially perfect, untoned coin with blatant contrast. (#95241)

3602 1967 SMS MS68 Ultra Cameo NGC. Boldly contrasted in the manner of a proof, this is truly a “special” coin. Minor gold border-toning has no effect on the intense cameo effect. Census: 6 in 68 Ultra Cameo, 1 finer (4/12).(#95242)

PROOF ROOSEVELT DIMES

PR68 Cameo 1952 Dime

3603 1952 PR68 Cameo PCGS Secure. Close examination reveals delicate champagne toning on essentially brilliant silver surfaces with satin luster on the devices and deeply mirrored fields. The exquisite strike features bold hair detail and full torch bands. Population: 6 in 68 Cameo, 1 finer (4/12). (#85227)

Well-Contrasted 1952 Dime, PR69 Cameo

3604 1952 PR69 Cameo NGC. Although NGC has certified 14 submissions of the 1952 Roosevelt dime in PR69, it has seen fit to grade only two as PR69 Cameo, pointing up the rarity of the issue with the Cameo designation. This piece is both pristine and well-contrasted, as the grade demands. Silver-white, unmarked surfaces easily “fade to black” at the correct angle. (#85227)

3605 1970 No S PR69 NGC. A low-contrast but high-appeal example of this No S proof variant. Subtle gold-orange accents visit the borders of the near-pristine surfaces. Census: 12 in 69, 0 finer (4/12).(#5248)

Elusive 1970 No S PR68 Ultra Cameo Dime

3606 1970 No S PR68 Ultra Cameo NGC. Although we have handled an occasional example of this sans-mintmark variety in the past, examples certified as Ultra Cameo trade seldom, whether at Heritage or elsewhere. It seems as though the Breen report of 2,200 pieces struck without the S has failed to materialize into certified populations remotely close to that figure. This gold-tinged piece shows thoroughly frosted devices with mirrored fields, well into Ultra Cameo territory. Census: 1 in 68 Ultra Cameo, 1 finer (4/12). (#95248)

3607 1975-S PR70 Deep Cameo PCGS. This technically perfect specimen exhibits sharply detailed frosty devices that provide profound Cameo contrast with the deeply reflective brilliant fields. Population: 33 in 70 Deep Cameo (4/12).(#95253)

TWENTY CENT PIECES

3608 1875-CC AU55 PCGS. Pale golden patina overlies the surfaces of this Choice AU, the only collectible Carson City twenty cent piece. Softly struck, especially on the reverse. Significant mint luster remains. (#5297)

3609 1875-CC AU58 NGC. A scarcely worn example of the more readily collectible Carson City issue for this odd denomination. Peach and blue peripheral influences surround silver-gray centers with considerable remaining radiance. (#5297)

Select 1875-CC Twenty Cent Piece Popular Mintmark Type Coin

3610 1875-CC MS63 PCGS. The 1875-CC twenty cent issue is one that local interests (Western silver miners) supported, and Carson City deliberately raced to beat San Francisco to become the first Western mint to strike the new denomination in 1875. (Of course, San Francisco compensated by striking 10 times as many coins as Carson City.) This Select coin boasts frosty silver-gray surfaces with few abrasions, well-struck in most areas but somewhat soft in the immediate centers. A nice example for type purposes and a good alternative to the ubiquitous 1875-S. (#5297)

1875-S Twenty Cent Piece, MS66 Brilliant and Highly Lustrous

3611 1875-S MS66 NGC. With a mintage of 1.1 million coins, the 1875-S twenty cent piece is the most readily available date in the series through MS64. Gems can be located with patience and a little searching, but Premium Gems, according to the population data, are elusive, and anything finer is rare. This MS66 coin displays white, minimally abraded surfaces. The strike brings out sharp definition on almost all of the design elements, save for the usually seen softness in Liberty's hair and top of the eagle's wing. Census: 50 in 66, 7 finer (4/12). (#5298)

Premium Gem 1875-S Twenty Cent Great Type Coin With Repunched Mintmark

3612 1875-S MS66 PCGS. FS-302. The mintmark was first punched in tilted to the left and then punched in correctly, leaving the serifs of the original S still showing. The mint frost on this Premium Gem swirls under rings of sea-green and golden-brown color at the margins and the rich silver and blue of the centers. Sharply struck overall with just the slightest softness at the top of the eagle's left (facing) wing. (#5298)

PROOF TWENTY CENT PIECES

3613 1875 PR62 Cameo NGC. A sharply detailed proof twenty cent piece, with noticeable field/device contrast and attractive blue and gold peripheral toning. Census: 6 in 62 Cameo, 43 finer (4/12). (#85303)

Choice Proof 1876 Twenty Cent Centennial-Year Proof

3614 1876 PR64 PCGS. A well-detailed Choice specimen from a proof mintage of 1,260 pieces, the present coin displays lightly marked fields, highlighted by shades of gray, amber, and greenish-gold patina. The fields display hazy reflectivity under the toning. Population: 85 in 64, 33 finer (4/12). (#5304)

Brilliant PR63 1878 Twenty Cent

3615 1878 PR63 PCGS. This proof-only specimen is fully brilliant and exhibits substantial cameo contrast, though its old green label holder predates the Cameo designation for the obsolete series. Sharply struck and unmarked with a trace of struck-in grease between the 78 in the date. Just 600 pieces were issued. (#5306)

EARLY QUARTERS

- 3616** 1796 — Holed — NGC Details. Fair. B-1, R.4. Among the rarest silver type coins, the Small Eagle quarter is pursued in all grades. This affordable example has a moderate-sized egg-shaped hole at 8 o'clock and the portrait displays hairlines. Star 8 has a small attempted puncture. The slate-gray surfaces are moderately wavy and unevenly worn. The 796 in the date is clear.
From The JG Collection, Part Two. (#5310)

1796 Draped Bust Quarter, B-2, VF35 Only Small Eagle Issue

- 3617** 1796 VF35 PCGS. B-2, R.3. The Philadelphia Mint produced no quarters until 1796, when a small mintage of 6,146 pieces was accomplished, using a total of two obverse and one reverse dies to complete the run. Afterward, no more quarters were struck until 1804, making the 1796 the only date with a Small Eagle reverse. All these factors make this issue extremely important to type collectors as well as series enthusiasts.

The high 6 in the date of this coin identifies it as a representative of the more available BD-2 variety. This coin retains much of its original design detail, with considerable mint luster remaining in sheltered areas. The eagle's head displays the usual flatness, but only the high points of the design show actual wear. No large or seriously distracting flaws are apparent. The historic importance, low mintage, and aesthetic appeal of this coin make it a prize for the discerning collector. (#5310)

1796 Draped Bust Quarter, B-2, AU58
First Date of Denomination, Only Date of Type
Low Mintage of 6,146 Pieces

3618 1796 AU58 NGC. B-2, R.3. As the first date of the denomination, the 1796 Draped Bust quarter is an important issue for both date and type collectors. The fact that it is the only quarter to employ the Small Eagle reverse design makes it doubly important as a type coin. Finally, the low mintage of 6,146 pieces has intrigued numismatists from the earliest days of the hobby. Only two die varieties are known for the date, with this coin representing the more available B-2 variety, with the high 6 in the date.

Experts estimate the surviving population of the B-2 variety at about 450 pieces, with a surprising number of specimens in high grade. It is likely that there was a hoard of these coins saved by some financial institution as currency reserves, although that function was usually performed by the half dollar denomination. There was little call for quarters in the American economy before 1857, because of the supply of Spanish 2 Reales pieces that circulated with the same value. Depositors of silver bullion typically preferred to redeem their deposits in the larger half dollar coins.

Delivery warrants for 1796 quarters were dated April 9 (1,800), May 27 (2,530), June 14 (1,564), and February 28, 1797 (252) for a total mintage of 6,146 quarters. It is now generally believed that the B-2 quarters were struck before the B-1 examples, and the B-2 variety is encountered much more frequently, so perhaps the first two deliveries were B-2 coins, while the fourth delivery, and at least part of the third, were of the B-1 type.

This boldly defined near-Mint piece has a trace of high point wear, but overall it presents exceptional eye appeal. A hint of weakness is evident at the eagle's head, as almost always seen on the B-2, but the remaining design motifs are sharp. Both sides have nearly full luster beneath light gold toning with traces of deeper peripheral iridescence. A minor rim bruise shows at 3 o'clock on the obverse. This coin possesses the strongest possible historic significance, relatively high technical grade, and strong visual appeal. Census: 17 in 58, 28 finer (4/12).

Ex: Central States Signature (Heritage, 4/2009), lot 2308, realized \$51,750. (#5310)

- 3619 1804 — Holed — NGC Details. VG. B-1, R.3.** Tompkins Die State 1/1. A round hole is at 12 o'clock, but this rare date quarter has full peripheral stars and legends, with only the tops of the ME in AMERICA threatened by a worn rim. Toned olive-green, lilac-gray, and stone-white with faint hairlines on both sides and a few thin marks near the ribbon.
From The JG Collection, Part Two. (#5312)

Rare VG10 1804 Quarter, B-1

- 3620 1804 VG10 PCGS. B-1, R.3.** Tompkins Die State 3/2. The first quarter coinage since 1796 reduced the number of obverse stars from 15 to 13 and employed the new Heraldic Eagle reverse. Two die pairs are known. On the more available B-1, a die scratch is present between stars 8 and 9. This minutely granular representative has dove-gray fields and pearl-gray devices. All legends and stars are clear except for the first four letters in E PLURIBUS UNUM.
Ex: Catfish Creek Collection, Part Two (Heritage, 10/2006), lot 879, which realized \$6,325. (#5312)

Choice VF 1804 Quarter, B-1

- 3621 1804 VF35 PCGS. B-1, R.3.** Tompkins Die State 2/3. The dies are clashed and a faint crack connects the tops of the letters in AMERICA. The 1804 is the key date of the Heraldic Eagle type. Its mintage of 6,738 is only a fraction of its 1805 to 1807 successors. Silver depositors of the era preferred larger denominations, such as half dollars and dollars, which explains the rarity of the 1796 and 1804 as well as the absence of intermediate date quarter dollar production. The present Choice VF example has rich tan-gray toning and pleasing sharpness. The strike is consistent except on the two highest reverse stars. There are no remotely relevant marks. (#5312)
- 3622 1805 Fine 15 NGC. B-3, R.1.** Tompkins Die State 5/3. Rich tan-gray toning blankets this unmarked and attractive Choice Fine half dollar. The reverse has a subtle rim ding at 7 o'clock but the shield lines are fully separated. (#5313)
- 3623 1806 Fine 15 PCGS. B-3, R.1.** Tompkins Die State 2/2. Steel-gray toning is comprehensive aside from tan patina on the high points. Softly brought up at the centers, but peripheral elements are well defined. Faintly hairlined but free from visible marks. (#5314)

BUST QUARTERS

Partly Lustrous Near-Mint 1815 Quarter, B-1 “L” Counterstamp

- 3624** 1815 “L” Counterstamp AU58 NGC. B-1, R.1. The “E” and “L” counterstamps remained enigmatic for many years, but the present theory is that they originated from a divisive vote of the Harmony Society in Economy, Pennsylvania, around 1832. Of the two letters, the “L” stamp is scarcer. This is a partly lustrous cream-gray quarter that has a crisp strike and attractive surfaces. (#5321)

1822 B-2 Quarter, Good 6 Blundered Reverse Die

- 3625** 1822 25/50C Good 6 PCGS. B-2, R.5. Slight surface roughness appears under magnification on this medium to dark gray blundered die quarter dollar. The engraver mistakenly entered the denomination as 50 C, then corrected his error. Faint scratches and other trivial surface marks are evident, and consistent with the grade. (#5333)
- 3626** 1824/2 Good 6 PCGS. B-1, R.3. The sole 1824-dated die variety of a scarce and underappreciated issue. The present piece is principally cream-gray with deeper charcoal toning at the borders. The peripheral stars and letters are distinct from the rim, and most of LIBERTY is clear, though the LI is faint. (#5335)
- 3627** 1825/4 VF25 PCGS. B-3, R.3. Significantly scarcer than Browning-2, the incorrect attribution on the PCGS insert. The denomination is distant from the claws. This lilac-gray and almond-gold representative is faintly hairlined but the eagle is well detailed and there are no noticeable marks. (#5336)
- 3628** 1828 VF35 PCGS. B-1, R.1. A Choice VF gunmetal-gray representative from the final year of the large diameter subtype. Traces of forest-green patina are noted near the eagle’s left (facing) shoulder. No marks are obtrusive. (#5342)

- 3629** 1834 AU55 PCGS. B-1, FS-901, R.1. The O over F in OF variety, separately listed in the *Guide Book* in recent years. The same reverse was used on the 1833 B-2, which is unlisted in the *Guide Book*. The present Choice AU B-1 example is crisply struck and displays consistent dove-gray toning and a few minute marks. (#5353)

- 3630** 1838 MS61 NGC. B-1, R.1. The final date of the Bust quarter series. Only one die pair was used despite a reported mintage of 366,000 pieces, which suggests a majority of that production was coined from 1837-dated dies. This is a satiny example with tan-gray centers and attractive blue-green and rose-red margins. One hair-thin mark noted on the cheek and neck. (#5357)

SEATED QUARTERS

- 3631** 1843-O Large O Fine 15 PCGS. CAC. FS-501. A rare and important variety with a Large O mintmark that was probably intended for half dollar dies. This piece has natural light gray surfaces with deeper steel patina outlining the devices. Some dark verdigris is noted at the lower reverse. (#395927)

1853 No Arrows Quarter, AU50 Recut Date

- 3632** 1853 No Arrows AU50 PCGS Secure. A recut date is common to all genuine 1853 No Arrows quarters. Few market appearances of this rarity occur each year and the Seated Liberty quarter specialist will recognize the importance of this offering. This pleasing piece has gray-brown surfaces with delicate peripheral blue toning. Underlying luster is present on both sides. Scattered grade-consistent surface marks are inconsequential. Population: 3 in 50, 21 finer (4/12). (#5421)

1854 Arrows Quarter, MS64 Conditionally Elusive

- 3633** 1854 Arrows MS64 PCGS. CAC. The date and arrows are high in the exergual space, closer to the base of Liberty than the border. This Choice Mint State piece is highly attractive, and examples are rarely encountered finer. Both sides have light ivory and silver luster with a crescent of deep gold and iridescent toning at the right side of the obverse. Population: 58 in 64, 22 finer (4/12). (#5432)

**Near-Gem 1854-O Arrows Quarter
Original Pinkish-Gray and Blue Surfaces**

- 3634 1854-O Arrows MS64 PCGS.** With the 1853-54 Arrows coinage the New Orleans Mint really “stepped up to the plate” to help produce much-needed minor silver for the domestic American economy, striking well over 1 million quarters each in those years. The 1854-O saw a production of 1.48 million pieces, and survivors are obtainable for a price today up to the Gem level or so. This near-Gem boasts mottled pinkish-gray centers with blue rim accents, highly lustrous and well-struck. A few stray marks, including one on Liberty’s mouth, preclude an even finer grade, but this original coin will work well in the type set of many a picky collector. (#5433)

**1855 Arrows Quarter, MS65
Rare in All Uncirculated Grades, Especially Gem**

- 3635 1855 Arrows MS65 NGC.** Larry Briggs, in his *Liberty Seated Quarters* book, says the 1855 Arrows is very common in grades from Good to VF, scarce in XF and AU, and very scarce in Uncirculated grades. As indicated from the population figures, Gem and better examples are very challenging. The Gem we offer here has whispers of russet patina over lustrous surfaces that are devoid of significant marks. The fields are bright and semireflective on each side. Except for the star centers along the upper left (facing) obverse border and the feathers on the eagle’s right leg, the design elements are well impressed. Census: 7 in 65, 7 finer (4/12). (#5435)
- 3636 1877 MS65 PCGS.** Frosty silver with peach elements. This well-defined Gem has just a hint of striking softness on the rightmost obverse stars. PCGS has graded 89 pieces as MS66 or better (4/12). (#5504)
- 3637 1877 MS66 NGC.** Swirling luster through the fields with frosty high points. This is a minimally toned Premium Gem that shows just a few narrow but long toning streaks on the obverse. Census: 48 in 66 (1 in 66+), 32 finer (4/12). (#5504)

**Superb Gem 1877 Quarter, MS67
Lightly Toned Surfaces**

- 3638 1877 MS67 PCGS.** This Philadelphia date was the last really large mintage of the Liberty Seated series, with 10.9 million struck for circulation, but is nonetheless elusive in the higher ranks of Mint State. This example offers delightfully smooth, deeply lustrous fields that gleam under soft light peach-gold toning of great delicacy. It would appear that most of these coins entered active circulation with comparatively few preserved. Population: 38 in 67, 1 finer (4/12). (#5504)
- 3639 1878-CC MS64 PCGS.** An attractive near-Gem from the end-date for minor silver Carson City coinage. Faint golden glimpses settle over pale silver surfaces that show a mix of satin and frost in the luster. Population: 62 in 64 (1 in 64+), 25 finer (4/12). (#5509)

**1878-CC Quarter, MS65
Final CC Quarter Dollar**

- 3640 1878-CC MS65 PCGS. CAC.** The obverse has light clash marks and several fine die cracks, while the reverse has few die defects. The final quarter dollar of the Carson City Mint, this lovely Gem is fully lustrous with frosty mint brilliance and a few splashes of gold toning. Population: 20 in 65, 5 finer (4/12). (#5509)

**1879 Quarter, MS67
Conditionally Rare**

- 3641 1879 MS67 NGC.** An impressive Superb Gem Mint State piece when most numerically equivalent coins are proofs. This 1879 quarter is one of few Gem or finer pieces that survive from the mintage of 13,600 quarters. Both sides have bright, frosted silver surfaces and reflective fields that provide considerable contrast. Census: 21 in 67, 5 finer (4/12). (#5511)

**Premium Gem 1880 Quarter
Reflective, Lightly Toned Surfaces**

- 3642 1880 MS66 PCGS.** Despite the low mintage of many minor silver coins in the decade or so after Morgan dollar coinage commenced, survivors are generally available, as though contemporary collectors put aside some examples on purpose. The 1880 Seated quarter was produced in an amount reported as 13,600 coins, but this Premium Gem is one of 35 such at PCGS, with 10 finer (4/12). The surfaces are expectedly prooflike, with mottled olive, gray, and pinkish tones on the obverse. The reverse shows a deeper pink center with blue rim tints. There are no mentionable signs of contact and the strike is sharp, save for Liberty's torso. (#5512)

**1880 Quarter Dollar, MS67
Tied for Finest at PCGS**

- 3643 1880 MS67 PCGS. CAC.** Business strike mintages of Seated quarters from 1879 to 1891 were extremely small, although the survival rate was rather significant. However, Superb Gem or finer specimens of all those dates are rarely encountered. This 1880 has reflective fields with brilliant silver surfaces and splashes of iridescence. Population: 10 in 67, 0 finer (4/12). (#5512)

**1881 Seated Liberty Quarter, MS66+
Only 12,000 Pieces Struck**

- 3644 1881 MS66+ PCGS. CAC.** From a minuscule mintage of just 12,000 pieces, the 1881 Seated Liberty quarter is rarely encountered in Premium Gem condition. This high-end Premium Gem displays well-detailed design elements, with vibrant satiny mint luster and hints of pale gold toning. Population: 13 in 66 (2 in 66+), 6 finer (4/12). (#5513)

Richly Toned 1889 Quarter, MS67

- 3645 1889 MS67 NGC.** This late Liberty Seated quarter is a low-mintage issue of only 12,000 pieces, released at a time in which few collectors preserved what were then ordinary circulating coins. This Superb Gem will appeal to those with a predilection for rich toning, displaying electric blue, tawny russet-gold, and iridescent silver. Careful study under a glass shows no troubling marks of any kind. Census: 25 in 67, 2 finer (4/12). (#5522)

- 3646 1891 MS65 PCGS.** The Seated Liberty design was retired after 1891, making the date an important one for type collectors. This sharply detailed Gem displays strong mint luster under variegated gold, blue, amber, and green toning. Population: 55 in 65, 27 finer (4/12). (#5524)

PROOF SEATED QUARTERS

**Green Label PR64 1856 Quarter
Rare Early Proof Issue**

- 3647 1856 PR64 PCGS.** Most references cite a figure of about 30 pieces as the number of 1856 proof quarters known, out of a mintage of perhaps 100. Briggs identifies the diagnostic of a proof of this date as, "a large die bulge on reverse that extends from above right wing to 'L' of 'DOL.'" This diagnostic bulge is immediately evident on this coin, which would be immediately identifiable as a proof in any event due to its mirrored fields and exceptional clarity of detail. Faint tan-gold toning covers the unblemished surfaces, but moderate cameo contrast is nonetheless evident. An uncommon opportunity for the connoisseur of early proof coinage. Housed in a green label PCGS holder. Population: 8 in 64, 1 finer (4/12). Ex: FUN Signature (Heritage, 1/2007), lot 915, which realized \$12,650. (#5552)

- 3648 1858 PR63 PCGS.** A sharply detailed Select proof, from the first year of commercial proof set offerings. Probably no more than 100 proof Seated Liberty quarters were struck in 1858 and this example displays colorful blue and gold toning. Population: 16 in 63, 16 finer (4/12). (#5554)

**Outstanding 1859 Seated Quarter
PR67 ★, Sole Finest at NGC**

- 3649 1859 PR67 ★ NGC.** The year 1859 saw 800 proof quarters minted. NGC and PCGS population figures indicate that about 250 or so survive, less an unknown number of resubmissions and crossovers. Most of the certified population falls into the PR62-PR64 range, with 50 or so coins grading PR65 and finer. The present Superb Gem is the *single finest* 1859 proof quarter with the coveted Star designation. Gorgeous medium-intensity toning in cobalt-blue, purple, and golden-brown hues at the borders frames lighter silver-gold centers. The strike is full throughout, and the piece is impeccably preserved. The outstanding overall eye appeal would be difficult to surpass.
Ex: Long Beach Signature (Heritage, 5/2008), lot 339, which realized \$25,300. (#5555)

**1860 Quarter, PR65 Cameo
Dazzling Field-Device Contrast**

- 3650 1860 PR65 Cameo NGC.** Even though the official proof mintage was an even 1,000 pieces, 458 were melted as unsold at year's end. This is one of the finest Cameo examples known. The brilliant surfaces display deeply reflective fields with strongly contrasting mint frost over the devices. The strike is full in the centers with some peripheral softness noted on the stars. Census: 5 in 65 (1 in 65+) Cameo, 4 finer (4/12). (#85556)

**1864 Seated Quarter, PR65
Only Three Finer Coins at PCGS**

- 3651 1864 PR65 PCGS. CAC.** Only 470 proof Seated Liberty quarters were struck in 1864, during the waning days of the Civil War. This sharply detailed Gem features deeply reflective fields that show few signs of contact. The mellow golden-brown centers yield to a ring of cobalt-blue at the peripheries, creating exceptional eye appeal. An excellent prospect for a Registry Set. Population: 12 in 65, 3 finer (4/12). (#5560)

- 3652 1867 PR63 ★ Cameo NGC.** The brilliant centers give way to vivid rings of golden-brown and cobalt-blue toning on this sharply detailed proof. Eye appeal is tremendous. Census: 1 in 63 ★ Cameo, 32 finer (4/12). (#85566)

1867 Quarter, Dazzling PR66 Cameo

- 3653 1867 PR66 Cameo NGC.** Demand for the 625 proofs issued in 1867 is dramatically increased by the extreme scarcity of high-grade business strikes from this year. This snowy white specimen boasts outstanding contrast and appeal. Simply stated, awe-inspiring quality for this early With Motto proof quarter. Census: 6 in 66 Cameo, 2 finer (4/12).
Ex: ANA Signature (Heritage, 8/2007), lot 674. (#85566)

**Gem Proof Cameo 1871 Quarter
Blatantly Reflective Silver-White Surfaces**

- 3654 1871 PR65 Cameo NGC.** Of the 960 proof Seated quarters made in 1871 this Gem proof is among the few finest survivors, regardless of how many have actually made it to the present day. The silver-white surfaces display blatant contrast, pristine preservation, and deep reflectivity. Some small lumps from die rust and tiny contact marks both appear only under a loupe. Census: 5 in 65 Cameo, 3 finer (4/12). (#85570)

**1874 Quarter, PR67
Arrows at Date**

- 3655 1874 Arrows PR67 NGC.** Ex: Kaufman. The small arrow heads left and right of the date signified a minuscule weight change that occurred in 1873, with that design feature continuing in production the following year. At the time these coins were minted, dies were standardized with little variance from one to the next. However, the arrow heads were still hand-punched in the die, and can be used to identify different varieties. On this example, both appear to slant upward, following the curve of the border.

A highly attractive Superb Gem, this lovely proof has obvious contrast but lacks the Cameo designation to the dark reverse toning. Both sides are fully mirrored with splashes of peripheral gold and iridescent toning on the obverse. Census: 6 in 67, 4 finer (4/12). (#5575)

**1875 PR66 Cameo Quarter
Borderline Deep Cameo**

- 3656 1875 PR66 Cameo PCGS. CAC.** This amazing Premium Gem Cameo proof is a borderline Deep Cameo example with hints of champagne toning over brilliant silver surfaces. The devices have bold details and thick mint frost, residing within deeply mirrored fields. Population: 1 in 66 Cameo, 0 finer (4/12). (#85576)

Multicolor PR66 1876 Quarter

- 3657 1876 PR66 NGC. CAC.** Type Two Reverse with small feet on the As in the legends. This is a flashy high grade proof quarter that boasts a bold strike and lovely sea-green and lavender toning. Cameo contrast is precluded by the diverse patina. Certified in a former generation NGC holder. (#5577)

- 3658 1877 PR63 PCGS.** Light rose-red patina visits the fields and much of the eagle. The seated Liberty is frosty and untuned. A needle-sharp strike contributes further to the appeal. Encased in an old green label holder. (#5578)

- 3659 1877 PR64 NGC.** A pleasing near-Gem, this 1877 quarter has mostly gold toning on the obverse with a crescent of powder-blue above, and similar toning with violet on the reverse. Housed in a former generation holder. A mere 510 proofs were issued. (#5578)

- 3660 1877 PR64 Cameo PCGS.** Bright and considerably contrasted. Most of each side is silver, though a rosy area has settled over the left side of Liberty's figure. Population: 7 in 64 (1 in 64+) Cameo, 9 finer (4/12). (#85578)

**1881 Quarter, PR66+ Cameo
Gorgeous Peripheral Toning**

- 3661 1881 PR66+ Cameo PCGS. CAC.** Both sides of this stunning Premium Gem Cameo proof exhibit peripheral blue, violet, and gold toning inside the border, with mostly silver-white centers. A splendid specimen, this quarter has exceptional eye appeal. Population: 21 in 66 (3 in 66+) Cameo, 7 finer (4/12). (#85582)
- 3662 1882 PR63 Cameo NGC. CAC.** Blazingly contrasted through silver centers that glare from within orange and blue peripheral toning. Lightly hairlined but well within Select Cameo parameters. Census: 2 in 63 Cameo, 36 finer (4/12). (#85583)
- 3663 1882 PR64 Cameo PCGS Secure.** Strongly frosted on the devices, though the mirror-contrast is a trifle soft. The golden tints that appear only at the rims on the obverse have greater saturation on the reverse. Population: 14 in 64 Cameo, 26 finer (4/12). (#85583)
- 3664 1884 PR65 NGC.** Deep blues and violets through the margins with more gold-influenced centers. Strongly mirrored under the toning with hints to what must have been remarkable contrast in the coin's past. Census: 49 in 65, 61 finer (4/12). (#5585)
- 3665 1885 PR64 PCGS. CAC.** The centers of this near-Gem proof exhibit champagne toning with deep blue and iridescent peripheries. Sharply defined with fully mirrored fields and light cameo contrast. (#5586)

Iridescent-Toned 1886 Quarter, PR68

- 3666 1886 PR68 NGC.** Iridescent pastel swaths of honey-gold, rose-red, and ocean-blue embrace this fully struck and pristine Superb Gem, a coin memorable for its preservation in addition to its diverse patina. Among the finest specimens from the surviving low mintage of 886 proofs and 5,000 business strikes. Census: 5 in 68, 1 finer (4/12).
Ex: Summer FUN Signature (Heritage, 7/2009), lot 492, which brought \$8,300. (#5587)
- 3667 1887 PR62 PCGS.** An essentially untoned specimen with a glimpse of gold patina on the lower reverse margin. Cameo contrast is noticeable, particularly on the reverse. Certified in an old green label holder. Only 710 proofs were produced. (#5588)

**1889 Seated Liberty Quarter, PR68 ★
Possibly Finest Known**

- 3668 1889 PR68 ★ NGC.** The star designation for exceptional quality is undoubtedly a result of the spectacular eye appeal created through the lovely toned surfaces. Both sides have excellent cameo contrast and deeply mirrored fields that shine through the blue-green, amber, and iridescent toning. From a tiny mintage of 711 pieces.
- The present coin is easily one of the finest specimens extant, one of just four pieces in the combined certified population at the PR68 level, and the only example with the Star designation, with none finer (4/12). This amazing, superlative proof will prove to be a highlight of the new owner's cabinet. (#5590)

BARBER QUARTERS

- 3669 1898-S MS63 PCGS.** Uncommonly reflective for this S-mint issue with light golden elements over a silver base. This well-defined Select piece has a few small depressions on Liberty's cheek and marks scattered elsewhere. Population: 7 in 63, 18 finer (4/12). (#5621)

Fully Struck Gem 1900-S Quarter

- 3670 1900-S MS65 NGC.** Mottled pinkish-gold and powder-gray tints appear on each side of this fully struck S-mint Barber quarter, one of four in MS65 with eight finer at NGC (4/12). Even under a loupe there is no mentionable sign of contact, and the problematic right shield corner on the reverse is complete. (#5627)

- 3671 1902 MS66 PCGS. CAC.** This lovely Premium Gem has frosty silver luster with splashes of gold and iridescent toning. Some peripheral strike weakness is evident on several of the obverse stars, and the lower reverse details. Population: 25 in 66, 3 finer (4/12). (#5631)

1902-O Barber Quarter, MS65 Important Condition Rarity

- 3672 1902-O MS65 PCGS.** This is only the 12th appearance of a Gem or finer 1902-O Barber quarter in our auctions since the beginning of our Permanent Auction Archives in 1993. A major condition rarity in the Barber quarter series. This Gem has brilliant silver surfaces with frosty mint luster and nearly full design details. Population: 10 in 65, 7 finer (4/12). (#5632)

- 3673 1907-O MS65 PCGS. CAC. Ex: Friend.** This well-preserved example shows a strong strike for the issue with only a small amount of weakness on the reverse. Astonishing originality and vibrant colors range from ocean-green to tangerine on this pleasing example. Population: 18 in 65 (1 in 65+), 15 finer (4/12). (#5647)

- 3674 1912 MS65 NGC. CAC.** Frosty silver luster with gold and midnight-blue elements at the margins on the obverse and into the fields on the reverse. This underrated issue of 4.4 million pieces is a condition rarity any better. Census: 30 in 65, 8 finer (4/12). (#5662)

- 3675 1913 MS64 PCGS. CAC.** Although overshadowed by its San Francisco Mint counterpart, the 1913 is a rare Barber quarter issue that enjoys great demand in all grades. This Choice Mint State piece has frosty silver luster with splashes and specks of dark toning. Population: 40 in 64, 33 finer (4/12). (#5664)

Low Mintage XF 1913-D Quarter

- 3676 1913-S XF40 PCGS.** The lowest mintage regular issue 20th century quarter, and one of the three keys to the series. Most survivors are heavily worn, but the present pearl-gray and almond-gold example is well defined. A few tiny marks include a tick on the base of the left (facing) wing. Encased in a green label holder. (#5666)

- 3677 1915 MS65 PCGS.** Well struck and highly lustrous. This attractive Gem is also untuned on the reverse, with some very faint tan patina on the obverse and a few small, scattered contact marks. Population: 81 in 65 (1 in 65+), 16 finer (4/12). (#5670)

PROOF BARBER QUARTERS

Brilliant Superb Gem Proof 1892 Barber Quarter

- 3678 1892 PR67 Ultra Cameo NGC.** Type Two Reverse. The classic Barber design was introduced in 1892, with a generous proof mintage of 1,245 pieces. This magnificent Superb Gem exhibits the dramatic white-on-black flash of the best cameo specimens, with richly frosted devices and deeply mirrored fields. Census: 7 in 67 Ultra Cameo, 5 finer (4/12). (#95678)

1893 Quarter, PR66 Undesignated Cameo Specimen

- 3679 1893 PR66 NGC. CAC.** While there is no designation assigned to this brilliant Premium Gem proof, it is an obvious Cameo example and possibly deserves an Ultra Cameo designation. Both sides have a tinge of champagne toning that is barely worth mentioning. The fields are deeply mirrored around highly lustrous and frosty white devices. Census: 53 in 66, 28 finer (4/12). For reference, NGC has certified seven in PR66 Cameo with 21 finer. (#5679)

- 3680 1894 PR63 Cameo PCGS.** Fully frosted devices stand out vividly from the deep mirror fields to create powerful contrast and resulting visual appeal. Only 972 proofs were struck of the 1894 quarter, and the present coin is a highly satisfactory representative. Population: 8 in 63, 58 finer (4/12). (#85680)

**1900 Quarter, Brightly Mirrored PR66
Popular Turn-of-the-Century Date**

- 3681 1900 PR66 PCGS. CAC.** The 1900 quarter was generously minted with 912 pieces produced. However, there are never enough high-grade survivors to satisfy all who wish an example of this first year of the new century. The mirrored fields backlight the blended rose and blue toning on the obverse, while on the reverse a significant band of original brilliance remains with iridescent toning above and below. Population: 23 in 66, 7 finer (4/12). (#5686)

Deeply Toned PR67 1903 Quarter

- 3682 1903 PR67 PCGS.** Under a lamp the deep toning on this piece resolves into a pinkish-gold central obverse with steel-blue at the margins, while the reverse offers more aqua tinges in a uniform manner. A few tiny hairlines in the right obverse field are perhaps all that preclude an even finer grade. Population: 17 in 67, 1 finer (4/12). (#5689)

Ice-White 1903 Quarter, PR67 Cameo

- 3683 1903 PR67 Cameo PCGS.** A flick of the wrist makes the surfaces "fade" to the desired silver-on-black contrast on this pristine proof, which appears to verge on a Deep Cameo designation. There is no sign of toning on this ice-white piece, and a loupe reveals a full struck and no mentionable distractions whatsoever. Population: 10 in 67 Cameo, 3 finer (4/12). (#85694)

- 3684 1908 PR65 NGC.** Strong gold influences with a light silver shade at the centers and blue on the rims. Better-contrasted than usually seen, though not to a Cameo standard. Census: 32 in 65, 52 finer (4/12). (#5694)

**Pastel-Toned 1908 Quarter
Reflective PR67 Cameo**

- 3685 1908 PR67 Cameo PCGS. CAC.** Moderate pastel toning on each side fails to defeat a Cameo designation for the good field-device contrast present. Light hues of gold, copper, and jade congregate mostly at the rims on this highly reflective Superb Gem proof, one of only 545 made in the waning years of the series. Population: 3 in 67 Cameo, 0 finer (4/12). (#85694)

**Spectacularly Toned PR68 1911 Quarter
A Great Type Coin**

- 3686 1911 PR68 PCGS. Ex: Larry Shapiro.** The 1911 Barber quarter mintage was reported at 543 coins, among the smaller totals in the entire proof run from 1892 through 1915. This Superb Gem in any case lives in the upper echelon of survivors aesthetically as well as numerically, a great toned type coin. The surfaces exhibit pristine preservation, with the obverse palette comprising blue and gold-rose toning intermixed with a brilliant arc in the right field. The reverse takes a more traditional approach, greenish-yellow and rose toning evenly covering the surfaces. Despite the intense color, the surfaces are brightly mirrored. A spectacular proof coin with the Larry Shapiro pedigree. Population: 4 in 68, 0 finer (4/12). (#5697)

3687 1913 PR64 PCGS. If certified today, this green-label PCGS coin almost certainly would be in line for a Cameo designation. Bands of gold, blue, and green outer toning frame silver interiors.
From The Lance Gage Collection. (#5699)

STANDING LIBERTY QUARTERS

1916 Quarter, VG8 Standing Liberty Key

3688 1916 VG8 NGC. The obverse of this key Standing Liberty quarter has outlined devices, with a few feather details visible in the wings on the reverse. Just enough of the date remains for positive identification of this scarce issue, surviving from a minuscule mintage of 52,000 coins. (#5704)

1916 Standing Liberty Quarter, VG8 Details Sought-After Key

3689 1916 — Rims Damaged — ANACS Details. VG8. The 1916 Standing Liberty quarter boasts an extremely low mintage for a 20th century coin, and collectors prize any example of the date, regardless of grade or condition. This well-worn example features a legible date and the major design elements are still intact, at least in outline. (#5704)

Choice AU 1916 Standing Liberty Quarter First-Year Key

3690 1916 AU55 NGC. Only 52,000 Standing Liberty quarters were struck in 1916, the first year of the design. This attractive Choice AU specimen shows just a touch of high-point wear on design elements that display a better-than-average strike for the issue. The surfaces retain much of their original mint luster and exhibit a few hints of pale gold toning. (#5704)

1916 Standing Liberty Quarter Originally Toned MS62 Full Head Example

3691 1916 MS62 Full Head NGC. The clear ear hole and separation of Liberty's hair all along the brow appear to meet the minimum requirement for Full Head status. Some of the rivets are softly struck, as usual for the issue, and gold and charcoal-gray patina predominates on both sides. A couple of obverse scrapes are noted, a thin mark through Liberty's midsection and a short deep nick just above and right of the topmost star on the left side of the gate. An affordable Mint State specimen of this key issue.
Ex: Los Angeles Signature (Heritage, 8/2009), lot 689. (#5705)

**1916 Standing Liberty Quarter
MS63 Full Head, Untoned Surfaces**

- 3692 1916 MS63 Full Head NGC.** This untoned and satiny key date quarter has a splendidly unabraded obverse, and the reverse is also well preserved, aside from a quartet of minuscule ticks localized to the eagle's beak. No striking softness is evident, and the piece presents a clean and new appearance worthy of an advanced collection. The 1916 is sought after not only by date and mint collectors in the Standing Liberty series, but also by those who acquire key dates throughout all series. Although dated 1916, the issue was not released into circulation until early 1917, where it soon blended in with the various and prolific 1917 Type One issues. Clearly, a few 1916 pieces were set aside by collectors and the curious, but the vast majority remained in circulation for some time, to the extent that the date wore off and only series experts aware of 1916 subtype distinctions could recognize their importance. Mint State examples are scarce and treasured by the numismatic community.
Ex: Dallas Signature (Heritage, 11/2005), lot 2114; Long Beach Signature (Heritage, 2/2006), lot 1009. (#5705)

- 3693 1917 Type One MS66 Full Head PCGS. CAC.** A subtly frosted and high-end Premium Gem Full Head example of the popular type issue. Delicate gold and blue overtones grant considerable eye appeal. (#5707)

**Fully Struck 1917 Type One Quarter
Untoned MS67 Full Head**

- 3694 1917 Type One MS67 Full Head NGC.** The 1917 Type One Standing Liberty quarters are in reality an entirely different subtype from the 1916-dated quarters, and when fully struck they are the most spectacularly produced coins in the whole series. This piece displays 30 full shield rivets, and the strike appears to fully encompass every detail on both sides, far surpassing the mere head. The mattelike surfaces radiate generous luster with little trace of color. Census: 58 in 67 (1 in 67+) Full Head, 0 finer (4/12). (#5707)

**1917 Type One Quarter, MS67 Full Head
Original Hermon MacNeil Design Intent**

- 3695 1917 Type One MS67 Full Head PCGS. CAC.** This Superb Gem example of an ever-popular two-year silver type coin is enriched by diffuse amber-gold hugging the peripheries on both sides. The strike, as defined by Liberty's face and upper body, is outstanding and shows Hermon MacNeil's design as the artist originally intended it to appear. The lustrous surfaces are devoid of visible abrasions. Certified in a green-label holder, this coin represents the highest grade assigned by PCGS, one of 62 submissions in MS67 Full Head (4/12).
Ex: Long Beach Signature (Heritage, 9/2008), lot 1961. (#5707)

- 3696 1917-D Type One MS65 Full Head PCGS. CAC.** Booming luster, a bold strike, and an absence of abrasions confirm the quality of this introductory year Denver Mint Gem. A couple of tiny reverse spots preclude perfection. Encapsulated in a green label holder. (#5709)

**1917-D Type One Quarter, MS67 Full Head
Subtle Iridescent Toning on Each Side**

- 3697 1917-D Type One MS67 Full Head PCGS. CAC.** Powder-blue, golden-brown, and rose-red toning adorns this lustrous and sharply impressed Superb Gem. Smooth aside from a solitary hair-thin vertical line beneath TRVST. The sole Denver issue of the design subtype, with a much lower mintage than its Philadelphia cousin. Population: 18 in 67 Full Head, 0 finer (4/12). (#5709)

3698 1917-S Type One MS65 NGC. Light golden patina overall with stark silver brilliance in two vertical streaks over the eagle's wings. Liberty's shield is better-defined than her head, which falls just short of Full Head details. Census: 23 in 65, 14 finer (4/12). (#5710)

3699 1917-S Type One MS65 Full Head NGC. Dusky violet and burnt-orange hues enrich this Type One quarter from the sole such issue struck at San Francisco. Great detail with subtle eye appeal. (#5711)

3700 1917 Type Two MS66 Full Head PCGS. CAC. Silver-blue through the centers with gold-orange at the edges. A few deeper spots are noted below the eagle's well-defined body. Population: 66 in 66 (1 in 66+) Full Head, 7 finer (4/12). (#5715)

1917-D Quarter, MS65 Full Head First Type Two Date

3701 1917-D Type Two MS65 Full Head NGC. The Type Two Standing Liberty quarter debuted in 1917, and this spectacular D-mint Gem is an outstanding example of the type. This coin is sharply detailed, with Full Head definition, and just a touch of softness on two shield rivets. The surfaces are accented with pale gold toning and both sides exhibit vibrant mint luster. Census: 30 in 65 Full Head, 8 finer (4/12). (#5717)

3702 1917-S Type Two MS65 PCGS. A pleasingly lustrous Gem under partial gold and charcoal patina with windows of bright silver. This Gem is softly struck (as usual) on Liberty's head and shield, but the overall eye appeal is solid. Population: 67 in 65, 16 finer (4/12). (#5718)

3703 1917-S Type Two MS66 NGC. CAC. Bold gold-orange patina at the margins with a succession of blues across the lustrous centers. A softly struck but appealing Premium Gem. Census: 15 in 66, 1 finer (4/12). (#5718)

1918/7-S Quarter, Fine 12 Clear Overdate

3704 1918/7-S Fine 12 NGC. CAC. FS-101. The budget-minded collector should give this piece careful consideration, as lower grade certified overdate quarters are rarely encountered. The design is part of the reason, since the date quickly wore down, obliterating the actual overdate feature. However, it is clearly visible on this attractive natural gray example. The surfaces are smooth and virtually mark-free. A pleasing specimen for the grade. (#5726)

Extremely Fine 1918/7-S Quarter Pale Gray Patina

3705 1918/7-S XF40 PCGS. CAC. FS-101. Gunmetal-gray centers are framed by faint tan toning. Luster emerges from protected regions, and the crossbar and downstroke of the underdigit 7 are apparent. Imperfections are minimal and limited to a tick on the mailed bust and a small spot above the tail feathers. (#5726)

3706 1919 MS65 Full Head PCGS. CAC. Well-defined overall with complete rivets on the shield. Light blue and green-gold accents visit flashy fields. A quality Philadelphia Type Two type coin. (#5729)

3707 1919-D AU58 NGC. A lightly worn example of this popular mintmarked issue, silver-gray through the centers with gold and violet elements along the rims. Liberty's head and the lower shield show softness.
From The JG Collection, Part Two. (#5730)

3708 1919-D MS63 PCGS. This little-saved date of fewer than 2 million pieces is recognized as conditionally scarce any better than this Select coin. Gold-to-umber patina appears at the margins of the luminous obverse and across most of the reverse. Typical striking softness at Liberty's head and the eagle's body. (#5730)

1920-S Quarter Dollar, MS64 Full Head Rarely Finer

3709 1920-S MS64 Full Head PCGS. This amazing Choice Mint State specimen has full head details, and similar examples are rarely encountered. This is a strike rarity in the series. Both sides have frosty silver luster with entirely untuned surfaces. Population: 31 in 64 Full Head, 23 finer (4/12). (#5739)

**Premium Gem 1921 Quarter
Full Shield Rivets, None Finer at PCGS**

3710 1921 MS66 PCGS. Series specialists are well-acquainted with the 1921 Standing Liberty quarter, a conditional rarity in high grades and a low-mintage Philadelphia issue to boot. This Premium Gem is certified in a PCGS green-label holder and displays remarkable eye appeal. Even though the head details are insufficiently brought up for a Full Head designation, *the shield rivets and chain mail covering the bosom are all bold.* The obverse is generously toned in pink-orange patina, while the reverse is silver-gray with olive accents. Both sides show generous satin luster. A super example of this elusive date. Non-Full Head Standing Liberty quarters may represent a significant collecting opportunity. Population: 18 in 66, 0 finer (4/12). (#5740)

3711 1923 MS66 PCGS. CAC. From silver-gray to gold and verging on orange, this Premium Gem has an intriguing mix of patina and its lack. Bluntly struck on Liberty's head, though the rivets of the shield are sharp. (#5742)

3712 1923-S XF40 NGC. Gold-to-gray and violet elements are most prominent, the latter appearing as wedges and bars. Distinctly worn but still an important survivor of its issue of just 1.36 million pieces. *From The JG Collection, Part Two.* (#5744)

**Premium Gem 1923-S Quarter
Boldly Lustrous and Virtually Pristine**

3713 1923-S MS66 PCGS. Even without the Full Head designation, the present Premium Gem 1923-S quarter is a remarkable condition rarity at this level of preservation. The average certified survivor is only Choice XF or thereabouts. Bold cartwheel luster radiates from gleaming silver-white surfaces that show little trace of color. Contact marks are scattered and minor, but the eye appeal is major. Population: 24 in 66, 5 finer (4/12). (#5744)

**Pinkish-Gold 1923-S Quarter
MS62 Full Head**

3714 1923-S MS62 Full Head PCGS. This piece appears to meet the minimum requirements for a Full head designation, with Liberty's ear hole visible, the curl of hair above discernible and complete forehead separation. A few minor scrapes in the fields define the numeric grade. Generous mint luster emanates from the pinkish-gold-toned surfaces. (#5745)

**Frosty 1926-D Quarter, MS64 Full Head
Seldom Seen Finer**

3715 1926-D MS64 Full Head NGC. CAC. The 1926-D quarter is elusive with Full Head detail and boasts a relatively low mintage of 2.7 million pieces. This near-Gem certainly qualifies for the designation, though a trace of striking softness is seen on Liberty's shield. The faintest blush of central gold toning appears on the deeply frosty fields. Census: 17 in 64 Full Head, 9 finer (4/12). *Ex: Dallas Signature Sale (Heritage, 10/2009), lot 596.* (#5757)

3716 1927-S XF45 NGC. As the key to the regular issue Standing Liberty quarter series, the 1927-S is eagerly sought out in all grades. This piece has even wear over the high points and there is an even amount of gray-golden toning over each side. (#5764)

3717 1927-S AU50 ANACS. A briefly circulated example of the famously low-mintage mintmarked Standing Liberty quarter issue. Violet and orange peripheral toning surrounds still-luminous silver interiors. Housed in a small-format ANACS holder. (#5764)

**1927-S Quarter, MS63
Key Standing Liberty Issue**

3718 1927-S MS63 PCGS. A series key, the 1927-S is rarely encountered in grades better than Fine. The mintage of 396,000 explains the rarity of this issue. The Select Mint State example offered here is highly lustrous with brilliant silver surfaces and a few trivial splashes of iridescent toning. The head and shield details are indistinct as usual. (#5764)

- 3719 1928 MS65 Full Head PCGS.** Blazing luster radiates from silver-gold mattelike surfaces with an impeccable strike and lots of eye appeal. Even a loupe reveals no consequential contact. Population: 77 in 65 (1 in 65+) Full Head, 34 finer (4/12). (#5767)

**Superb Gem 1928-S Quarter, Full Head
Only Two Finer Coins at NGC**

- 3720 1928-S MS67 Full Head NGC.** The 1928-S Standing Liberty quarter is somewhat difficult to locate with Full Head definition. This Superb Gem Full Head also shows sharp detail in the vertical shield lines and in the chain mail. The radiantly lustrous silvery surfaces are nearly untuned save for the slightest hint of gold color on the lower left obverse margin. Census: 35 in 67 Full Head, 2 finer (4/12). (#5771)

- 3721 1929 MS66 Full Head PCGS. CAC.** In addition to the sharp head details, every individual rivet in the shield is visible on this Premium Gem. Both sides are brilliant and untuned with frosty silver luster. (#5773)

- 3722 1929 MS66 Full Head PCGS. CAC.** A wealth of boldly reflective silver luster drenches both sides of a late date of the Standing Liberty series not generally noted for Full Head designation. Locating a more satisfying example would be a chore. Population: 94 in 66 (5 in 66+) Full Head, 7 finer (4/12). (#5773)

- 3723 1930-S MS66 Full Head PCGS.** Splendid steel-gray and golden-brown colors enrich the unblemished fields and devices. A lustrous premium Gem, crisply struck and certified in a green label holder. Population: 87 in 66 (1 in 66+) Full Head, 17 finer (4/12).
Ex: Long Beach Signature (Heritage, 2/2006), lot 1096, which realized \$1,092.50. (#5781)

WASHINGTON QUARTERS

- 3724 1932 MS66 PCGS. CAC.** A well-detailed Premium Gem from the first year of the Washington quarter design, this coin displays lustrous surfaces under shades of green, blue, and amber toning PCGS has graded only two coins in higher numeric grades (4/12). (#5790)

**Choice 1932-D Washington Quarter
Key Date With Excellent Eye Appeal**

- 3725 1932-D MS64 PCGS.** The 1932-D Washington quarter is the most challenging issue of the series in high grade. This impressive Choice example displays sharply detailed design elements and vibrant mint luster, with only a few minor contact marks. The surfaces are enhanced by attractive shades of champagne-gold and ice-blue toning on both sides. Eye appeal is outstanding. (#5791)

1932-D Washington Quarter, MS65 Original and Gently Toned

- 3726 1932-D MS65 PCGS.** The key first-year Washington quarter issue, the 1932-D is notoriously difficult to obtain in Gem condition, even though fewer examples were made of the 1932-S. The present Gem 1932-D is fully original and obviously has been carefully cared for since it left the Denver Mint. Left to undergo natural toning, it now displays an overall sheen of handsome tawny gold that coalesces at the peripheries. Careful study finds no contact marks on its smooth and lustrous surfaces. PCGS has certified several dozen submissions at the Gem level, with only a single MS66 finer (4/12).
Ex: New York Signature (Heritage, 7/2004), lot 6244, which brought \$22,425. (#5791)

**Gem 1932-D Quarter
First-Year Low-Mintage Key**

3727 1932-D MS65 PCGS. In the first year of the Washington quarter design, a modest production of 436,800 pieces was accomplished at the Denver Mint, the second-lowest mintage of the series, behind the 1932-S. However, the 1932-D is much more difficult to locate in Gem condition than the 1932-S. The Denver coins were roughly handled in storage and most Mint State examples seen today are extensively bagmarked, accounting for the scarcity of high-grade specimens. The present coin is one of the few Gem survivors, displaying well-detailed design elements, vibrant mint luster, and accents of golden-tan and amber toning. The surfaces show no significant signs of contact. Population: 63 in 65, 1 finer (4/12). (#5791)

3728 1932-S MS64 PCGS. Frosty luster is largely silver with hints of gold-to-green visiting the rims. A pleasing example of this popular first-year key date of just 408,000 pieces. (#5792)

3729 1932-S MS64 PCGS. This near-Gem key Washington quarter is brilliant with glints of gold and well-struck, save for softness on the motto. A few marks on Washington's cheek define the grade. (#5792)

3730 1932-S MS64+ NGC. This coin is the epitome of "near-Gem," for erasing even one or two of the small marks on the jawline might be enough to elevate its grade. Iridescent peripheral toning fades into silver at the large center obverse and peach on the smaller reverse interior. (#5792)

**1932-S Washington Quarter, MS65
Marvelous Low-Mintage Issue**

3731 1932-S MS65 PCGS. Brilliant cartwheel surfaces show an occasional dash of light color when examined under a glass. Exceptionally bright, frosty mint luster saturates both sides of this lovely, problem-free Gem example of a low-mintage first-year issue. PCGS has only graded four coins in higher numeric grade (4/12). Ex: *Pittsburgh Signature (Heritage, 8/2004), lot 6097.* (#5792)

**Gem 1932-S Washington Quarter
Low-Mintage First-Year Key**

3732 1932-S MS65 PCGS. The Washington quarter design was introduced in 1932, and the 1932-S claims the lowest mintage of the series, at 408,000 pieces. This attractive Gem exhibits well-detailed design elements, with lustrous surfaces and pleasing shades of champagne-gold and lavender toning. PCGS has certified only four coins in higher numeric grades (4/12). (#5792)

**Gem Doubled Die 1934 Quarter, FS-101
Famous Guide Book Variety**

3733 1934 Doubled Die Obverse MS65 PCGS. CAC. FS-101. The most prominent doubled die of the Washington quarter series. LIBERTY and the date have very thick letters, but the Motto shows the most dramatic doubling. The present lustrous stone-gray Gem is well struck and impressively unabraded. Population: 19 in 65 (1 in 65+), 11 finer (4/12). (#5795)

3734 1935-S MS67 NGC. Crisply struck with bold satin luster and faint streaks of gold patina on each side. The impressively preserved surfaces only reveal a couple of minuscule tick marks in Washington's hair and are pristine otherwise. Census: 30 in 67, 0 finer (4/12). Ex: *Houston Signature (Heritage, 11/2007), lot 60843.* (#5799)

- 3735 1936-D MS65 PCGS.** Noted for its conditional rarity, the 1936-D is a find in Gem quality. Light olive and stone-gray toning graces lustrous and only faintly abraded surfaces. Certified in an old green label holder. (#5801)
- 3736 1936-S MS67 NGC.** This immaculate and lustrous early branch mint Superb Gem displays richly variegated apple-green and rose-red toning. Housed in a prior generation holder. Census: 11 in 67 (2 in 67 ★), 0 finer (4/12). (#5802)
- 3737 1949 MS67 PCGS. CAC.** Bold gold-orange patina with dots of crimson occupies the margins on this Superb Gem. The interiors are silver at the base but have elements of blue and violet-rose intermixed. Population: 37 in 67 (1 in 67+), 1 finer (4/12). (#5839)
- 3738 1950-D/S MS64 NGC. CAC. FS-601.** A bold later-date overmintmark that was discovered and publicized some time after its issue, when circulation had severely reduced the number of Mint State examples. The present untuned, satiny coin represents a distinctly high grade for this popular *Guide Book* variety, which also has a 1950-S/D counterpart. Census: 15 in 64, 7 finer (4/12). (#5843)

PROOF WASHINGTON QUARTERS

- 3739 1936 PR66 PCGS.** Warm silver-gray patina yields to bright orange-gold toning on the right side of the obverse and upper reverse peripheries. A blemish-free representative of this first-year proof quarter.
Ex: *Santa Clara Signature (Heritage, 11/2001)*, lot 5747. (#5975)

1936 Quarter Dollar, PR67 Obsolete 'W' Designation

- 3740 1936 PR67 NGC.** A fully struck and marvelously reflective proof that is entirely untuned and absolutely brilliant across both sides, as indicated by the now-obsolete "W" designation (for White). This was the first year of issue for modern proofs, and the quarter had the lowest official mintage of the five denominations struck that year, at a mere 3,837 pieces. A beautiful Superb Gem example of the key proof Washington quarter issue. Census: 20 in 67, 0 finer (4/12). (#5975)
- 3741 1937 PR67 PCGS. CAC.** The reflective surfaces are brilliant silver-white save for a small rim accent of iridescence at the lower obverse and correspondingly at the upper reverse. Population: 81 in 67 (1 in 67+), 2 finer (4/12). (#5976)
- 3742 1937 PR67 PCGS. CAC.** Original apricot-gray toning enriches this beautiful second-year proof Washington quarter. Razor-sharp striking details and impeccable surface preservation confirm its status as a Superb Gem.
Ex: *Palm Beach Signature (Heritage, 11/2004)*, lot 6844; *FUN Signature (Heritage, 1/2006)*, lot 2584. (#5976)

- 3743 1941 PR68 NGC.** The ice-white surfaces are totally immaculate and show no trace of contrast or other color. Superb eye appeal for this later Washington quarter proof, struck in an amount slightly exceeding 15,000 pieces. Tied for finest certified. Census: 25 in 68, 0 finer (4/12). (#5980)

1941 Washington Quarter, PR68 Sole Finest at PCGS

- 3744 1941 PR68 PCGS. CAC.** The deeply reflective surfaces on this piece — the *sole finest certified at PCGS* — could pass for a looking-glass, despite the most imperceptible hints of lime, pink, and gold that appear on the obverse at certain angles. As expected of the grade, even a loupe reveals no sign of contact. One of slightly more than 15,000 proofs struck. Population: 1 in 68, 0 finer (4/12). (#5980)
- 3745 1956 PR69 Deep Cameo PCGS.** Boldly contrasted and practically flawless. Only a couple of minuscule dots of milky patina preclude a perfect black-and-white effect. Population: 40 in 69 Deep Cameo, 0 finer (4/12). (#95988)

EARLY HALF DOLLARS

1794 O-105 Half Dollar, AG3

- 3746 1794 AG3 PCGS. O-105a, R.5** This first-year half dollar is extensively worn, showing light to moderate scratches on each side. The surfaces combine light silver-gray with deeper steel toning, presenting a natural appearance. The obverse has a full date and outlined bust, with LIBERTY and the right-side stars merged into the border. The reverse shows most of the legend, part of the wreath, and part of the eagle. (#6051)

**1794 O-102 Half, Good 6
Only 14 Known**

- 3747 1794 Good 6 PCGS. O-102, High R.6.** A rare 1794 variety, and the present piece shows about the same detail as the plate coin in the fourth edition of Overton. This piece has an old scratch in the left obverse field, but otherwise is nearly problem free. The obverse is deeply toned in steel, charcoal, and olive-gray, while the reverse is lighter gray with darker peripheral toning.

Auction and census records suggest that just 14 or 15 examples are known in all grades. This piece apparently ranks a little below average among the limited population. (#6051)

Very Good 1794 Half Dollar, O-101a

- 3748 1794 VG8 NGC. O-101a, R.4.** The introductory date of the half dollar denomination, and much scarcer than its 1795 successor, the only other date of the Flowing Hair type. The present lilac-gray and caramel-gold example has clear stars and legends, except for the date which is faint though all four digits are readable. Only lightly abraded save for a minor obverse rim nick at 7 o'clock. (#6051)

**1794 O-101 Half Dollar, VG10
Two-Tone Reverse**

- 3749 1794 VG10 PCGS. O-101, R.4.** This wholesome example will please the specialist as well as the date or type collector. The surfaces have natural pale gray color that is deeper in the reverse fields, creating a two tone effect on the reverse. A thin scratch is revealed across Liberty's head only when caught in the right angle of light. The usual die crack from the rim to wreath between D and S is clearly visible on this example. An attractive coin for the grade. (#6051)

- 3750 1795 2 Leaves Genuine PCGS. O-131, High R.4.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen with environmental damage that has been cleaned. The borders are intermittently granular with blue-gray verdigris and the central reverse has pebbled appearance. Moderately hairlined, but all letters and stars are clear. (#6052)

- 3751 1795 2 Leaves Good 4 PCGS. O-113a, R.4.** A stone-gray and caramel-gold Flowing Hair type coin. On the obverse, all stars and letters are well outlined. STATES and AMERICA have a few faint letters. Lightly hairlined but without noticeable abrasions or rim detractions. (#6052)

- 3752 1795 2 Leaves Good 6 ANACS. O-105, High R.3.** This Flowing Hair type coin is toned cream-gray to pale tan-gold with deeper blue-gray near the rims. The legends and stars are clear. A few old marks on the reverse are of little consequence. (#6052)

- 3753 1795 2 Leaves VG10 PCGS. O-109, R.4.** The pearl-gray centers are bounded by peripheral sea-green and golden-brown. An unblemished example with clear legends and a few lightly defined left-side stars. (#6052)

**1795 O-110 Half Dollar, VF25
Two Leaves Reverse**

- 3754 1795 2 Leaves VF25 NGC. O-110, R.3.** Only three of the 31 known 1795 half dollar varieties are rated R.3, the balance carrying higher rarity ratings. Varieties O-105, 110, and 113 are the three common die marriages, and those are the varieties most frequently chosen for date or type collections. This pewter-gray and charcoal example has delicate golden overtones with trivial marks including minor rim nicks at the upper obverse. (#6052)

1795 O-131 Half Dollar, VF25
Usual Two Leaves Reverse

3755 1795 2 Leaves VF25 NGC. O-131, High R.4. Relatively common among 1795 half dollars, the O-131 is ideal for a date or type set. This mid-grade specimen has pewter-gray surfaces that darken near the borders. Both sides have myriad handling marks in addition to a small lamination defect in the left obverse field. (#6052)

1795 O-103 Half Dollar, AU50
Low Condition Census

3756 1795 2 Leaves AU50 PCGS. CAC. O-103, R.5. An early die state with obverse and reverse cracks, before the heavy rim break formed on AME. The fourth edition Overton census reads (45, 40, 40, 30, 30), that list representing coins in a few collections known to the editor. A small number of AU coins are also known, including this AU50 PCGS specimen that we believe is the fourth or fifth finest existing O-103 half dollar. It is quite distinctive with mottled iridescence over the pewter-gray obverse. The reverse has gold and steel toning over its pewter-gray surface. Population: 19 in 50, 68 finer (4/12), for all 1795 Two Leaves varieties. (#6052)

1797 Half Dollar, O-102, VF Details
Key to a Type or Date/Variety Collection

3757 1797 — Repaired — NGC Details. VF. O-102, Low R.6. The present offering may not be especially pretty, but it is a Draped Bust Small Eagle half dollar, and a 1797 O-102 at that, the scarcest of the four Overton varieties. Even low-grade 1796-1797 halves, including those with impairments, are realizing five-figure prices in the present market.

This VF Details specimen displays light gray centers that transition to slightly darker gray patina imbued with hints of brown at the borders. Liberty's hair shows relatively good detail, though some of it may have been strengthened. What little feather detail there is on the wings may also represent some strengthening, which is quite possibly the case on the right (facing) claw as well. Small pock marks are visible on each side, somewhat more on the obverse central motif, and some smoothing has likely occurred on both sides.

Our ongoing research on the 1796-1797 half dollar series finds that impairments such as those indicated are not uncommon. Indeed, fully one-third of the specimens we have cataloged or whose images we have examined from other sources reveal one or more problems. Consequently, any Small Eagle half, being the key to an advanced type or early half dollar date/variety collection, will continue to find a home, regardless of grade or impairments.

3758 1806 Pointed 6, No Stem VF30 PCGS. O-109, R.1. Medium caramel-gold and pearl-gray embrace this midgrade Draped Bust type coin. Traces of luster are present though the devices display expected wear. The glossy surfaces are unblemished save for minor marks near the L in LIBERTY.(#6073)

3759 1806 6 Over Inverted 6 VF25 PCGS. O-112, R.4. This better variety representative features deep stone-gray and tobacco-brown toning. All letters in E PLURIBUS UNUM are clear, and marks are surprisingly absent. The bisecting obverse die crack is usual for O-112.(#6078)

**1806 O-110 Half Dollar, XF40 Details
Obverse Retained Cud**

3760 1806 Pointed 6, Stem — On Defective Blank, Heavily Scratched — ANACS. XF40 Details. O-110, R.6. A rare die variety. This late die state has the area between two obverse die cracks raised to form a retained cud in the right obverse field. Light gray surfaces show hints of pale blue toning. A planchet defect is evident at 2 o'clock on the obverse and 4 o'clock on the reverse, while the obverse has a light vertical scratch and a heavy horizontal scratch, both crossing the entire coin.
From The JG Collection, Part Two.

3761 1806 Pointed 6, Stem — Improperly Cleaned, Obverse Scratch — NGC Details. XF. O-116, R.3. A brief thin scratch on the upper right obverse field fails to distract, and the coin is only mildly bright from dipping. Luster illuminates design elements and the eye appeal is better than the NGC notations imply.(#6071)

3762 1806 Pointed 6, Stem XF45 NGC. O-116, R.3. A lovely slate-gray piece that displays a consistent strike and an unblemished reverse. Smooth aside from a pair of light thin marks beneath the ribbon. For O-116, the T in LIBERTY is widely repunched, and a die crack connects the tops of UNITED.
Ex: Palm Beach Signature (Heritage, 3/2006), lot 855. (#6071)

3763 1807 Draped Bust XF45 NGC. CAC. O-110a, R.3. Pockets of bright luster illuminate design elements of this Choice XF early half dollar. The smooth surfaces exhibit dusky stone-gray and autumn-gold toning. A later die state with a descending crack through the second S in STATES.(#6079)

BUST HALF DOLLARS

3764 1807 Large Stars, 50 Over 20 VF35 PCGS. O-112, R.1. This silver-gray representative displays copious luster for the Choice VF level, though the devices exhibit moderate wear. One thin mark noted near star 6, and wispy abrasions are seen near star 8 and beneath the right (facing) wing.(#6086)

3765 1807 Large Stars, 50 Over 20 XF45 PCGS. O-112, R.1. This blundered die variety was created when the die sinker began to enter the denomination as 25C instead of 50C. The present piece has light pearl-gray and caramel-gold toning. Unmarked with pleasing sharpness.(#6086)

Well Struck MS62 1808/7 Half, O-101

3766 1808/7 MS62 PCGS. O-101, R.1. The sole Overton variety of this clear overdate. The crossbar and the flag of the 7 emerge beneath a loupe. This is a dusky representative with blended gunmetal-gray and olive-green toning. Satin luster shimmers across design elements. Careful evaluation locates only unimportant marks. Population: 4 in 62, 15 finer (4/12). (#6091)

Patinated MS61+ 1808 Half, O-102a

3767 1808 MS61+ NGC. O-102a, R.2. The lengthy die crack left of the 0 in the date determines the later Overton die state. This sharply struck representative displays cartwheel sheen throughout the dusky steel-blue and caramel-gold surfaces. Smooth aside from a hair-thin mark on Liberty's neck. (#6090)

3768 1811 Small 8 AU58 NGC. O-110, R.1. Olive-gray and caramel-gold encompass this partly lustrous near-Mint representative. The toning is slightly deeper on the reverse. Devoid of noticeable marks, and the strike is sharp except on stars 4 through 7.(#6097)

**1812 O-110b Half Dollar, AU55
Single Leaf Die State**

3769 1812 AU55 NGC. O-110b, R.6. Single Leaf. Although the O-110 die marriage is common, rated R.1, examples of the latest die state are major rarities with less than 20 known in all grades. The reverse die is cracked through UNITED STATE to the scroll, continuing to the R in AMERICA. That die is also lapped, creating the rare and popular Single Leaf die state. This is one of only a few die states that enjoy a separate listing in the *Guide Book*.

Stephen Herrman's auction analysis of early half dollar varieties shows that just seven examples have been sold at auction over the last 15 years, and among those, an XF40 is the finest. This piece is far finer with a trace of high-point wear on the ivory and golden toned surfaces, showing iridescent highlights. A remarkable opportunity for the specialist. (#6100)

3770 1812 AU58 NGC. O-110a, R.1. Deep golden-brown and gunmetal-gray toning encompasses this satiny and sharply struck near-Mint half dollar. Faint roller marks on the obverse exergue are mint-made. One minor edge ding noted at 5 o'clock on the reverse. (#6100)

3771 1812 AU58 NGC. CAC. O-103, R.1. Golden-brown and gunmetal-blue toning drapes this partly lustrous and unmarked Capped Bust type coin. Parallel die lines beneath the beak attribute the Overton marriage. (#6100)

Choice O-105a 1812 Half Dollar

3772 1812 MS64 NGC. O-105a, R.2. A lustrous and nearly mark-free Choice half dollar with even and medium olive-gray and chestnut-toning. A sharply struck and desirable Capped Bust type coin. Lengthy die cracks on the left obverse and a double denticle at 4 o'clock on the reverse combine to determine the Overton variety. (#6100)

**1812 O-103 Half Dollar, MS64
Diagnostic Reverse Die Lines**

3773 1812 MS64 PCGS. CAC. O-103, R.1. The reverse has fine vertical die lines in the circular area bounded by the eagle's beak, neck, and left (facing) wing. Frosty silver luster on both sides of this Choice Mint State specimen shine through ivory and delicate gold toning that is light on the obverse and thicker on the reverse. Population: 50 in 64 (1 in 64+), 26 finer (4/12), for all 1812 varieties. (#6100)

3774 1813 50C Over UNI XF45 PCGS. CAC. O-101, R.2. This dusky stone-gray half dollar displays moderate wear and is smooth aside from a few thin marks beneath UNUM. A die engraving blunder, UNI was entered, then the work was apparently shelved until a later date when engraving began anew. (#6104)

3775 1813 MS61 NGC. O-102, R.4. Dr. Glenn Peterson designates O-102 as the "ear bars" variety in his ever-useful bust half attribution guide. The "bars" are clash marks from the shield. The present satiny piece exhibits rich orange-brown, mauve-red, and blue-green patina. No relevant marks are discovered beneath a loupe. (#6103)

1814 O-103 Half Dollar, MS65
Reverse Die Ridge

3776 1814 MS65 PCGS. CAC. O-103, R.1. A heavy reverse defect line extends vertically from the scroll to the left (facing) wing, providing instant identification of the O-103 die marriage. There are several Gem or finer examples of this variety known, along with several high grade examples of other 1814 varieties. These coins are excellent candidates for date or type collectors, as well as variety specialists.

Imperfectly centered, this piece appears to be an early die state with no evidence of the obverse clash marks mentioned in the Overton reference. Although somewhat indistinct in places, this Gem has virtually flawless ivory surfaces with satin luster beneath gray-brown and iridescent toning. A sensational specimen for the connoisseur. Population: 13 in 65, 3 finer (4/12). (#6105)

MS68 ★ 1814 Half Dollar, O-103
Marvelous Preservation and Toning

3777 1814 MS68 ★ NGC. O-103, R.1. This available die pairing is recognized on the obverse by star 7, which has one point at the juncture of the upper and lower curls on Liberty's forehead. Most examples, including the present one, show die clashing in obverse fields. Multiple vertical die lines run down to the rim from below the forward portion of the bust. On the reverse, a heavy defect ridge or die line runs from the scroll beneath the initial E, downward to the center of the left (facing) wing.

The half dollars of 1814 were produced in relatively large number for the time, some 1.04 million pieces. Those coins were produced using only eight obverse and nine reverse dies, combining to make nine known die marriages for the year. The dies were obviously pushed to the limits, and several varieties of 1814 are well-known for die clashes, breaks, die erosion, and the other ailments that overstressed dies can produce. The Overton reference notes that "the year 1814 produced some of the most severely clashed dies of the entire [Bust half] series."

The O-103 and O-108a varieties of the 1814 are the only two rated as R.1 or common, although others rank R.2, and only the O-106 is rare. In the case of this coin, however, the sheer commonness of the O-103 variety allows for the pure chance of a marvelous coin such as this to exist.

The mint luster, thick and frosted, displays abundantly evident through the toning. The centers are silver-gray, with a light accent of rose surrounded by cobalt-blue at the extreme margins on each side. As is the case for many 1814 half dollars, this piece is quite sharply struck (although, as the Overton reference points out, that sharp strike came at the expense of sharp die clashing when there was no intervening planchet). As demanded at this incredible grade level, there are no visible abrasions or adjustment marks, save for the aforementioned die clashing in the fields. (#6105)

Famous 1815/2 Half Dollar, O-101, MS62
Sole Die Pair for the Date

- 3778 1815/2 MS62 NGC. O-101, R.2. Though *clashed* through the denomination, this unworn example of the famous one-die-pair-only date does not have the elevating die *crack* that distinguishes the O-101a state. Long one of the most prized *Guide Book* varieties among Capped Bust half dollars, the 1815/2 overdate (which represents all 1815-dated halves) enjoys rarity in Mint State that transcends even its popular acclaim. Remarkably well-defined on the central devices, if soft on the stars, this luminous piece has great appeal thanks to gold, violet, and blue peripheral overtones enhancing medium-gray surfaces. Census: 7 in 62, 3 finer (4/12). (#6108)

Patinated MS62 1817/3 Half, O-101

- 3779 1817/3 MS62 NGC. O-101, R.3. A mildly prooflike example of this obvious overdate. Deeply toned walnut-brown, cobalt-blue, and gunmetal-gray. Evenly struck save for minor blending on the claws. Only minor field marks are present. An early die state without any sign of the eventually heavy die crack on the lower reverse. (#6111)

O-109 1817 Half Dollar, MS62

- 3780 1817 MS62 NGC. O-109, R.2. Repunching on the C in AMERICA and the O in OF helps attribute the Overton variety. A satiny representative with deep mauve and powder-blue toning. Well struck with minor blending of detail on the curl beneath the Y in LIBERTY. Unabraded except for a single small tick on the nose. (#6109)

- 3781 1819 AU58 NGC. O-112, R.3. This delightful near-Mint specimen exhibits bright-white luster, with soft gold toning on the peripheries. Well struck with no distracting marks, the present piece spent very little time in circulation. (#6117)

Dusky MS62 1819 Bust Half, O-110a

- 3782 1819 MS62 NGC. O-110a, R.3. Dusky caramel-gold and steel-blue embrace this satiny and evenly defined half dollar. Refreshingly devoid of marks. A repunched star 7 and a lengthy reverse peripheral die crack confirm the Overton subvariety. Although O-110a is merely scarce overall, in Mint State it is rare, given the paucity of Uncirculated appearances in Heritage auctions. (#6117)

**Satiny Choice 1820/19 Half Dollar
Square Base 2, O-101**

- 3783 1820/19 Square Base 2 MS64 NGC. O-101, R.2.** Vibrant navy-blue and orange-gold bands along the borders cede to lighter pearl-gray and chestnut centers. This satiny and well struck Choice half dollar is essentially void of abrasions save for a faint hair-thin line above the eagle's beak. The reverse periphery displays faint roller marks, as produced. 1820 is a bountiful year for *Guide Book* collectors due to six different listings. Overton lists two 1820/19 varieties, but they are readily distinguished. O-101 has a Square 2 and O-102 has a Curl 2. Combined NGC 1820/19 Census: 4 in 64, 3 finer (4/12). (#6125)

**Smooth MS63 1820 Half Dollar
Knob 2, Scarce O-104 Variety**

- 3784 1820 Square Base Knob 2, Large Date MS63 NGC. O-104, High R.4.** A satiny representative with cream-gray fields and devices. The borders offer deeper lilac, tan, and olive patina. Sharply struck and exceptionally void of marks. Likely within the Condition Census for the variety, though Heritage auctioned a PCGS MS64 example back in 2001. Most Knob 2 1820 halves are O-105. (#6122)

- 3785 1821 AU58 NGC. O-105, R.1.** Light olive-gold toning graces the borders of this generally lustrous Capped Bust half. The stars are crisply struck, although the claws and fletchings are softly brought up. Marks are confined to wispy grazes near the right scroll end. (#6128)

**Colorful Select 1822 Half Dollar
O-105'a', Overton-Unlisted Die State**

- 3786 1822 MS63 NGC. O-105'a', R.7?** A later die state of O-105 with a crack through the right-side stars. This crack, unmentioned in Overton, is listed in the Herrman auction reference as O-105'a'. Herrman gives the rating as R.7 with a question mark, although we suspect a number rest undiscovered within collections. An additional lengthy unlisted crack extends from the leaves to the E in STATES. Overall, O-105 is R.3. This is a mildly prooflike and lightly abraded example with dappled golden-brown and ocean-blue toning. (#6129)

**1822 O-113 Half Dollar, MS64
Possible Condition Census**

- 3787 1822 MS64 NGC. O-113, R.3.** Despite the scarcity of this die marriage, several higher grade pieces are known, according to the census listing in the fourth edition Overton reference. Alternatively, market appearances are infrequent, with only two finer auction appearances in the last 15 years, according to Stephen Herrman. This Choice Mint State piece may fall at the low end of the census. Both sides are brilliant with frosty white luster and a dash of pale gold toning. Census: 53 in 64 (2 in 64+), 16 finer (4/12), for all 1822 varieties. (#6129)

Lustrous MS64 1823 Bust Half, O-104

- 3788 1823 MS64 PCGS. O-104, R.3.** This coruscating and crisply struck near-Gem displays medium autumn-gold and slate-gray patina. Marks are impressively absent, and the eye appeal is superior for the type. Undoubtedly within the Condition Census for the variety, topped in Herrman by a darkly toned NGC MS64 example that last appeared at auction in 1993. (#6131)

**1824 O-117 Half Dollar, MS64+
Pastel-Toned Peripheries**

- 3789 1824 MS64+ PCGS. CAC. O-117, R.1.** Two short spikes extend into the field from the wing, pointing to the IT of UNITED. A plentiful variety often found in higher grades, but seldom with the spectacular eye appeal of this near-Gem. Both sides are fully original with intermingled gray, steel, and gold toning, all within a frame of pastel blue and iridescent toning. Population: 61 in 64 (3 in 64+), 16 finer (4/12), for all 1824 Normal Date varieties. (#6137)

**1824/4 O-110 Half Dollar, MS64+
Tied for Finest PCGS Certified**

- 3790 1824/4 MS64+ PCGS. CAC. O-110a, R.2.** The reverse of this late die state piece has a crack through AM to the right (facing) wing, down through the shield, to the border between the two lower leaf pairs. Another crack listed in Overton is unapparent, perhaps obscured by the heavy flow lines in that area. This near-Gem is fully brilliant with bold central details and frosty luster. Both sides have delicate champagne toning over brilliant white surfaces. Population: 10 in 64 (2 in 64+), 0 finer (4/12). (#6140)
- 3791 1825 MS63 NGC. O-102, R.1.** Caramel-gold toning adorns the reverse, while the obverse has only a wisp of honey-gold along the left margin. Impressively void of abrasions, and cartwheel luster dominates both sides. The profile is lightly strike doubled. (#6142)

Near-Gem 1825 Bust Half, O-114

- 3792 1825 MS64 NGC. O-114, R.1.** Pleasing golden-brown, olive-green, and steel-gray toning endows this carefully preserved Choice half dollar. The luster is good though slightly diminished across the open obverse field. Well struck save for the claws and uppermost stars. O-114 is distinguished by light recutting on the 1 in the date. (#6142)

Toned Choice 1826 Half Dollar, O-101a

- 3793 1826 MS64 ANACS. O-101a, R.2.** Rich golden-tan toning blankets this lustrous and essentially mark-free near-Gem. The reverse displays bold clash marks, and both sides exhibit spindly die cracks. The strike is sharp except on star 1. An exceptional representative of the Capped Bust design. (#6143)

**Gem 1826 Half Dollar, O-118
Lightly Toned and Lustrous**

- 3794 1826 MS65 PCGS. O-118, R.1.** According to Mint records, a substantial mintage of more than 4 million Capped Bust half dollars was accomplished in 1826, with 20 die varieties known for the date. This attractive Gem shows the stars close to the milling and the base of A higher than M in AMERICA, identifying the O-118 variety. This specimen is well-detailed, with satiny mint luster and shades of golden-gray and blue patina. Population for the date: 35 in 65, 7 finer (4/12). (#6143)
- 3795 1827 Square Base 2 MS63 PCGS. O-120a, R.3.** Heavy die lines on the field near the bust tip aid the attribution of this Overton marriage. This satiny Select half dollar features dappled olive-green and stone-gray toning. Free from noticeable contact, and the strike is crisp with slight merging on the curls and the top of the eagle's head. (#6144)
- 3796 1827 Square Base 2 MS63 NGC. O-125, R.3.** Medium autumn-gold and stone-gray blend throughout the fields and devices. The peripheries display plum-mauve and jade-green. This lustrous half dollar is unmarked and attractive. The strike is sharp aside from the left-side stars. (#6144)
- 3797 1828 Curl Base 2, No Knob MS61 NGC. O-103, R.2.** Rich golden-brown and steel-gray toning fills the fields and devices, while the margins offer aquamarine and wheat-gold. Unabraded aside from a single reed mark on the C in 50 C.
Ex: Charlotte ANA (Heritage, 3/2007), lot 782, which realized \$1,265. (#6148)

**1828 O-117a Half Dollar, MS64
Late Die State**

- 3798** 1828 Square Base 2, Small 8, Large Letters MS64 PCGS. O-117a, R.1. The recut serif of the C in 50C is diagnostic for the variety. The reverse has a crack through UNITED STATES OF A, while heavy flowlines obscure some evidence of that feature. Delicate champagne toning appears on both sides of this sharply detailed Choice Mint State piece. Both sides have splendid surfaces with satin luster. Population: 27 in 64 (2 in 64+), 10 finer (4/12). (#6151)

**1828 O-115 Half Dollar, MS64
Among Top 10 Known**

- 3799** 1828 Square Base 2, Small 8, Large Letters MS64 PCGS. O-115, R.2. Several high grade examples of this common variety are known, including Gem or finer pieces. This Choice Mint State specimen is likely just outside the condition census for O-115. Both sides have frosty ivory luster with delicate splashes of golden-brown toning. Population: 27 in 64 (2 in 64+), 10 finer (4/12). (#6151)

**Near-Gem O-101a 1829/7 Half
Popular Guide Book Overdate**

- 3800** 1829/7 MS64 NGC. O-101a, R.1. Beautiful navy-blue, peach-gold, plum-red, and cream-gray toning illuminates this satiny Choice half. Magnification is required to view the wispy field marks. Repunching is obvious on all four date digits. It appears that the reverse die was lapped early in the life of the marriage, since most examples seen have absent branch, shaft, and feather detail near the claws. (#6155)

**Prooflike Choice 1829/7 Half Dollar
O-101a, Lapped Die State**

- 3801** 1829/7 MS64 PCGS. CAC. O-101a, R.1. An unusual prooflike example with original peripheral golden-brown and powder-blue toning. The devices are predominantly gunmetal-gray. Only minor marks are encountered. Sharply struck at the centers with selected incompleteness of strike along the margins. Population: 10 in 64, 6 finer (4/12). (#6155)

Choice Large Letters 1829 Half, O-110a

- 3802** 1829 Large Letters MS64 NGC. O-110a, R.2. The sole 1829 die pair with an obsolete Large Letters reverse. Mostly chestnut-gold with cream-gray high points and deeper powder-blue patina near the rims. Lustrous and virtually free from marks. The reverse border displays several slender die cracks. (#6154)

**Gem 1829 Capped Bust Half, O-112
Only Three Finer PCGS Coins**

- 3803 1829 Small Letters MS65 PCGS. O-112, R.1.** Twenty die varieties are known for the 1829 Capped Bust half dollar, utilizing combinations of 11 obverse and 16 reverse dies. The coin offered here shows the parallel die lines below star 13 that indicate the available O-112 variety.

The present coin is a spectacular Gem, with an eye-catching patina of gold, sea-green, cerulean-blue, and gray hues. Vibrant mint luster shines beneath the toning, and only a few minor contact marks are evident. The design elements are sharply detailed in all areas, except for a touch of flatness on the upper stars. Eye appeal is outstanding. Housed in a green label holder. Population: 16 in 65, 3 finer (4/12). (#6154)

- 3804 1831 MS61 NGC. O-110, R.2.** Delicate honey-gold toning is predominant but the margins offer glimpses of gunmetal-blue patina. Lustrous and lightly abraded with occasional incompleteness of strike at the borders. (#6159)
- 3805 1831 MS63 NGC. O-110, R.2.** Medium sun-gold dominates this lustrous example, although the high points exhibit steel-blue. The strike is sharp at the centers but peripheral elements show softness. There are no noteworthy marks. (#6159)
- 3806 1832 Small Letters MS61 NGC. O-118, R.1.** The “laced lips” Overton variety. The present unblemished Bust half exhibits deeply blended navy-blue, plum-mauve, and olive-gold patina. The margins and devices glimmer with luster. (#6160)
- 3807 1833 MS62 PCGS. O-114, R.2.** Light chestnut-gold toning visits most of this lustrous, evenly struck, and unabraded Capped Bust half. The high points display steel-blue patina. Liberty’s profile is strike doubled. (#6163)
- 3808 1834 Small Date, Small Letters MS62 NGC. O-110, R.4.** Lengthy die cracks (as made) through the scroll and the olive branch confirm this scarce variety. A well struck representative that has medium olive and powder-blue patina. NGC O-110 Census: 2 in 62, 2 finer (4/12).
Ex: New York Signature (Heritage, 11/2003), lot 6637, which realized \$805. (#6166)
- 3809 1834 Small Date, Small Letters MS63 PCGS. CAC. O-120, R.4.** A better variety identified by a repunched star 7 and a vertical line from the right shield corner. Light to medium almond-gold and sea-green toning graces this lustrous and minimally abraded Select half. Only the upper left stars lack a bold strike. (#6166)

**1834 O-116 Half Dollar, MS64
Small Date, Small Letters**

- 3810 1834 Small Date, Small Letters MS64 NGC. O-116, R.1.** This impressive Choice Mint State 1834 half dollar has fully brilliant satin luster that is little subdued by the lovely gold, russet, violet, and blue toning on the obverse, and the delicate gold toning on the reverse. The O-116 die pair is common, and this piece is ideal for a date or type collection. (#6166)

3811 1835 MS63 NGC. O-109, R.2. A lustrous Select Bust half with moderate apple-green, lilac, and cream-gray toning. Sharply struck except for the stars. The fields are well preserved, though a few minor marks on the cheek correspond to the grade. (#6168)

3812 1836 Lettered Edge MS61 NGC. O-108a, R.2. The 1836 over 1336 *Guide Book* variety, which shows the lower ball of a 3 within the 8 in the date. This thoroughly lustrous representative has glimpses of tan toning and an absence of remotely relevant marks. (#6169)

**1836 O-123 Half Dollar, MS64
Likely the Finest Known**

3813 1836 Lettered Edge MS64 PCGS. CAC. O-123, R.4. An important opportunity for the variety specialist to acquire an attractive Choice Mint State example of the scarce O-123 die marriage. The fourth edition of the Overton reference includes a census that lists a single MS64 with four examples graded MS60. In his auction analysis of early half dollars, Stephen Herrman points to the MS63 specimen in the January 2002 Stack's sale as possibly the finest surviving example of this variety.

The present MS64 piece is almost certainly the new finest known, with ivory surfaces and lovely peripheral iridescence. The lower reverse shows design weakness that is common to all known examples of this die pair. (#6169)

**1836 Lettered Edge Half, MS62
50 Over 00 Mint Blunder, O-116**

3814 1836 50 Over 00 MS62 NGC. O-116, R.2. The blundered denomination variety, at the end of the Lettered Edge Capped Bust series, is reminiscent of a similar engraving error on the O-112 1807, which took place at the advent of the series. The present satiny piece has deep apple-green, plum-mauve, and rose-gold toning. Generally smooth, though Liberty's neck displays a few small abrasions. (#6170)

REEDED EDGE HALF DOLLARS

**1836 Reeded Edge Half, MS62
First-Year, Low-Mintage Date**

3815 1836 Reeded Edge MS62 NGC. The Reeded Edge Capped Bust half series began with a minor run of 1,200 pieces in 1836. While several versions of the Judd pattern reference included the 1836 Reeded Edge pieces, most numismatic scholars agree that such coins were intended for circulation. Indeed, many did circulate, and Mint State examples are conditionally scarce. This crisply struck survivor has pleasing detail and no trace of wear. The surfaces have soft, pleasing luster beneath gray-golden patina. Small, scattered abrasions on each side account for the grade. Census: 10 in 62, 11 finer (4/12).

Ex: ANA Signature (Heritage, 8/2007), lot 829. (#6175)

1837 Half Dollar, MS64
Capped Bust, Reeded Edge

3816 1837 MS64 PCGS. This lovely Capped Bust, Reeded Edge half dollar represents the first of two two-year subtypes. In 1836 and 1837, the denomination reads 50 CENTS, and in 1838 and 1839, it reads HALF DOL. Both sides have frosty luster and sharp design motifs with delicate gold toning, light on the obverse and heavy on the reverse. A few trivial marks prevent a higher grade. Population: 73 in 64 (2 in 64+), 25 finer (4/12). (#6176)

3817 1839 MS61 NGC. Excellent detail for the time with silver, peach, sky-blue, and violet shadings to varying degrees. A thin pinscratch along the jawline is visible only at certain angles. (#6179)

1839 Reeded Edge Half Dollar, MS64
Capped Bust Design

3818 1839 MS64 NGC. Alive with satin luster, this coin is uninhibited by toning or abrasions. Both sides exhibit a sharp strike on every feature. The second subtype of the Reeded Edge half dollars, coined in 1838 and 1839, has the denomination as HALF DOL. An important coin for the advanced type collector. Census: 39 in 64, 7 finer (4/12). (#6179)

SEATED HALF DOLLARS

3819 1846-O Tall Date VF30 PCGS. CAC. The scarce Tall Date variety trades for multiples of its Medium Date counterpart, yet remains unlisted in *Cherrypickers'*. Toned deep cream-gray and tan-brown with a bold LIBERTY and a single hair-thin mark at the obverse center. (#6256)

3820 1855-O Arrows MS63 PCGS. An attractive Select example of the short-lived Arrows type, with well-detailed design elements and a few hints of gold and blue toning. Population: 47 in 63, 91 finer (4/12). (#6283)

3821 1855-O Arrows MS63 NGC. Blue-to-violet at the margins with a fade into peach and near-silver at the centers, finishing with a tiny silver center on Liberty's left (facing) shoulder on the obverse. This O-mint Arrows coin has decent overall detail, though the strike on the stars is uneven. (#6283)

Sharp 1855-O Arrows Fifty Cent, MS64
An Excellent Type Coin

3822 1855-O Arrows MS64 PCGS. CAC. The combination of the Arrows-at-Date subtype and the New Orleans mintmark makes this issue, along with the 1854-O Arrows half, popular type coins. Both are available in high Mint State grades due to their large mintages. The surfaces exhibit frosty luster and are devoid of toning. Several stars show slight weakness, otherwise the design elements are boldly detailed. Faint hairlines and grade-consistent marks are only visible under a glass. Population: 67 in 64, 24 finer (4/12). (#6283)

3823 1860 MS63 PCGS. Frosty luster is largely silver with faint blue overtones, though a significant area of pale apricot toning also is present. Strong inner detail contrasts with the weakness at upper obverse and lower reverse. Population: 14 in 63, 24 finer (4/12). (#6299)

3824 1861 MS63 NGC. Well-defined overall with light gray surfaces that show streaks of pale reddish-orange. Lightly abraded in the fields but appealing overall, a noteworthy coin. (#6302)

3825 1861-O MS62 PCGS. Silver-gray, blue-green, sage, and bronze elements converge on this O-mint half dollar from the year Louisiana seceded from the United States. Well-defined with a minor rim bump at the N in UNITED on the reverse. (#6303)

**1861-O 'Confederate' Half, XF45
Cracked Obverse Die, WB-102**

- 3826 1861-O CSA Obv XF45 NGC. FS-401, WB-102.** This Seated Liberty half dollar is a later state of the obverse die that was also used for the four Original Confederate half dollars, proving its production during Confederate occupancy of the New Orleans Mint. Traces of luster remain beneath the olive-brown and iridescent toning on both sides. An impressive example and extremely popular with collectors. (#39968)

**1861-S Half Dollar, MS64
Large S Mintmark**

- 3827 1861-S MS64 PCGS. CAC.** This spectacular near-Gem exhibits frosty silver luster with light gray surfaces that host splashes of pale gold toning on each side. The strike is bold with sharp hair on the obverse and full feathers on the reverse. The large S mintmark is centered over the F in HALF on the reverse. Population: 14 in 64, 4 finer (4/12). (#6306)

-
- 3828 1866-S No Motto VF35 PCGS.** Strong blue-green influences saturate the deep gray surfaces of this Choice VF piece. Aside from a rim bump over the ER of AMERICA, this is a pleasing midrange example from the last No Motto half dollar issue, mintage 60,000 pieces. Population: 14 in 35, 37 finer (4/12).(#6315)

**1866 Motto Half Dollar, MS65
Conditionally Rare**

- 3829 1866 Motto MS65 NGC.** The debut of the With Motto design saw a mintage of 744,900 half dollars at Philadelphia. Despite that seemingly large production, the issue is conditionally rare, with few Gem or finer examples surviving today. Contemporary collectors preferred proofs, and business strikes entered circulation. This stunning Gem has frosty silver luster with ivory surfaces and tinges of gold and champagne toning. Census: 7 in 65, 8 finer (4/12). (#6319)
-
- 3830 1867 AU58 PCGS.** Early in the With Motto series, this is a remarkable AU58 coin. The fields are bright and semireflective, giving added appeal. Sharply struck throughout.(#6321)

1870-CC WB-4 Half Dollar, AU58+
Condition Census Specimen

3831 1870-CC AU58+ NGC. WB-101, WB-4, R.6. Partial drapery. There are five die varieties recorded for the 1870-CC half dollars surviving from a mintage of 54,617 coins, or just under 11,000 coins per die pair. Just under 200 examples are believed to exist for all five varieties today.

Louisiana collector Roy Pohler assembled a hoard of 90 pieces that he acquired from the mid-1970s to the mid-1980s. Well over half of that hoard graded no better than VG. Only three coins graded AU and no examples from that hoard were Mint State. Details of the 1870-CC half dollar appear in *A Register of Liberty Seated Half Dollar Varieties, Volume II*, Carson City Branch Mint by Bill Bugert (2010).

The top half dozen pieces from all sources include two Mint State coins, an AU58 NGC coin, an AU55 PCGS coin, and one or two coins graded AU53. Bugert included a detailed census. This piece apparently ranks third or fourth finest of all known 1870-CC half dollars.

An attractive near-Mint specimen with excellent eye appeal, this 1870-CC half dollar has satin luster with exceptional design definition. Most of the stars are sharp, considerable head detail is noted, and the eagle's feathers and claws are strong. Light silver-gray surfaces shine through speckled gold and iridescent toning. Only a few trivial marks and faint hairlines are evident on each side. Census: 2 in 58 (1 in 58+), 1 finer (4/12). (#6328)

**1871 Half Dollar, MS64
Scarce in Mint State**

- 3832 1871 MS64 PCGS. CAC.** The 1871 half dollar, with a mintage exceeding 1.2 million pieces is a common date overall, but scarce in Mint State. Near-Gems such as the present coin are a great find, and finer examples are seen infrequently. Gold and iridescent toning adorns the obverse while the reverse displays light champagne color with pale blue accents. Frosty silver luster and bold design motifs are evident on both sides. A few trivial grade-consistent marks are noted. Population: 16 in 64, 7 finer (4/12). (#6330)

**1871-S Half Dollar, MS64, WB-102
'Very Small Mintmark'**

- 3833 1871-S MS64 PCGS. WB-102.** Very Small Mintmark. Most of the substantial mintage exceeding 2 million pieces are of this reverse die variety. Some strike weakness appears on the reverse in the vertical shield lines and the eagle feathers below, but there are few mentionable marks on this satiny near-Gem, silver-white with dots of russet. Population: 8 in 64, 3 finer (4/12). (#6332)

**1873 Open 3, No Arrows Half
Original Fair 2 Example**

- 3834 1873 Open 3, No Arrows Fair 2 NGC. CAC. WB-101.** The year 1873 was a transitional one for the Mint with the focus clearly on the new design with arrowheads on each side of the date. There were 214,200 pieces struck of the No Arrows half with the Open 3 in the date; however, examples are extremely rare with many melted after July 10. This is a heavily worn, but original example. The fields are medium gray with contrasting reddish-tinged brilliance over the devices. Each side presents an interesting study of wear patterns. Obviously the obverse wore quicker than the reverse, which still shows some of the rim. A few grade-consistent marks are noted, mostly on the obverse. (#6337)

- 3835 1873-CC Arrows — Cleaning — Genuine PCGS. XF Details.** Parallel hairlines emerge upon careful rotation, but this better date cream-gray Carson City half exhibits only light circulation wear. We note a diagonal mark on Liberty's shield and filing on the base of Liberty's rock. (#6344)

- 3836 1875-CC AU58 PCGS.** An attractive, barely worn Carson City half. Light gold-orange peripheral influences give way swiftly to the subtly frosted silver luster of the interiors. Population: 17 in 58, 64 finer (4/12). (#6350)

- 3837 1878-CC — Filed Rims — PCGS Genuine. XF Details.** Far scarcer than its '75-CC to '77-CC predecessors, the '78-CC mintage of just 62,000 pieces likely ceased upon the arrival of Morgan dollar dies. This nicely detailed slate-gray example is subdued but displays traces of luster. Obverse file marks are noted between 9 and 12 o'clock.

- 3838 1883 MS62+ NGC.** Though not so sharply struck or deeply mirrored as a proof, this Mint State example has much of the rest of the "look" with appreciable contrast and dappled border-toning. Great eye appeal for this issue of just 8,000 pieces. Census: 5 in 62 (1 in 62+), 45 finer (4/12). (#6365)

- 3839 1890 MS63 PCGS.** Strong blue-green, gold, and orange outer toning yields to near-silver at small centers. Lightly abraded but fundamentally pleasing with diffuse reflectivity to the luster. Population: 21 in 63, 59 finer (4/12). (#6372)

**1891 Half, MS65 Prooflike
Significant Field-Device Contrast**

- 3840 1891 MS65 Prooflike NGC.** The 1891 pulled the mintage of half dollars out of the tailspin of the 1880s. For the first time since 1878 the production of halves was substantial; in this case with 200,000 pieces struck. This is an impressive example that is brilliant throughout and a coin that displays significant depth of mirroring in the fields in addition to moderate frost over the devices. Sharply defined, except on the uppermost stars. Census: 3 in 65 Prooflike, only 1 finer (4/12). (#6373)

PROOF SEATED HALF DOLLARS

Choice Proof 1860 Seated Half

- 3841 1860 PR64 NGC. Dappled golden-brown, apple-green, and gunmetal-gray toning embraces this precisely struck near-Gem. A slender flan streak above the F in HALF is of mint origin. Significantly scarcer than suggested by its mintage of 1,000 pieces, since unsold sets were melted by the Mint. Breen (1988) estimates a net proof mintage of 525 pieces. (#6414)

Premium Gem Proof 1871 Half Stunning Concentric Patina

- 3842 1871 PR66 PCGS. Stunning patina is the hallmark of this Superb Gem proof 1871 Seated half dollar. A thin ring of ice-blue to lavender toning surrounds centers of pinkish-gold and orange, with considerable cameo contrast even though unacknowledged at PCGS. A sharply struck and distraction-free coin. Population: 3 in 66, 1 finer (4/12). (#6429)

1873 Arrows Half, PR64 Cameo Sharply Contrasted

- 3843 1873 Arrows PR64 Cameo PCGS. The Arrows type of 1873 and 1874 is one of the most recognizable and sought-after types in 19th century U.S. numismatics. This near-Gem has the added attraction of strong cameo contrast on each side; the obverse is arguably Deep Cameo. A few light hairlines can be made out with a loupe, and the obverse shows just a hint of light toning while the reverse is brilliant. Population: 8 in 64 Cameo, 7 finer (4/12). (#86434)

Colorful Gem Proof 1875 Seated Half

- 3844 1875 PR65 PCGS. CAC. The original toning on this Gem proof comprises pinkish-gold in the center ceding to cobalt-blue and aqua at the rims on each side, with glowing luster and a sharp strike. A tiny linear abrasion near the first S in STATES is the only singular mark that appears. Population: 22 in 65 (1 in 65+), 7 finer (4/12). (#6436)

- 3845 1878 PR63 PCGS. Deep gunmetal-gray toning envelops both sides of this Select proof example, with well-detailed design elements that show just a touch of softness on the eagle's claws. Population: 53 in 63 (1 in 63+), 68 finer (4/12)..(#6439)

- 3846 1878 PR63 PCGS. CAC. Appreciably contrasted, though not sufficiently so for the taste of the PCGS graders, and appealing despite light flaws. Pink, lavender, blue, and gold hues mingle in the rich patina, and flashes of mirror peek out where the toning is thinnest. (#6439)

1878 Cameo PR65 Half Dollar Noticeably Frosted Devices

- 3847 1878 PR65 Cameo NGC. Only 800 proof halves were struck in 1878. When one subtracts the pieces that have been lost through attrition over the years, there are surprisingly few proofs left, especially in high grade. The fields on this example are flashy and brightly mirrored with a significant presence of mint frost over the devices. The centers are almost brilliant and surrounded by a ring of deep golden-brown at the margins. Census: 12 in 65 Cameo, 13 finer (4/12). (#86439)

- 3848 1881 PR64 PCGS. This is a deeply toned example of this low-mintage proof issue. Rich rose, blue, and yellow toning covers each side with bright mirroring in the fields that enlivens the patination. Only 975 proofs were struck with another 10,000 strikes for circulation, all in all a generally unavailable year. Population: 75 in 64, 38 finer (4/12). (#6442)

**1881 Half Dollar, Gem Proof
Nearly Brilliant Obverse, Toned Reverse**

- 3849 1881 PR65 PCGS. CAC.** The contrast between the two sides of this low-mintage date is striking. The obverse is nearly brilliant with confirmed contrast between the fields and devices. The reverse, however, is deeply toned in blended shades of rose and blue; if contrast is present on that side it is not apparent through the toning. Sharp striking details throughout. Population: 28 in 65, 10 finer (4/12). (#6442)

- 3850 1884 PR64 NGC.** This low-mintage date shows bright reflectivity in the fields and nearly brilliant surfaces except for a slight accent of golden at the margins. Sharply struck. (#6445)

- 3851 1885 PR63 Cameo NGC.** The pale gold centers of this Select proof Liberty Seated half dollar are surrounded by a ring of cobalt-blue toning, enhancing the outstanding eye appeal. The field/device contrast is bold, but not profound. Census: 6 in 63 Cameo, 50 finer (4/12).
Ex: D.C.S.E. and F.D.I.C. Sale (Heritage, 6/1988), lot 598. (#86446)

- 3852 1886 PR63 Cameo PCGS.** Excellent reflectivity and contrast. Largely silver surfaces have blushes of reddish-orange color, most prominently at the edge where Liberty's leg rises from the nearby field. Population: 12 in 63 Cameo, 28 finer (4/12). (#86447)

**Cameo Superb Gem 1887 Half Dollar
Starkly Contrasted on Each Side**

- 3853 1887 PR67 Cameo NGC.** The 1887 half dollar is already an impressively scarce date, in a decade full of scarce and rare halves. Only 710 proofs were produced in addition to the mere 5,000 strikes for circulation. This piece is among the finest known, a group of only five other coins so graded at NGC (4/12). Each side of this piece sparkles with deep reflectivity and there is a significant presence of mint frost covering the devices. Brilliant. (#86448)

- 3854 1889 PR64 NGC.** From a mintage of 711 pieces, this well-detailed 1889 proof Seated Liberty half dollar shows just a touch of softness on the motto. The reflective surfaces are blanketed in dark shades of gold, lavender-gray, and cobalt-blue toning. Census: 44 in 64, 49 finer (4/12). (#6450)

- 3855 1889 PR64 PCGS. CAC.** The multicolored toning adds even more to the appeal of this near-Gem. The fields are brightly mirrored and enhance the color on each side. A sharply struck proof of this low-mintage year. (#6450)

**1890 Half, PR66 Cameo
Stark White-on-Black Contrast**

- 3856 1890 PR66 Cameo NGC.** Icy devices exhibit obvious white-on-black contrast against the deeply mirrored fields. This crisply struck specimen is brilliant aside from a hint of dark toning on the right base of the eagle's neck. Specks of light gray debris are noted within the date digits. The 1890 has a low production of 590 proofs and 12,000 business strikes. Census: 5 in 66 Cameo, 7 finer (4/12).
Ex: Long Beach Signature (Heritage, 9/2006), lot 1965; Dallas Signature (Heritage, 11/2006), lot 859. (#86451)

**1890 Seated Half, PR67 Cameo
Profoundly Contrasted**

- 3857 1890 PR67 Cameo NGC.** From a tiny mintage of 590 pieces, proof 1890 half dollars are rare in all grades. Examples in PR67 Cameo are very rare. NGC has certified only seven examples at the Superb Proof Cameo level, with none finer; while PCGS has graded four coins in this grade, with one finer (4/12). The present coin is simply magnificent, with boldly impressed, frosty devices that contrast vividly with pristine mirrored fields. Overall visual appeal is stunning.
Ex: Houston Signature (Heritage, 12/2009), lot 759. (#86451)

**1890 Half Dollar, PR67+ Cameo
Technically and Aesthetically
Close to Perfection**

- 3858 1890 PR67+ Cameo PCGS. CAC.** Regardless of date, this has to be one of the most visually impressive Seated halves on the market today. There is an off-center small circle of brilliance on each side that is surrounded by swaths of reddish-gold and blue-green. The fields are exceptionally deep in their mirrored reflectivity, apparent even through the significant toning. Likewise, the frosted devices are strongly evident, which set up the cameo effect. This piece is tied with one other PR67+ Cameo at PCGS and is technically bettered only by a single PR68 Cameo (4/12). (#86451)
-

BARBER HALF DOLLARS

**Gem 1892 Barber Half
Low-Mintage First-Year Issue**

- 3859 1892 MS65 PCGS. CAC.** The Barber half dollar design was adopted in 1892, and the Philadelphia Mint produced a low mintage of 934,000 pieces. Examples in Gem condition are scarce in today's market. Darkly toned in attractive shades of golden-brown, blue-steel, and gray, this impressive Gem exhibits well-detailed design elements and vibrant satiny mint luster. Population: 98 in 65 (2 in 65+), 51 finer (4/12). (#6461)

- 3860 1892-O Micro O VG8 NGC.** This minuscule-mintmark variant is the key to the "With Varieties" Barber half dollar set. The VG8 coin offered here has deep blue and violet toning over each side with elements of lighter gold-to-gray. The L and TY of LIBERTY are visible on the headband, making this a strictly graded coin. An opportunity for the dedicated series enthusiast. (#6463)
-

1892-S Barber Half, Partially Toned MS64

- 3861 1892-S MS64 PCGS.** Unlike its Philadelphia counterpart, the 1892-S appears to have been little saved for a newly designed coin with more than a million pieces struck. The soft, frosted mint luster retains much brilliance with patches of deep gray-russet scattered over each side. Well struck. (#6464)
- 3862 1894 MS64 PCGS.** Lustrous surfaces are visited by whispers of light tan and gray toning, and display impressively-struck design features. A short squiggly mark is noted between stars 3 and 4 on the obverse. Population: 26 in 64, 26 finer (4/12). (#6468)
-

**Gem 1894-S Barber Half
Elusive Issue in High Grade**

- 3863 1894-S MS65 PCGS. CAC.** Despite the mintage of more than 4 million pieces, the 1894-S Barber half dollar is one of the most elusive dates of the series in high grade. This delightful Gem exhibits sharply detailed design elements, satiny mint luster, and hints of pale gold and amber toning. Population: 5 in 65, 5 finer (4/12). (#6470)
-

3864 1895-S MS62 PCGS. Frosty silver with gold-to-brown elements along parts of the margins. Excellent detail, including on the eagle's often-weak talons, and solid eye appeal despite wispy abrasions. (#6473)

**1895-S Half Dollar, MS66
Significant Condition Rarity**

3865 1895-S MS66 PCGS Secure. Warmly lustrous surfaces glow under peach, russet-gold, blue-gray, and silver toning with one or two small dots of deeper color to be found with a glass. Both sides are pleasingly smooth with only a handful of small flaws. The 1895-S is by no means the lowest-mintage Barber half dollar date, but most of the mintage (slightly over 1.1 million pieces) went directly into circulation before American collectors were awakened to the fascination of mintmarks. In grades above Gem, this San Francisco half is an extreme condition rarity. PCGS has certified just two pieces in MS66 and only two finer (4/12). (#6473)

3866 1897-O VF35 PCGS. An evenly worn specimen of this low-mintage date, retaining much original detail. The surfaces are lightly abraded, with pleasing gray and blue-steel patina. Population: 14 in 35, 71 finer (4/12). (#6478)

**Silvery Near-Mint 1897-S Barber Half
Key Series Issue**

3867 1897-S AU58 PCGS. The 1897-S is a longtime key in the Barber half series, and this near-Mint State example would fit nicely into a mostly Uncirculated set. The faintest touch of rub appears on the highest points, with silver-white surfaces gleaming faintly of gold overtones. A "slider" in the parlance of earlier times. (#6479)

3868 1898-O VF30 PCGS. An underrated issue, with a mintage of just 874,000 pieces, the 1898-O Barber half dollar is scarce-to-rare in all grades. This pleasing lavender-gray specimen shows moderate even wear on the problem-free surfaces. (#6481)

3869 1898-S MS61 PCGS. Luminous surfaces and well-struck devices save for minor weakness in the upper-right shield corner. Minute marks are visible in the lower part of Liberty's neck, but the overall "look" is not one of an MS61 coin. Population: 2 in 61, 34 finer (4/12). (#6482)

3870 1898-S MS62 NGC. This well-detailed MS62 example displays just a touch of softness in the area of the right (facing) shield point. The lustrous surfaces exhibit traces of light blue and gold toning. Census: 5 in 62, 22 finer (4/12). (#6482)

3871 1899-O MS64 NGC. CAC. Lovely plum-red and navy-blue toning embraces the fields. The devices are stone-gray. Well preserved and satiny with only minor incompleteness of strike near the fletchings. Encased in a prior generation holder. Census: 14 in 64, 11 finer (4/12). (#6484)

3872 1901-S XF40 PCGS. CAC. This underrated semikey date was little-saved at the time of release. This XF40 example has faint glimmers of luster remaining on lightly worn and pale blue-gray surfaces. Population: 15 in 40, 73 finer (4/12). (#6491)

3873 1902-S MS62 NGC. Each side of this boldly struck San Francisco date displays silver luster underlying scattered tawny golden toning. Proper appreciation of this issue in Mint State grades can be gained from the NGC Census: 6 in 62, 25 finer (4/12). (#6494)

**1904-O Half Dollar, MS65
Seldom Seen in Gem Grade**

- 3874 1904-O MS65 NGC.** The 1904-O Barber half dollar is eagerly sought but seldom seen in full Gem, although several PCGS-certified examples — including the former Dr. Steven Duckor MS66 PCGS coin and the Eliasberg-Shireman MS66+ PCGS specimen — exist in higher grade. Only three times previously have we been privileged to offer a higher-graded example than the present piece, which boasts the most amazingly bright, swirling, satiny mint luster. As so often seen with this Charles E. Barber design, some of the central details failed to strike up completely, but this example is decidedly above-average for any New Orleans coin. Centers are untoned, highlighted by a fascinating hint of reddish peripheral toning on each side. Some light pinscratches in the reverse field appear below the bundle of arrows, but pass unseen until examined under a loupe. Census: 4 in 65, 0 finer (4/12). (#6499)

**1904-O Half Dollar, Toned MS66
Among the Finest Known**

- 3875 1904-O MS66 PCGS.** The 1904-O half dollar is scarce in all grades and especially difficult to obtain in the better Mint State grades. Moreover, it is often poorly struck, a characteristic of many New Orleans issues. On the contrary, our MS66 offering is an exceptional coin. It is solidly struck, so that even the shield and arrow feathers and adjacent claw — elements that are often weak — are sharply defined. Vibrant luster issues from both sides, which display whispers of soft purple toning. This impeccably preserved specimen generates super eye appeal. Population: 6 in 66, 2 finer (4/12). (#6499)
- 3876 1905-O MS64 PCGS.** Frosty silver interiors have gold-orange patina as a peripheral counterpoint. The portrait has decent if unspectacular detail, though the definition on the eagle's talons is noteworthy. Population: 40 in 64 (3 in 64+), 24 finer (4/12). (#6502)

**1906-D Half Dollar, MS65
First Year From Denver**

- 3877 1906-D MS65 PCGS.** While the 1906-D was the first year of issue for the Denver mint, few people seemed to have noticed. Only a handful of high-grade survivors are known today out of a mintage of more than 4 million pieces. This example has shimmering mint luster and clean surfaces. The interior of each side tends toward brilliance with deeper russet toning around the margins. Population: 14 in 65, 8 finer (4/12). (#6505)

**Gem 1906-S Barber Half
Seldom Seen Finer**

- 3878 1906-S MS65 NGC.** The 1906-S Barber half is an unheralded elusive issue in Gem condition within the series, perhaps because specimens survive even in the MS66-MS67 and (occasionally) MS68 range. (Those few coins are mostly in tightly held collections, however, due to the surging popularity of the series.) This golden-gray Gem is well-struck throughout, verging on a full strike, and to mention any contact marks would be to overemphasize them. Census: 9 in 65, 6 finer (4/12). (#6507)

- 3879 1908 MS63 PCGS.** Lightly toned on the obverse, the reverse is nearly brilliant and shows considerable vibrancy. Lightly marked. (#6512)

- 3880 1908-S MS62 NGC.** Rich golden and steel-gray toning covers each side of this satiny half dollar. Just a bit softly struck in the usual places. Census: 10 in 62, 24 finer (4/12). (#6515)

Well-Produced 1908-S Half, MS64

- 3881 1908-S MS64 PCGS.** Out of the mintage of 1.6 million pieces only a few dozen higher grade examples have survived. This example displays light rose-gold toning that deepens noticeably around the margins. Both sides are enlivened by the bright mint luster, a characteristic of San Francisco products. Population: 16 in 64, 15 finer (4/12). (#6515)

- 3882 1912-S MS64 PCGS.** This Choice example shows somewhat muted luster due to rich brown toning found primarily around the borders. This well struck example shows only the slightest number of ticks. Population: 59 in 64 (4 in 64+), 29 finer (4/12). (#6526)

PROOF BARBER HALF DOLLARS

**1893 Half Dollar, PR65
Slight Cameo Contrast**

- 3883 1893 PR65 NGC.** This delightful Gem has fully mirrored fields around satin devices with bold design definition. Both sides have considerable silver brilliance with splashes of lilac and delicate blue toning that leads to exceptional aesthetic appeal. Census: 31 in 65, 50 finer (4/12). (#6540)

1893 Barber Half, PR65

- 3884 1893 PR65 PCGS.** This Gem proof Barber half dollar has full cameo contrast with satin devices residing on fully mirrored fields, all beneath gold, violet, and iridescent toning. The strike is full with every detail showing bold definition. Population: 22 in 65, 29 finer (4/12). (#6540)

- 3885 1894 PR64 NGC.** Gold-to-orange and blue-to-green patina enriches this near-Gem specimen. Light contrast is evident on each side but not strong enough for a Cameo designation. (#6541)

**1894 Barber Half Dollar, PR66
Meticulously Struck**

3886 1894 PR66 NGC. Gleaming mirror fields highlight the meticulous strike and impressive wealth of fine detail displayed on the head and eagle on this Premium Gem example of a proof mintage of only 972 pieces. The near-perfection of this extraordinary coin demonstrates why proofs attracted more collector attention in their day than even the finest Gem Mint State pieces. Census: 26 in 66, 24 finer (4/12). (#6541)

3887 1895 PR64 PCGS. Attractive shades of golden-brown and violet patina blanket the reflective surfaces of this sharply detailed Choice half dollar. From a proof mintage of 880 pieces. Population: 55 in 64, 61 finer (4/12). (#6542)

3888 1901 PR63 NGC. Intermingled shades of gold, blue, and lavender-gray patina grace the surfaces of this well-detailed Barber half dollar. A few minor contact marks show on the moderately reflective surfaces. (#6548)

**Premium Gem Proof 1903 Barber Half
Dark Multicolor Toning**

3889 1903 PR66 PCGS. The proof Barber half dollars of 1903 claim a mintage of 755 pieces, and only a handful of survivors can compare to the present coin in terms of quality and eye appeal. This sharply detailed specimen shows only the slightest touch of softness at the juncture of the shield and eagle's wing. The immaculate surfaces are blanketed in attractive shades of dark green and blue patina, with considerable reflectivity underneath. Population: 16 in 66, 8 finer (4/12). (#6550)

**1907 Barber Half, PR67
Only One Finer PCGS Coin**

3890 1907 PR67 PCGS. The mintage of proof Barber half dollars in 1907 was a meager 575 pieces, and few survivors can match the quality of the present coin. This spectacular Superb Gem displays sharply detailed design elements and deeply reflective fields, under mottled green and blue toning. Population: 3 in 67, 1 finer (4/12). (#6554)

**1908 Half Dollar, PR67
Richly Toned Example**

3891 1908 PR67 PCGS. The obverse is dramatically toned in cobalt-blue, cherry-red, and olive shades. The reverse has a light gold area framed on each side by ruby-red and blue-green. Precisely struck and undisturbed with exceptional eye appeal. Population: 8 in 67, 3 finer (4/12).

Ex: Long Beach Signature (Heritage, 9/2007), lot 1664. (#6555)

3892 1910 PR63 PCGS. Golden toning is strongest at the margins, cut with a touch of blue-gray. Light silver interiors show minor hairlines and vague frost across the devices, an unusual feature for this issue of 551 pieces. (#6557)

**Gem Proof 1910 Barber Half Dollar
Rarely Seen Cameo Example**

3893 1910 PR65 Cameo PCGS. From a small mintage of 551 pieces, the 1910 Barber half dollar is seldom encountered with any degree of Cameo contrast. This sharply detailed Gem displays a surprising amount of mint frost on the devices that provides bold contrast with the reflective fields. A few wisps of green and blue toning accent the peripheries. Population: 7 in 65 (1 in 65+) Cameo, 9 finer (4/12). (#86557)

**Superb Gem Proof 1912 Half
Variegated Toning Over Reflective Surfaces**

3894 1912 PR67 PCGS. This sharply struck Superb Gem proof displays variegated toning that comprises daubs of rose, gold, and blue-gray on the obverse, with deeper ochre, violet, and emerald patina on the reverse and generous reflectivity prevailing throughout. Minor strike softness appears on the eagle's right (facing) wing top. Population: 5 in 67, 1 finer (4/12). (#6559)

**Gem Proof 1914 Barber Half
Rare Cameo Specimen**

3895 1914 PR65 Cameo PCGS. Collector demand for proof coins was at a low ebb in 1914, and only 380 proof Barber half dollars were struck. Examples with Cameo contrast are rarely encountered, but this delightful Gem shows considerable mint frost on the sharply detailed design elements, and the contrast with the deeply mirrored fields is undeniable. A few hints of golden-tan toning enliven the surfaces. Population: 2 in 65 Cameo, 4 finer (4/12). (#86561)

3896 1915 PR62 Cameo PCGS. Gold and blue outer toning yields to light but distinct contrast at silvery centers. Several scuffs in the right obverse field preclude Select status. Population: 1 in 62 Cameo, 6 finer (4/12). (#86562)

EARLY DOLLARS

3897 1795 Flowing Hair, Three Leaves — Rims Filed, Cleaned — ANACS. VG8 Details. B-5, BB-27, R.1. A mildly bright Flowing Hair type coin with a cream-gray obverse and a deeper charcoal-gray reverse. Each side has a few filed rim dings, the most evident above OF. The left (facing) wing is nonetheless nicely detailed. (#6852)

**1795 Flowing Hair Three Leaves Dollar
B-5, BB-27, Appealing Choice Very Fine**

3898 1795 Flowing Hair, Three Leaves VF35 NGC. B-5, BB-27, R.1. Bowers-Borckardt Die State II. A bold strike provides significant detail on the major devices, and moderate wear is largely confined to the highest points, most notably to the middle of Liberty's head. Handsome light gold toning boosts this coin's undeniable visual appeal. This obverse variety is one of the most distinctive of this busy date, showing star 1 distant from the lowest curl and a raised diagonal bar slanting in the left field just above Liberty's upper curl. The reverse shows a pair of laurel berries lined up precisely below F in OF in the well-spaced legend. This coin saw relatively brief and problem-free circulation that gives it a dignified and pleasing overall appearance. An ideal specimen for any carefully chosen type or specialized collection early dollars, the present coin will reward careful examination. (#6852)

**1795 Three Leaves Flowing Hair Dollar
B-6, BB-25, Toned Extremely Fine**

3899 1795 Flowing Hair, Three Leaves XF40 NGC. B-6, BB-25, R.3. Die State III with the obverse die lapped as indicated by shortened hair curls. State III is the usual die state of the variety. While the B-6 is a slightly scarcer variety, it still ranks among the plentiful issues for type collectors to consider. This example exhibits pleasing pewter-gray surfaces with hints of pale blue toning on both sides. The surfaces are lightly abraded, with no significant marks, although the obverse has a tiny rim bump at 5 o'clock and the reverse shows a small rim bump at 10 o'clock. Ex: *Houston Signature (Heritage, 12/2008)*, lot 792. (#6852)

**1795 B-5, BB-27 Dollar, XF40
Three Leaves Reverse**

3900 1795 Flowing Hair, Three Leaves XF40 PCGS. B-5, BB-27, R.1. The diagonal bar behind the upper hair curls immediately identifies the B-5 die marriage, the most plentiful variety among all Flowing Hair silver dollars. This piece has light silver-gray surfaces with splashes of peripheral iridescence. Faint hairlines are evident on each side but entirely inconsequential. (#6852)

**1795 Flowing Hair Dollar, AU50
Iridescent Toning, B-6, BB-25**

- 3901 1795 Flowing Hair, Three Leaves AU50 NGC. B-6, BB-25, R.3.** Bowers-Borckardt Die State III, with four leaves in the cluster below the first S in STATES. An earlier die state of this variety exists with only three leaves showing below the S, causing Bolender to believe it was a different variety, which he called B-18 in 1952 and B-21 later. The missing leaf was probably due to foreign matter clogging the die. Most often seen in grades below VF, BB-25 becomes rare at the AU level.

The present coin is an attractive AU specimen, showing the usual softness on the centers and some peripheral elements, due to lapping. The pleasing surfaces are iridescently toned in shades of gray, green, claret, and violet. Traces of mint luster shine through the toning. A few minor rim bruises are noted at 7 o'clock on the obverse and some adjustment marks are seen on the central reverse. Census for BB-25: 1 in 50, 2 finer (4/12). (#6852)

**AU55 Sharpness Three Leaves B-5, BB-27
1795 Flowing Hair Dollar**

- 3902 1795 Flowing Hair, Three Leaves — Repaired — ANACS. AU55 Details. B-5, BB-27, R.1.** B-5, BB-27, R.1. The readily recognizable 'bar' variety, named after the raised die line behind the uppermost hair lock of Liberty. The glossy textured surfaces have retoned in reddish-golden shades. Both sides are deceptively free of distracting circulation marks but are slightly glossy and lightly hairlined with smoothing evident on the upper left obverse field. The devices retain at excellent definition from a well centered impression. Ex: *Denver Signature* (Heritage, 8/2006), lot 3617, which realized \$8,193.75. (#6852)

- 3903 1795 Flowing Hair, Two Leaves — Scratches — NGC Details. VF Details. B-1, BB-21, R.2.** Upon first glance, this Flowing Hair type coin appears to have a silver plug at the obverse center. Instead, a prior owner placed a small circular item over the coin and moved a wire brush around it, then removed the item, leaving a series of fine curly scratches that end at the circle circumference. Moderately cleaned, and the reverse has faint mint-made adjustment marks.

**VF Details 1795 Flowing Hair Dollar
Two Leaves, B-1, BB-21**

- 3904 1795 Flowing Hair, Two Leaves — Scratched — NCS. VF Details. B-1, BB-21, R.2.** A few pinscratches correspond to the NCS designation. The most noticeable are near the eagle's legs, though a light pinscratch is located on Liberty's jaw. Toned gunmetal-gray with blushes of golden-brown on peripheral elements. Liberty's profile is clashed (as made), an unlisted die state. (#6853)

**1795 Flowing Hair Dollar, VF25
Famous Silver Plug Example, B-7, BB-18**

- 3905** 1795 Flowing Hair, Silver Plug VF25 PCGS. B-7, BB-18, R.3. Bowers-Borckardt Die State I. According to Mint records, 160,295 Flowing Hair dollars were struck in 1795, before the design was changed to the Draped Bust motif later in the year. Seventeen die varieties are known for the Flowing Hair type, with the present coin representing the BB-18 variety. The BB-18 is identified by the position of the lowest curl barely touching star 1 and nearly completing a loop, and the 14 berries in the reverse wreath.

This coin features the interesting silver plug at the center, a device the Mint used in the early days to add the proper amount of silver to an underweight planchet. The outlines of the plug can be seen on both sides of this coin, as the plug has taken on a pale greenish-gold patina that contrasts with the silver and dove-gray hues elsewhere. Specimens with the silver plug are rare and avidly sought-after by series enthusiasts. The present coin is evenly worn, with pleasing surfaces showing only minor abrasions. Population for silver plug: 5 in 25, 23 finer (4/12). (#6854)

**1795 B-14, BB-51 Dollar, AU50
Off-Center Draped Bust**

- 3906** 1795 Draped Bust, Off-Center, AU50 NGC. B-14, BB-51, R.2. Attribution of this die marriage is made simple by the position of Liberty's highest hair curl, directly beneath the B in LIBERTY. Only one other variety is known for the 1795 Draped Bust dollar: B-15, BB-52, which has the highest hair curl directly below E in LIBERTY. The current variety is off-center, with Liberty's bust placed too far left by the die maker. It is said that the model for the obverse portrait was Anne Bingham, a prominent Philadelphia socialite who was renowned for her beauty.

This lovely, richly toned representative displays a deep layer of even rose-brown across each side. The design elements are generally well-produced, although typical softness occurs on the eagle's head and breast feathers, and on the lower right reverse dentils. Shallow adjustment marks appear near the right obverse periphery, extending over stars 9 through 12, which may account for partial incompleteness in those stars' centers. High-point wear is even and minimal, and surface marks are few. A pair of minuscule marks just to the right of the eagle's beak should prove reliable as pedigree identifiers. (#96858)

**1795 Draped Bust Dollar, AU55
Off-Center Bust, B-14, BB-51**

- 3907 1795 Draped Bust, Off Center AU55 PCGS. B-14, BB-51, R.2.** Bowers-Borckardt Die State I. The Draped Bust design was employed for the first time in 1795, replacing the Flowing Hair dollars struck earlier in the year. Two die varieties of the Draped Bust type are known for the date, differentiated by the placement of the bust on the obverse. The present coin represents the BB-51 variety, with the bust positioned too far to the left so that the highest wave of hair is under B in LIBERTY.

The present coin is an attractive Choice AU specimen, with just a trace of wear showing on the sharply detailed design elements. The lustrous surfaces are accented by pleasing shades of champagne-gold and turquoise patina, and only minor contact marks are evident. Population for BB-51: 10 in 55, 18 finer (4/12). (#96858)

**1796 Draped Bust Dollar, VF Details
Small Date, Large Letters, B-4, BB-61**

- 3908 1796 Small Date, Large Letters — Improperly Cleaned — NCS Details. VF. B-4, BB-61, R.3.** Bowers-Borckardt Die State III. This coin retains much of its original detail, including the die dot above the 1 in the date and the large letters in the legend that identify the BB-61 variety. Only minor contact marks are present, but some Mint-made adjustment marks are evident at the bottom of the reverse. The coin is retoning after the noted cleaning, with dark accents of russet and violet on the lower obverse rim. (#6860)

- 3909 1796 Large Date, Small Letters — Surface Damage — Genuine PCGS. VG Details. B-5, BB-65, R.4.** The die chip that joins the I and C of AMERICA is diagnostic for the variety, and this example has that feature advanced, covering nearly the entire upper half of the I, and the upper left curve of the C. Looking beyond the damage at the lower reverse, in the form of several scratches of varying lengths, this is an attractive, richly toned, well circulated early dollar that is actually nicer than it sounds. Take a careful look at this one. (#6861)

**1796 Bust Dollar, Fine 12
Large Date, Small Letters, B-5, BB-65**

- 3910 1796 Large Date, Small Letters Fine 12 ANACS. B-5, BB-65, R.2.** Bowers-Borckardt Die State IV, a scarcer die state.. The BB-65 variety is easily identified by the large die lump joining I and C in AMERICA and the broken right foot of R in LIBERTY. An evenly worn specimen with a minor rim bruise at 10 o'clock on the obverse and light silver-gray patina. (#6861)

1796 B-5, BB-65 Dollar, XF40
Diagnostic Reverse Die Lump

- 3911** 1796 Large Date, Small Letters, XF40 NGC. B-5, BB-65, R.2. Die State IV, wherein the die lump on the reverse begins to follow the curve of the C in AMERICA. Easily recognized as the lone Large Date die pair for the year. The present coin, an upper-tier representative with modest wear concentrated at the high points, is softly lustrous beneath green-gold, silver-gray, and slate-blue patina. (#6861)

1797 Dollar, Deeply Toned XF40
10x6 Stars, B-3, BB-71

- 3912** 1797 10x6 Stars, Large Letters XF40 PCGS. B-3, BB-71, R.2. Bowers-Borckardt Die State III. This beautifully centered example displays a full strike and a wealth of fine detail, making it ideal for any carefully chosen type or variety collection of early dollars. Generally smooth surfaces are bathed in deep pearl-gray toning with hints of pale rose. The berry under the A of STATES quickly identifies this variety. Moderate circulation is evident on the highest points, and careful examination under a glass reveals a few widely scattered contact marks. (#6865)

1797 B-3, BB-71 Silver Dollar, AU58
10x6 Stars, Large Letters

- 3913** 1797 10x6 Stars, Large Letters AU58 PCGS Secure. B-3, BB-71, R.2. Ex: Hesselgesser Collection. Bowers-Borckardt Die State III. The usually seen die state, with an attenuated curl atop Liberty's head below the B in LIBERTY, and the right edges of the lower-right palm leaves on the reverse showing evidence of die lapping. Frosty silver surfaces show hints of tawny gold, especially on the obverse of this exceptionally high-grade *Guide Book* variety. LIBERTY is measurably off-center thanks to the crowding of 10 stars along the left border. U.S. coins, like the nation's flag, would soon reach maximum capacity for adding stars representing new states. Soon 13 stars would become standard in the interest of avoiding excessive clutter in the designs.
- Faint die clashing can be found in the right obverse field, but neither side is notable for the adjustment marks so often seen on these early silver coins. The brighter silver-white reverse presents a particularly pleasing rendition of the Small Eagle design, which was soon replaced by the large Heraldic Eagle motif of later dates. This coin's grade is the highest assigned by PCGS, which has certified only two AU58 pieces as B-3, BB-71 (4/12). An appealing example formerly in the collection of Dr. Robert D. Hesselgesser, noted series specialist who maintains several top-ranking Registry Sets of early dollars. (#6865)

- 3914** 1797 9x7 Stars, Large Letters Good 6 ANACS. B-1, BB-73, R.3. Bowers-Borckardt Die State III. Olive-brown and powder-blue toning encompasses this better date early dollar. We note a couple of light thin marks on the portrait and occasional obverse granular areas. One small reverse rim mark at 4 o'clock. (#6863)

**1797 B-1, BB-73 Silver Dollar, VF Details
9x7 Stars, Large Letters**

- 3915** 1797 9x7 Stars, Large Letters — Surfaces Tooled — Genuine PCGS. VF Details. B-1, BB-73, R.3. Myriad marks on each side of this two-tone early dollar suggests that this piece was purposely mistreated in the past, in an attempt to remove tiny bits of silver. The devices are light gray with medium gray fields and darker patina at the peripheries. (#6863)

3916 No Lot

- 3917** 1798 Large Eagle, Pointed 9 — Reverse Planchet Flaw — NGC Details. VF. B-28, BB-118, R.3. Bowers-Borckardt Die State I. This dove-gray Bust dollar has a vertical flan flaw on the reverse from 6 o'clock to the horizontal shield lines. That planchet flaw has been tooled, though a second and less conspicuous flan flaw, at 2:30 on the obverse, remains undisturbed. The reverse exhibits vertical hairlines, and small roundish marks are at 5 o'clock on the obverse and opposite at 1 o'clock on the reverse. (#6873)

- 3918** 1798 Large Eagle, Pointed 9, Close Date VF25 NGC. B-25, BB-123, R.4. Bowers-Borckardt Die State IV with numerous obverse die cracks. Deep gunmetal-gray with lighter tan toning on the portrait and the eagle's neck. The stars above the eagle are softly impressed, but the wings and shield are well defined. Relatively unabraded aside from a faint, thin mark concealed within the hair. Ex: Summer FUN Signature (Heritage, 6/2008), lot 1185, which realized \$1,955. (#6873)

- 3919** 1798 Large Eagle, Pointed 9 VF30 PCGS. B-24a, BB-124, R.2. Bowers-Borckardt Die State IV. Light pearl-gray and almond-gold toning. The surfaces are faintly hairlined but generally unmarked. The strike is good aside from softness on the stars northeast of the eagle's head. Housed in a green label PCGS holder. Ex: FUN Signature (Heritage, 1/2005), lot 8140, which realized \$2,760. (#6873)

**1798 Heraldic Eagle Dollar, XF40
B-14, BB-122 Variety**

- 3920** 1798 Large Eagle, Pointed 9 XF40 NGC. B-14, BB-122, R.3. Bowers-Borckardt Die State IV. The BB-122 variety is identified by the close position of stars 11 and 12 on the obverse and the claw touching A in AMERICA on the reverse. This lightly worn specimen shows a little softness on the central reverse, but all major design detail remains intact. The pleasing surfaces retain some traces of mint luster, with no adjustment marks and only minor abrasions. (#6873)

-
- 3921** 1798 Large Eagle, Pointed 9 — Repaired, Cleaned — ANACS. XF45 Details. B-24, BB-124, R.2. Bowers-Borckardt Die State IV. The fields are extensively smoothed and whizzed, and a thin scratch is near the right shield tip. Gunmetal-gray and tan toning alternates across this richly detailed Bust dollar. (#6873)

1798 B-27, BB-113 Dollar, AU58
First Obverse Die Use, Last Reverse Use

- 3922 1798 Large Eagle, Pointed 9, Close Date AU58 NGC. B-27, BB-113, R.2** The "workhorse" obverse die was used with seven different reverse dies, and is seen here in its first use, with a die crack from the denticles below the 9, curving to the left below the date on its way to join star 1. The reverse die was used for four die marriages and is in its final use here, showing several thin die cracks and other minuscule die markers.

This near-Mint specimen has full satin luster with only a slight break on the high points, all beneath intense lime, pale blue, rose, and violet toning on each side. Surface marks are minimal, and eye appeal is excellent. (#6873)

- 3923 1798 Large Eagle, 5 Stripes, 10 Arrows Fine 12 PCGS. B-6, BB-96, R.3.** Bowers-Borckardt Die State IV. Deep golden-brown toning encompasses this early Heraldic Eagle dollar. The central reverse is lightly impressed and exhibits heavy adjustment marks, as made. One pinscratch near the bust tip and a couple of gray spots are present at the borders. (#6876)

- 3924 1798 Large Eagle, Wide Date, Pointed 9 Fine 15 ANACS. B-23, BB-105, R.3.** Bowers-Borckardt Die State III. Pearl-white devices contrast with dove-gray fields. The eagle is surprisingly sharp for the Choice Fine level. The centers display a few horizontal slide marks. (#6877)

- 3925 1799/8 13 Stars Reverse Fine 12 NGC. B-1, BB-142, R.4.** From the most commonly seen reverse die state, this example shows extensive die crumbling at I in AMERICA. A seemingly inconsequential rim ding is noted on the reverse at 1 o'clock. This evenly worn example exhibits shades of golden-brown while deep navy-blue and violet shine through the reverse fields. (#6884)

1799/8 Draped Bust Dollar, AU50
13 Reverse Stars Overdate, B-1, BB-142

- 3926 1799/8 13 Stars Reverse AU50 NGC. B-1, BB-142, R.3.** Bowers-Borckardt Die State III. All three of the known overdate varieties of the 1799 Draped Bust dollar employ the same obverse die. This attractive AU specimen features the 13 star reverse, with scaling around the I in AMERICA that characterizes the BB-142 variety. This well-detailed example displays pleasing dove-gray patina, with surfaces that are remarkably free of abrasions and adjustment marks. Census for BB-142: 2 in 50, 3 finer (4/12). (#6884)

- 3927 1799 7x6 Stars VG10 NGC. B-10, BB-163, R.2.** Bowers-Borckardt Die State IV. A late die state with heavy cracks on the reverse that affect the sharpness of the stars above the eagle. This is a deep cream-gray example with lighter toning on the high points. Smooth overall with unimportant obverse rim dings at 2, 7, 9, and 11 o'clock. (#6878)

- 3928 1799 7x6 Stars — Improperly Cleaned — NGC Details. Fine. B-19, BB-155, R.4.** Bowers-Borckardt Die State IV. This slate-gray representative has bold peripheral legends and stars. Both sides are a bit luminous from cleaning, the field above the arrows has three faded marks, and minor rim dings are noted at 2 and 3 o'clock on the reverse. (#6878)

- 3929 1799 7x6 Stars — Improperly Cleaned — NGC Details. VF. B-14, BB-167, R.3.** Bowers-Borckardt Die State II. Though lightly hairlined and mildly glossy, this is a nicely defined Bust dollar with medium almond-gold and stone-gray toning. Marginally off center toward 11 o'clock, affecting only the width of denticils. Ex: *Lindsmith & LaRivere Collections (Bowers and Merena, 11/1999), lot 2212.* (#6878)

- 3930 1799 7x6 Stars VF20 NGC. B-5, BB-157, R.2.** Bowers-Borckardt Die State II. Early dies for this collectible Bolender variety, though the ascending crack through STATES is present. Richly toned golden-brown and steel-blue with pleasing definition on the eagle's wings. There are no consequential marks. (#6878)

- 3931 1799 7x6 Stars VF25 PCGS. B-8, BB-165, R.3.** Bowers-Borckardt Die State II. Tobacco-brown and lavender toning encompasses this lightly abraded early silver dollar. Evenly struck save for the stars northeast of the eagle's head. (#6878)

- 3932 1799 7x6 Stars — Damaged, Scratched, Cleaned — ANACS. XF Details. B-16b, BB-158, R.2.** Bowers-Borckardt Die State IV. The terminal state with several heavy obverse die cracks and a wavy appearance to the obverse. This slate-gray and almond-gold piece is well defined but has numerous tiny marks at the obverse center and a number of short scratches on the central reverse. Mildly dull from cleaning. Ex: *Dallas Signature (Heritage, 12/2005), lot 927.* (#6878)

**1799 Draped Bust Dollar, XF40
7x6 Stars, B-9, BB-166 Variety**

- 3933** 1799 7x6 Stars XF40 PCGS. B-9, BB-166, R.1. Bowers-Borckardt Die State III. This lightly worn Draped Bust dollar retains much of its original detail and shows the "Apostrophe" die flaw after the second S in STATES that identifies the readily available BB-166 variety. The pleasing surfaces are free of adjustment marks and show only minor abrasions. (#6878)

**1799 B-12, BB-160 Silver Dollar, AU53
No Berries Reverse**

- 3934** 1799 7x6 Stars AU53 ANACS. B-12, BB-160, R.3. The olive branch lacks berries on the late stage of the reverse die as it appears on B-11 and B-12 (BB-161 and BB-160, respectively). This pleasing light gray specimen has yellow and iridescent toning on both sides, with traces of luster in the protected areas. Trivial handling marks are evident on each side. (#6878)

- 3935** 1800 Wide Date, Low 8 — Improperly Cleaned — NGC Details. VF. B-10, BB-190, R.3. Bowers-Borckardt Die State VI. This minutely granular and luminous early dollar displays consistent lemon-gray toning and is devoid of detrimental abrasions. Most letters in E PLURIBUS UNUM are sharp. (#6888)

**1800 B-14, BB-194 Dollar, XF45
Dotted Date**

- 3936** 1800 Dotted Date XF45 PCGS. B-14, BB-194, R.3. The Dotted Date variety is one of the most distinctive early dollar varieties. The rust marks around the first 0 in that date provide instant attribution. Dark gray patina and gold toning hide a few faint hairlines and trivial surface marks on this pleasing dollar. (#6889)

**1800 B-14, BB-194 Dollar, AU58
Dotted Date**

- 3937** 1800 Dotted Date AU58 NGC. B-14, BB-194, R.3 A series of rust pits around the first 0 in the date give this variety its name, and provide for instant attribution. Lighter die lumps are scattered across much of the obverse die. Myriad die cracks are evident on each side of this late die state specimen.

Most 1800 Dotted Date dollars are found in lower grades. For example, NGC has certified 31 examples with an average grade of less than XF40. When the Bowers-Borckardt record of Notable Specimens was compiled in the early 1990s, a single piece was arbitrarily graded MS63, although that coin from the Boyd Collection has not been seen since its 1945 auction appearance. Three others were graded AU50, and the balance were listed in lower grades.

Reflective fields appear on both sides of this satiny, lustrous specimen, with reddish-gold toning over light silver surfaces. Both sides have a few scattered marks. Census: 2 in 58, 3 finer (4/12). (#6889)

**Choice VF 1801 Dollar
Scarce B-4, BB-214 Variety**

- 3938** 1801 VF35 PCGS. B-4, BB-214, R.4. The first 1 in the date is positioned close to the curl and there is a spur on the curved part of the D in UNITED, identifying the BB-214 variety, the scarcest variety for the date. The evenly worn surfaces of this coin retain much original detail, under mixed bluish-gray and golden-brown patina. (#6893)

- 3939** 1801 — Improperly Cleaned — NGC Details. XF B-2, BB-212, R.3. Bowers-Borckardt Die State III with a single “collar” clash. A lightly worn stone-white representative that has no singularly relevant marks, although minor hairlines are occasionally visible. (#6893)

- 3940** 1801 — Improperly Cleaned — NCS. XF Details. B-1, BB-211, R.3. This uniformly microgranular example is dark gray with forest-green and tan undertones. The devices display impressive detail, and there are no obtrusive marks. (#6893)

**1801 B-1, BB-211 Silver Dollar, XF45
Elusive in Higher Grades**

- 3941** 1801 XF45 PCGS. B-1, BB-211, R.3. Only four 1801 silver dollar varieties are known (five if the proof novodel is counted). Three of the four varieties are rated R.3, the fourth is R.4. As a date, 1801 is scarce in higher grades, and Mint State pieces are virtually unknown. This Choice XF specimen is an ideal date or type coin. Both sides have light gray surfaces with hints of lilac, gold, and iridescent toning. (#6893)

- 3942** 1802 Narrow Date Fine 15 NGC. B-6, BB-241, R.1. Bowers-Borckardt Die State III. Stone-gray devices, almond-gold fields, and ocean-blue borders provide a variety of color. This slightly bright silver dollar is lightly abraded for the grade, though we note a short mark in front of Liberty's neck. (#6895)

- 3943** 1802 Narrow Date — Obverse Scratched — NGC Details. VF B-6, BB-241, R.1. Bowers-Borckardt Die State III. This Heraldic Eagle dollar has dusky charcoal-gray and walnut-brown toning. A few parallel marks above the bust truncation explain the NGC notation. A small rim ding is at 7 o'clock, and the nicely detailed surfaces are subdued. (#6895)

- 3944** 1803 Small 3 Good 4 NGC. B-5, BB-252, R.3. The reverse die of this example started life in 1801 and saw its final appearance on this 1803 variety. Silver-gray patina covers both sides of this solid collector-grade example. (#6900)

**Scarce B-4, BB-254 Small 3
1803 Silver Dollar, VF25**

- 3945** 1803 Small 3 VF25 PCGS. B-4, BB-254, High R.3. Significantly scarcer than the typically encountered 1803 dollar, the B-6 Large 3. This is a collectible yet nicely defined example with attractive caramel-gold and powder-blue toning. Only moderately abraded overall, though to provide an identifier we mention a thin mark above the eagle's head. (#6900)

- 3946** 1803 Large 3 — Damaged — NGC Details. VF B-6, BB-255, R.2. Bowers-Borckardt Die State II. A reverse rim ding at 11:30 is filed, as are nearby dentils. Otherwise only a moderately abraded example of the final Bolender variety struck for circulation. Toned in dusky dove-gray and lavender shades.
From The JG Collection, Part Two. (#6901)

- 3947** 1803 Large 3 — Cleaned — ANACS. VF20 Details. B-6, BB-255, R.2. Bowers-Borckardt Die State II. Generally slate-gray with glimpses of sun-gold in design crevices. All letters in E PLURIBUS UNUM are at least partly present. The sole Large 3 die variety, if the extremely rare novodel proof is excluded. (#6901)

GOBRECHT DOLLARS

1838 Judd-84 Gobrecht Dollar, PR64 The Rarest of the Three Gobrecht Dates

3948 1838 Name Omitted, Judd-84 Restrike, Pollock-93, R.5, PR64 NGC. Silver. Reeded Edge. Stars Obverse, No Stars Reverse. Die Alignment III (head of Liberty opposite the NE in ONE). The Die Alignment III coins were likely struck in the late 1850s and never placed into circulation. These pieces show reverse die cracks at the top of MERI in AMERICA, the base of LAR in DOLLAR, and the top of TE in UNITED.

The Gobrecht dollars of 1838 are somewhat confusing, as the intent of their striking differs from one alignment to another. The Die Alignment IV coins, with the head of Liberty opposite the F in OF, represent originals that were struck in either 1838 or 1839. These rare coins are actually patterns. Probably fewer than 50 such pieces were ever struck. No 1838 dollars are known from Die Alignment I. Probably 250 or slightly more restrikes such as this coin were struck in Die Alignment III in the late 1850s, or during one of Henry Linderman's later tenures as Mint director. We know conclusively that some of the die-cracked Die Alignment III dollars were struck in the late 1850s (or possibly later), as one coin with these cracks exists struck over an 1859 Seated dollar. That coin was sold in our ANA Signature two years ago.

This lovely, high-grade example shows deeply mirrored fields. The peripheral details are a bit softly defined, but the centers are intricately detailed. The light hairlines that limit the coin from a PR65 grade are greatly subdued by an overlay of light gray-blue patina on each side. The dollars from 1838 are the rarest of the three dates in the Gobrecht series, and this piece represents a rare opportunity for the advanced collector.

Ex: Central States Signature (Heritage, 4/2007), lot 2159. (#11352)

1839 Gobrecht Dollar, Nicely Toned PR63
Judd-104 Original, Die Alignment IV

3949 1839 Name Omitted, Judd-104 Original, Pollock-116, R.3, PR63 PCGS. Stars Obverse, No Stars Reverse. Silver. Reeded Edge. Die Alignment IV: Center of Liberty's head opposite right side of F in OF. In December 1839, there were 300 Gobrecht dollars struck for circulation. All known coins of this date (both Originals and Restrikes) are in Die Alignment III or IV, but Originals are only known from Die Alignment IV. Unlike the 1836-dated coins, none are known in Die Alignment I, with the eagle flying upward. Thus it was impossible for the grading services to follow the lead of the 1836 dollars and label Die Alignment I coins as Originals, since none exist. Rather, the coins with little or no reverse die cracking were labeled as Original strikings, while the more heavily cracked pieces (through the tops of MERI, TE, and the bottom of LAR) are considered Restrikes, presumably produced between 1858 and 1885. This particular piece neatly fits into the Original category. Strong magnification shows a hairline-thin crack between the tops of ER, but it is so faint many may not see it.

Original 1839 dollars are generally found in circulated or impaired condition. This is logical, as they were struck in 1839 and released into circulation. Few people had the awareness in 1839 to set aside the recently designed dollar simply because it was dated that year. Presumably, most people who were interested in Christian Gobrecht's design set aside memento pieces from the first year of issue in 1836.

This is a particularly attractive example. The fields are nicely mirrored, and the reflectivity is consistent with proofs of other denominations struck in this era. Each side shows variegated rose and sea-green toning. The striking details are absolutely full, even showing complete definition on Liberty's foot. Magnification shows a few small contact marks in the fields on each side, but none are of singular importance. (#11444)

**1839 Restrike Gobrecht Dollar, Judd-104
Sharply Contrasted PR63 Cameo**

- 3950 1839 Name Omitted, Judd-104 Restrike, Pollock-116, R.3, PR63 Cameo NGC.** Stars Obverse, No Stars Reverse. Silver. Reeded Edge. Die Alignment IV (medal turn, center of Liberty's head opposite right side of F in OF). A die crack connects the tops of MERI, a characteristic of later restrikes. Additionally, the texture of the surfaces identifies this piece as a product of the 1860s or 1870s, certainly not 1839. The fields display a high degree of die polish and deep reflectivity, and heavy striations are noted that created this mirroring. The coin has also been lightly cleaned, leaving hairlines that go in another direction from the striations. Each side is mostly brilliant in the center with light dabs of russet patina at the margin. The die striations gives this Gobrecht the strong cameo contrast seen between the fields and devices, an unusual and certainly desirable finish on this popular 19th century type coin.

Although our description calls the 1839 Judd-104 "Name Omitted," it is noteworthy that the authors and contributors to the reference *Gobrecht Dollars Illustrated by the Collection of Julius Korein*, M.D. choose a different terminology: Name Removed. This casts a whole new light on the 1838- and 1839-dated Gobrecht dollars, particularly those most frequently seen, the Judd-84 and Judd-104 issues.

In a chapter titled "Gobrecht Reflections," John Dannreuther sums up his thinking about the matter nicely:

"The Starry and Starless [reverse] dies were from a common master die, with the dentils and lettering identical on the two dies, as they both have 182 identically placed dentils. (All four Gobrecht obverse dies have 165 identically placed dentils.) The stars were added to the reverse to created the starred reverse used for the 1836 Name on Base issue, just as the stars were added to a new master die that was created from the name-removed starless obverse working hub and used for the 1838 and 1839 obverse dies."

(#11446)

SEATED DOLLARS

- 3951 1841 AU58 NGC.** Ample remaining luster is partly silver with gold, orange, and violet elements showing largely at the margins. Modestly rubbed with solid overall definition, though the stars are a trifle soft. Census: 43 in 58, 45 finer (4/12).(#6927)
- 3952 1844 AU55 NGC.** Light blue-gray and deeper sage shadings embrace this lightly worn but still-lustrous Choice AU Seated dollar. Wispy abrasions and a few stuttering marks are present in the fields. Census: 21 in 55, 58 finer (4/12).(#6930)
- 3953 1845 XF45 PCGS.** Lightly worn with scattered abrasions but still faintly luminous. This Philadelphia Seated dollar has modest toning, gold-influenced at the centers with blue and lavender elements along the margins.(#6931)

**Choice AU 1845 Seated Dollar
Still Noticeably Reflective**

- 3954 1845 AU55 PCGS.** A low mintage of 24,500 business strikes makes the 1845 a popular date for Seated dollar collectors. As with most dollars struck in the 1840s and 1850s, the fields show significant reflectivity, an aspect that is still evident on this lightly circulated coin. The surfaces are nearly brilliant with just a hint of yellowish-golden patina on each side. Numerous small abrasions are peppered over each side, but none are worthy of individual mention. (#6931)
- 3955 1846 AU53 PCGS. CAC.** This is a pleasing blue-gray example of an early Seated dollar. The only defect we see is a small dig in the left reverse field. Significant luster remains.(#6932)
- 3956 1846 AU58 NGC. CAC.** Rich violet-gray and golden-rose hues enrich the eye appeal of this near-Mint Seated dollar. Great detail with only isolated abrasions and modest wear. A small dark spot appears in the lower folds of drapery.(#6932)
- 3957 1847 AU50 ANACS.** A still-luminous piece with gold and brown tints at parts of the margins. Lightly abraded overall with a long, stuttering line of reed marks off Liberty's pole-supporting arm. (#6934)
- 3958 1859 XF45 PCGS.** A pleasing Choice XF specimen, with light wear on the design elements and a few traces of mint luster under attractive gray and blue-steel patina. Population: 20 in 45, 77 finer (4/12).(#6946)
- 3959 1859-O AU55 NGC.** Blue-green, gold-orange, and gray overtones mingle on this lightly worn antebellum Seated dollar. Lightly abraded overall with the largest rim bump over Liberty's head. (#6947)

1859-S Seated Dollar, MS63
An Absolute and Condition Rarity

- 3960 1859-S MS63 NGC.** The coinage of silver dollars in San Francisco in 1859 had a twofold purpose: It was more economical for the mint to strike one silver dollar than two half dollars or 10 dimes, and dollars were also produced to try and cut into the Mexican market for Trade dollars in the Orient. Addressing this second point, the August 1859 *Mercury Magazine* stated: "Every vessel leaving San Francisco for Chinese ports takes a large amount of Mexican dollars." As a result, most surviving 1859-S dollars are VF or XF. Hardly any were intentionally set aside at the time of issue. This is one of the finest examples known of this condition rarity. Only 10 coins have been certified in MS63 with a single piece finer (4/12). Each side has bright fields and intermixed rose and gray toning. The strike is generally strong except on the eagle's plumage. Light abrasions are evident with a magnifier, the most obvious a cluster over the breasts of Liberty. (#6948)
-

1860-O Silver Dollar, MS62
Likely Treasury Hoard Coin

- 3961 1860-O MS62 NGC.** This is a stunning Seated dollar for the grade, with fully brilliant silver luster and satiny surfaces. Faint hairlines are virtually undetectable. It is likely that this piece has the 1960s Treasury hoard as its numismatic source. Most Mint State 1860-O dollars surviving today are from that hoard, dispersed half a century ago. (#6950)
-

**1867 Seated Dollar, MS65
Very Rare in High Grades**

- 3962 1867 MS65 NGC.** The Bowers-Borckardt dollar reference explains the opportunity presented in the early and mid-1860s for the Seated dollar in the China trade. The standard Mexican eight reales was altered during the brief reign of Emperor Maximilian (1864-1867). His portrait was not widely recognized in the Orient as was the longstanding Cap and Rays design. This confusion and lack of trust gave the United States an opportunity to increase its market share in China, and as a result mintages of silver dollars increased and many thousands were shipped overseas. However, even though production increased substantially, few pieces were set aside domestically, especially in high grade. This Gem displays the usual bright fields, created by die striations. Each side has intermixed golden-rose and gray patina with a blue accent at the margins. The reverse is sharply struck, but the obverse shows uniform softness of high point definition. Census: 4 in 65, 0 finer (4/12). (#6960)
- 3963 1869 AU58 NGC.** Modestly rubbed on the high points but with largely intact luster that is pale silver-gray. Light abrasions overall with a cluster of deeper marks off the right (facing) wingtip. Census: 13 in 58, 35 finer (4/12). (#6962)
- 3964 1870 AU58 NGC.** An uncommonly well-preserved example of this heavily melted issue, luminous under silver, gold-orange, and violet patina. Just slight rub appears on the high points, though there is broad striking weakness most visible on the right-side obverse stars. Census: 23 in 58, 58 finer (4/12). (#6963)
- 3965 1870-CC VG10 PCGS.** Although well worn, this is a wonderful example showing medium gray surfaces with deeper steel patina near the devices. A few trivial scratches and imperfections are expected for the grade. The reverse appears to be a full grade sharper than the obverse. (#6964)

- 3966 1870-CC VF30 NGC. Variety 2-E.** Patinated cobalt-blue and golden-tan with a window of relative brilliance at the reverse center. This first-year Carson City silver dollar has served in Old West commerce but retains substantial plumage detail. (#6964)
- 3967 1871 AU55 NGC.** This attractive Choice AU specimen shows only a trace of wear on the high points of the design elements, with prooflike fields under shades of gold, lavender, and blue toning. (#6966)

PROOF SEATED DOLLARS

**Moderately Toned Gem Proof
1860 Seated Dollar**

- 3968 1860 PR65 PCGS.** Although the *Guide Book* publishes to this day a figure of 1,330 pieces for the 1860 proof Seated dollar, Walter Breen maintains in his *Proof Encyclopedia* that all but 527 were melted. Despite the exact figure this Gem proof is nonetheless in the upper echelon of survivors of the issue; PCGS has seen only three submissions in this grade with seven finer, all in PR66 (4/12). The surfaces are highly reflective despite a moderate layer of intermingled sky-blue and pinkish patina. The strike is precise, save for a couple of stars at the top obverse rim, and the eye appeal is excellent. (#7003)

**1861 Seated Liberty Dollar, PR64 Cameo
Only Three Finer NGC Coins**

- 3969 1861 PR64 Cameo NGC.** Proof 1861 Seated Liberty dollars are much more elusive than the reported mintage of 1,000 pieces would suggest. Many examples went unsold and were melted after the end of the year. Experts estimate about 350 specimens were actually distributed, and coins with Cameo surfaces are rare. Vivid shades of cobalt-blue and greenish-gold toning encircle the mostly brilliant centers of this dramatically contrasted example. Census: 6 in 64 Cameo, 3 finer (4/12). (#87004)

**1863 Seated Dollar, PR62
Considerable Contrast Evident**

- 3970 1863 PR62 PCGS.** The 1863 Seated dollar might be termed "well known" because of its low mintage of only 460 proofs. Certainly collectors outside the series are aware of its importance and scarcity. This is an interesting coin that is lightly hairlined, but the fields are remarkably deep and even more interesting are the frosted devices. Each side is mostly brilliant with a hint of golden-brown toning around the rims. (#7006)

**Select Proof 1863 Dollar
Mostly Brilliant Surfaces**

- 3971 1863 PR63 PCGS.** In an interesting footnote to proof silver coins struck during the Civil War, in this case Seated dollars, Bowers (1993) notes that proofs enjoyed added popularity after specie payments were suspended in July 1862. This led to a higher survival in spite of the low numbers struck. This is a nicely mirrored example that shows much brilliance with a pearl-gray overlay of patina and scattered bits of toning. Lightly hairlined and fully struck. (#7006)

**1864 Seated Dollar, PR64
Low Mintage of Only 470 Pieces**

- 3972 1864 PR64 PCGS.** Just 470 proofs of this date were sold to collectors, but survivors are surprisingly numerous from that low original number. Deeply toned with a complete layer of midnight-blue, iron-gray, and brownish-gold toning over both sides. The design elements are all crisply defined, including Liberty's face and upper hair detail. An appealing Civil War-era Seated dollar. Population: 39 in 64, 18 finer (4/12).
Ex: FUN Signature (Heritage, 1/2008), lot 1866. (#7007)

- 3973 1865 PR55 PCGS. CAC.** This slightly handled proof still retains most of the reflectivity in the fields. The strike is predictably strong in all areas and there are no obvious or detracting contact marks. Perhaps carried briefly as a pocket piece. (#7008)

**Select Proof 1866 Dollar
Elusive Cameo Example**

- 3974 1866 Motto PR63 Cameo PCGS.** The motto IN GOD WE TRUST was adopted in 1866, making the date extremely popular with type collectors. This attractive Select specimen features sharply detailed devices, with rich mint frost that contrasts with the hazily reflective fields to produce a noticeable cameo effect. Light golden-tan toning is evident on both sides, with a few hairlines and contact marks explaining the grade. Population: 14 in 63 Cameo, 29 finer (4/12). (#87014)

Choice Cameo Proof 1866 Silver Dollar

- 3975 1866 Motto PR64 Cameo PCGS. CAC.** Light to medium autumn-gold toning visits the margins of this fully struck first-year Motto silver dollar. Frost is consistent across the devices, and the mirrored fields exhibit only delicate hairlines. An impressive specimen from a proof mintage of only 725 pieces. Population: 15 in 64 Cameo, 14 finer (4/12). (#87014)

**1869 Seated Dollar, PR63 Cameo
Only 600 Pieces Struck**

- 3976 1869 PR63 Cameo NGC.** The 1869 proof Seated Liberty dollar boasts a low mintage of just 600 pieces, and few survivors display any Cameo contrast. This impressive Select example exhibits sharply detailed frosty design elements set against hazily reflective fields that show only a few minor hairlines. Census: 10 in 63 Cameo, 13 finer (4/12). (#87017)

**1871 Seated Liberty Dollar, PR63
Rare Cameo Example**

- 3977 1871 PR63 Cameo PCGS.** A generous mintage of 960 proof Seated Liberty dollars was achieved in 1871, with most examples sold as part of silver proof sets, which were unusually popular that year. This impressive Select example displays dramatic cameo contrast between the mirrored fields and the sharply detailed frosty design elements. A few minor hairlines and contact marks prevent a Choice evaluation. Population: 16 in 63 Cameo, 13 finer (4/12). (#87019)

**Consistently Toned Near-Gem Proof
1873 Seated Dollar**

- 3978 1873 PR64 PCGS.** This near-Gem proof 1873 Seated dollar displays fairly consistent toning on each side, with golden-amber hues contrasting against glints of jade. The eye appeal is excellent and the strike is bold, and a loupe reveals only a few stray contact marks that preclude a Gem grade. Population: 38 in 64, 15 finer (4/12). (#7021)

TRADE DOLLARS

**1874-CC Trade Dollar, MS60
Sharply Struck**

- 3979 1874-CC MS60 PCGS.** Most of the 1874-CC Trade dollar mintage went to China, and a considerable number returned with chop marks (David Bowers, 1993). This Mint State specimen lacks any such imprints. Both sides of this brilliant piece display satin luster with delicate gold patina, and the design elements are sharply struck with no evidence of high-point wear. Myriad marks account for the grade, but none of these can be considered significant. (#7035)

- 3980 1875 AU58 PCGS.** Type Two Reverse. The cartwheel luster is largely intact, and freckles of orange patina cling to the obverse border. Striking softness is typical and the surfaces show scattered marks of varying depth, but the overall eye appeal is solid; the obverse in particular displays well. Population: 12 in 58, 49 finer (4/12). (#7037)

Lightly Toned Choice 1875-S Trade Dollar

- 3981 1875-S MS64 PCGS.** Type One Reverse. Large S. Delicate almond-gold toning visits this thoroughly lustrous and carefully preserved near-Gem. The strike is good save for Liberty's hair and the eagle's right (facing) claw. A lovely example of this conditionally challenging crown-sized type. (#7039)

**1875-S/CC Trade Dollar, FS-501, MS62
Emergency Coinage Measure**

- 3982 1875-S/CC MS62 NGC. FS-501.** Type One Reverse, Large S. The more prominent of the two known S/CC reverses. The right C is lightly but nearly fully outlined. The left C is also evident, although faint. Unlike the 1900-O/CC silver dollar varieties, the 1875-S/CC was struck while the Carson City Mint was active. The reason for its existence can only be speculated. Perhaps the San Francisco Mint, which coined the majority of Trade dollars, had a dire need for reverse dies, and it was more expedient to send dies from Carson City rather than Philadelphia. The present lustrous and faintly toned silver dollar is only lightly abraded for the grade. The strike is good, although Liberty's head and the right (facing) claw are generally soft. Census: 6 in 62, 8 finer (4/12). (#7040)

**Choice 1876-S Trade Dollar
Rare in Higher Grades**

- 3983 1876-S MS64 NGC.** Type One Obverse, Type One Reverse. Large S. The 1876-S Trade dollar boasts one of the largest mintages of the series at 5.2 million pieces, but examples in Choice condition are scarce in today's market, and finer specimens are quite rare. This attractive Choice example is sharply detailed in most areas, with a touch of softness on the head and upper stars. The lustrous surfaces are blanketed in spectacular shades of orange, gold, and lilac toning. Census: 85 in 64, 20 finer (4/12). (#7043)
- 3984 1877 MS62 NGC.** A prooflike Trade dollar when rich olive-green and rose-gold toning. Well struck save for the upper obverse margin. The reverse is well preserved and the obverse field displays small marks. Certified in a prior generation NGC holder. (#7044)

PROOF TRADE DOLLARS

- 3985 1873 — Improperly Cleaned — NGC Details. Proof.** Cameo contrast is apparent on this lightly toned and faintly hairlined first-year proof. The strike is sharp except on the right (facing) claw. (#7053)

- 3986 1873 PR63 NGC.** Gold-to-gray patina overall with considerable reflectivity underneath. This Select proof displays well for the grade on the obverse, though three deep contact marks appear close to the eagle on the left side. Census: 30 in 63, 54 finer (4/12). (#7053)

**Deeply Toned, Reflective
Near-Gem Proof 1874 Trade Dollar**

- 3987 1874 PR64 PCGS. CAC.** Even though the surfaces are deeply toned in dominant shades of aqua with russet rim accents, generous reflectivity is blatant on both sides of this near-Gem proof 1874 Trade dollar. The strike is razor-sharp, and only a stray contact mark or two appear to preclude a Gem grade. A beautiful representative of the type. Population: 41 in 64, 9 finer (4/12). (#7054)

**Gem Proof 1875 Trade Dollar
Only 700 Pieces Struck**

- 3988 1875 PR65 PCGS.** Type Two Reverse. A small mintage of 700 proof Trade dollars was achieved in 1875, split between Type One and Type Two reverse designs. This coin represents the Type Two Reverse, with no berry under the claw. The 1875 proof Trade dollars were better received by collectors than their counterparts of earlier years, and there are a few more examples extant than for the 1873 and 1874 issues. Still, the 1875 is quite rare at the Gem level.

This attractive Gem displays sharply detailed design elements, with mirrored fields under pleasing shades of cerulean-blue and champagne-gold toning. Only the most insignificant signs of contact are present, and this coin possesses outstanding eye appeal. Population: 9 in 65, 5 finer (4/12). (#7055)

**1875 Trade Dollar, PR63 Cameo
A Business Strike Rarity
Proofs Carry Added Demand**

- 3989 1875 PR63 Cameo PCGS.** Type One Reverse. The rarity of business strike 1875 Trade dollars places added emphasis on surviving proofs. This Select Cameo proof is mostly brilliant with excellent contrast, the devices residing within a frame of gold and blue-green toning. Population: 16 in 63 Cameo, 22 finer (4/12). (#87055)

Gem Cameo Proof 1875 Trade Dollar

- 3990 1875 PR65 Cameo NGC.** Type Two Reverse. Delicate but consistent light gold toning graces this lovely Cameo Gem proof Trade dollar. The strike is razor-sharp, even on such often mushy areas as Liberty's hair and the eagle's claws. A few nearly imperceptible parallel hairlines are detected beneath Liberty's branch stem, and faint mint-made flan streaks are found above the eagle's beak and through the final letters in AMERICA, but these are of little significance. Only 700 proofs were struck, and the scarcity of Uncirculated business strikes for this date contributes to the demand for high quality proofs. Census: 13 in 65, 6 finer (4/12).
Ex: Dallas Signature (Heritage, 10/2006), lot 2319, which realized \$8,050. (#87055)

- 3991 1876 — Improperly Cleaned — NGC. Proof.** Type One Obverse, Type Two Reverse. Proofs of this date are also known with a Type Two obverse. This stone-gray centennial-year specimen is intricately struck but displays myriad faint hairlines. (#7056)

Select Proof 1876 Trade Dollar

- 3992 1876 PR63 PCGS.** Type One Obverse, Type Two Reverse. This brilliant Select proof exhibits such pronounced device-to-field contrast that it might qualify as Deep Cameo, but is undesignated as Cameo or Deep Cameo due to its circa-1990 green label holder. Sharply struck and highly mirrored with icy motifs and lightly abraded fields. (#7056)

- 3993 1877 PR62 PCGS.** Unlike the business strikes of this date, the proofs are fully struck on the head of Liberty. The surfaces display gray-blue toning in equal measure over each side, which helps subdue the light hairlining. (#7057)

- 3994 1879 PR62 PCGS.** Light silver-gray surfaces host faint gold toning on each side of this fully mirrored proof-only Trade dollar. Faint hairlines and contact marks prevent a higher grade. (#7059)

**1879 Trade Dollar, PR63
Important Proof-Only Issue**

- 3995 1879 PR63 PCGS.** Trade dollars were only produced in proof format in 1879, with a mintage of 1,541 pieces. A patina of light blue and greenish-gray hues blankets the surfaces of this attractive Select example, with brightly reflective fields shining through the toning, and well-detailed design elements. (#7059)

**1879 Trade Dollar PR62
Scarce Example With Cameo Surfaces**

- 3996 1879 PR62 Cameo NGC. CAC.** A generous proof mintage of 1,541 Trade dollars was achieved in 1879, the second year in which the Philadelphia Mint produced only proof examples of this denomination. This boldly contrasted specimen displays sharply detailed frosty devices and reflective fields, with attractive champagne-gold toning. (#87059)

Cameo PR66 1879 Trade Dollar
Beginning of the Proof-Only Era

- 3997 1879 PR66 Cameo NGC.** While the 1878 technically is the first proof-only Trade dollar issue, starting with the 1879 Trade dollars, all examples struck were proofs, lending both dates symbolic significance. This carefully preserved and solidly contrasted specimen has a largely silver (mirror-and-frost) appearance but also shows glimpses of green-gold at the margins, particularly on the reverse. A few tiny faults are present, but the all-around eye appeal is solid. NGC has certified a total of 26 numerically finer Cameo specimens (4/12), though the presence of resubmissions is virtually a guarantee. (#87059)

High-Grade 1879 Trade Dollar
PR67 Cameo, First Proof-Only Issue

- 3998 1879 PR67 Cameo NGC.** This is an extraordinarily high-grade specimen of the first proof-only date struck at Philadelphia as the Trade dollar began its slide into undeserved oblivion. This obverse shows what Breen characterized as the “imperfect top” on 8 in the date, while this reverse variety displays pleasingly full feathers on the eagle’s legs. The Trade dollar’s primary goal of circulation in the Far East had been largely achieved by 1878, and the Trade dollar’s legal tender status within the United States had been revoked earlier, in July 1876. The dates after 1878 were struck largely for inclusion in annual proof sets or to be sold as singles to interested collectors. Their steadily diminishing mintages create major challenges for numismatists today, and pieces of the present coin’s exceptional quality are seldom encountered in many later dates. Census: 15 in 67, 2 finer (4/12). (#87059)
- 3999 1880 PR58 NGC. CAC.** Little mirrored reflectivity remains on this lightly worn proof-only Trade dollar. Both sides are deeply toned in gray with iridescent splashes. (#7060)

**Premium Gem Proof 1880 Trade Dollar
Only Three Coins Certified Finer at PCGS**

- 4000 1880 PR66 PCGS.** Intermingled shades of blue and gray patina enhance the well-preserved surfaces of this remarkable Premium Gem proof. The fields are deeply reflective, beneath the toning, and the design elements are sharply detailed. As in all years after 1879, Trade dollars were only struck in proof format in 1880. Population: 25 in 66, 3 finer (4/12). (#7060)

**1880 Trade Dollar, PR65 Cameo
Elusive Contrasted Specimen**

- 4001 1880 PR65 Cameo NGC.** The golden-tinged obverse is equally as blemish-free as the silver-white reverse. Pinpoint strike definition and silky-smooth features provide solid eye appeal for this Gem proof late-date Trade dollar. The appreciably frosted devices appear to float atop glassy reflectivity in the fields. Census: 22 in 65 Cameo, 48 finer (4/12). (#87060)

- 4002 1882 — Improperly Cleaned — NGC Details. Proof.** Hairlines are prevalent but the precisely struck devices are frosty and provide contrast with the untuned fields. The crossbar is nearly absent on the 4 in 420. A popular proof-only date. (#7062)

**1882 Proof-Only Trade Dollar, PR63
Rich, Variegated Toning**

- 4003 1882 PR63 NGC.** While a proof-only date, the 1882 is likely to be one of the more frequently encountered Trade dollars, which is good news for type collectors as the overall preservation is quite high. The proof mirrors on this piece flash brightly when angled just right, but they have to penetrate the variegated gray, blue, and golden toning seen over each side. Almost fully struck. (#7062)

**1882 Trade Dollar, PR67
None Finer at PCGS**

- 4004 1882 PR67 PCGS. CAC.** Trade dollars were only struck in proof format in 1882, with a reported mintage of 1,097 pieces. The demand for this issue seems to have peaked early in the year, as deliveries dropped off sharply after March, with only 49 examples delivered in April and other small totals struck throughout the year. The December delivery was a respectable 165 pieces, possibly anticipating a larger Christmas demand, but it is likely that some of these were melted as unsold.

This magnificent Superb Gem Trade dollar is spectacularly toned, with golden-brown centers surrounded by a ring of violet on both sides. The design elements are well-detailed, with just a touch of softness on the upper stars and the fields display deep reflectivity under the toning when the coin is tilted in the light. This specimen shows the weak right crossbar extension on the 4 in 420 that is characteristic of the Bowers-Borckardt variety 1b. Eye appeal is outstanding. Population: 6 in 67, 0 finer (4/12). (#7062)

Cameo Contrasted 1882 Trade Dollar, PR63

- 4005 1882 PR63 Cameo NGC.** The fields flash strongly through the blue and rose toning seen on the obverse and the near-brilliant reverse. The cameo devices are abundantly evident through the toning on the obverse, profoundly so on the reverse. While the 1882 is a relatively available Trade dollar, it is less so with strong field-device contrast as seen on this piece. Census: 17 in 63 Cameo, 82 finer (4/12). (#87062)

1882 Trade Dollar, PR63 Deep Cameo Brilliant and Profoundly Contrasted

- 4006 1882 PR63 Deep Cameo PCGS.** While 1882 Trade dollars are frequently encountered, few are seen with the profound contrast between fields and devices noted on this coin. The brilliant surfaces certainly help, but the mirroring is remarkable as is the thick mint frost seen on the devices. Lightly hairlined. Population: 13 in 63 (1 in 63+) Deep Cameo, 27 finer (4/12). (#97062)
- 4007 1883 PR58 PCGS.** The slightest touch of wear shows on the sharply detailed design elements of this still-attractive proof Trade dollar. Pale champagne-gold and cerulean-blue toning blankets the surfaces of both sides. (#7063)
- 4008 1883 — Improperly Cleaned — NGC Details. Proof.** The icy motifs are well struck, but the fields display noticeable hairlines. Untoned aside from a dab of cobalt-blue between stars 9 and 10. A popular proof-only date. (#7063)

Elite PR67 Cameo 1883 Trade Dollar

- 4009 1883 PR67 Cameo PCGS.** Despite the presence of the 1884 and 1885 Trade dollar proof rarities in the occasional auction catalog, for most collectors' practical purposes (and as the official Mint records know it), the Trade dollar series ends with the proof-only issue of 1883. This is one of the most magnificent specimens from that terminal issue, crisply contrasted through a partial layer of green-to-gold toning across otherwise silver surfaces. A small milky spot to the right of the obverse wheat sheaf and a tiny luster disturbance at the E of AMERICA do little to shake the coin's impressive overall preservation. Population: 2 in 67 (1 in 67+) Cameo, 0 finer (4/12). (#87063)

WALKING LIBERTY HALF DOLLARS

- 4010 1916 MS64 PCGS.** Frosty silver luster is gorgeous on this near-Gem, toned only at a few small places at the margins. Decently struck but with a few horizontal abrasions along the central obverse high points, thus accounting for the grade. (#6566)
- 4011 1916 MS64 ANACS.** The exceptionally strong central details, especially on Liberty's hand and the eagle's leg, make this a strong type coin candidate. Each side also displays exuberant mint frost and light peripheral toning. (#6566)
- 4012 1916 MS64 NGC.** Decently detailed compared to its often-weak first-year peers. Shimmer-sweeping luster is silver-gray at its base but has distinctive gold and lavender elements. (#6566)
- 4013 1916 MS65 PCGS.** The dime, quarter, and half dollar each featured a new design that was introduced in 1916. This lovely Gem has frosty silver luster and delicate peripheral gold toning. (#6566)

1916 Half Dollar, MS66
First Walking Liberty Issue
Only Four Finer at PCGS

- 4014 1916 MS66 PCGS. CAC.** The 1916 Walking Liberty half dollar is always in demand because of its low mintage and its status as a first-year type coin. The present coin is a spectacular Premium Gem, with a sharp strike and full, satiny luster. The surfaces display lovely ice-blue centers, with shades of gold and amber at the borders. Eye appeal is outstanding. Population: 77 in 66 (3 in 66+), 4 finer (4/12). (#6566)
- 4015 1916-D MS65 PCGS.** The 1916-D is a scarce early Walker that is challenging in higher Mint State grades, more so than its mintage of 1.01 million would suggest. This Gem has a luminous, pebbled texture under varying patina, gold-infused gray on the obverse with dappled violet-gray at the right reverse. (#6567)

1916-D Fifty Cent, MS66
Seldom Seen Any Finer

- 4016 1916-D MS66 NGC.** Premium Gem is the highest grade that the 1916-D half is likely to be encountered by most collectors as NGC and PCGS combined have certified fewer than 10 examples finer. The central design features are typically soft, though the thumb on Liberty's branch hand is outlined. Lustrous silver surfaces display faint splashes of gold patina. Census: 31 in 66, 6 finer (4/12). (#6567)
- 4017 1916-S AU58 NGC.** This well-detailed near-Mint example shows emerging detail on Liberty's hand and the eagle's leg. The surfaces display slightly granular, but vibrant, mint luster. The mintmark was located on the obverse in this first-year issue. (#6568)
- 4018 1916-S MS62 NGC.** Peach-gold overtones are prominent on this first-year San Francisco half. Though the devices have typically soft detail, the luster under the patina is intact. (#6568)
- 4019 1916-S MS63 PCGS.** An adequate strike appears on this first-year Walker, with light gray surfaces and full luster. A few minimal splashes of toning are noted on each side. (#6568)

1916-S Half Dollar, MS64
Scarce First-Year Issue

- 4020 1916-S MS64 PCGS.** This popular key date is virtually untoned but for some pale golden-rose color on each side. Bright and clean with a decent strike and lots of eye appeal. The thumb on Liberty's right (facing) hand is outlined, as are the separations in the adjacent branches. An extremely attractive, low-mintage early Walker. (#6568)

- 4021 1917 MS66 NGC.** Brightly lustrous on both sides with a decent strike. The obverse has gold-orange, pink, and pale blue peripheral hues, while the reverse has richer versions of the same colors with plum added and broader coverage. Census: 38 in 66, 4 finer (4/12). (#6569)
- 4022 1917 MS66 NGC.** This well-detailed Premium Gem, from the second year of the series, exhibits satiny mint luster and shades of green, gray, and amber toning. Census: 38 in 66, 4 finer (5/12). (#6569)
- 4023 1917-D Obverse MS63 NGC. CAC.** Varying silver-grays occupy the centers, while the margins show lavender and violet elements. A softly struck but important obverse-mintmark piece with few serious abrasions. (#6570)
- 4024 1917-D Obverse MS64 NGC.** The mintmark was moved to the reverse later in the year, but this coin shows the D in the favored obverse position. This well-detailed Choice example is brightly lustrous, under shades of champagne-gold and lavender toning. (#6570)
- 4025 1917-D Obverse MS64 PCGS.** Quicksilver luster has an occasionally pebbled texture. Golden overtones are far more prominent on the reverse. Solid all-around detail. PCGS has graded 74 pieces as MS65 or better (4/12). (#6570)
- 4026 1917-D Reverse AU58 PCGS. CAC.** Gold and apricot overtones are luminous on this example of the initial reverse-mintmark Denver issue. Decently struck overall with a degree of separation on the thumb. (#6571)
- 4027 1917-D Reverse MS62 PCGS.** Silver-white through the centers with pale golden-tan at much of the margins. A plum patch touching Liberty's hand and the flag provides the sole highly visible exception. Fewer than 2 million pieces were struck after the switch to the reverse mintmark. (#6571)
- 4028 1917-S Obverse AU55 ANACS.** A luminous and minimally worn example from the cut-short Obverse Mintmark subtype. Surfaces are largely silver with few significant marks and a pebbled texture. (#6572)
- 4029 1917-S Obverse MS60 ANACS.** The surfaces have a fine-grain, matte-like texture with satiny mint luster. Sharply struck, except on Liberty's head, the centers are light and surrounded at the margins by rich reddish-golden and blue toning. (#6572)

**1917-S Obverse Half, MS64
Nearly Brilliant Surfaces**

- 4030 1917-S Obverse MS64 PCGS.** Roughly comparable in scarcity to its Reverse counterpart, the 1917-S was curiously little saved at the time of issue. This is a softly lustrous example that retains most of the original brilliance with a light accent of color around the margins. Well struck on Liberty's hand and gown lines. (#6572)

- 4031 1917-S Reverse MS62 PCGS.** A subtly lustrous example, minimally marked with gold-gray patina over both sides. Softly struck as usual in the centers, though this has little impact on the grade. (#6573)
- 4032 1917-S Reverse MS63 PCGS.** Well-struck with moderately toned, matte-like surfaces that show mostly wispy marks. Gold-orange and lavender-gray are the most noteworthy hues on this Select piece. (#6573)

**1917-S Reverse Half Dollar, MS64
Fully Lustrous and Well Struck**

- 4033 1917-S Reverse MS64 PCGS. CAC.** The 1917-S half dollar with the mintmark on the reverse is an elusive issue in Mint State, indeed more so than its mintage of 5.5 million pieces would suggest. Moreover, weak strikes in the central areas plague this issue. The present near-Gem exhibits sharper detail than ordinarily seen, and its frosty ivory surfaces are fully lustrous with splashes of subtle blue toning at the peripheries. PCGS has seen only 48 numerically finer pieces (4/12). (#6573)

**1917-S Reverse Mintmark Half Dollar, MS64
Light Golden-Tan Toning**

- 4034 1917-S Reverse MS64 PCGS. CAC.** Light golden-tan toning visits this shimmering and nicely struck better-date half dollar. Carefully preserved and surprisingly scarce as such, despite a reported mintage of more than 5.5 million. The year 1917 was transitional for Walking Liberty mintmarks, which moved from the obverse to the reverse. PCGS has only certified 48 numerically finer examples (4/12).
Ex: FUN Signature (Heritage, 1/2008), lot 2088. (#6573)
- 4035 1918 MS64 NGC.** Well-defined everywhere, branch hand included. Lustrous surfaces are largely silver with a satiny sheen, edged in gold with a few tan incursions at the reverse periphery. A couple of minute marks are noted in the right (facing) obverse field and on the lower part of the eagle's right wing. (#6574)
- 4036 1918-D AU58 ANACS.** Typically soft through the centers but with little actual wear. Strong remaining luster with a light gold-to-gray overlay and a number of small specks of deeper color. (#6575)

**1918-D Half Dollar, MS63
Above-Average Strike**

- 4037 1918-D MS63 PCGS.** Brilliant, lustrous, and mostly white, with just a hint of pale gold color mixed in to produce an attractive Select Mint State specimen. A decent strike is slightly above average for the issue. The surfaces are lightly abraded, as expected for the grade, but contact marks are small and unworthy of individual mention. *Ex: Long Beach Signature (Heritage, 9/2006), lot 2059. (#6575)*

- 4038 1918-S MS62 NGC.** An earlier reverse-mintmark San Francisco piece with a sizable gold component to the patina where present, over most of the obverse and the outer reverse. The reverse has a marked but lustrous silver interior. (#6576)

- 4039 1918-S MS63 PCGS.** Typically blunt on the high parts of the design but with intact gold-and-gray luster. A pleasing Select example for the date, which proves conditionally challenging in Gem and better grades. (#6576)

**Lustrous Near-Gem 1918-S Half Dollar
Seldom Seen Finer**

- 4040 1918-S MS64 PCGS.** Although sometimes regarded as a common early date, the 1918-S half dollar is elusive in grades higher than Choice. This coin's obverse strike is typical of the early dates, showing head and hand weakness resulting from A.A. Weinman's original design concept. Frosty silver suffuses both sides. PCGS shows only 31 submissions in finer grades (4/12). (#6576)

Choice 1918-S Half Dollar

- 4041 1918-S MS64 PCGS.** Dappled caramel-gold toning drapes lustrous and well preserved surfaces. The strike is typical on the cheek and branch hand. Like other early branch mint issues, the '18-S is scarce in Uncirculated grades. A "bearded eagle" variety with clash marks on the left reverse field. Housed in a green label holder. (#6576)

**1918-S Half Dollar, MS64
Conditionally Scarce**

- 4042 1918-S MS64 NGC.** Despite a substantial mintage of over 10 million pieces, the 1918-S was not saved in quantity, and anything finer than this lovely Choice coin is a condition rarity. Well struck overall with slight definition on the branch hand. Luminous, modestly granular surfaces are primarily pale silver-gray with dots of tan near the rims and warm golden overtones on the obverse. (#6576)

- 4043 1919 AU55 NGC.** This Choice AU Walking Liberty half dollar is well-struck, with the usual touch of softness on the centers. The surfaces retain much satiny mint luster, with just a wisp of pale gold toning. (#6577)

**1919 Walking Liberty Half, MS65
Bright, Clean, Attractive Surfaces**

- 4044 1919 MS65 PCGS.** Any half dollar dated 1919 gets the attention of the astute collector. While not as scarce as the D and S-mint issues from this year, the Philadelphia coins are still among the scarcest halves in the early Walker series. This sparkling Gem is brilliant throughout and shows no obvious or detracting marks on its brightly lustrous surfaces. Sharply defined. Population: 53 in 65, 24 finer (4/12). (#6577)

**Premium Gem 1919 Walking Liberty Half
None Finer at NGC**

- 4045 1919 MS66 NGC.** The 1919 Walking Liberty half dollar claims a low mintage of 962,000 pieces, and it is the second-rarest Philadelphia issue of the series, following the 1921. This spectacular Premium Gem exhibits bold detail on the design elements, with just a touch of softness on the centers. The lustrous surfaces are toned in shades of pale gold and amber, with few signs of contact. Census: 11 in 66, 0 finer (4/12). (#6577)

**Choice AU 1919-D Half Dollar
Semikey Issue**

4046 1919-D AU55 NGC. Branch mint silver coins from 1919 are known for their conditional rarity, and the 1919-D half is particularly challenging. Though Liberty's chest and other high points show slight wear, cartwheel luster remains abundant, and the stone-gray surfaces lack consequential contact. (#6578)

**1919-D Walking Liberty Half, AU58
Conditionally Scarce in Higher Grades**

4047 1919-D AU58 PCGS. The 1919-D Walking Liberty half dollar claims a smallish mintage of 1.1 million pieces, and the supply of high-grade examples is severely limited by striking problems and lackluster surfaces. This attractive near-Mint specimen displays the usual softness on the central obverse and the eagle's leg, but the pleasing surfaces exhibit satiny mint luster and subtle champagne-gold and ice-blue toning. (#6578)

**Mint State 1919-D Half Dollar
Bold Strike and Luster**

4048 1919-D MS61 ANACS. The 1919-D Walking Liberty half dollar is a prime condition rarity in the series, due to the prevalence of weak strikes and subpar mint luster. This attractive Mint State example displays the usual softness on the central devices, but peripheral detail is bold. The surfaces exhibit satiny mint luster and shades of green and blue toning at the rims. (#6578)

**1919-D Half Dollar, MS63
Strike and Condition Rarity**

4049 1919-D MS63 NGC. The 1919-D is an immediately recognizable rarity in the popular Walking Liberty half series. It is seldom located in mint condition, and it is scarce (and highly collectible) in XF and AU. This issue is also one of the great strike rarities in the series. The head, skirt, and hand detail on Liberty is softly defined on this piece, as usual, but the mint luster is bright and satiny, and there are surprisingly few surface marks for a Select Mint State piece. This nearly brilliant coin has just the slightest hint of golden peripheral color on each side. (#6578)

4050 1919-S XF40 PCGS. CAC. Distinctly worn but faintly luminous in the fields, which add a peach tinge to the light gray visible on the central devices. A few small marks are visible, but none warrant individual mention. (#6579)

4051 1919-S — Improperly Cleaned — NGC Details. AU. Just a trace of wear shows on the design elements, which show a better-than-average strike. The luster is a little flat, due to the noted cleaning, but the surfaces show traces of pleasing gold and lavender toning. (#6579)

**1919-S Walking Liberty Half, MS63
Challenging Early Series Issue**

- 4052 1919-S MS63 PCGS.** In absolute terms, the 1919-S Walking Liberty half dollar is the second-rarest issue of the series in Mint State. However, some really nice specimens were saved, and a few other dates are more difficult to locate in high grade. This attractive Select specimen is well-detailed, with a touch of softness on the eagle's leg and Liberty's hand. The surfaces are lustrous, with accents of gold and turquoise toning. Housed in a green label holder. (#6579)

**1919-S Walker, MS64
Largest Half Dollar Mintage of the Year**

- 4053 1919-S MS64 PCGS.** Apparently because the mintage of the 1919-S was the largest of the three issues of that year, fewer were saved. As a result, high-grade (XF and better) examples are now difficult to find, and Mint State pieces are quite elusive. Strike is an especially important factor on '19-S half dollars. This piece lacks complete definition but is unusually well-detailed on the skirt lines. The mint luster is exceptional, thick and frosted with a subtle overlay of grayish-gold on the reverse. A Choice example of this key issue in the Walking Liberty series. PCGS has only certified 50 numerically finer pieces (4/12).

Ex: New York Signature (Heritage, 6/2005), lot 5803. (#6579)

**Gem 1919-S Half Dollar
Rare Issue in High Grade**

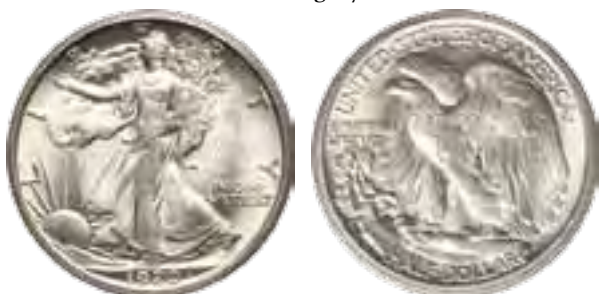

- 4054 1919-S MS65 PCGS. CAC.** The 1919-S Walking Liberty half dollar boasts a relatively small mintage of 1.5 million pieces and contemporary collectors saved few examples for posterity. As a result, the 1919-S is one of the most challenging issues of the series in high grade. This delightful Gem possesses tremendous eye appeal, with especially vibrant mint luster and attractive accents of pale gold toning. The design elements are well-detailed, with just a touch of softness on the usual problem areas, like Liberty's head and hand. The surfaces are free of mentionable distractions. Population: 39 in 65, 11 finer (4/12). (#6579)
-
- 4055 1920 MS64 NGC.** Supremely lustrous and untuned with bright, satiny fields and ample striking sharpness. Despite a mintage of more than 6.3 million pieces, the 1920 half dollar is genuinely scarce in Gem and better grades. (#6580)
- 4056 1920-D AU55 ANACS.** A Choice AU example of the 1920-D Walking Liberty half dollar, with well-detailed design elements and much remaining mint luster. A few hints of green and gold toning highlight the pleasing surfaces. (#6581)

**1920-D Walking Liberty Half, MS64
Challenging Date in High Grade**

- 4057 1920-D MS64 NGC.** The 1920-D Walking Liberty half dollar is a challenging date, but its elusive nature is not widely appreciated outside of series specialists. This attractive Choice example features well-detailed design elements with satiny mint luster under shades of champagne-gold toning. Census: 81 in 64, 15 finer (4/12). (#6581)

**Choice 1920-D Half Dollar
Brilliant and Highly Lustrous**

- 4058 1920-D MS64 PCGS. CAC.** Although exhibiting slight central weakness, this near-Gem is sharper than usually seen with brilliant silver luster and frosty mint surfaces. Both sides host a few minuscule marks that are consistent with the grade. PCGS has only certified 47 finer examples (4/12). (#6581)
- 4059 1920-S MS61 ANACS.** Scarce in all grades of Uncirculated, this example is typically struck with minimal definition in the centers. Both sides are mostly brilliant with golden-rose color around the margins. (#6582)
- 4060 1920-S MS62 NGC.** Decently detailed for the date, as Liberty's branch hand shows a modicum of detail. Broadly luminous surfaces have light silver interiors with golden-tan near the rims. (#6582)

**1920-S Half Dollar, MS64
Popular Condition Rarity**

- 4061 1920-S MS64 PCGS.** The 1920-S is a widely recognized condition rarity in the Walking Liberty series, ranked 10th rarest in mint condition out of 65 issues. This near-Gem shows remarkable strength of strike in all areas. It is tempting to call it fully struck in terms of early Walkers. The surfaces are bright throughout with rich, satiny mint luster. Each side is minimally abraded with no singularly noticeable or mentionable marks, and mostly brilliant with just the faintest tinge of pinkish patina around the margins. (#6582)

Delightful MS64+ 1920-S Half

- 4062 1920-S MS64+ PCGS.** Canary-gold and ice-blue patina endow this coruscating and impressively unabraded near-Gem half dollar. A dash or two of deeper color is near the Y in LIBERTY. The high points of Liberty show minor bluntness usual for the West Coast issue. Though plentiful in grades AG through Fine, the 1920-S is very scarce in quality Mint State. (#6582)

- 4063 1921 XF40 NGC. CAC.** The early 1920s recession sharply reduced coinage for the half dollar denomination. Philadelphia struck only 246,000 pieces, and the economic hardship limited the number saved by collectors. Trouble-free wear is superficial, muted by smooth gray toning. (#6583)

- 4064 1921 — Improperly Cleaned — NGC Details. AU.** A well-detailed specimen of this low-mintage key, with some softness apparent on the eagle's breast. The surfaces have an unnaturally bright sheen, with a few hints of golden-tan toning. (#6583)

- 4065 1921 — Obverse Improperly Cleaned — NGC Details. AU.** The 1921 Walking Liberty half dollar is an elusive key, and collectors prize any example of this date, regardless of condition. This well-detailed example shows little effect from the noted cleaning, as the surfaces display attractive champagne-gold toning and satiny mint luster. (#6583)

**Sharp 1921 Select Half Dollar
Excellent Choice for a Mint State Collection**

- 4066 1921 MS63 NGC.** The 1921 Philadelphia half dollar has the second lowest mintage of the series, making it a high-demand issue among Walking Liberty collectors. Delicate champagne toning and satiny silvery luster adorn both sides. Above-average detail is apparent on the design elements, including sharpness on the branch hand. This is a marvelous coin for the designated grade, that will fit nicely into a Mint State date/mint-mark collection. (#6583)

- 4067 1921-D — Cleaned — ANACS Details. AU, Net XF40.** This important key date is avidly collected in all grades and conditions. This lightly circulated piece shows unnaturally bright surfaces that are retoning in attractive shades of violet and gold. (#6584)

- 4068 1921-D — Improperly Cleaned — NGC Details. AU.** A well-detailed and lightly circulated example of this issue, which claims the lowest mintage of the series. The surfaces show few signs of contact, but the mint luster is somewhat flat, because of the noted cleaning. (#6584)

**Choice 1921-D Walking Liberty Half
Lowest Mintage of the Series**

- 4069 1921-D MS64 PCGS.** The 1921-D claims the lowest mintage of the Walking Liberty series, at 208,000 pieces, and few examples were saved by collectors. Examples in Gem condition are elusive and expensive, making attractive near-Gems, like the present coin, all the more desirable.

The satiny, brilliant surfaces of this impressive Choice specimen display a light silver-gold patina. The strike is sharp but not full, and yet Liberty's thumb is distinguishable. A few undistracting light abrasions help define the grade. Certified in a green-label holder. PCGS has graded only 34 pieces finer (4/12). (#6584)

- 4070 1921-S — Cleaned — ANACS Details. XF, Net VF20.** A moderately worn example of this popular key issue, with speckled blue and green toning over slightly subdued mint luster. The design elements retain XF sharpness. (#6585)

**1921-S Walking Liberty Half, AU50
Sought-After Key Issue**

- 4071 1921-S AU50 PCGS. CAC.** Although a few other dates have even lower mintages, the 1921-S Walking Liberty half dollar is the rarest date of the series in Mint State. Pleasing AU specimens are a good alternative to expensive technically Uncirculated pieces that usually have no advantage in eye appeal. This lightly circulated example shows a few traces of actual wear, but most areas of incomplete detail can be attributed to the soft strike always seen on this issue. This attractive AU example retains much original mint luster, and only minor abrasions are evident. (#6585)

**1921-S Half Dollar, AU58
A Key Issue**

- 4072 1921-S AU58 PCGS.** An old numismatic truism is that an AU58 coin is "an MS63 with rub," and while that may not be true in all cases today, it certainly bears relevance to this coin. This noted condition rarity is white and fully lustrous. While the soft strike is typical of the date, actual wear appears to be at an absolute minimum, limited to the very highest points of the coin. This is an opportunity for a Walking Liberty half dollar collector to acquire a problem-free coin with the appearance of a much higher grade, and quite possibly at a much more affordable price. (#6585)

**1923-S Half Dollar, MS64
Conditionally Scarce**

4073 1923-S MS64 PCGS. A beautiful Choice low mintage half that offers delicate tan-gold toning. Sharply struck save for inescapable softness on the branch hand. The right-side border has a couple of russet freckles, but both sides are remarkably unabraded. The fields are striated, as made from mint-polished dies. (#6586)

4074 1927-S MS62 ANACS. A well-detailed MS62 specimen, with just a touch of softness on the centers, this coin displays vibrant mint luster under shades of champagne-gold and blue toning. (#6587)

4075 1927-S MS63 PCGS. A typically struck representative with quality luster and pastel lilac and apricot colors. Minor but ultimately grade-defining marks are noted above the branch hand and on the right side of the skirt. (#6587)

4076 1928-S AU58 ANACS. Light gold and blue overtones with solid eye appeal. This near-Mint example has striking weakness through the obverse's "central column" and on the eagle's legs, but there is little actual wear. (#6588)

4077 1928-S MS63 ANACS. This attractive Select example displays especially vibrant mint luster, under shades of champagne-gold, blue, and amber toning. The devices are well-detailed, with a touch of softness on the centers. (#6588)

**1928-S Half Dollar, MS64
Pristine and Lightly Toned**

4078 1928-S MS64 PCGS. CAC. The 1928-S is best known as a premier strike rarity, but it is also scarcer on an absolute basis than several issues in the early series. This piece shows the usual central striking softness, but this almost-always-seen trait seems more than compensated for by the rich, coruscating mint luster. Pale rose-golden toning is seen over each side of this minimally marked example. (#6588)

Smooth Gem 1928-S Half Dollar

4079 1928-S MS65 PCGS. A radiant Gem with much above-average sharpness for this conditionally scarce issue from the 1920s. Slightly dusky honey-gold is evident, along with infrequent splashes of powder-blue toning. The surfaces are remarkably smooth. Population: 55 in 65, 6 finer (5/12).
Ex: FUN Signature (Heritage, 1/2006), lot 4041, which realized \$9,200. (#6588)

4080 1929-D MS64 PCGS. Gold-toned overall with windows into silver (both sides) and a sizable plum overlay on the reverse. The detail on Liberty's head is notably sharp. Just over 1 million pieces were struck for the issue. (#6589)

**1929-D Half Dollar, MS66
Only One Finer PCGS Coin**

4081 1929-D MS66 PCGS. The 1929-D Walking Liberty half dollar is not as difficult to locate as the low mintage of just over 1 million pieces would suggest, but the issue is very scarce at the Premium Gem level. This impressive specimen displays well-detailed design elements and vibrant mint luster, with a few hints of pale gold toning. Housed in a green label holder. Population: 56 in 66, 1 finer (4/12). (#6589)

**1929-D Half Dollar, MS66
Only One Certified Finer**

4082 1929-D MS66 PCGS. CAC. The first D-mint half dollar in this series produced since 1921, the 1929-D is a lower-mintage issue with slightly more than 1 million coins struck. As befits the issue, this coin is uncommonly well struck for a Walker from the 1923-1929 era. The luster is richly frosted in texture. The lightest suggestions of golden-tan iridescence are seen through the centers of this otherwise brilliant-white example. Population: 56 in 66, 1 finer (4/12).
Ex: Long Beach Signature (Heritage, 6/2002), lot 6313. (#6589)

- 4083 1929-S MS64 PCGS.** Diffuse, slightly reflective luster is this near-Gem's calling card. Hints of golden overtone are more prominent and mixed with gray on the reverse. Great detail on Liberty's head, if not her hands. (#6590)
- 4084 1933-S MS64 PCGS.** Frosty and lustrous with a strong partial golden-tan and lavender-blue overlay. Decently detailed for the date with a modicum of definition on the branch hand. (#6591)
- 4085 1933-S MS64 PCGS. CAC.** A meticulous strike is demonstrated by this San Francisco coin's excellent hand detail and remarkably full feathers. Its appeal is assured by satisfyingly rich silver-white mint frost that cover both sides. (#6591)

Boldly Struck 1933-S Half Dollar, MS66

- 4086 1933-S MS66 PCGS.** This is the first Walking Liberty half dollar since 1929, and was struck only at the San Francisco Mint. The strike is bold, including the branch hand and eagle's breast. Frosty mint luster graces both sides, each of which displays a little evidence of delicate gold toning. Pristine, minimally abraded surfaces add to the coin's outstanding eye appeal. Population: 81 in 66 (1 in 66+), 7 finer (4/12). (#6591)
- 4087 1934 MS67 PCGS.** Frosty mint luster is highlighted by a blush of palest gold that deepens subtly at the outer rims. The sharpness of the coin's strike is best seen by the bold definition on Liberty's head and hand. (#6592)
- 4088 1934-D MS65 PCGS. CAC.** Mostly silver luster has partial gold and violet overtones. Decently struck on the branch hand and the eagle's leg feathers, though Liberty's head shows softness. (#6593)
- 4089 1934-D MS66 PCGS.** A satiny coin with splashes of reddish-gold over otherwise silver-white surfaces. Sharply impressed with decent definition on Liberty's thumb, skirt lines, and head. PCGS has graded only four pieces as MS67 or better (4/12). (#6593)
- 4090 1934-D MS66 NGC.** This brightly lustrous Premium Gem displays sharp definition on most design elements, with just a touch of softness on Liberty's head. Hints of attractive pale gold toning visit the pleasing surfaces. Census: 32 in 66, 1 finer (5/12). (#6593)
- 4091 1934-D MS66 PCGS.** Remarkably full head and hand detail add materially to the beauty of this exceptional Depression-era coin. A wealth of unbroken silver luster further amplifies the undeniable visual appeal of an unusually bold Denver strike that is placed high in the roster of high-graded examples. PCGS has graded only four finer coins (4/12). (#6593)
- 4092 1934-D MS66 PCGS.** This well-detailed Premium Gem shows Liberty's thumb in full outline, but the head and eagle's leg are a little soft. The lustrous surfaces are graced by highlights of gold toning. PCGS has graded only four coins finer (4/12). (#6593)
- 4093 1934-D MS66 PCGS.** A full split thumb is visible on Liberty's branch hand, and generous luster proceeds from silver-gold somewhat satiny surfaces. Marks are few but the eye appeal is high. The finest grade practically obtainable, as PCGS has seen only four numerically finer (5/12). (#6593)

1934-D Walking Liberty Half, MS67 Single Finest Certified at NGC

- 4094 1934-D MS67 NGC.** Small D. A substantial number of 1934-D halves were struck (2.36 million), but most appear to have been roughly handled. This coin is one of only five Superb Gems certified by the two major grading services (4/12). The surfaces are thoroughly lustrous and each side shows pinkish-lilac toning with golden accents around the margins. Nicely struck and carefully preserved. (#6593)
- 4095 1934-S MS64 PCGS.** Solidly lustrous with a touch of flash, largely silver at left with gold, tan, and blue elements to the right. The obverse has a soft strike, but the reverse offers better definition. Housed in a green label holder. (#6594)

1934-S Half Dollar, MS66 Only Six Numerically Finer at PCGS

- 4096 1934-S MS66 PCGS.** This Premium Gem is well struck for a 1934-S Walking Liberty half dollar, exhibiting scintillating luster and remarkably clean fields, defining the MS66 grade that PCGS has assigned. Delicate champagne and light gray toning throughout confirms the originality of this piece. Population: 90 in 66 (3 in 66+), 6 finer (4/12).
Ex: FUN Signature (Heritage, 1/2008), lot 2116. (#6594)

1935 Walking Liberty Half, MS67 One Finer Specimen at PCGS

- 4097 1935 MS67 PCGS.** The 1935 Walking Liberty half dollar was a well-produced issue in general, but the design detail around Liberty's hand and the eagle's leg is always softly impressed. This magnificent Superb Gem is sharply detailed in other areas, and displays attractive shades of champagne-gold and ice-blue patina, with especially vibrant mint luster. Population: 21 in 67, 1 finer (4/12). (#6595)

4098 1935 MS67 NGC. Solid detail for the grade with separation on Liberty's branch-hand thumb. Gold-edged margins shift through silver-blue on their way to metallic near-white. Census: 24 in 67, 0 finer (4/12). (#6595)

4099 1935-D MS65 PCGS. Silver-blue frost overall with gold-orange and lavender elements at the left obverse and upper reverse. A shallow mark just above Liberty's branch hand contributes to the grade. (#6596)

**1935-D Half Dollar, MS66
Exceptional Eye Appeal**

4100 1935-D MS66 PCGS. This Premium Gem is highly lustrous and brilliant with exceptional eye appeal. Hints of peripheral gold toning are evident on each side. Nicely struck for the issue, which Bruce Fox says in his *Complete Guide to Walking Liberty Half Dollars*, "The ultimate example of a condition rarity. Virtually impossible to find fully struck." PCGS has certified only one piece finer, an MS66+ (4/12). (#6596)

**1935-D Half Dollar, MS66
None Numerically Finer**

4101 1935-D MS66 PCGS. A lustrous stone-white piece that has clean fields and well preserved devices. Liberty has areas of incomplete striking detail, but the eye appeal is nonetheless undeniable. Neither grading service has yet to certify any finer examples. Population: 97 in 66 (1 in 66+), 0 finer (4/12). (#6596)

4102 1935-S MS65 NGC. Gold and periwinkle patina over most of the obverse. The reverse lacks the other side's "windows" into silver but also dispenses with the blue. This Gem is softly struck on Liberty's hands but well-defined on her head. (#6597)

4103 1935-S MS65 NGC. Uncommonly well-defined on Liberty's head, though her branch hand and the eagle's forward leg have more typical softness. Light golden tints visit the margins, as does a small brown spot near 9 o'clock on the reverse. (#6597)

1935-S Walker, Highly Lustrous MS66

4104 1935-S MS66 PCGS. CAC. Satiny luster radiates throughout the carefully preserved surfaces. Liberty's midsection and the eagle's right (facing) leg are a bit soft, as often seen, but the rest of the details are bold. A fully brilliant and attractive representative. NGC and PCGS combined have certified just five examples finer (4/12). Ex: Los Angeles Signature (Heritage, 8/2009), lot 1697. (#6597)

4105 1936 MS67 PCGS. Frosted luster shines under largely golden patina with blue accents along the margins. A small shiny spot is noted at Liberty's upper gown, its origin indeterminate. PCGS has graded only two pieces as MS68 or better (4/12). (#6598)

**1936 Half Dollar, MS68
Tied for Finest Certified**

4106 1936 MS68 NGC. This is an exceptional 1936 half. The surfaces are so clean, it is literally possible to count the tiny imperfections with the aid of a loupe. Each side shimmers with satiny mint luster, exhibiting a pale overlay of golden-rose color that deepens slightly around the reverse margin. Truly an extraordinary Walking Liberty half, more than just one of the finest known 1936s, but one of the finest Walkers known. Census: 5 in 68, 0 finer (4/12). (#6598)

**1936-D Half Dollar, MS67
Brilliant and Untoned**

4107 1936-D MS67 NGC. A sharply struck and fully brilliant Superb Gem, this piece displays frosty silver luster with no trace of toning on either side. The strike is exceptional with full details on both sides. This is an impressive example that the connoisseur will appreciate. It is tied for the finest of the date certified by either NGC or PCGS. Census: 26 in 67, 0 finer (4/12). (#6599)

4108 1936-S MS66 PCGS. Hints of gold and gunmetal-blue color enliven this lustrous and crisply struck Gem. A gorgeously undisturbed memento of the Great Depression. PCGS has graded just six coins as MS67 or better (4/12). (#6600)

4109 1936-S MS66 NGC. A frosty silver piece with smooth surfaces and little color. Liberty's head has decent detail, though the thumb on the branch hand shows only slight separation. (#6600)

**1936-S Half Dollar, MS67
Tied for Finest Certified**

4110 1936-S MS67 NGC. A Superb quality example of this issue, one of the finest ever certified. In fact, NGC has only certified 13 at this grade level, and PCGS another six (4/12). Neither service has graded any as MS68 or finer. For all practical purposes, this is the finest 1936-S half dollar available. (#6600)

**Superb Gem 1936-S Half Dollar
Sharply Struck Lustrous Example**

4111 1936-S MS67 NGC. Fully struck Gem and finer examples of this issue are nearly impossible to locate. While this example falls slightly short of fully struck honors, it is nearly so with most of the head details complete, and the thumb almost entirely outlined. Both sides have extensive die polish lines in the fields, with vibrant satiny mint luster. Census: 13 in 67, 0 finer (4/12). (#6600)

4112 1937 MS67 PCGS. Bright cartwheel luster shines under light toning on the obverse of this impressive Superb Gem, pale gold overall with a shift to dusty-rose at the margins. Uncommonly sharp detail is this Superb Gem's secret asset. PCGS has graded just two coins as MS68 or better (4/12). (#6601)

4113 1937 MS67 NGC. Strongly lustrous with a subdued but distinct frosty texture. Faint hints of blue and peach patina visit each side, and a more opaque set of tan dots appears between UNITED and STATES. Census: 75 in 67, 1 finer (4/12). (#6601)

4114 1937-D MS66 PCGS. Speckles of milky color visit frosted gold-gray surfaces on this well-struck Walking Liberty half. A few minute marks on Liberty's lower skirt are the sole obstacles to an even more impressive designation. (#6602)

4115 1937-D MS66+ PCGS. CAC. This high-end Premium Gem shows only the slightest softness on Liberty's hand. The surfaces exhibit vibrant mint luster and brilliant color, with an occasional accent of green. (#6602)

**Superb Gem 1937-D Half Dollar
Condition Rarity**

4116 1937-D MS67 PCGS. Contrasting with most dates in the 1930s and 1940s, the 1937-D half dollar is scarcer than its San Francisco counterpart. This magnificent coin displays a sharply defined head on Liberty and bold leg feathers on the eagle. Its swirling mint frost is mostly brilliant, but close examination reveals a tantalizing hint of iridescence. Population: 38 in 67, 0 finer (4/12). (#6602)

**1937-D Half Dollar, MS67
None Finer at PCGS**

4117 1937-D MS67 PCGS. CAC. Featuring speckled gold, russet, and green colors reminiscent of a crisp day in the early fall, this original Superb Gem is a treat to behold. Virtually no contact marks can be detected over the glossily lustrous surfaces, with the grade seemingly limited only by the indifferent strike common to the issue. The 1937-D is an underrated date in all grades, and is scarce at the Superb level. The major services have combined to grade only one coin finer (4/12). Population: 38 in 67, 0 finer (4/12). (#6602)

**Superb Gem 1937-S Half Dollar
None Certified Finer**

4118 1937-S MS67 PCGS. The 1937-S Walking Liberty half dollar is a better date in the middle series and the present coin is among the finest known examples. This spectacular Superb Gem displays well-detailed design elements and vibrant mint luster, with a few accents of champagne-gold and amber toning. Population: 23 in 67, 0 finer (4/12). (#6603)

**Superb Gem 1938 Half Dollar
Underrated Issue in High Grade**

- 4119 1938 MS67 PCGS.** The 1938 Walking Liberty half dollar is very scarce in Superb Gem condition, but specimens can be located with patience. Examples in finer grades are virtually unobtainable. This spectacular Superb Gem displays sharply detailed design elements, with vibrant mint luster and shades of pale gold toning. Population: 65 in 67, 1 finer (4/12). (#6604)

Colorful Superb Gem 1938 Half Dollar

- 4120 1938 MS67 PCGS.** Green-gold toning dominates both sides, with plum-mauve patina confined to the margins. Lustrous with a good strike and an uncommonly mark-free appearance. A magnificent Superb Gem of this late Great Depression issue. Population: 65 in 67, 1 finer (5/12). (#6604)
- 4121 1938 MS67 NGC.** Satin luster sweeps under layers of silver-gray, peach, and violet-blue patina. Carefully preserved and uncommonly gorgeous, if softly struck on Liberty's branch hand. Census: 36 in 67, 2 finer (4/12). (#6604)
- 4122 1938-D MS65 PCGS.** Frosty luster with a few stray marks. Silver-white is the prime color, though golden accents are noted at parts of the margins. Fewer than half a million pieces were struck for this issue. (#6605)

**1939 Half Dollar, MS68
Finest Numerically Graded**

- 4123 1939 MS68 NGC. CAC.** This uncommonly lustrous example is better-detailed than most, especially on Liberty's branch hand. Gold and peach toning appears as outer bands on the obverse but also across much of the reverse. Census: 19 in 68 (1 in 68+), 0 finer (4/12). (#6606)

- 4124 1939-D MS67 PCGS.** Great luster and a decent strike for this date with most of the details sharp on Liberty's head and the skirt lines. Faint gold infusions are most visible in concentrated patches at the upper and right obverse. Population: 55 in 67 (1 in 67+), 1 finer (4/12). (#6607)

- 4125 1939-D MS67 NGC.** This stunning Superb Gem is sharply detailed, with vibrant satiny mint luster, and a trace of champagne-gold toning on the mostly brilliant fields. Census: 83 in 67, 1 finer (5/12). (#6607)

- 4126 1939-D MS67 NGC.** Bands of lavender-blue and golden-brown patina enrich the eye appeal of this Superb Gem. Liberty's head and branch hand offer above-average definition. Census: 83 in 67, 1 finer (4/12). (#6607)

- 4127 1939-D MS67 NGC.** Frosty silver overall with golden tints appearing largely at the margins. Liberty's head is well-defined, though her branch hand is weak. Census: 83 in 67, 1 finer (4/12). (#6607)

- 4128 1939-S MS67 NGC.** Strongly struck for the date with frosty accents on blazing silver-white luster. A magnificent S-mint Walker. Neither NGC nor PCGS has graded an MS68 or better example of the issue (4/12). (#6608)

- 4129 1939-S MS67 NGC.** A beautiful satin sheen graces this fully untuned silver-white piece. Boldly struck overall, if typically soft on Liberty's branch hand, with near-pristine surfaces. A diagonal die crack bisects the eagle on the reverse, from the top of the left (facing) wing through the right (facing) talons. Neither NGC nor PCGS has graded an MS68 example of this issue (4/12). (#6608)

- 4130 1939-S MS67 NGC.** This is a decently detailed Superb Gem by 1939-S standards. The luster is frosty silver with glimpses of green-gold along the margins. Neither NGC nor PCGS has graded an MS68 example of this issue (4/12). (#6608)

- 4131 1941 MS67 NGC. CAC.** Slightly weak at the central obverse as usual, this brilliant silver Superb Gem has satin luster with no evidence of toning on either side. NGC has certified just 18 finer (5/12). (#6611)

- 4132 1941-S MS65 PCGS.** A softly struck but glossy short-setter with gorgeous patina. Blue-lavender and rose-gold hues saturate most of each side, though variations of each appear along the margins. (#6613)

- 4133 1941-S MS66 NGC.** Eye-catching satiny luster shimmers throughout this faintly tan-tinged Premium Gem. Liberty's dress lines and the eagle's right (facing) leg are a touch soft, as typical. There are just a few minor abrasions to preclude an even finer grade. NGC and PCGS have graded just 23 MS67 or better pieces between them (4/12). (#6613)

**1941-S Half Dollar, MS67
None Certified Finer**

- 4134 1941-S MS67 NGC.** Weak strikes, numerous heavy abrasions, and poor eye appeal all plague 1941-S half dollars. Bruce Fox (1993) writes: "The upper gown lines and Liberty's hand, as well as the eagle's breast, are rarely found detailed." While somewhat less than fully struck, the present Superb Gem ranks head and shoulders above most-seen '41-S specimens. Partial detail is visible on the branch hand, and Liberty's head and gown lines and the eagle's breast are strongly defined. The radiantly lustrous surfaces are untuned and remarkably devoid of mentionable surface or rim marks. All in all, this piece generates "superb" eye appeal. Census: 17 in 67, 0 finer (4/12). (#6613)
- 4135 1942 MS67 PCGS. CAC.** The branch hand at the central obverse is somewhat indistinct, while all other design elements are sharp. Both sides are brilliant and untuned with frosty silver luster. PCGS has only certified four finer (5/12). (#6614)
- 4136 1942-S MS66 PCGS.** The bright, sparkling, satiny surfaces are brilliant, with mild reflectivity in the fields and a few faint surface marks that fail to impair the assigned grade of the piece. A lovely Premium Gem example of this late date in the Walking Liberty series. (#6617)
- 4137 1942-S MS66 PCGS. CAC.** Boldly frosted luster is silver with a hint of blue. Detail on this Premium Gem is blended at the branch hand and eagle's leg but bold on Liberty's head. PCGS has graded just one coin as MS67 or better (4/12). (#6617)
- 4138 1942-S MS66 NGC. CAC.** Trumpet tail S. Dappled peach-gold toning adorns the peripheries of this highly lustrous, typically struck, and unabraded high grade half dollar. Encapsulated in a former generation holder. (#6617)
- 4139 1942-S MS66 PCGS. CAC.** Trumpet tail S. A virtually pristine Premium Gem with light sea-green and honey-gold toning near the borders. The strike is above average though the branch hand shows softness. (#6617)
- 4140 1942-S MS66 PCGS. CAC.** Effusive luster has occasional golden accents against the silver-white, which is frosty but subdued except in contrast to a few windows of brilliance. A beautiful short-set Premium Gem from San Francisco. PCGS has graded just one example as MS67 or better (4/12). (#6617)
- 4141 1942-S MS66+ PCGS. CAC.** Blue overtones are prominent in the shining silver luster. This short-set piece is bluntly struck on the high points but magnificently preserved. PCGS has graded just one example as MS67 or better (4/12). (#6617)
- 4142 1944 MS67 NGC.** A frosty and fully brilliant Superb Gem, boldly detailed overall with only slight central weakness. An excellent World War II-era coin. NGC and PCGS have graded just two MS68 or better pieces between them (4/12). (#6621)
- 4143 1944 MS67 PCGS.** This is a beautiful coin with stunning satin luster that has just a few tinges of blue at the margins. Strongly struck, virtually pristine, and with few better: PCGS has graded just one coin as MS68 or better (4/12). (#6621)

- 4144 1944 MS67 NGC.** This well-detailed Superb Gem shows the often-seen touch of softness on Liberty's hand and head, but other devices are strongly impressed. The surfaces radiate vibrant mint luster and no mentionable contact marks are present. Census: 83 in 67, 1 finer (5/12). (#6621)
- 4145 1944 MS67 NGC. CAC.** Nearly all of the obverse and reverse of this Superb Gem hosts brilliant lemon toning with a few small areas of light silver. NGC and PCGS have each certified a single finer example (5/12). (#6621)
- 4146 1944-D MS67 PCGS. CAC.** Although struck amid the rush of wartime, this Denver coin shows unusually full hand detail. Both sides display liberal quantities of russet-gold toning with some deeper areas on the outer rims. (#6622)
- 4147 1944-S MS66 NGC. CAC.** Large S. This brilliant and coruscating Premium Gem is close to immaculate and is only held back from an even finer grade by lightness of impression on the branch hand and upper skirt lines. (#6623)
- 4148 1945 MS67+ NGC.** A halo of brilliance with a pinkish hue around Liberty contrasts with the primarily satiny texture on this silver-gray Superb Gem. A loupe reveals only tiny marks in keeping with the grade. The *sole finest certified at NGC* (5/12). (#6624)
- 4149 1945-D MS67 NGC. CAC.** This brilliant Superb Gem has frosty silver luster with little evidence of toning on either side. A splendid specimen showing only slight central weakness. Only one finer example is certified (5/12). (#6625)
- 4150 1946 MS67 NGC.** Better-defined than usually seen, particularly on Liberty's head and hands. Gleaming silver surfaces show suggestions of gold and blue. Census: 40 in 67, 0 finer (4/12). (#6627)
- 4151 1946 MS67 NGC.** An attentively struck short-set Superb Gem with bold, swirling luster. Gold and peach overtones grace medium-silver surfaces. Census: 40 in 67, 0 finer (4/12). (#6627)
- 4152 1946 MS67 PCGS. CAC.** Silver-blue patina is delicate compared to the bold arc-wash of gold-orange and umber that is present around a good deal of the obverse margins and even more of the reverse. Neither NGC nor PCGS has graded an MS68 example (4/12). (#6627)
- 4153 1946-D MS67 NGC.** Frosty luster has wisps of champagne toning over otherwise brilliant-white surfaces. Neither NGC nor PCGS has graded an MS68 or better example of this short-set issue (4/12). (#6628)
- 4154 1946-S MS67 NGC.** A gorgeous coin with bright and swirling silver luster, softly struck on the highest design elements but otherwise an entirely attractive Superb Gem. Census: 60 in 67, 0 finer (4/12). (#6629)
- 4155 1946-S MS67 NGC. Ex: Nevada Silver Collection.** Knob S. Lustrous and essentially unabraded with only a whisper of caramel-gold color. Better struck than most San Francisco Walkers, as the head and skirt lines have impressive detail. Census: 60 in 67, 0 finer (4/12). (#6629)
- 4156 1946-S MS67 PCGS. CAC.** Knob S. Attractive autumn-gold, rose-red, and jade-green toning adorns the margins of this highly lustrous and nearly pristine Superb Gem. The strike is quite sharp, particularly on the skirt lines and cheek. A splendid example of the final S-mint issue. Population: 30 in 67, none finer (4/12). (#6629)
- 4157 1947 MS67 NGC.** The surfaces are exceptional for a Walking Liberty half dollar, and the luster is at full silver-white blaze. A fantastic final-year coin with bold detail. Census: 63 in 67, 0 finer (4/12). (#6630)
- 4158 1947-D MS67 NGC.** Well-defined for this final-year issue with strong luster and minimal color to the patina. The reverse has a distinctly frosted appearance. Neither NGC nor PCGS has graded an MS68 example of the issue (4/12). (#6631)

PROOF WALKING LIBERTY HALF DOLLARS

Near-Gem Proof 1936 Walker Slight Peripheral Toning

- 4159 1936 PR64 NGC. CAC.** The first brilliant finish proof Walking Liberty half dollars were minted in 1936 and they are extremely popular with type collectors. This lovely near-Gem proof has brilliant silver surfaces with traces of gold toning and splashes of steel. Both sides have nicely mirrored fields and sharp design motifs. (#6636)

Premium Gem 1936 Half Dollar First Proof Offering in Two Decades

- 4160 1936 PR66 PCGS.** Only 3,901 proof Walking Liberty half dollars were struck in 1936, the first proof offering in two decades. This spectacular Premium Gem is sharply detailed throughout, with deeply mirrored fields and speckled champagne-gold toning. Proof coins were overshadowed by the activity in the commemorative market in 1936, but collector demand rose encouragingly in following years. (#6636)

1936 Half Dollar, PR67 Only One Certified Finer

- 4161 1936 PR67 NGC.** The brilliant surfaces of this Superb Gem proof half dollar display barely discernible light yellow-gold and sky-blue patina. A powerful strike leaves the expected bold definition on the design features, and impeccable preservation is evident on both sides. Census: 73 in 67 (1 in 67+), 0 finer (4/12). (#6636)

Superb Gem Proof 1936 Half Dollar Only One Finer Example at PCGS

- 4162 1936 PR67 PCGS.** From the first issue of the modern era of proof coinage, and a remarkable example. This Superb Gem has mostly brilliant silver surfaces with a trace of peripheral iridescence on each side. Although little cameo contrast remains, the devices are slightly lustrous, and the surrounding fields are fully reflective. All design elements are boldly detailed, and the separation between Liberty's thumb and fingers is easily observed. Few examples of this issue, with a mintage of only 3,901 pieces, can possibly match the present specimen. Population: 20 in 67, 1 finer (4/12).
Ex: Palm Beach Signature (Heritage, 3/2006), lot 1578, which realized \$23,000. (#6636)

- 4163 1937 PR66 NGC. CAC.** A dynamic, fully brilliant example of this early proof Walker. The fields are deeply mirrored and there are no detracting marks present. A splendid example. (#6637)

- 4164 1937 PR67 PCGS.** Subtly glowing silver-gray toning bathes both sides, and the underlying surfaces are virtually pristine and as free of marks as the assigned grade would suggest. Solidly, if not overwhelmingly reflective for added eye appeal. .
Ex CSNS Signature (Heritage, 5/2004), lot 7822. (#6637)

**1937 Half Dollar, PR67
Only 17 Finer NGC**

- 4165 1937 PR67 NGC. CAC.** Certain coins have the look of originality, a look that is hard to put into words. This is such a coin. It looks like it was just popped out of a proof set where the cellophane wrapper had broken. The surfaces oxidized (toned) in a unique manner. The center of the obverse shows pale ice-blue toning and the margin has bright russet-gold. The reverse, on the other hand, is sea-green, rose, and magenta. An outstanding, original example of this scarce, second-year issue in the proof series.
Ex: St. Louis Central States (Heritage, 5/2007), lot 3091, which realized \$3,220. (#6637)

- 4166 1937 PR67 PCGS. CAC.** A scarce early proof that is often overlooked as it is chronologically next to the key 1936. Only 5,728 proofs were struck — few can equal the technical preservation and originality of this lovely piece. Deeply mirrored with slight haziness around the margins and a dash of russet at the top of the eagle's right (facing) wing.
Ex: Long Beach Signature (Heritage, 2/2007), lot 4055. (#6637)

PR67+ 1937 Walking Liberty

- 4167 1937 PR67+ PCGS. CAC.** Medium caramel-gold and lime-green toning drapes this satiny and immaculate Superb Gem. Tiny russet freckles emerge when the piece is rotated at obscure angles. The second-lowest mintage of the proof series. As of (4/12), PCGS has certified just nine pieces in higher grades. (#6637)
- 4168 1938 PR67 PCGS. CAC.** A marvelous Superb Gem, from a proof mintage of just 8,152 pieces. This coin shows the brightly reflective all-brilliant finish the Mint employed on proofs of this era, with sharply detailed design elements, and just the slightest hint of pale gold toning. (#6638)

**1938 Half Dollar, PR68
Tied for Finest Certified**

- 4169 1938 PR68 NGC.** Dazzling mirrored reflectivity fails to be diminished by a thin veil of smoky-gray and yellow patina. A few speckles of darker brown toning are seen at selected locations on the reverse. A carefully preserved Superb example. Census: 49 in 68, 0 finer (4/12). (#6638)

- 4170 1939 PR67 PCGS. CAC.** Impressive striking qualities and impeccably preserved surfaces lend great eye appeal to this Superb Gem. Close examination reveals traces of speckled milky-tan color around the peripheries. (#6639)

**1940 PR68 Half Dollar
None Finer**

- 4171 1940 PR68 NGC.** 1940 half dollars in this lofty grade level are few and far between. NGC and PCGS combined have seen only 81 such pieces, and none finer (4/12). Excellent strike definition throughout, including Liberty's face and left thumb and the eagle's left leg. Pastels of lime-green, crimson, and gold-brown streak across the obverse, while whispers of powder-blue and light tan visit the reverse. Close examination of each side reveals no mentionable marks. Census: 50 in 68, 0 finer (4/12). (#6640)

- 4172 1941 PR67+ NGC. CAC.** A profound chromelike gleam is the most immediately visible attribute of this later Walking Liberty half dollar proof. Only after the viewer becomes accustomed to the flash does the underlying substance — impressive preservation — reveal itself. NGC has graded 54 specimens as PR68 or better (4/12). (#6641)

- 4173 1942 PR67 PCGS.** Intensely mirrored with hints of contrast on each side. A light layer of gray patina turns gleaming golden-brown at the margins. Striking eye appeal. PCGS has graded just 35 pieces as PR68 or better (4/12). (#6642)

- 4174 1942 PR67 NGC. CAC.** The squared rims and sharp reeding on this Superb Gem specimen confirm its proof status, even though the mirrors are more watery than usual. Impressively preserved with a suggestion of pale blue over the fields. (#6642)

- 4175 1942 PR67 PCGS. CAC.** Profoundly mirrored and essentially untuned. The reverse of this Superb Gem has a suggestion of field-to-device contrast, though the obverse is more brilliant. (#6642)

- 4176 1942 PR67 PCGS. CAC.** This highly lustrous proof is a white example except for the slightest hint of cobalt-blue toning on liberty, which detracts in no way from the outstanding eye appeal of this example. (#6642)

**1942 PR68 Half Dollar
Only Four Finer**

- 4177 1942 PR68 NGC.** This issue is relatively common, with a respectable mintage of 21,200 pieces, but at the PR68 grade level it is understandably scarce, with fewer than 200 coins so graded by NGC and PCGS. This piece offers great technical merit in addition to outstanding eye appeal. The strike is crisp and full throughout, and both sides exhibit delightful purple-rose and electric-blue iridescent toning near the left periphery. An impeccably preserved and visually enticing representative of this final proof issue in the Walking Liberty half dollar series. (#6642)

**1942 Half Dollar, PR68
Final Proof Walker**

- 4178 1942 PR68 PCGS. CAC.** Rich crimson, gold, and powder-blue circles portions of the obverse and reverse. The remainder of the coin has only faint cream-gray toning. A faint mint-made retained lamination between the eagle's legs will be missed by nearly all observers. Fully defined and exceptionally attractive. Population: 34 in 68, 1 finer (4/12). (#6642)

FRANKLIN HALF DOLLARS

- 4179 1950-D MS66 Full Bell Lines PCGS.** The satiny powder-gray surfaces are tinged with gold on this strike rarity, showing complete luster and full bell lines, even though a few ticks in that area and elsewhere define the grade. Population: 50 in 66 (1 in 66+) Full Bell Lines, 0 finer (5/12). (#86657)
- 4180 1953-S MS67 NGC.** This 1953-S Superb Gem is an excellent substitute for the considerably costlier counterpart with Full Bell Lines. Mint set toning on the obverse comprises intermingled emerald and violet, while the reverse is more consistent pinkish-silver. Generous luster is a plus on both sides. Census: 7 in 67, 0 finer (5/12). (#6666)
- 4181 1962 MS66 Full Bell Lines NGC.** Indescribably lovely toning includes varying shades of gold and jade with more ice-blue on the reverse than obverse. The bell lines are bold for the issue, making this strike rarity among the finest certified, and the sole finest at NGC. Census: 1 in 66 Full Bell Lines, 0 finer (5/12). (#86682)

PROOF FRANKLIN HALF DOLLARS

- 4182 1950 PR67 NGC. CAC.** Quality mirrors with appreciable reverse contrast, though the obverse falls short of a Cameo tally. Milk-spotting is at a minimum, and only a faint hint of color is visible on the rim above and to the right of the date. (#6691)

**Cameo Superb Gem Proof 1950 Franklin
Tied for Finest at PCGS**

- 4183 1950 PR67 Cameo PCGS. CAC.** At the time Rick Tomaska published *The Complete Guide to Franklin Half Dollars* in 2002, PCGS had certified only a single example of the 1950 Franklin half in PR67 Cameo. A decade later (and no doubt after the diligent searching of thousands of proof sets), that number has increased to eight submissions — six in 67 Cameo, including the present piece, and two in 67+ Cameo (4/12). This silver-white, highly reflective piece shows little trace of other color, but perceptible contrast appears on each side, and the mirrored fields “go to black” with a flick of the wrist, while the devices show white. There is no mentionable sign of contact. PCGS has certified a single PR66 Deep Cameo. (#86691)
- 4184 1952 PR68 NGC.** The surfaces of this stunning Franklin half dollar are virtually perfect and untoned, while the design elements are sharply detailed throughout. Census: 20 in 68, 0 finer (5/12). (#6693)
- 4185 1952 PR68 NGC.** If the coin-using public had known coins of this quality, perhaps the Franklin design would have been more popular. Deep-mirror surfaces enhance both sides of this meticulously struck example, exemplifying the highest grade assigned to proofs of this date. Census: 20 in 68, 0 finer (4/12). (#6693)

- 4186 1952 PR67+ Cameo NGC.** A stunning high-end Superb Gem with bold contrast between the sharply detailed frosty devices and the deeply mirrored fields. Census: 80 in 67 (1 in 67+) Cameo, 3 finer (5/12). (#86693)

Cameo Superb Gem Proof 1952 Half

- 4187 1952 PR67 Cameo PCGS Secure. CAC.** Proof coins from the early 1950s are seldom encountered in high grade with significant cameo frost, but the present Superb Gem is one such find. Brilliant and immaculate with mint-made lapping on the eagle's wings and the front of Franklin's coat. Population: 27 in 67 Cameo, 1 finer (5/12). (#86693)
- 4188 1956 Type One PR68 Cameo PCGS.** Strongly reflective with quality contrast on both sides, though more so on the reverse. Only a few tiny milk spots keep the eye appeal from being completely "black-and-white." Population: 30 in 68 Cameo, 0 finer (4/12). (#86686)

PROOF KENNEDY HALF DOLLARS

- 4189 1964 PR69 Deep Cameo PCGS.** A fantastically preserved and boldly contrasted specimen from the first proof Kennedy half dollar issue. Just a touch of cloudiness appears at the rims. Population: 74 in 69 Deep Cameo, 0 finer (4/12). (#96800)

1968-S PR70 Deep Cameo Half Dollar Scarce Early Issue With Contrast

- 4190 1968-S PR70 Deep Cameo PCGS.** Issued only in proof sets in an era when Cameo and Deep Cameo proofs were far from frequently encountered, the 1968-S, 1969-S, and 1970-S Kennedy half dollars in such a condition are well known to collectors of this popular series. From proof mintages of 2.6 million to 3.0 million pieces, each of the three issues exists in PR69 Cameo or Deep Cameo to the extent of only a few hundred pieces. In PR70 Deep Cameo — the grade of the present example — there are 16 examples of the 1968-S graded at PCGS (4/12). This phenomenal piece reveals no visible marks on either side, with profoundly deep, bold looking-glass fields. Ex: Long Beach Signature (Heritage, 9/2006), lot 2344. (#96804)

Ultimate Grade 1974-S Half Dollar PR70 Deep Cameo

- 4191 1974-S PR70 Deep Cameo PCGS.** Hints of butter-gold toning are most apparent on the reverse, though also present at the obverse periphery. Icy motifs and glassy fields combine to ensure ideal cameo contrast. This pristine specimen is an essential acquisition for the competitive Registry Set. Population: 18 in 70 Deep Cameo (5/12). (#96810)

PR70 Deep Cameo Clad 1976-S Bicentennial Half

- 4192 1976-S Clad PR70 Deep Cameo PCGS.** Millions of collectors celebrated the Bicentennial by purchasing a proof set with new designs on the quarter, half, and dollar. But nearly all such pieces possess slight flaws that prevent assignment to the ultimate grade. Here is a fully struck and pristine specimen with profound white-on-black contrast. Population: 32 in 70 Deep Cameo (5/12). (#96811)
- 4193 1976-S Silver PR70 Deep Cameo PCGS.** The ultimate in proof Bicentennial half dollars, the present coin boasts microscopically exact detail, especially in the architectural features of Independence Hall and the finely delineated hair of President Kennedy. Intense pressure on PR70 examples has resulted from keen competition among builders of Registry Sets. Population: 53 in 70 Deep Cameo (4/12). (#96812)

MORGAN DOLLARS

- 4194 1878 8TF MS65 PCGS. VAM-17.** A slender band of orange-gold toning fills the borders of this lustrous and boldly struck Gem. Only a single slender mark beneath the left (facing) wing merits mention. Housed in a green label holder. (#7072)
- 4195 1878 8TF MS65 PCGS. VAM-17.** A lightly toned and beautiful Gem that boasts dazzling luster, smooth fields, and an exemplary strike. Delicate marks on the cheek are all that limit the grade. (#7072)
- 4196 1878 8TF MS65 PCGS. VAM-21, R.4.** Broken R & B, a variety Leroy Van Allen discovered in 1965. Rich blue-green color consumes the obverse, while the reverse border displays lovely golden-brown toning. The strike is bold in the centers, but the wreath base displays minor weakness. A few faint marks on the left obverse field are inconspicuous, while the cheek and reverse are near-pristine. Ex: Dallas Signature (Heritage, 11/2005), lot 2989; Palm Beach Signature (Heritage, 3/2006), lot 977. (#7072)

4197 1878 8TF MS65 PCGS. CAC. VAM-14.2. Golden-brown, plum-red, navy-blue, and apple-green endow this fully struck and lustrous eight tailfeather Gem. Surprisingly void of marks, and the eye appeal is outstanding. (#7072)

4198 1878 8TF MS65 ★ NGC. CAC. VAM-17. This delicately toned Gem has a prooflike obverse and a reverse with vibrant cartwheel luster. Well struck with smooth fields and only wispy contact on the cheek. (#7072)

**Single Finest Certified VAM-21
1878 Eight Tailfeather Dollar, MS66**

4199 1878 8TF MS66 NGC. VAM-21. Weak bases on the R and B in PLURIBUS are diagnostic for this eight tailfeather VAM. The wings of the eagle are partially lapped away. As of (4/12), the present lot is the single finest certified VAM-21. It is an intricately struck and brilliant Premium Gem with dynamic luster. Essentially pristine save for a subtle mark on the eagle's neck. (#7072)

Multicolor MS66 1878 8TF Dollar

4200 1878 8TF MS66 PCGS. CAC. VAM-17. Dramatic lemon-gold, powder-blue, and cherry-red toning fills the obverse and dominates the reverse border. The obverse center remains brilliant. This highly lustrous Premium Gem has smooth fields and only subtle contact on the portrait. It would be an arduous task to find another eight tailfeather dollar with such vibrant multicolor patina. Population: 33 in 66 (1 in 66+), 2 finer (4/12). (#7072)

4201 1878 7/8TF Strong MS65 PCGS. VAM-37. A flashy, sharply struck, and nearly brilliant Gem that has well preserved fields and only delicate marks on the cheek. The various 7/8TF VAMs are widely collected and have become more accessible in recent years due to VAMworld.com. (#7078)

4202 1878 7/8TF Tripled Blossoms Fine 15 PCGS. VAM-44, R.7. A Top 100 Variety. Per the first edition of the Top 100 reference, VAM-44 is "considered by most specialists to be the Number One Morgan dollar variety." Tripled edges on the leaves and blossoms remains evident despite 45 points of circulation wear. Toned cream-gray with a few faded marks above the ES in STATES. (#133829)

**Tripled Blossoms 1878 7/8TF Dollar
Choice AU, VAM-44**

4203 1878 7/8TF Tripled Blossoms AU55 NGC. VAM-44, R.7. A Top 100 Variety. The blossoms and leaves with Liberty's hair are die tripled, and the eagle's legs are die doubled. VAM-44 is known as the "King of VAMs" and is coveted by specialists in all grades. An untuned and mildly prooflike example with light wear on the eagle's breast and the expected number of wispy marks. Ex: Orlando FUN (Heritage, 1/2008), lot 5236. (#133829)

**VAM-41A 1878 7/8TF Morgan
Gem Deep Mirror Prooflike**

4204 1878 7/8TF Weak MS65 Deep Mirror Prooflike PCGS. VAM-41A. Dramatic field reflectivity leaves no doubt concerning the Deep Mirror Prooflike status of the present Gem. The piece is brilliant and well struck, although the reverse die was lapped, removing portions of the wing feathers. Marks are scarce and inconsequential. Many Morgan specialists are chasing the 1878 VAMs, particularly those of the 8TF and 7/8TF varieties. Ex: Long Beach Signature (Heritage, 5/2009), lot 992, which realized \$9,200. (#97071)

4205 1878 7TF Reverse of 1878 MS65 PCGS. A razor-sharp, first-year Gem with even frosty-white surfaces. This piece exhibits only minor signs of contact, fitting for the assigned grade. (#7074)

4206 1878 7TF Reverse of 1878 MS65 PCGS. Only a hint of golden toning is present on this lustrous and boldly struck Gem. Splendidly smooth despite a few faint grazes on Liberty's jaw. Certified in an old green label holder. (#7074)

4207 1878 7TF Reverse of 1878 MS65 PCGS. VAM-84. The "Washed Out L" variety, one of many popularly collected long neck Second Reverse VAMs. A dusting of almond-gold toning enriches this lustrous and sharply impressed Gem. Housed in a green label holder. (#7074)

4208 1878 7TF Reverse of 1879 MS65 PCGS. More than half of the obverse has vivid rainbow toning with the balance exhibiting frosty silver luster. The reverse is essentially brilliant with delicate peripheral gold toning. Just six finer examples are certified by PCGS (5/12). (#7076)

- 4209 1878-CC MS65 PCGS.** Copious luster occupies both sides, but the obverse shows orange tones in the center with sky-blue rims, while the reverse is untuned at the center, honey-gold and blue at the rims. The strike is a bit soft on the high points. (#7080)
- 4210 1878-CC MS65 PCGS.** This first-year issue Carson City Morgan exhibits strong frosty-white surfaces, with only the slightest orange-gold accents on the reverse. This sharply struck Gem would fit well in any high-quality Morgan dollar collection. (#7080)
- 4211 1878-CC MS65 PCGS.** This sharply detailed Gem, from the first year of the Morgan design, exhibits vibrant mint luster, under shades of green, gray, and violet toning. Exceptional visual appeal. (#7080)
- 4212 1878-CC MS65 PCGS.** The lustrous surfaces are ice-white save for a thin strip of honey-gold on the reverse at the eagle's right wing. Interesting die lines crisscross the lower reverse, including one straight line that runs from a lower leaf tip to spear the O in ONE. (#7080)

1878-CC Morgan Dollar, MS66 High-Grade First-Year Issue

- 4213 1878-CC MS66 PCGS.** The 1878-CC Morgan dollar remains fairly easy to locate in the lower ranges of Mint State, especially from MS60 to MS63, and the vast majority are heavily bagmarked. Premium Gem examples, such as the one offered here, are somewhat more challenging, and finer-graded coins are rare. Bright, lustrous surfaces have a silver-gray cast. The fields are somewhat prooflike, and exhibit occasional light die polish lines. Excellent definition is visible on the design elements, including virtual clarity in the hair over Liberty's ear and the eagle's breast feathers. A couple of light contact marks at Liberty's eyebrow and luster grazes on the cheek preclude a higher grade. Housed in a green label holder. PCGS has certified a mere five coins finer (4/12). (#7080)

Appealing 1878-CC Dollar, MS66+ Difficult To Locate Any Finer

- 4214 1878-CC MS66+ NGC.** Most 1878-CC dollars encountered in the marketplace are in Mint State, but in the lower levels thereof. Locating an example better than the present MS66+ coin will be extremely difficult; NGC has certified only eight specimens grading higher and PCGS five coins finer (4/12). Brilliant surfaces display frosty silver luster. This is a highly appealing example for the connoisseur of Morgan dollars. (#7080)

Premium Gem 1879 Morgan Dollar Only One PCGS Coin in Higher Grade

- 4215 1879 MS66 PCGS. CAC.** The 1879 Morgan dollar enjoyed a huge mintage of nearly 15 million pieces, and the issue can only be called scarce in MS66 condition today. However, specimens in higher grades are almost unobtainable, and this coin offers an unusual combination of eye appeal and high technical quality. Well-detailed design elements show just a touch of softness in the hair above the ear, while ample mint luster shines through attractive shades of green, blue, and gold toning. PCGS has graded only one coin in higher numeric grades (4/12). (#7084)

- 4216 1879 MS65 Prooflike NGC.** Mirror reflectivity of the fields contrasts with frosty silver devices for excellent visual effect. Sometimes viewed as an unexciting or ordinary date, grading service experience shows a different image for this early date. Census: 17 in 65 Prooflike, 0 finer (4/12). (#7085)

- 4217 1879-CC XF45 PCGS. CAC.** Deeply toned with the faintest luminosity escaping from lightly worn surfaces. Lavender-accented gold-gray surfaces show wear most prominently on the softly defined high points. (#7086)

Peripherally Toned 1879-CC Dollar, MS61

- 4218 1879-CC MS61 PCGS. VAM-2.** Golden-brown and navy-blue freckles adorn the borders. A lustrous Uncirculated example of one of the scarcest Carson City Morgan issues. The fields are only lightly abraded, though wispy marks on the portrait correspond with the grade. VAM-2 has a tilted left mintmark and minor doubling on the 8 in the date. (#7086)

Choice Key 1879-CC Dollar

- 4219 1879-CC MS64 PCGS. VAM-4.** A whisper of golden toning denies full brilliance, but this Choice rare date CC-mint dollar is lustrous and crisply struck. The reverse is close to pristine, while the obverse displays a few delicate grazes. A trace of struck-in grease is inconspicuously located to the right of the ear. Two light die lines descend from Liberty's nose to provide VAM interest. Ex: Long Beach Signature (Heritage, 10/2001), lot 7278. (#7086)

Near-Gem 1879-CC Silver Dollar

- 4220 1879-CC MS64 PCGS. CAC.** This lovely scarce date Choice Carson City coin displays potent luster and a mere whisper of tan toning. The strike shows minor inexactness on the claws and at the centers, but the fields are clean and the cheek has only the expected number of faint grazes. It is curious that all '79-CC dollars are Third Reverse when Second Reverse examples were struck at the facility the following year. (#7086)
-

MS65+ 1879-CC Silver Dollar Untoned, Silver-White Example

- 4221 1879-CC MS65+ PCGS. CAC.** Perfect Mintmark. The 1879-CC Morgan dollar issue is notable for strong production qualities especially apparent on high-grade coins; strong mint frost is the rule of the day, and it is abundant here. This untuned, silver-white Gem specimen is also remarkably free of abrasions, placing it in the distinct minority among survivors. Gem examples of the issue see feverish demand, and this MS65+ coin is attract even more interest when it crosses the block. A couple of short, horizontal marks just to the right of the second C in the mintmark are the only singular signs of contact. The strike is sharp, stopping just short of full. Population: 94 in 65 (1 in 65+), 2 finer (4/12). (#7086)
-

1879-CC Morgan Dollar, MS61 Distinctive Capped Die Variety

- 4222 1879-CC Capped Die MS61 PCGS. VAM-3.** A Top 100 Variety. The remnants of a smaller CC can be detected under the primary mintmark, identifying the Capped Die variety. This well-detailed Mint State example shows a touch of softness on Liberty's hair strands and the mint luster is slightly subdued by light lavender-gray toning. The surfaces show the expected number of minor contact marks for the grade. (#7088)
-

1879-CC Morgan Dollar, MS62 Popular Capped Die Variety

- 4223 1879-CC Capped Die MS62 PCGS. VAM-3.** A Top 100 Variety. Assertive cartwheel luster covers this untuned example of the popular Large over Small CC variety, eagerly sought by Morgan dollar specialists. Close examination finds light scuffs on Liberty's cheek, while the boldly repunched Carson City mintmark is wonderfully clear. (#7088)
-

Capped Die 1879-CC Dollar, MS63+

- 4224 1879-CC Capped Die MS63+ PCGS. VAM-3.** A Top 100 Variety. The late die state with a filled G in GOD. Delicate straw-gold toning enriches this better date Carson City Morgan. The obverse is well preserved, and the reverse displays only wispy grazes. The strike shows the usual slight merging of detail at the centers. (#7088)
-

**Prooflike MS63 1879-CC Morgan
Capped Die, VAM-3**

- 4225 1879-CC Capped Die MS63 Prooflike NGC. VAM-3.** A Top 100 Variety. A brilliant and highly prooflike Carson City dollar with substantial contrast between the frosty motifs and reflective fields. The "Capped Die" feature is actually a Large over Small CC. In addition, the 18 in the date is repunched. A few hairlines are noted near the second C in the mintmark and the lower left obverse is moderately abraded. (#7089)

- 4226 1879-O MS64+ PCGS. CAC.** An intense blue-green and iridescent toned near-Gem, the reverse has an oval of bright silver luster. Both sides are frosty with above average design definition. (#7090)

**Brilliant Gem 1879-O Dollar
Fully Struck in the Centers**

- 4227 1879-O MS65 NGC.** This brilliant 1879-O has sparkling mint luster and is fully struck in the centers. The examples of this date and mintmark in this sale present an unusual opportunity for the collector to acquire an above-average specimen. Few examples are offered with such whistle-clean surfaces and strength of strike. (#7090)

**1879-O Dollar, MS65
Radiant Mint Luster**

- 4228 1879-O MS65 PCGS. CAC.** There is wide variability in the preservation and appearance of 1879-O dollars. A great many are heavily abraded and softly struck. This is an exceptionally attractive example that has bright, radiant mint luster, more suggestive of an S-mint actually. The central strike details are absolutely complete. Overall the coin is notably free from abrasions, and suggestive of an even higher grade. (#7090)

- 4229 1879-S MS67+ PCGS. CAC.** A brilliant and outstanding Morgan dollar type coin. Fully struck with booming luster and only a single visible mark, nearly concealed on the eagle's breast. (#7092)

**1879-S Morgan Dollar, MS68
Among the Finest Certified at NGC**

- 4230 1879-S MS68 NGC. CAC.** The "3rd Reverse" variety, with the slanting top arrow feather. An arc of cobalt-blue, lavender, and yellow-gold patination hugs the upper left obverse border, leaving the remaining surfaces brilliant. A solid strike imparts excellent detail to the design features, and both sides are immaculately preserved. NGC has certified no coins in higher numeric grades (4/12). (#7092)

- 4231 1880 MS65+ PCGS. CAC.** A narrow ring of steel-blue runs on the upper obverse, expanding on the reverse to concentric rings of amber and blue, while the centers are untuned silver-white on each side. A loupe reveals satiny surfaces with few marks. (#7096)

**1880 Morgan Dollar, MS66
No Finer Examples at PCGS**

- 4232 1880 MS66 PCGS.** The 1880 Morgan dollar was produced in large numbers, but the quality of survivors varies widely. The issue is quite scarce in Premium Gem condition. This spectacular Premium Gem displays razor-sharp definition on all design elements, with vibrant mint luster and exceptionally clean surfaces. Population: 95 in 66, 0 finer (4/12). (#7096)

- 4233 1880-CC MS66 PCGS. CAC.** The obverse exhibits rich tobacco-gold toning that deepens perceptibly at the date, contrasting with a bright white reverse. The total mintage of this date was confused by the order to melt 96,000 pieces held not to be up to government standards, leaving an actual total of 495,000 pieces. (#7100)

- 4234 1880-CC MS65 Prooflike PCGS.** A well-detailed Gem, with hazily reflective surfaces that show noticeable cameo contrast. Housed in a green label holder. PCGS has certified only nine finer coins within the designation (4/12). (#7101)

- 4235 1880-CC 8 Over High 7 MS66 NGC. VAM-5.** A Top 100 Variety. The variety is undesignated on the NGC insert. This Superb Gem Uncirculated example is surprisingly mark-free. Sharp details and frosty luster help define this impressive white coin. (#7102)

- 4236 1880-CC 8 Over Low 7 MS65 PCGS. VAM-6.** A Top 100 Variety. This well-detailed Gem shows the remains of a 7 positioned low under the second 8 in the date. The surfaces are lustrous, with hints of gold and pink toning. (#7104)
- 4237 1880-CC 8 Over Low 7 MS65 PCGS. VAM-6, R.4.** A Top 100 Variety. The telltale is the remnants of an underdigit 7 beneath the second 8, while a loupe reveals other parts of the 7 inside the loops. An ice-white, attractive, well-struck Gem example. (#7104)
- 4238 1880/79-CC Reverse of 1878 MS65 NGC. VAM-4.** A Top 100 Variety. This lustrous overdated Carson City Gem is nicely struck and has unabraded fields. The lower cheek displays light marks, and the upper reverse shows a fingerprint. (#7108)
- 4239 1880/79-CC Reverse of 1878 MS64 Prooflike PCGS. VAM-4.** A Top 100 Variety. The frosty motifs contrast with glassy fields. Crisply struck and nearly untoned with minor grazes on the portrait. Population: 50 in 64 (3 in 64+) Prooflike, 10 finer (4/12). (#7109)

**Gem 1880/79-CC Dollar, VAM-4
Rare Deep Mirror Prooflike Example**

- 4240 1880/79-CC Reverse of 1878 MS65 Deep Mirror Prooflike ANACS. VAM-4.** A Top 100 Variety. This coin plainly shows the remains of an undertype 79 beneath the last two digits of the date, identifying the popular VAM-4 variety. The design elements are sharply detailed throughout and the fields are deeply mirrored, providing intense cameo contrast. Gems with Deep Mirror Prooflike surfaces are rare. (#97109)
- 4241 1880-CC 8/7 Reverse of 1878 MS64 PCGS. VAM-7A.** A Hit List 40 Variety. The N in IN is lightly clashed in front of the neck, but the obsolete Second Reverse remains the feature of greater interest. Well struck and lustrous with sun-gold toning that deepens near the margins. (#7110)
- 4242 1880-O MS64 PCGS.** Silver-white mint frost enriches a pleasingly bold New Orleans strike which is especially visible on the eagle's crisply defined breast feathers. Such minor marks as can be found are unobtrusive. (#7114)
- 4243 1880-O MS64 NGC.** Radiant luster is seen on this Choice Uncirculated example from the New Orleans Mint. A well-defined strike and unbroken white surfaces are noted on this minimally abraded dollar. (#7114)

**1880-S Morgan Dollar, MS67+
Incredible Iridescent Toning**

- 4244 1880-S MS67+ PCGS.** The 1880-S Morgan dollar was a well-produced issue, with a large mintage of 8.9 million pieces. Many examples were stored in Treasury vaults, and one dealer estimates that 1.6 million pieces were distributed in the great Treasury releases of the 1960s. Thus, the 1880-S is one of the most available dates of the series in high grade and a particular favorite of type collectors.
- The present coin is an incredible high-end Superb Gem, with sharply detailed design elements, vibrant mint luster, and virtually pristine fields. The outstanding visual feature of this coin is the vivid iridescent toning. Shades of champagne-gold, cobalt blue, burnt-orange, and lilac form a stunning play of colors, with most of the toning on the obverse. (#7118)
- 4245 1880-S MS67+ PCGS. CAC.** Lightly frosted on the high points of the obverse with strong cartwheel luster and a faint partial pale gray overlay on silver surfaces. Impressively preserved even by Superb Gem standards. (#7118)

- 4246 1880-S MS67+ PCGS. CAC.** Frosted on the devices with blazing semi-mirrored cartwheel fields. A single dot of deep patina appears at the juncture between the eagle's right (facing) wing and leg. (#7118)
- 4247 1881 MS66 PCGS.** The silver-gray surfaces of this remarkable Premium Gem are essentially mark-free and ringed with soft russet shades about the peripheries. Housed in a green label holder. Population: 74 in 66 (1 in 66+), 2 finer (5/12). (#7124)
- 4248 1881-CC MS66 PCGS.** Immaculate frosty silver surfaces add to the beauty of a sharp and exacting impression of the dies, making this coin an ideal collector example of this relatively low-mintage Carson City date. (#7126)
- 4249 1881-CC MS66 NGC.** Exceptionally full silver-white mint frost covers both sides of this Premium Gem 1881-CC, seldom seen in finer grades. The minimal marks are limited to a few faint scuffs on Liberty's cheekbone. (#7126)
- 4250 1881-CC MS66 PCGS.** This spectacular Premium Gem exhibits sharply detailed design elements and especially vibrant mint luster, with no mentionable distractions. Housed in a green label holder. (#7126)
- 4251 1881-CC MS66+ PCGS. CAC.** This GSA-origin dollar looks like two different coins. The obverse is deeply toned violet, magenta, orange, and gold in a wash from left to right, while the reverse is softly silver. (#7126)
- 4252 1881-CC MS66+ PCGS. CAC.** The obverse of this well-preserved GSA-origin dollar has gauzy gold-kissed patina over rich silver-gray surfaces. The reverse has dramatic "coin overlap" toning, bright silver at right with gold-orange and plum hues covering well over half of that side. (#7126)
- 4253 1881-CC MS65 Prooflike PCGS.** Thick, luxurious frost enhances the sharply struck devices on this Prooflike Carson City Gem. Largely silver fields have great flash and reflectivity, though not the depth for a Deep Mirror Prooflike designation. (#7127)
- 4254 1881-CC MS65 Prooflike PCGS.** Gold-tinged at the rims but with only faint whispers of cloud-white patina over silver interiors. Lightly frosted on the devices to supply contrast with moderate mirrors. (#7127)
- 4255 1881-CC MS64 Deep Mirror Prooflike PCGS. CAC.** The richly frosted design elements stand in stark contrast to the deeply mirrored fields of this remarkable Choice specimen. Only a few minor contact marks are evident, and eye appeal is exceptional. (#97127)
- 4256 1881-O MS65 PCGS. VAM-5.** A Hit List 40 Variety. The mintmark is strongly repunched within the loop. The variety is undesignated on the insert. Lustrous and intricately struck with clean surfaces and a hint of gold toning. (#7128)
- 4257 1881-O MS65 NGC.** This untuned and lustrous New Orleans Gem provides an intricate strike and uncommonly clean surfaces. Despite its common reputation in typical Mint State, the 1881-O is surprisingly scarce at the MS65 level. (#7128)

Gem Deep Mirror Prooflike 1881-O Dollar Tied for Finest at PCGS

- 4258 1881-O MS65 Deep Mirror Prooflike PCGS. CAC.** The 1881-O Morgan dollar is an available date in most grades, from a mintage of 5.7 million pieces. Examples with prooflike surfaces are also seen with some frequency, but the coins are usually plagued with bagmarks, making them less attractive. The present Gem Deep Mirror Prooflike coin is a happy exception, with only minor hairlines and contact marks that detract little from the considerable eye appeal. The design elements are sharply rendered, and the mirrored surfaces show a few hints of gold and champagne toning. Population: 12 in 65 Deep Mirror Prooflike, 0 finer (4/12). Ex: *Chicago Signature (Heritage, 8/2011), lot 7311.* (#97129)
- 4259 1881-S MS67 NGC. CAC.** The obverse of this remarkable Superb Gem is toned in mottled, but attractive, shades of champagne-gold and violet. On the reverse, the toning is mostly limited to the peripheries. The design elements show razor-sharp definition and the mint luster is satiny and vibrant. (#7130)
- 4260 1882-CC MS66 PCGS.** Dazzling cartwheel luster, an intricate strike, and immaculate fields attest to the quality of the present Carson City Premium Gem. A brilliant and beautiful example. (#7134)
- 4261 1882-CC MS66 PCGS.** A gorgeous and well-defined dollar, almost surely of GSA origin. The surfaces have bold cartwheel luster and little patina aside from a few green-gold hints on the obverse and a narrow rainbow band at the upper reverse. (#7134)
- 4262 1882-O MS65 PCGS.** An essentially brilliant Gem with satiny silver luster, this lovely dollar has a thin crescent of amber toning at the lower obverse border. (#7136)

4263 1882-O/S MS64 NGC. VAM-4. A Top 100 Variety. The “O/S Recessed” variety, one of three reverses known for the 1882-O/S. Light wheat-gold toning blankets this lustrous and boldly struck near-Gem. The devices exhibit minor mint-made die rust. (#7138)

4264 1882-O/S MS64 PCGS. VAM-4. A Top 100 Variety. This brightly lustrous Choice example shows a “Strong” overmintmark, with the O/S recessed, characteristic of the VAM-4 variety. The design elements are sharply detailed and a patina of champagne-gold and violet hues adds to the outstanding eye appeal. PCGS has certified only two finer specimens (4/12). (#7138)

**1882-O/S Dollar, Toned MS64
Strong Designation**

4265 1882-O/S MS64 Strong PCGS. CAC. VAM-3. A Top 100 Variety. The diagonal downstroke of the S is especially pronounced on this variety (thus the “Strong” designation). The O/S has long been known as a condition rarity in the Morgan series. It is very rare finer than MS64. In fact, PCGS has only certified two finer examples. Each side is covered with rich reddish-golden and light blue toning with strong underlying mint luster. The strike is strong, and abrasions are few and widely scattered. (#7138)

Remarkable MS68 ★ 1882-S Dollar

4266 1882-S MS68 ★ NGC. Some Morgan dollar issues fail to immediately excite the average numismatist because of their easy availability, especially since the great Treasury releases of 1962 to 1964, when many scarce-to-rare issues were rendered commonplace. The ‘82-S is a relatively common issue that has been certified by the tens of thousands in lower Mint State grades. At MS68, however, examples are far from easy to find; and with the coveted “Star” designation from NGC (an indication of exceptional eye appeal), there are a mere seven coins certified with none finer, as of (4/12). This sharply struck piece displays ample luster and visually captivating coloration that includes deep shades of lilac, red-gold, and cobalt-blue across the obverse, and similar hues near the reverse periphery. The surfaces are exquisitely preserved and nearly pristine. A beautiful and technically impressive coin from the San Francisco Mint.
Ex: Oxford Collection (Heritage, 3/2008), lot 970. (#7140)

4267 1883-CC MS66+ ★ NGC. Remarkable fire-red, forest-green, and lemon-gold patina consumes the obverse of this high grade Carson City Morgan. The reverse is brilliant, and both sides are thoroughly lustrous. (#7144)

4268 1883-CC MS66+ PCGS. CAC. VAM-3A, R.5. This is simply an outstanding Carson City coin, enriched by a sharp strike and saturated with silver-white mint frost that covers both sides. Die clashing shows a reversed N at Liberty’s throat, identifying this VAM variety. (#7144)

4269 1883-CC MS66 Prooflike PCGS. CAC. Near-brilliant and boldly struck with a pleasing contrast between the fields and devices. Just a couple of small field marks on the obverse preclude an even finer designation. PCGS has graded just eight pieces as MS67 Prooflike or better (4/12). (#7145)

**1883-CC Morgan Dollar, MS67 Prooflike
None Certified Finer**

4270 1883-CC MS67 Prooflike PCGS. CAC. Dramatic orange-red, yellow-gold, peach, and powder-blue endow the obverse of this precisely struck Superb Gem. The reverse is mostly brilliant but has narrow bands of golden-brown near the rim. Moderately mirrored and exceptionally free from marks, an outstanding Carson City type coin. Population: 8 in 67 Prooflike, 0 finer (4/12). (#7145)

4271 1883-CC MS65 Deep Mirror Prooflike PCGS. The sharply detailed design elements exhibit a rich coat of mint frost that contrasts profoundly with the deeply reflective fields of this impressive Gem. A few hints of gold toning are evident and eye appeal is outstanding. (#97145)

4272 1883-S MS63 PCGS. The 1883-S has a high mintage but, unlike its ‘78-S to ‘82-S predecessors, went into West Coast circulation instead of Treasury storage. Thus, Uncirculated examples are elusive. Lustrous and nearly brilliant with smooth fields and light facial grazes. (#7148)

4273 1883-S MS63 PCGS. This brilliant and coruscating select Morgan dollar is precisely struck and displays only scattered small abrasions. Despite its high mintage, the ‘83-S is conditionally scarce. (#7148)

**1884 Silver Dollar, MS67
Rainbow Toned Reverse**

4274 1884 MS67 NGC. The reverse is dominated with deep shades of sky-blue, red, antique-gold, and violet as if this was an end coin in a paper roll for a long time. The obverse is bright and untoned. Both sides show sharp definition and a remarkable absence of mentionable marks. A “must see” item for the toning enthusiast. Census: 36 in 67, 2 finer (4/12). (#7150)

- 4275 1884-CC MS66+ PCGS. CAC.** Broad silver luster with a touch of frostiness on the high points. Minimally abraded, as the shallow "roller marks" visible along the jawline were present at striking and thus do not affect the technical grade.(#7152)
- 4276 1884-CC MS66+ PCGS. CAC.** Twinkling frost graces the devices, while the fields flash and swirl with bright luster. The reverse interior patina takes on a green-gold aspect at certain angles to the light.(#7152)
- 4277 1884-CC MS66 Prooflike NGC.** A stunning Premium Gem example of this popular Carson City issue, with sharply detailed design elements that show bold cameo contrast with the intensely reflective fields. A ring of emerald green toning graces the peripheries. Census: 56 in 66 (2 in 66+) Prooflike, 7 finer (5/12). (#7153)
- 4278 1884-CC MS65 Deep Mirror Prooflike PCGS. CAC.** Stunningly mirrored with moderately frosted devices that supply great silver-to-silver texture contrast. This gorgeous Gem is housed in a first-generation holder.(#97153)
- 4279 1884-O MS67 NGC.** Although the hair over Liberty's ear is typically weak, all other design features on both sides are boldly defined. The frosty white-silver surfaces are virtually brilliant and highly lustrous. A beautifully preserved Superb Gem.
Ex: *West Palm Beach FUN (Heritage, 7/2007), lot 1398.* (#7154)
- 4280 1884-S AU58 PCGS.** Broadly luminous through the fields under deep layers of sunset-gold and blue-gray patina. The high points are softly struck but show little actual wear. A pleasing example from this challenging issue of 3.2 million pieces.(#7156)
- 4281 1884-S AU58 NGC.** This well-preserved piece spent very little time in circulation, with luster gleaming from the fields. While wear is noted on the high point, no single detracting marks can be seen on the surfaces of this Near-Mint example.(#7156)
- 4282 1884-S — Obverse improperly Cleaned — NGC Details. Unc.** The surfaces of this sharply detailed Morgan dollar are toned in attractive shades of champagne-gold and lavender, but the obverse has an unnatural sheen from the noted cleaning.(#7156)
- 4283 1885 MS67 NGC.** A boldly struck Superb Gem that appears brilliant upon first glance, but has glimpses of apricot toning on the reverse margin. A single tick on the left (facing) leg denies numismatic perfection.(#7158)
- 4284 1885 MS67 PCGS. CAC.** This impressive Superb Gem displays a rainbow of toning at the left obverse and a fully brilliant, untoned reverse. All design elements are bold, further enhancing the coin's outstanding eye appeal. This issue is extremely rare any finer; PCGS and NGC combined have certified only six specimens finer. Population: 75 in 67 (1 in 67+), 1 finer (4/12).(#7158)
- 4285 1885 MS66 Deep Mirror Prooflike NGC.** Wonderful deeply reflective fields surround the precisely detailed reliefs that are highlighted by the well-defined hair strands over Liberty's ear and the eagle's breast feathers. Census: 57 in 66 (2 in 66+) Deep Mirror Prooflike, 5 finer (4/12).(#97159)
- 4286 1885-CC MS65 NGC.** A bit weak over Liberty's ear, this white example exhibits amazing cartwheel luster, while no distracting abrasions are present on this well-preserved Gem. (#7160)
- 4287 1885-CC MS65 NGC.** Always in demand because of its low mintage of 228,000 pieces, the 1885-CC Morgan dollar is prized by collectors in all grades. This delightful Gem displays well-detailed design elements and vibrant mint luster.(#7160)
- 4288 1885-CC MS65 PCGS.** This well-detailed Gem exhibits just a touch of softness on the hair above Liberty's ear, with especially vibrant satiny mint luster and only minor signs of contact. This coin possesses exceptional eye appeal.(#7160)
- 4289 1885-CC MS65 PCGS.** Light green-gold tints settle over parts of the fields, but the rest of this Gem is effectively silver. Well-defined with a small shiny scrape near the tip of the bust.(#7160)
- 4290 1885-CC MS65 NGC. VAM-2A, R.6.** One of the recently popular "clashed obverse n" VAMs. A trace of golden patina visits this lustrous and otherwise brilliant Carson City dollar. Nicely struck with a smooth reverse and only minor obverse contact. Lowest mintage of the CC-mint issues.(#7160)
- 4291 1885-CC MS65 NGC.** Well-defined with silver-frost across the high points and light patina over cartwheel luster. This semireflective Gem almost certainly came from a GSA source. (#7160)
- 4292 1885-CC MS65 PCGS.** Distinctly frosted on the obverse portrait with near-Prooflike reflectivity in the fields, though the reverse has a more cartwheel appearance. A translucent milky streak overlaps the right (facing) wingtip, but the coin shows little color elsewhere. (#7160)
- 4293 1885-CC MS65 PCGS.** An impressive Gem specimen of this low-mintage Carson City issue, with sharply detailed design elements throughout and vibrant mint luster. Wisps of pale gold toning enhance the creamy surfaces, which show only minor signs of contact.(#7160)
- 4294 1885-CC MS65+ PCGS. CAC.** A flashy and well struck Gem that approaches full brilliance but has a hint of straw-gold toning. Immaculate except for a few wispy grazes on the portrait. (#7160)
- 4295 1885-CC MS66 NGC.** Decently detailed with lightly frosted devices and flashes of reflectivity in cartwheel-leaning fields. This pleasing Premium Gem shows a light green-gold overlay. (#7160)
- 4296 1885-CC MS66 PCGS.** This lovely premium Gem has potent luster and nearly undisturbed surfaces. In addition, the strike is very sharp. A popular Carson City issue, from a mintage of just 228,000 pieces.(#7160)
- 4297 1885-CC MS66+ PCGS.** This low mintage Carson City silver dollar is close to brilliant and exhibits dazzling cartwheel sheen. Sharply struck and pleasing with an especially clean reverse. (#7160)
- 4298 1885-CC MS66+ PCGS. CAC.** Always a popular collector coin because of its low mintage of 228,000 pieces. This is a bright-white example that has shimmering mint luster, as one would expect from a Carson City dollar. Each side is refreshingly free from the usual CC abrasions and there is just the slightest striking softness in the centers.(#7160)
- 4299 1885-CC MS66 Prooflike NGC.** An amazing Premium Gem Prooflike Morgan dollar, this piece is brilliant and entirely untuned. The fields are fully mirrored around lustrous devices. Census: 23 in 66 Prooflike, 3 finer (5/12).(#7161)
- 4300 1885-CC MS65 Deep Mirror Prooflike NGC.** A brightly mirrored and brilliant Gem of this popular low mintage Carson City issue. The centers show minor inexactness of impression, and occasional small marks are detected beneath a loupe.(#97161)
- 4301 1885-O MS67 NGC.** Hints of honey-gold appear on each side of this Superb Gem, otherwise silver-white with satiny surfaces and radiant cartwheel luster. A loupe reveals only tiny marks, in keeping with the grade.(#7162)
- 4302 1885-O MS67 NGC. CAC.** The satiny silver surfaces are well-struck and show no mentionable marks, with a thin arc of gold toning along the left obverse margin. NGC has seen only nine submissions numerically finer (5/12).(#7162)
- 4303 1885-O MS67+ NGC. CAC.** Frosty glitters across the high points lend this pale silver piece amazing eye appeal. Though the 1885-O is available for a price in MS67, NGC has graded only nine pieces as MS68 or better (4/12).(#7162)
- 4304 1885-S MS65 PCGS.** Fantastic cartwheel luster flashes under partial toning, silver-to-orange with greens, blues, and violets along the right rims. Though the 1885-S Morgan dollar is available for a price in MS65, anything better is a condition rarity. (#7164)

4305 1885-S MS65 PCGS. A bold strike and cartwheel luster are quintessential elements of this 1885-S Morgan dollar. The obverse is brilliant-white with light toning at stars 5 and 6, while the reverse displays light champagne toning. (#7164)

4306 1885-S MS65 PCGS. CAC. This Gem has broadly sweeping luster under gold-gray patina that gains a blue-violet edge to left. Strong interior detail is another great asset. PCGS has graded just 31 pieces as MS66 or better (4/12). Housed in a green label holder. (#7164)

1886-O Morgan Dollar, MS63
Conditionally Scarce in Higher Grades

4307 1886-O MS63 PCGS. The 1886-O Morgan dollar saw extensive circulation in the 19th century, with few examples saved by collectors and small numbers in the Treasury releases of the 1960s. High-quality pieces are seldom encountered. The present coin is a pleasing Select specimen, with well-detailed design elements and lustrous, lightly marked surfaces that show accents of pale gold toning. (#7168)

Choice 1886-O Dollar
Seldom Seen Finer

4308 1886-O MS64 PCGS. CAC. Ex: Shrike Set. Although the 1886-O Morgan dollar claims a huge mintage of more than 10 million pieces, the issue is conditionally scarce in grades above MS63. Both sides of this well-detailed Choice example have subtle champagne toning over satiny silver surfaces with outstanding eye appeal. PCGS has only certified three numerically finer examples of this date (4/12). (#7168)

4309 1886-S MS65 NGC. This sharply struck Gem exhibits frosty white surface, while touches of champagne appear on the devices. There are slight abrasions on the obverse, while the reverse appears to be nearly pristine. (#7170)

Gem 1886-S Morgan Dollar
Rare Prooflike Example

4310 1886-S MS65 Prooflike PCGS. The moderately reflective prooflike fields of this delightful Gem frame well-detailed frosty design elements, providing bold cameo contrast when the coin is tilted in the light. A few minor contact marks and hairlines prevent an even higher grade. Housed in a green label holder. Population: 20 in 65 Prooflike, 4 finer (4/12). (#7171)

Top 100 VAM-2 1886-S/S Dollar
MS64 Deep Mirror Prooflike

4311 1886-S/S MS64 Deep Mirror Prooflike PCGS. VAM-2. A Top 100 Variety. The mintmark was initially entered with a tilt to the left, then carefully repunched in the proper position. Traces of the serifs remain from the first impression. But any variety of the lower mintage 1886-S dollar is desirable, particularly in DMPL format. This flashy and nearly untuned Choice Morgan has a good strike and pleasing preservation. (#97171)

Prooflike Gem 1887/6 Morgan, VAM-2

4312 1887/6 MS65 Prooflike NGC. VAM-2. A Top 100 Variety. The curve from the base of an underdigit 6 identifies the scarce 1887/6 overdate. Lightly toned and lustrous with smooth and moderately flashy fields. A few tiny strike-throughs on Liberty's neck are of mint origin. Census: 22 in 65 Prooflike (1 in 65 ★ Prooflike), 1 finer (4/12). (#7175)

4313 1887 MS67 NGC. Deep multicolored hues on each side of this lovely Superb Gem coin range from blue to pink to deep violet and magenta. Cartwheel luster manages to break through the intense color, and a loupe reveals few signs of contact. (#7172)

4314 1887 MS67 NGC. A lightly gray-toned example with impressive luster and all-around eye appeal. Only a touch of softness at the hair over the ear and a few scattered marks stand between this coin and an even finer grade. (#7172)

- 4315 1887 MS67 NGC.** Strong silver luster on the cartwheel obverse with a patch of green-gold at lower right. That color blossoms over the reverse, taking on orange components and adding occasional lavender accents. (#7172)
- 4316 1887-S MS65 PCGS.** Light blues and greens form the bulk of the patina, though streaks of gold also are present. Well-struck with suggestions of onetime frostiness on the high points. PCGS has graded 23 examples as MS66 or better (4/12). (#7180)
- 4317 1888 MS66+ PCGS. CAC.** The surfaces show satin luster and no sign of color besides silver-white, although a loupe reveals a few tiny dark flecks. It also uncovers relatively pristine preservation and a bold strike. Population: 29 in 66+, 15 finer (5/12). (#7182)
- 4318 1888 MS65 Deep Mirror Prooflike PCGS.** Richly frosted devices stand out forcefully from deep glass-mirror fields. The boldly reflective fields are highlighted by a display of deep gold toning that emphasizes a meticulous impression of the dies. Population: 43 in 65 Deep Mirror Prooflike, 9 finer (4/12). (#7183)
- 4319 1888-S MS65 NGC.** A bit of softness is noted above Liberty's ear on this otherwise well-struck example. Brilliant surfaces show off a well-preserved Gem that exhibits only the slightest contact marks, a spectacular S-mint example with a slightly rotated reverse. (#7186)
- 4320 1888-S MS65 PCGS.** Frosty, lustrous, and generally untuned save for a single spot on the eagle's right wing and a touch of green-gold "edging." A well-preserved Gem, softly struck but without serious abrasions. (#7186)
- 4321 1889 MS66 PCGS.** Frosty silver-white surfaces are satisfyingly free of distracting marks. Careful study reveals the merest hint of weakness in the lock immediately above Liberty's ear. The 1889 is a true condition rarity in higher grades. PCGS has graded only four finer examples (4/12). (#7188)

**MS66+ 1889 Silver Dollar
Only a Few Graded Finer**

- 4322 1889 MS66+ PCGS. CAC.** A brilliant Premium Gem with booming luster and a good strike. Only faint surface imperfections are present. The 1889 is a high mintage date and is plentiful in typical Mint State, but examples of the present extraordinary quality are rarities. A competitive yet affordable candidate for an advanced Registry holding. (#7188)
- 4323 1889 MS65 Prooflike PCGS.** Uncirculated 1889 silver dollars will always be plentiful, but Prooflike pieces are scarce, and Gems with reflective fields are undeniably rare. This lightly toned example is sharply struck and displays only inconsequential marks. (#7189)
- 4324 1889-CC VF20 NGC.** A cream-gray Carson City key date dollar. Occasional small marks emerge beneath a loupe, but the overall appearance is attractive. The devices display wear yet wing plumage is substantial. (#7190)
- 4325 1889-CC VF30 NGC.** Richly toned with faint glimmers of luster, unusual for the midrange grade. The most prominent hues are reddish-orange, sage, olive, and forest-green. (#7190)

- 4326 1889-CC — Improperly Cleaned — NGC Details. XF.** Faintly retoned gold-orange and blue-gray around parts of the margins, though the centers remain pale gold-gray after a cleaning. Several light to moderate digs appear in the portrait area as well. This is an important coin nonetheless, as it represents the key 1889-CC issue with a mintage of only 350,000 pieces. (#7190)
- 4327 1889-CC XF40 ANACS.** Appreciably worn but still luminous silver-white centers have orange and blue framing patina at parts of the borders. Several significant abrasions on and near the portrait are grade-consistent. Housed in a small-format ANACS holder. (#7190)

**1889-CC Morgan Dollar, XF40
Collectible Example of This Key Date**

- 4328 1889-CC XF40 PCGS.** Some light wear shows on the high points of the design elements, but this attractive XF specimen retains much of its original design detail and mint luster. A few hints of lime-green and pale gold toning grace the peripheries, while the centers remain mostly brilliant. This lightly abraded key will be a welcome addition to a fine collection of Morgan dollars. (#7190)

Choice XF 1889-CC Dollar

- 4329 1889-CC XF45 PCGS.** Deep gray surfaces reveal tobacco-brown and gunmetal-blue undertones once this key Carson City dollar is rotated beneath a light. Substantial design definition and glimpses of remaining luster confirm the Choice XF grade. Lightly abraded and undeniably scarce relative to demand. (#7190)

**Choice XF 1889-CC Dollar
Good Balance of Value and Quality**

- 4330 1889-CC XF45 NGC.** This key Carson City Morgan dollar displays attractive shades of pale gold and lavender-gray toning on both sides. The design elements show only a few hints of actual wear, and considerable mint luster remains, beneath the patina. An attractive alternative to a Mint State example of this challenging date. (#7190)

White XF45+ 1889-CC Dollar

- 4331** 1889-CC XF45+ NGC. A band of bright luster fills the borders. The wings and hair also display mint shimmer. This essentially untoned Choice XF example has only light wear. The only mentionable marks are near the arrow heads. Though the mintage is higher than the 1881-CC and 1885-CC, the 1889-CC is rarer since the former two issues emerged in quantity in the GSA auctions of the 1970s. (#7190)

1889-CC Morgan Dollar, AU53 Lightly Circulated Key

- 4332** 1889-CC AU53 PCGS. The 1889-CC Morgan dollar is the key to the Carson City series. Collectors prize this date because of its low mintage and distinctive mintmark, and even circulated examples are always in demand. The present coin is a lightly circulated example, with a little softness on the hair above the ear and a scattering of minor contact marks on both sides. The lustrous surfaces show hints of greenish-gold toning. (#7190)

Choice AU 1889-CC Silver Dollar

- 4333** 1889-CC AU55 NGC. CAC. Autumn-gold and dove-gray blend throughout this partly lustrous and briefly circulated representative. A pass beneath a lens fails to locate any remotely mentionable marks. Sharply struck for this key Carson City issue. An original and desirable example of the want list favorite. (#7190)

Near-Mint 1889-CC Dollar Most Elusive Carson City Morgan

- 4334** 1889-CC AU58 PCGS. The 1889-CC Morgan dollar is an important branch-mint key, from a reported mintage of just 350,000 pieces. Among Carson City Morgan dollars, the 1889 issue is easily the most elusive, and this date inspires spirited competition whenever an example is offered publicly. The present coin is an attractive near-Mint specimen that displays just a touch of wear on the high points of the design, like the hair strands above Liberty's ear and the eagle's breast. The lightly marked surfaces show a mixture of satiny mint luster and prooflike reflectivity. Only a few hints of champagne-gold toning enhance the mostly brilliant surfaces. (#7190)
-

1889-CC Dollar, AU58
Almost Complete Mint Luster

- 4335 1889-CC AU58 PCGS. Carson City Mint Superintendent James Crawford died on March 8, 1885, at age 52 after a “short, full life” that Rusty Goe chronicles in the similarly named reference. The new mint supervisor, William Garrard, was despised among the local populace, nonetheless overseeing the transfers of 3.2 million CC-mint silver dollars to Washington, D.C., San Francisco and other locations, nearly all dated 1882 through 1885, explaining the prevalence of those dates during the GSA sales and Treasury releases decades later. The Carson City Mint closed for four years, reopening in 1889 and striking a respectable total of 350,000 1889-CC Morgan dollars. Goe maintains, however, that many of those coins were later melted for unspecified reasons, leaving somewhere between 25,000 and 100,000 coins for potential release into circulation. This piece spent only a short time in the channels of commerce before its significance was recognized and it was set aside. Remarkably strong mint luster complements golden-brown toning streaked over each side. The strike is sufficient, and a few small abrasions are scattered across each side. (#7190)
-

1889-CC Dollar, MS62
Key to the CC Morgan Series

- 4336 1889-CC MS62 PCGS. The recorded mintage of the 1889-CC Morgan dollar is 350,000 pieces, but that mintage figure is meaningless today, just as those of many Saint-Gaudens double eagle issues are. Rusty Goe maintains in *The Mint on Carson Street* that a large part of the mintage of the 1889-CC was later melted, and that today 11,000 to 16,000 pieces survive in all grades, of which 4,000 to 7,500 are Mint State. Many of the certified examples at NGC and PCGS average VF30 to VF35 or so. However, numerous high-grade Mint State examples survive as well, sometimes appearing with gorgeous prooflike surfaces. This piece shows just a faint glimmer in the fields. The strike is strong, but not completely defined in the centers. The untuned surfaces show a couple of scuffs on the chin of Liberty and field below. (#7190)
-

MS62 1889-CC Morgan Dollar
First Issue After 1885 Hiatus

- 4337 1889-CC MS62 PCGS. CAC.** Like many of its Morgan dollar fellows from 1885 and before, the 1889-CC issue has a limited mintage of fewer than a million pieces. Unlike those predecessors, however, the 1889-CC was not retained in quantity by the federal government, making Mint State examples elusive and far more valuable than their earlier peers. This gold-kissed MS62 example is lightly toned ivory-silver overall with broad luster. The detail is decent for the issue, if a trifle soft on the hair over Liberty's ear. A wedge-shaped abrasion between Liberty's eye and nostril precludes Select status. (#7190)

1889-O Dollar, MS65
Better Struck, Partially Toned

- 4338 1889-O MS65 PCGS.** This high-mintage Morgan issue is best known for the "pancake strike" seen on most coins. This piece is not fully struck, but for the issue there is above-average definition over the ear of Liberty and on the eagle's plumage. The obverse is two-toned, showing wide bands of golden-brown and deep blue, while the reverse is mostly brilliant with a thin band of golden around the rim. (#7192)

1889-O Morgan Dollar, MS65
Desirable and Boldly Lustrous

- 4339 1889-O MS65 NGC.** The strike is sharp for this Southern branch mint and the coin displays bold overall luster for additional visual impact. With 11.8 million struck, this date is readily available in lesser grades but rapidly becomes scarce in Choice condition and above. Census: 49 in 65, 6 finer (4/12). (#7192)

- 4340 1889-S MS65 PCGS.** This gleaming white Gem has outstanding eye appeal for the grade. Only minor softness is noted on the hair over Liberty's ear. (#7194)

- 4341 1889-S MS65 NGC. Ex: Redfield Hoard.** This impressive Gem has trivial grade-consistent marks on each side, with brilliant mint frost and untuned silver surfaces. NGC has only certified 26 finer (5/12). (#7194)

- 4342 1889-S MS65+ PCGS.** Stark silver luster blazes on each side of this S-mint dollar from a mintage of 700,000 pieces. Frosty accents catch the light on the well-struck high points. (#7194)

- 4343 1889-S MS65 PCGS. CAC.** This San Francisco date saw 700,000 pieces struck and many were paid out by the U.S. Treasury before the present surge in popularity of the Morgan dollar. Rich tawny gold distinguishes this pleasing example. Each side is minimally abraded and the fields are bright and semiprooflike. (#7194)

- 4344 1890 MS65 PCGS.** Both sides of this piece show powerful luster, solid striking definition, and pleasing overall preservation, but the similarities end there. Rich green-gold and peach tones prevail on the obverse, while the reverse has only pale hints of such color at the margins. (#7196)

- 4345 1890 MS65 PCGS.** Original gray-brilliant surfaces with a faint accent of golden patina around the margins. Well-struck and problem-free. A scarce issue in strict Gem condition despite its mintage, and virtually unobtainable any finer. Housed in a green label holder. PCGS has certified only one finer specimen (4/12). (#7196)

- 4346 1890 MS65 PCGS. CAC.** Plum, blue, and gold-orange patina washes over the warmly lustrous obverse. The last color appears at the rims of the reverse, the interior on that side being mainly silver-white with only faint evidence of patina. PCGS has graded only one coin as MS66 or better (4/12). (#7196)

- 4347 1890-CC Tail Bar MS62 ANACS. VAM-4.** A Top 100 Variety. Many consider this the easiest VAM to identify by the bold die scratch between the left tail of the eagle and the wreath. This well-preserved example is highly lustrous with hints of raspberry and cobalt-blue around the peripheries. (#87198)

- 4348 1890-CC MS64 PCGS.** Richly toned peach and silver through broad centers with narrow blue and violet bands at the rims. This near-Gem is well-defined with strong cartwheels under the patina. (#7198)

- 4349 1890-CC MS64 ANACS.** A sharply delineated crescent of gold, violet, and amber toning creates a striking visual effect on the obverse of this sharply detailed Choice specimen. Vibrant mint luster and a few additional wisps of color add to the considerable eye appeal. (#7198)

**Choice 1890-CC Morgan Dollar
Deep Mirror Prooflike Surfaces**

- 4350 1890-CC MS64 Deep Mirror Prooflike PCGS.** Mostly brilliant reflective fields, with occasional light olive patina, frame well-struck design elements with intense field/device contrast. Lengthy and interesting die polishing lines (as struck) are especially prominent in the upper reverse. Housed in a green label holder. (#97199)
- 4351 1890-O MS65 NGC.** A well-struck New Orleans example. This coin offers an astonishingly clean cheek with luminous white surfaces. Mint luster gleams from this well-preserved Gem specimen. (#7200)
- 4352 1891 MS64 PCGS. CAC.** Several gold-orange streaks are half-hidden in Liberty's hair, adding color to otherwise silver surfaces with light, gauzy patina over excellent cartwheel luster. Slightly soft at the hair over the ear but otherwise decently detailed. Housed in a green label holder. (#7204)
- 4353 1891-CC MS64 NGC. VAM-3.** A Top 100 Variety. This variety was popularized by its nickname, the "Spitting Eagle." Frosty silver surfaces show few distracting marks on either side. The distinctive reverse die dot that gives the variety its name is sharp and clearly defined, adding to the collector appeal. (#7206)
- 4354 1891-CC MS64 PCGS.** This well-detailed Choice Morgan dollar, from the fabled Carson City Mint, displays vibrant mint luster on creamy brilliant surfaces, with terrific eye appeal. Housed in a green label holder. (#7206)
- 4355 1891-CC MS64 NGC. CAC. VAM-3.** A Top 100 Variety made popular by its nickname the "Spitting Eagle." The raised die dot that gives this variety its colorful name is especially well defined. This specimen displays silver-white centers haloed in tawny gold around the peripheries for vivid eye appeal. (#7206)
- 4356 1891-CC MS64+ PCGS. CAC.** The untuned silver surfaces display copious luster and an excellent strike for the issue. The obverse displays a few less abrasions than the reverse, which shows a few ticks that likely precluded a Gem grade. (#7206)

**Gem 1891-CC Morgan Dollar
Sharply Struck With Vibrant Luster**

- 4357 1891-CC MS65 PCGS.** The 1891-CC Morgan dollar can be located in Gem condition with a little patience, but specimens in higher grades are rare. This impressive Gem offers brilliant creamy fields and sharply detailed design elements, with vibrant cartwheel mint luster on both sides. Eye appeal is exceptional. (#7206)

Patinated Gem 1891-O Morgan

- 4358 1891-O MS65 PCGS.** Deep sea-green, lilac, and champagne-red toning embraces this coruscating and carefully preserved New Orleans Gem. The '91-O is readily available in Uncirculated grades but Gems are highly elusive. The eagle's breast and the hair above the ear show softness, as is usual for the issue. Population: 83 in 65 (1 in 65+), 0 finer (5/12). (#7208)
- 4359 1891-S MS65 PCGS.** Mottled gold and iridescent toning appears near the borders on this lustrous Gem. Both sides have splashes of silver brilliance with satin surfaces. (#7210)
- 4360 1891-S MS65 PCGS.** Bountiful luster emanates from light pink-gold surfaces on this no-problems Gem coin, well-struck and certified in a green-label holder. The reverse is fairly prooflike and well-contrasted, the obverse a bit less so. PCGS has seen 63 numerically finer (5/12). (#7210)
- 4361 1892-CC MS63 PCGS.** This well-detailed Select Morgan dollar displays satiny mint luster under shades of green, lavender, and blue patina. A few minor contact marks prevent a Choice designation. Housed in an old green label holder. (#7214)
- 4362 1892-CC MS64 PCGS.** This sharply detailed Choice example displays satiny mint luster that mixes with prooflike reflectivity in sheltered areas. A scattering of minor contact marks on both sides prevents a Gem designation. (#7214)

**MS64+ 1892-CC Silver Dollar
Scarce VAM-8A**

- 4363 1892-CC MS64+ PCGS. CAC. VAM-8A, R.5.** A lightly toned near-Gem with potent luster and exemplary preservation for the designated grade. The centers show minor inexactness of impression. Much scarcer in Mint State than its '91-CC predecessor. VAM-8A has a die break within the 2 in the date and a clashed N from IN in front of the neck. (#7214)

**Deep Mirror Prooflike Select
1892-CC Silver Dollar**

- 4364 1892-CC MS63 Deep Mirror Prooflike ANACS. VAM-8, R.3.** Impressive field reflectivity, a good strike, and light rose-red peripheral toning are the chief assets of this scarce date Carson City dollar. The reverse is uncommonly void of marks, although Liberty's cheek and neck display wispy abrasions. A far date VAM with die fill inside the loops of the 89 in the date. (#97215)

- 4365 1892-O MS64 PCGS. CAC.** A well-detailed Choice example of this popular New Orleans issue, with just a touch of softness on the hair above the ear. This piece exhibits vibrant mint luster, with highlights of gold toning. (#7216)

**Gem 1892-O Dollar
Vivid Luster and Eye Appeal**

- 4366 1892-O MS65 PCGS.** The typical 1892-O Morgan dollar displays a weak strike and subpar mint luster, with little eye appeal. Examples in Gem condition are scarce, and finer specimens are very rare. Finding a well-detailed Gem with vibrant mint luster, like the present coin, requires patience and good fortune. PCGS has graded only five coins in higher numeric grades (4/12). (#7216)

- 4367 1892-S AU50 NGC.** A cream-gray rare date silver dollar that has smooth fields and a couple of moderate marks on the cheek. Satin luster emerges from protected regions. (#7218)

- 4368 1893 MS63 NGC.** A flashy Mint State example of one of the lowest mintage Philadelphia issues, with only 378,000 pieces produced, of the Morgan dollar series. This piece is sure to please any Morgan dollar enthusiast, offering a well defined strike absent of any notable abrasions. (#7220)

- 4369 1893 MS63 NGC.** This highly lustrous Select Mint State piece has no evidence of toning on either side. All branch mint 1893 Morgan dollars are rare in Mint State, and the Philadelphia issue is scarce, yet it is the choice of collectors who seek just one silver dollar from each year of production. (#7220)

- 4370 1893 MS63 PCGS.** An attractive Select example of this desirable date, a nicely struck coin exhibiting reasonable detail to the breast feathers and good definition to the hair. The surfaces are not toned, displaying rippling silver-white luster. (#7220)

- 4371 1893 MS63 PCGS.** This sharply detailed Morgan dollar exhibits satiny fields, with a few wisps of gold and pink toning. The surfaces are lightly marked for the grade. Housed in a green label holder. (#7220)

- 4372 1893 MS64+ PCGS. CAC.** A high-end Choice example of this low-mintage Philadelphia issue, with well-detailed design elements and satiny mint luster. The surfaces are enhanced by hints of pink and gold toning. (#7220)

**1893-CC Morgan Dollar, MS62
Popular Issue With Date and Type Collectors**

- 4373 1893-CC MS62 NGC.** The 1893-CC Morgan dollar is the final issue from the famous Carson City Mint, an important date for mintmark type collectors. The issue is also in demand from date collectors because of its low mintage. This pleasing MS62 specimen is sharply detailed and lustrous, with a scattering of minor contact marks on the obverse that explain the grade. (#7222)

**1893-CC Dollar, MS62
Final CC-Mint Issue**

- 4374 1893-CC MS62 PCGS.** The 1893-CC Morgan dollar is always in demand as the final issue from the famous Carson City Mint. This attractive MS62 example displays well-detailed design elements, with a touch of softness on the centers. The surfaces radiate intense satiny mint luster, with a scattering of minor contact marks on both sides. (#7222)

**1893-CC Morgan Dollar, MS62
Sharply Struck and Vibrantly Lustrous**

- 4375 1893-CC MS62 PCGS.** The Carson City Mint discontinued coining operations after 1893, and examples from the final year are always popular with both date and type collectors. This sharply detailed, lustrous specimen shows a few hints of pale gold toning, with excellent eye appeal for the grade. Housed in a green label holder. (#7222)

- 4376 1893-O AU58 NGC.** Lowest mintage of all New Orleans Morgan issues, the '93-O is a prize acquisition at the near-Mint level. The present lightly toned example has essentially full luster and only a whisper of wear on the eagle's breast. (#7224)

**1893-O Morgan Dollar, MS61
Lowest New Orleans Mintage**

- 4377 1893-O MS61 PCGS.** The 1893-O Morgan dollar boasts a mintage of 300,000 pieces, the lowest total of the New Orleans series. This pleasing Mint State example exhibits unusually well-detailed design elements and bright mint luster, with a few accents of pale gold toning. A cluster of minor contact marks on Liberty's cheek explains the grade. (#7224)

- 4378 1893-S Genuine PCGS.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of a VG specimen that has been cleaned. A well-worn example with cleaning and several pinscratches, this coin has begun to reclaim its eye appeal with border-toning in tan and violet-blue at left. (#7226)

- 4379 1893-S VG8 ANACS.** This San Francisco issue is among the most sought-after of all Morgan dollars in any grade. While this piece saw its share of honest circulation, the date and mintmark are both crisp and full. Wear is evenly distributed on either side, and abrasions are surprisingly few. This piece reminds today's collectors that the silver dollar was indeed a workhorse of circulating coinage in the far West of the late 19th century. (#7226)

- 4380 1893-S — Improperly Cleaned — NGC Details. Fine.** A touch more worn than the usual 1893-S dollar with gold-laced pearl-gray surfaces showing odd radiance after a cleaning. Just 100,000 1893-S dollars were struck, and the date is a well-recognized key. (#7226)

- 4381 1893-S — Improperly Cleaned — NGC Details. Fine.** A cream-gray example of the famous business strike series key. The borders display golden-brown and forest-green. Faintly hairlined with two small rim dings on the reverse at 6 and 9 o'clock. (#7226)

Evenly Worn 1893-S Dollar, VF20

- 4382 1893-S VF20 NGC.** The 1893-S is the undisputed key to the series and is always the center of attention to collectors of circulated Morgans. This piece offers deep gray patina with hints of various other subtle, underlying colors. Set against the basic gray in the fields are the brilliantish high points of the design, which display even wear. Minimal abrasions. (#7226)

Midgrade VF30 1893-S Dollar

- 4383 1893-S VF30 PCGS.** The diagnostic die line at the top of the T in LIBERTY is clear on this stone-gray key date San Francisco silver dollar. Lightly hairlined but devoid of obtrusive marks. Traces of luster emerge when the coin is rotated beneath a light. President Cleveland's opposition to the Sherman Act led to low mintages of 1893 to 1895 silver dollars. (#7226)

Unblemished XF 1893-S Dollar

- 4384 1893-S XF40 PCGS. CAC.** Silver-gray and tan-gold toning drape the lightly marked surfaces of this series key Morgan dollar. Luster illuminates the margins, and wear is confined to the high points of the design. Although the 1893-S and 1894 have similar mintages, the 1893-S is rarer due to the greater acceptance of silver dollars in Western commerce. (#7226)

**Choice XF 1893-S Morgan Dollar
Business-Strike Key to the Series**

- 4385 1893-S XF45 PCGS.** A lightly circulated example of the business-strike key to the Morgan dollar series, with only traces of wear on the design elements and slightly subdued mint luster. The pleasing surfaces show only minor contact marks, with some hints of pale gold toning. This coin would be a welcome addition to an otherwise high-grade collection of Morgan dollars. (#7226)

AU Sharpness 1893-S Dollar

4386 1893-S — Cleaning — Genuine PCGS. AU Details. Although this key date silver dollar has been dipped, it is much higher in grade than the typical '93-S. The central high points show slight wear, but bright luster illuminates the margins and devices. There are no obtrusive marks. An opportunity to obtain a minimally circulated example at an affordable price. (#7226)

4387 1894 VG10 NGC. CAC. Despite extensive wear, this is an attractive two-tone example of the Philadelphia key to business strike Morgan dollars. This dollar has light gray devices with medium gray fields showing only minor grade-consistent marks. (#7228)

4388 1894 XF40 NGC. This rare date Philadelphia Morgan is refreshingly void of abrasions despite the expected level of high point wear. Generally stone-gray although design recesses display charcoal patina. (#7228)

4389 1894 AU50 NGC. The margins teem with luster, as do the eagle's wings and Liberty's curls. This cream-gray key date representative displays occasional small marks but remains highly attractive for the grade. (#7228)

4390 1894 AU50 NGC. Peach-gold patina invigorates the margins of this partly lustrous and lightly abraded low mintage silver dollar. The eagle's breast and the hair above the ear display moderate wear. (#7228)

4391 1894 AU55 ANACS. Dashes of sun-gold toning are noticeable on the reverse, but most of this Choice AU example is pearl-gray. Luster dominates the margins and motifs, though the cheek and open fields are subdued. Small marks are distributed but inoffensive. (#7228)

Mint State 1894 Dollar

4392 1894 MS61 NGC. Delicate almond-gold toning encompasses this lustrous key date Philly dollar. The reverse is minimally abraded and on its own would grade higher, but slender marks on the left obverse correspond to the MS61 level. The hair above the ear displays softness, but the overall strike is good. (#7228)

Uncirculated Low-Mintage 1894 Dollar

4393 1894 MS61 NGC. This Philadelphia Mint key date silver dollar has the overall look of an even higher grade, but we note a rim irregularity at 4 o'clock on the reverse. Faint chestnut toning graces lustrous and smooth surfaces. Other than the '93-S, the lowest mintage regular issue of the type. (#7228)

Select 1894 Morgan Dollar Low-Mintage Philadelphia Key

4394 1894 MS63 PCGS. Bright surfaces are virtually untuned, save for a light toning spot on Liberty's neck, and reveal sharply impressed design features. Only the hair above Liberty's ear shows a touch of softness. A few small marks on Liberty's cheek limit the grade; the reverse is wonderfully preserved, with pleasing smooth fields. From a mintage of just 110,000 pieces. (#7228)

Near-Gem 1894-O Dollar

4395 1894-O MS64 PCGS. Light caramel-gold toning graces this highly lustrous and conditionally rare New Orleans silver dollar. One slender tick on the cheek, but the fields are virtually pristine. The hair above the ear and the eagle's breast are lightly brought up, though the remainder of the designs are bold. (#7230)

**Boldly Lustrous MS64+ 1894-O Dollar
Conditionally Rare Any Better**

4396 1894-O MS64+ PCGS. CAC. PCGS has graded a mere 10 examples of the 1894-O dollar in MS65 or better (4/12), making this MS64+ coin an excellent compromise between quality and price. While the strike through the centers is typically soft, this piece is remarkably smooth overall with more shallow luster grazes than marks of any depth. A long line to the left of the eagle's beak was perhaps the decider for a "mere" MS64+ grade. Bright and swirling luster is essentially silver with only the slightest suggestions of ivory and rose at certain angles to the light. The all-around eye appeal is excellent. (#7230)

4397 1894-S MS64+ PCGS. Silver mint frost highlights an exacting impression of the dies that is most apparent in the strands of hair over Liberty's ear and the crisply defined feathers on the eagle's breast. Visual appeal is boosted by the absence of troubling surface marks. (#7232)

4398 1894-S MS64+ PCGS. CAC. A fully brilliant Choice Mint State specimen, this 1894-S dollar has frosty silver luster with less than 1% toning, consisting of an iridescent sliver at the lower obverse border. (#7232)

**Gem 1894-S Morgan Dollar
Sharply Detailed and Lustrous**

4399 1894-S MS65 NGC. The 1894-S Morgan dollar was a well-produced issue, and collectors expect high quality and exquisite eye appeal from examples of this date. This delightful Gem displays sharply detailed design elements and vibrant mint luster, with creamy unmarked surfaces. The 1894-S is quite elusive in MS65 condition. Census: 43 in 65, 9 finer (4/12). (#7232)

**1894-S Morgan Dollar, MS65
Challenging Issue in Higher Grades**

4400 1894-S MS65 PCGS. Magenta, olive, and lavender shades enrich the appearance of this crisply struck, deeply toned Gem. The reverse is virtually devoid of any blemishes, while a small milling mark resides along Liberty's jaw line. The low mintage 1894-S is collectible in MS62 through MS64 grades, but becomes a significant challenge at the MS65 level. (#7232)

4401 1895-O AU53 NGC. The '95-O is the key to the New Orleans subset of the Morgan series, despite the lower mintage of the also scarce '93-O. The present representative has ample bright luster with faded marks near the chin and occasional charcoal-gray toning. (#7236)

4402 1895-O AU55 NGC. This low-mintage AU example shows only minor signs of circulation. While the coin has toned a soft gray much of the coin's original luster remains, with only a few minor nicks on Liberty. (#7236)

4403 1895-O AU55 PCGS. This New Orleans example exhibits a well-defined strike that is seldom encountered on this branch mint issue. Original mint luster remains on this bright-white piece, showing only the slightest signs of circulation. (#7236)

**1895-S Morgan Dollar, AU58
Lightly Marked Lustrous Example**

4404 1895-S AU58 PCGS. The 1895-S Morgan dollar is a low-mintage date that is seldom encountered without extensive bagmarks. Limited dappled olive toning visits each side of this attractive near-Mint example. The design elements are nicely impressed, with just a touch of softness on Liberty's hair and the eagle's breast. Only a few small marks are seen on Liberty's face. (#7238)

4405 1895-S Genuine PCGS. Surface Damage. This fully brilliant and lustrous Mint State example with prooflike surfaces and a few handling marks on each side, aside from the heavy damage on Liberty's cheek and neck.

1895-S Morgan Dollar, Unc Details

4406 1895-S — Obverse Scratched — NGC Details. Unc. An important opportunity for the advanced Morgan dollar collector to obtain an attractive example of the 1895-S rarity with excellent eye appeal, despite a few minor obverse scratches and hairlines. Graded separately, the reverse is at least MS63, possibly finer. (#7238)

4407 1896-O MS61 PCGS. A coin synonymous with rarity in high grades, this 1896-O is attractive for the assigned grade with minimal bagmarks. Brilliant mint luster exudes from the reverse and left obverse field, while the right obverse field exhibits more satiny luster. Housed in a green-label PCGS holder. (#7242)

**Select 1896-O Dollar
Elusive Issue in Higher Grades**

4408 1896-O MS63 PCGS. The 1896-O Morgan dollar is one of the most challenging dates of the series to locate in high grade. This impressive MS63 example offers well-detailed design elements, with the often-seen touch of softness above Liberty's ear. The surfaces are blanketed in shades of gray, gold, and lavender toning, with satiny mint luster underneath. (#7242)

**1896-S Morgan Dollar, MS64
Unusually Clean Surfaces**

4409 1896-S MS64 NGC. The 1896-S Morgan dollar is often seen with excessive bagmarks, making the issue scarce in high grade. This attractive Choice example displays unusually smooth surfaces, with vibrant satiny mint luster and well-detailed design elements. Just a hint of pale gold toning enhances the pleasing surfaces. (#7244)

4410 1897-O MS61 PCGS. Broad silver luster with occasional hints of green-gold. Though moderately abraded, this remains a well-defined and pleasing example of a challenging New Orleans issue. (#7248)

**Select 1897-O Dollar
Better-Than-Average Strike and Luster**

4411 1897-O MS63 NGC. Like many issues struck at the New Orleans Mint in the 1890s, the 1897-O Morgan dollar was not produced to a high standard of quality, making high-grade specimens difficult to locate. This attractive Choice example features a better-than-average strike, with vibrant mint luster and only minor contact marks. (#7248)

4412 1897-S MS66 PCGS. While the population of lower Mint State examples is quite robust, coins certified at this level are elusive. This majestic Morgan exhibits smooth, highly lustrous surfaces. Streaks of faint champagne, russet-orange and pink toning cover portions of the coin, primarily on the reverse, while bright-white prevails. (#7250)

4413 1898-O MS67 NGC. Considered a major rarity prior to the early 1960s, this issue now ranks among the common dates of the Morgan dollar series, the result of large quantities released from the U.S. Treasury circa 1962. This Superb Gem is brilliant and highly lustrous with frosty mint brilliance and no toning on either side. NGC has certified one finer specimen (5/12). (#7254)

4414 1898-O MS67 NGC. The usual weakness over Liberty's ear is evident, although the hair sharper than on many others.. This frosty Superb Gem has brilliant silver luster with no evidence of toning on either side. (#7254)

4415 1898-O MS67 NGC. A magnificent Superb Gem that boasts dynamic luster and exquisite preservation. A good strike contributes further to the exceptional eye appeal. NGC has certified just one example as MS68 or finer (4/12). (#7254)

- 4416 1898-O MS65 Deep Mirror Prooflike PCGS. CAC.** The deeply mirrored fields of this delightful Gem show stark cameo contrast with the sharply detailed frosty devices. Only minor contact marks are evident on the mostly brilliant surfaces, with a few hints of golden toning. (#97255)
- 4417 1898-S MS65 PCGS.** Broad silver luster overall with diagonal streaks of golden-tan adding color. Modestly abraded with the roller marks on Liberty's chin not affecting the grade. Housed in a green label holder. (#7256)
- 4418 1898-S MS65 NGC.** This minimally abraded specimen is sure to please with its highly lustrous surfaces. Under close inspection minute roller marks can be seen across the high point on Liberty's cheek. (#7256)
- 4419 1899 MS66 PCGS.** This delightful Premium Gem displays sharply detailed design elements and vibrant mint luster, with pristine brilliant surfaces. From a low mintage of 330,000 pieces. Housed in a green label holder. (#7258)
- 4420 1899-S MS65 NGC.** While softness is noted on the hair above Liberty's ear, the breast feathers on the eagle are extremely well defined. Soft gold can be seen on this otherwise bright-white specimen. (#7262)

**1899-S Morgan Dollar, MS66
Attractive Multicolor Toning**

- 4421 1899-S MS66 PCGS. CAC.** Attractive shades of green, blue, and lavender toning highlight the pristine surfaces of this delightful Premium Gem. The design elements are well-detailed and vibrant mint luster shines through the toning. The 1899-S is very scarce in MS66 condition, and PCGS has graded only eight coins in higher numeric grades (4/12). (#7262)
- 4422 1900-O MS66+ PCGS. CAC.** An amazing Premium Gem with brilliant silver luster, this specimen has no toning on either side. The bright white surfaces are pristine and unmarked, offering exceptional eye appeal. PCGS has only certified 33 finer (5/12). (#7266)
- 4423 1900-O/CC MS65 NGC. VAM-11.** A Top 100 Variety. VAMworld.com does not list a VAM-11A variety, but the present lot is a candidate since the N in IN is lightly clashed in front of Liberty's neck. Lustrous and nearly brilliant with a good strike and clean fields. (#7268)
- 4424 1900-O/CC MS65 NGC. CAC. VAM-8A.** A Top 100 Variety. Light honey-gold patina adorns lustrous and splendidly preserved fields and devices. The centers display minor inexactness of strike. Leftover reverse dies from Carson City, which ceased coin production in 1893, were finally overmintmarked and sent to New Orleans in 1900. (#7268)
- 4425 1900-S MS65 PCGS.** This pleasing coin exhibits the luster and eye appeal one would expect of a gem quality specimen. The 1900-S is quite scarce in high grades. (#7270)
- 4426 1901 MS60 NGC.** Noted for its scarcity in Uncirculated grades, the 1901 provides a stark contrast with the 1899, which is comparatively plentiful in Mint State despite a far lower mintage. This lustrous and nearly brilliant example has a good strike and a moderately abraded left obverse. (#7272)

**Mint State 1901 Morgan Dollar
Vibrant Mint Luster**

- 4427 1901 MS61 NGC.** An attractive Mint State example of this turn-of-the-century issue, with well-detailed design elements and vibrant mint luster. Only a few traces of pale gold toning enhance the mostly brilliant surfaces, while a scattering of minor contact marks on the obverse explain the grade. (#7272)

Conditionally Elusive MS62 1901 Dollar

- 4428 1901 MS62 PCGS.** One of the best-known cautionary tales in numismatics, the 1901 Morgan dollar is the cornerstone of many "don't judge a coin by its mintage" and "condition rarity matters" lessons. This MS62 example is pale silver-white and softly lustrous with golden-brown and claret elements at parts of the rims. Assorted light abrasions, including several on Liberty's cheek, preclude Select status. (#7272)

**1901 Morgan Dollar, MS63
Famous Late P-Mint Issue**

- 4429 1901 MS63 NGC.** Appealing deep silver luster is especially notable on both sides, though more intense on the reverse. Some trivial and widely scattered abrasions appear on the obverse. This is a thoroughly pleasing and conditionally elusive example of the 1901-P issue, sure to become a star attraction in some carefully constructed dollar collection. NGC has seen only 18 submissions finer (4/12). (#7272)
- 4430 1901-S MS64 PCGS.** The surfaces are accented by light gold toning on this turn-of-the-century dollar. The surface marks are scattered and the strike is soft, as one expects for the issue. (#7276)
- 4431 1901-S MS64 PCGS. CAC.** Medium intensity gray-gold toning appears on both sides of this delightful near-Gem Morgan dollar. Slight central weakness is evident over Liberty's ear, with faint roller lines on the cheek. (#7276)

Brilliant Prooflike MS66 1902-O Dollar

- 4432 1902-O MS66 Prooflike PCGS. CAC.** An untoned example with blatantly flashy fields and a good strike. No abrasions are readily evident. Only about 1% of all Uncirculated examples qualify as Prooflike, and among those pieces, only a tiny fraction have comparable preservation with the current lot. Population: 10 in 66 Prooflike, 0 finer (5/12). (#7281)

1902-O Dollar, MS64 Deep Mirror Prooflike Infrequently Seen With Mirrored Finish

- 4433 1902-O MS64 Deep Mirror Prooflike PCGS.** This is a Choice Mint State example with brightly reflective, mirrored fields. A lovely example with exceptional aesthetic appeal for the grade. Only about 2% of all certified examples of this date have received the PL or DMPL designation. Population: 25 in 64 Deep Mirror Prooflike, 4 finer (4/12).
Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 10011. (#97281)

- 4434 1903 MS66+ PCGS. CAC.** Light chestnut-gold toning enriches this lustrous and virtually pristine silver dollar. A boldly struck piece that will upgrade even the advanced holding of the series. (#7284)
- 4435 1903 MS67 PCGS.** Broadly silver with strong cartwheel luster that flashes at the proper angle. Light green-gold obverse border-toning takes on a richer orange aspect at the upper right reverse. Population: 67 in 67, 0 finer (4/12). (#7284)
- 4436 1903 MS67 NGC.** This well-struck example shows only the slightest sign of reverse softness on the eagle's breast. This high grade example shows a nearly immaculate cheek with only the slightest signs of contact elsewhere on the coin. Creamy mint luster envelops the surfaces. Census: 91 in 67, 2 finer (4/12). (#7284)
- 4437 1904 MS65 PCGS.** Varying intensities of russet-gold and diffuse blue toning highlight a forceful strike and impart variegated beauty to this colorful example of the last prewar date in the Morgan series. PCGS has graded only 15 finer coins (4/12). (#7290)

Superb Gem 1904-O Morgan

- 4438 1904-O MS67 NGC.** The pristine surfaces of this Superb Gem are mark-free with satiny silver luster, reflective fields, and sharp design elements. The faintest hint of green-gold patina visits the rims. Census: 86 in 67 (1 in 67+), 0 finer (4/12).
Ex: *Dallas Signature* (Heritage, 11/2007), lot 1384. (#7292)

1904-O Dollar, Satiny MS67

- 4439 1904-O MS67 NGC.** The 1904-O has an enduring popularity because of the presence of relatively large numbers of near-Gem and finer coins. It is also the final year of issue for the regular Morgan dollar design and always a good pick for type purposes. This is an exceptionally well-preserved example that displays bright, shimmering satiny luster that is virtually unfazed by abrasions. (#7292)

Bright Superb Gem 1904-O Dollar

- 4440 1904-O MS67 NGC.** Each side of this Superb Gem has gleaming white mint luster. The fields are even brighter still, most likely the result of die polishing. The strike details are almost complete in the center of each side, quite remarkable actually for a coin that was struck from C4 reverse dies. Census: 86 in 67 (1 in 67+), 0 finer (4/12). (#7292)

**Exceptional 1904-O Dollar, MS67
Among the Finest Known**

- 4441 1904-O MS67 NGC.** The story of the availability of the 1904-O is the stuff of numismatic lore with the availability of many bags from the Treasury at face value in 1962. With so many coins released after storage of almost 60 years, there had to be numerous high-grade pieces in the multi-bag release. This is one of them. In fact, nothing has been certified finer. Each side is completely brilliant and the coin displays the bright, satiny mint luster the 1904-O is so well known for. The strike is strong, abrasions require a magnifier to discern, and the fields are borderline semireflective. (#7292)

Multicolor MS67 ★ 1904-O Dollar

- 4442 1904-O MS67 ★ NGC.** Dramatic ruby-red, apple-green, and pumpkin-gold toning competes for territory across the reverse of this lustrous and crisply struck Superb Gem. The obverse is fully brilliant. Although NGC has certified 94 '04-O dollars at the MS67 level (as of 4/12), only five such pieces have received a Star designation, and none have been certified as MS68 or higher, with or without a Star. (#7292)

**1904-S Morgan Dollar, MS64
Attractive Peripheral Toning**

- 4443 1904-S MS64 PCGS.** Vibrant cartwheel mint luster shines beneath shades of champagne-gold peripheral toning on this attractive Choice Morgan dollar. The design elements are well-detailed and only a few minor contact marks are evident. The 1904-S is a better date in the series, and examples are seldom encountered with this much eye appeal. (#7294)

**1904-S Morgan Dollar, MS65
Exceptional Strike and Luster**

- 4444 1904-S MS65 PCGS.** Although some Morgan dollar specialists dismiss this San Francisco date as often "weak or heavily bagmarked," the present Gem is remarkably free of distracting marks and possesses pervasive overall luster with harmonious dashes of russet-gold on both sides. The eagle's highest breast feathers are indistinct, but the balance of the devices are satisfyingly full. PCGS has seen only 11 submissions finer (4/12). (#7294)

- 4445 1921 MS66 PCGS. CAC.** Rich orange-red, jade-green, and mauve toning consumes this lustrous high grade Morgan type coin. A good strike for the issue although the lower portions of the wreath are incomplete. (#7296)

- 4446 1921-S MS65 PCGS.** The green-gold tints that are subtle on the obverse are a trifle more overt on the reverse. Well-defined for the last year of Morgan dollar strikings with a single small mark on the bridge of the nose. (#7300)

PROOF MORGAN DOLLARS

**Patinated Gem Proof 1878 Morgan Dollar
Eight Tailfeathers, VAM-14.3**

- 4447 1878 8TF PR65 PCGS. CAC. VAM-14.3.** Dramatic forest-green, cherry-red, and dove-gray toning encompass this fully struck and undisturbed Gem. An outstanding and original specimen. Die doubling is evident on the lower leaves of the wreath. Only 500 proofs were struck for this briefly coined design subtype. Population: 11 in 65, 11 finer (4/12). (#7311)

- 4448 1882 PR61 Cameo NGC.** The reflective surfaces of this pleasing proof example show a modest degree of contrast with the sharply detailed design elements. Hints of gold and lavender toning enliven the surfaces, while a scattering of minor contact marks and hairlines explains the grade. (#87317)

Lightly Toned PR65 Cameo 1882 Morgan Dollar

- 4449 1882 PR65 Cameo PCGS.** Light green-to-gold overtones grace the fields of this gleaming Gem Cameo proof. The detail on the central devices is excellent, the frost rich, and the overall eye appeal incredible. Few examples from this earlier Morgan dollar proof issue have survived so well-preserved and strongly contrasted. Population: 10 in 65 (1 in 65+) Cameo, 7 finer (4/12). (#87317)

1882 Morgan Dollar, PR67 Ultra Cameo
Only One NGC Example in Higher Grade

- 4450 1882 PR67 Ultra Cameo NGC.** A generous proof mintage of 1,100 Morgan dollars was achieved in 1882, using two obverse and two reverse dies. This delightful specimen shows the slight doubling on the numerals 82 in the date that indicates the VAM-10 variety. The richly frosted design elements are sharply detailed throughout, and seem to float on the deeply mirrored fields. The resulting Cameo contrast is intense. The incredibly well-preserved surfaces are mostly brilliant, with just a hint of pale gold toning. Eye appeal is tremendous. Census: 2 in 67 (1 in 67+) Ultra Cameo, 1 finer (4/12). (#97317)

1884 Morgan Dollar, PR62
Bold Cameo Specimen

- 4451 1884 PR62 Cameo PCGS.** A nominal proof mintage of 875 pieces was achieved in 1884, using only a single pair of dies. This sharply detailed specimen displays bold cameo contrast between the frosty devices and the mirrored fields, with only minor signs of contact. Eye appeal is outstanding. Population: 7 in 62 Cameo, 42 finer (4/12). (#87319)

- 4452 1886 — Obverse Counterstamp — NGC Details. Proof.** A richly toned blue-green proof 1886 Morgan dollar, seemingly normal save for a tiny and mysterious letter H punched under the tip of the bust. Aside from this idiosyncrasy, the coin displays well, particularly the untouched reverse. (#7321)

1886 Morgan Dollar, PR64
Multicolored Toning

- 4453 1886 PR64 PCGS.** An impressive Choice proof with deep obverse patina and lighter reverse toning. The obverse has a blend of blue, brown, and iridescent hues, while the reverse is lighter gold with the iridescence as a substantial overtone. One of 886 proofs coined for this issue, and clearly among the most beautiful. Population: 41 in 64, 35 finer (4/12). (#7321)

Patinated PR66 1887 Silver Dollar

- 4454 1887 PR66 PCGS.** The business strike 1887 is among the most common Morgan issues, but proofs of the same date are rare, since only 710 such pieces were struck. The present immaculate specimen has a needle-sharp strike and comprehensive deep rose-red, navy-blue, and honey-gold toning. (#7322)

Proof Near-Gem 1888 Silver Dollar
Repunched Date, VAM-25

- 4455 1888 PR64 PCGS. CAC. VAM-25. The 18 is nicely repunched. Dusky apricot-gold fields are accompanied by dove-gray motifs and cobalt-blue and lilac-red margins. A good strike with only minor incompleteness at the centers. Unabraded save for a small mark near the base of the cap. A scant 832 proofs were coined. (#7323)

Choice Proof 1890 Morgan Dollar
Dark Multicolor Toning

- 4456 1890 PR64 NGC. From a meager mintage of 590 pieces, the 1890 proof Morgan dollar is a very scarce issue in Choice condition. The reflective fields of this attractive example are blanketed in shades of gold, violet and gray patina, and the design elements are sharply detailed. Census: 37 in 64, 61 finer (4/12). (#7325)

1893 Morgan Dollar, PR68 ★ Cameo
Rarely Seen With Sharp Details
Finest Certified at NGC

4457 1893 PR68 ★ Cameo NGC. CAC. Only 792 proof Morgan dollars were struck in 1893, and the issue was not one of the best-produced dates of the era. The dies were spaced too far apart in the press and many examples show flat and incomplete details on the centers of both sides. The VAM reference calls the 1893 issue “the most poorly struck Morgan proofs.” The coin offered here is an emphatic exception to this rule, with intricate detail evident on the hair strands above Liberty’s ear, and sharp definition on the feathers on the eagle’s breast. It would be difficult to find a coin with a better strike, even among the proofs of 1898, which were noted for their high quality. The small business-strike mintage of only 378,000 pieces has always put added pressure on the tiny supply of proofs to satisfy demand from quality-conscious collectors.

The present coin is a spectacular piece which boasts extraordinarily colorful toning on both the obverse and reverse. The colors undoubtedly resulted in the Star designation for eye appeal from NGC. The strong russet hues near Liberty’s ear fade into a ring of blue and lighter yellow on her head, then fade to darker russet, sea-green and rose closer to the rim. The reverse is perfectly matched and equally colorful. As if this artist’s palette wasn’t enough, the surfaces of this coin are stunning and superbly preserved as well, with no trace of handling. If you demand vibrantly toned coins, then here is one to examine and add to an advanced collection. The combined NGC and PCGS Population reports show a total of five coins graded this high with Cameo or Ultra/Deep Cameo contrast, and only one has been graded higher in these two designations (4/12).

Ex: San Francisco ANA Signature (Heritage, 7/2005), lot 10299, realized \$32,200. (#87328)

**1894 Gem Proof Morgan Dollar
Ever-So-Slight Cameo Effect**

4458 1894 PR65 NGC. After several years of substandard striking definition, the strike and overall quality of proof Morgans improved in 1894. This is a sharply detailed example that is untoned. The fields are deeply mirrored and each side shows a moderate amount mint frost over the devices, giving the coin a slightly cameoed appearance. Census: 48 in 65, 75 finer (4/12). (#7329)

Pristine PR66 Cameo 1894 Dollar

4459 1894 PR66 Cameo NGC. Light apple-green and golden-brown freckles enrich the borders of this undisturbed and exemplary high grade proof Morgan. The fully struck motifs are frosty and compare favorably to the reflective fields. The proof 1894 trades for a premium over preceding dates due to the rarity of its corresponding business strike. Census: 14 in 66 Cameo, 29 finer (5/12). (#87329)

**Circulated Proof 1895 Morgan Dollar
Proof-Only Issue of 880 Pieces**

4460 1895 — Surfaces Tooled — Genuine PCGS. Proof. In our opinion, the piece has the details of a Fine specimen. This 1895 Morgan dollar — a proof, like all of its kind — has seen hard use. Glossy gold-to-gray surfaces show significant wear as well as two sets of reed marks on the portrait; contact marks elsewhere have been smoothed out, evidence of tooling. Despite these faults, the authenticity of this 1895 dollar is beyond reproach. As such, it has great appeal for the collector seeking a worn certified example as a capstone for a Morgan dollar set, who will appreciate the coin in all its flawed yet important glory.

Proof-Only 1895 Dollar
Sharply Contrasted PR63 Cameo

4461 1895 PR63 Cameo NGC. The 1895 Morgan silver dollar became known as a proof-only rarity within a few years after its production, leading many generations of collectors to avidly pursue the few examples available. Even neophyte collectors of this popular series know that a nominal sum of 880 examples were produced in proof format, along with a reported 12,000 business strikes — not one of which has ever been conclusively authenticated (or much more than rumored, in fact, despite a couple of “tall tales”). The popular and plausible explanation is that: either the phantom business strikes were produced using 1894-dated dies; that they were some kind of accounting mixup; or that, if indeed 1895-dated business strikes were made, the 12 bags lay dormant in some long-forgotten Treasury vault until they were melted under the terms of the Pittman Act, sometime shortly after 1918.

The number of proofs produced for the 1895 makes it neither more nor less rare than other proof Morgan dollars in terms of supply, although the lack of any business strikes makes an *enormous* difference in terms of *demand*.

How many of those proofs exist today? Writing in the silver dollar *Encyclopedia* published in 1993, Q. David Bowers estimated a surviving population of unimpaired proofs of about 667 pieces (PR60 and up) and offered these thoughts:

“The preceding fits in neatly with my belief—stated in print long before these calculations were done—that perhaps 500 to 600 or so Proofs still survive. This date has a high conservation ratio as it was recognized as a rare date soon after issue, and fewer were spent [than of other proof Morgan dollars].”

The present specimen is an exceptionally well-produced example with strong field-device contrast on each side, made even more apparent by the lack of toning. There are virtually no contact marks; just a few obverse hairlines explain the PR63 grade. (#87330)

1895 PR66 Cameo Morgan Dollar

One of the Finest From the Mintage of 880 Proofs

4462 1895 PR66 Cameo NGC. The proof-only 1895 Morgan dollar and its business strike counterpart, the 1893-S, are the undisputed keys to the series, rare in all grades, conditionally very rare in high grades, and in demand from collectors and dealers at any grade and reasonable price point.

It is the absence of business strike Morgan dollars dated 1895 that makes the 1895 proofs so valuable; in and of themselves, they are neither more nor less rare than other proofs in the series: The proof production of 880 pieces was unremarkable. However, when one considers that there are likely 10,000 or more Morgan dollar specialists in the United States, the issue becomes one of the utmost importance.

Q. David Bowers, writing in the *Buyer's Guide to Silver Dollars and Trade Dollars of the United States*, notes that the 1858 Liberty Seated dollar is the sole proof-only issue within that series: "As such, it has acquired a special cachet over the years. Together with the 1851 and 1852, the 1858 is one of the 'big three' in the series."

Bowers notes another important similarity to the 1895 proof Morgans, one highly relevant to collectors today:

"While only about 300 were made, these were sold especially to numismatists, who preserved them. Accordingly, many survive today. As a date, the 1858 is two or three orders rarer than the Proof-only 1895 Morgan dollar (the only Proof-only date in the Morgan series). However, the 1858 sells for less money, as there are fewer specialists in the Liberty Seated field."

The 1895 Morgan dollar was well-known as a rarity within a few years of its manufacture, and accordingly, collectors have preserved a good percentage of the original production. But as with other Morgan dollar proof issues, any example at the Gem or finer grade level is elusive, as the average certified survivor is about PR64 or so. This is an especially attractive and well-preserved piece. The fields are glassy-smooth and exhibit unfathomable depth of reflectivity. The frosted devices are notably contrasted. While the piece is mostly brilliant, there is a hint of golden patina on each side. One of the best-preserved 1895 dollars. Census: 16 in 66 Cameo, 18 finer (4/12). (#87330)

**Premium Gem Proof 1897 Dollar
Brilliant Cameo Surfaces**

4463 1897 PR66 Cameo NGC. Essentially fully struck, save for a trace of weakness above Liberty's ear, this gorgeous Premium Gem also exhibits sharply frosted devices and deeply mirrored fields. Both sides are free of hairlines and contact marks. Of this issue, David Bowers once commented: "Proofs are usually well struck with deep cameo contrast and are a joy to behold. In higher grades, such coins are among the finest in the Morgan series." Census: 7 in 66 Cameo, 19 finer (4/12). (#87332)

4464 1900 PR55 NGC. One of just 912 proofs issued, this silver dollar was likely spent by an heir, perhaps during the Great Depression. Faint gold toning visits still-flashy surfaces. Minor marks include small obverse rim dings at 1, 3, and 5 o'clock. (#7335)

PR66 Cameo 1901 Silver Dollar

4465 1901 PR66 Cameo NGC. The brilliant obverse on its own likely merits an Ultra Cameo designation, since the portrait is deeply and fully frosted. The reverse also shows obvious cameo contrast in addition to faint tan patina. DOLLAR is nicely die doubled, although this variety should not be confused with the dramatic *Guide Book* doubled die reverse. Close examination reveals pinpoint carbon flecks on the reverse. Census: 5 in 66 Cameo, 4 finer, none certified as Ultra Cameo (4/12). (#87336)

4466 1902 — Altered Surfaces — NCS. Proof. Enough mirrored proof surface remains visible for attribution on this polished Morgan dollar. Obvious hairlines and minor contact marks are evident, especially on the reverse. No evidence of toning appears on either side. (#7337)

4467 1902 — Reverse Improperly Cleaned — NGC Details. Proof. From a proof mintage of just 777 pieces, this well-detailed Morgan dollar shows brightly mirrored fields on the obverse, but the reverse displays an unnatural hazy quality. A few hints of gold and violet toning enhance the mostly brilliant surfaces.

**1902 Silver Dollar, PR65 Cameo
Extremely Rare Contrasted Proof**

4468 1902 PR65 Cameo NGC. The immensely deep reflectivity in the inky-black fields is among the most profound that we have ever seen on a 20th century proof Morgan dollar. Razor-sharp details and pristine surfaces make the assigned grade level seem conservative. This piece is an obvious exception to the usual rule of low- or no-contrast proofs. NGC and PCGS combined have certified 472 1902 proof dollars, but they have only certified eight Cameo proof examples, and neither service has certified a Deep Cameo specimen. Census: 2 in 65 Cameo, 3 finer (4/12). (#87337)

**Near-Gem Proof 1903 Morgan Dollar
Penultimate Official Issue**

4469 1903 PR64 PCGS. CAC. A stunningly mirrored example of the penultimate official proof Morgan dollar issue. The interiors retain their original pale silver luster, while the fields have a pale champagne cast that turns toward blue-green close to the rims. A hairline that starts below Liberty's eye and trails to the right defines the grade. (#7338)

**Premium Gem Proof 1903 Morgan Dollar
Spectacular Multicolor Toning**

4470 1903 PR66 NGC. Proof Morgan dollars from 1903 were struck in the no-contrast method of proofing that began in earnest at the Mint in 1902. This uncommonly high grade representative is deeply toned in cobalt-blue and sunset-orange shades that have left a touch of near-brilliance at the center of the reverse. Census: 31 in 66, 29 finer (4/12). (#7338)

PEACE DOLLARS

- 4471 1921 MS65 PCGS.** A frosty first-year Peace dollar with typically soft detail on the portrait but strong preservation. Near-brilliant with just a few small patches of milky toning near the rims. (#7356)
- 4472 1921 MS65 NGC.** The usual softness found on the central devices of most High Relief Peace dollars is noted on this example, while other areas show very strong details. Signs of die polish can be seen in the obverse fields, while light-gold patina is seen on the lustrous creamy surfaces of this coin. (#7356)
- 4473 1921 MS65 PCGS. CAC.** A thoroughly satisfying High Relief Gem that demands the closest examination, this coin displays understated gold toning that deepens almost imperceptibly at the rims. Finding a finer first-date example would require effort. (#7356)
- 4474 1922 Scar Cheek Early Die State MS64 NGC. VAM-5A.** A Top 50 Variety. The "Scar Cheek" or "Scarface" VAM combines a die break on Liberty's cheek with the "Tripled Leaves" reverse. The Early Die State with a less-developed but nonetheless lengthy and prominent "scar." Glimpses of straw-gold overlies bright, lustrous surfaces. (#133743)
- 4475 1922 Moustache MS64 PCGS. CAC. VAM-12A.** A Top 50 Variety. A prominent die break slants down from Liberty's upper lip onto the cheek on this popular variety. Both sides of this Choice Mint State piece have splashes of dusky gold toning over frosty silver luster. VAM-12A Population: 11 in 64, 1 finer (5/12). (#133747)
- 4476 1922-S MS65 PCGS. CAC.** Frosty luster with patina that is either silver with a hint of blue or stark yellow-to-orange. Decidedly above-average detail with just a few light ticks on the feathers. (#7359)
- 4477 1922-S MS65 PCGS. CAC.** The 1922-S Peace dollar was produced in large numbers, but few examples were saved and the issue is known for weak strikes and excessive bagmarks. As a result, the 1922-S is rare in grades above MS65. This pleasing Gem is well-detailed and brightly lustrous, with highlights of pale gold toning. Housed in a green label holder. (#7359)
- 4478 1923 MS66+ PCGS. CAC.** Despite the plentiful nature of the issue, the most common Peace dollar, both sides of this Premium Gem exhibit frosty silver luster with no evidence of toning. An exceptional example, with only 46 finer PCGS submissions (5/12). (#7360)

1923-S Peace Dollar, MS65 Frosted Mint Luster

- 4479 1923-S MS65 PCGS.** The surfaces exude bright, coruscating mint frost, a trait common to this issue. Additionally, each side is notably free from abrasions. The strike is a bit soft in the centers, another trait common to this well-known strike rarity in the Peace dollar series. Light golden-russet peripheral toning is seen on each side of this otherwise brilliant example. (#7362)

Coruscating MS65 1923-S Dollar

- 4480 1923-S MS65 NGC.** Autumn-gold and forest-green shades are confined to the borders. The devices are stone-gray. Lustrous and splendidly preserved with an above average strike. The obverse field displays myriad die polish lines, as made. The '23-S is common in MS62 but Gems are highly elusive. Census: 78 in 65, 1 finer (5/12). (#7362)
- 4481 1924-S MS64 NGC.** Frosty luster is pale silver. Solid all-around eye appeal, though scattered obverse marks and a cut at the eagle's head preclude a finer designation. (#7364)
- 4482 1924-S MS64 PCGS. CAC.** An uncommonly bold strike and wealth of silver-white mint frost distinguishes this example of a date often described as difficult to find with these qualities. This is just the coin for those actively pursuing exceptional appeal. (#7364)

1924-S Peace Dollar, Gem Uncirculated Sharply Struck and Brightly Lustrous

- 4483 1924-S MS65 PCGS.** The 1924-S is one of several S-mint Peace dollars that are strike rarities. One would not know it from viewing this piece, though. The strike is strong in the center of each side with almost complete definition on the right side of the eagle's wing. Mint luster is bright and frosted, as expected, and the surfaces are generally brilliant with just a hint of peripheral golden. Population: 72 in 65 (1 in 65+), 5 finer (4/12). (#7364)

Superb Gem 1925 Peace Dollar Only One Finer NGC Coin

- 4484 1925 MS67 NGC.** The 1925 Peace dollar was a well-produced issue, with a large mintage of more than 10 million pieces. As a result, a number of high-quality examples are available today, and the issue is quite popular with type collectors. This spectacular Superb Gem offers sharply detailed design elements, vibrant mint luster, and a few hints of pale gold toning. Census: 63 in 67, 1 finer (4/12). (#7365)

4485 1925-S MS64 NGC. CAC. This faintly toned Choice Peace dollar has booming luster and only moderate incompleteness of strike at the centers. The obverse is well-preserved, though the reverse displays wispy marks. The 1925-S is a better date seldom offered in finer grades. (#7366)

4486 1925-S MS64+ PCGS. CAC. A strike and conditional rarity, the 1925-S Peace dollar seldom appears at the Gem or higher level. This near-Gem shows perhaps a few too many tiny hits scattered about, but the strike is above-average and the gray-gold surfaces host much eye appeal. PCGS shows 36 finer (5/12). (#7366)

4487 1926 MS66+ PCGS. CAC. A frosty silver example that appears to be a Superb Gem by the obverse alone. Only a stuttering line of a few reed marks above the word ONE on the reverse can preclude an even finer grade. (#7367)

**Superb Gem 1926-D Peace Dollar
None Certified Finer**

4488 1926-D MS67 PCGS. From a mintage of 2.3 million pieces, the 1926-D Peace dollar was produced to a high standard of quality, and high-grade specimens of this date are among the finest in the series. The stunning Superb Gem offered here is sharply detailed throughout, with intricate detail on Liberty's hair strands and excellent definition on the eagle's feathers. The pleasing surfaces emit vibrant mint luster, with a few accents of champagne-gold toning on both sides. There are no mentionable distractions and visual appeal is terrific. Population: 8 in 67, 0 finer (4/12). (#7368)

4489 1926-S MS65 PCGS. CAC. Finer examples of the 1926-S Peace dollar are infrequently seen. This Gem has frosty luster beneath teal toning with mottled iridescence. Trivial grade-consistent marks are evident on each side. (#7369)

4490 1927-D MS64 PCGS. CAC. This satiny near-Gem has mostly brilliant silver luster with splashes of dusky toning on each side. Sharply struck for the issue, with excellent eye appeal. (#7371)

**1927-D Peace Dollar, MS65
Smooth Light Gold Toning**

4491 1927-D MS65 PCGS. This Denver date cannot be dismissed as common, especially in Gem or finer. Pervasive frosty luster covers both sides, highlighting a highly precise strike. This coin is marvelously free of intrusive bag marks often seen on 1920s strikes, and its visual appeal blunts many of the criticisms widely broadcast when the de Francisci design first entered circulation. Though 1.28 million were struck, PCGS has graded only 10 finer (4/12). (#7371)

4492 1928 MS64 PCGS. This date has the lowest mintage in the Peace series, and has long been sought by silver dollar specialists and general collectors. This appealing specimen boasts broad semi-circular swathes of rich old-gold on both sides that contrast pleasantly with the overall silver-white mint frost. (#7373)

4493 1928 MS64 PCGS. CAC. An amply lustrous near-Gem with largely silver color on Liberty's face and neck but a dazzling mix of gold, orange, and burgundy hues elsewhere. Great charm for this famously low-mintage issue. (#7373)

Colorful Gem 1928 Peace Dollar

4494 1928 MS65 PCGS. Wafts of lavender, russet, and gold accent the mostly silver-gray surfaces of this carefully preserved Gem. The strike is sharp, and there are no mentionable marks. Pleasing cartwheel luster gives this piece excellent eye appeal. With the lowest mintage in the series (just 360,649 pieces), the 1928 is easily one of the key dates. PCGS reports only 11 pieces in MS66 or better (4/12). (#7373)

**Gem 1928 Peace Dollar
Untoned and Remarkably Clean**

- 4495 1928 MS65 PCGS.** It seems there are never enough 1928 Peace dollars to satisfy collector demand. Anyone contemplating assembling a set immediately notices the low mintage but relative affordability of Gem examples. This is a satiny example that is untuned and free from any noticeable abrasions. Sharply struck. (#7373)

**1928 Peace Dollar, MS65
Lowest Series Mintage**

- 4496 1928 MS65 PCGS. CAC.** The 1928 Peace dollar boasts the lowest mintage of the series, at 360,649 pieces. Gem examples are scarce, and PCGS has certified only 11 coins in higher numeric grades (4/12). The present coin is a well detailed Gem, with above-average mint luster, and a blanket of greenish-gold toning on both sides. (#7373)
- 4497 1928-S MS64 PCGS. CAC.** Ice-white surfaces offer blinding luster and an adequate strike on this coin. Much eye appeal is present along with a few too many contact marks for the Gem grade, and bit of central strike softness is present. PCGS shows 48 submissions in Gem or finer grades (5/12). (#7374)

**Gem 1928-S Peace Dollar
High-Grade Key, VAM-3**

- 4498 1928-S DDO MS65 ANACS. VAM-3.** A Top 50 Variety. In high grade, the 1928-S is a key issue in the Peace dollar series. This delightful Gem features well-detailed design elements, with satiny mint luster and attractive shades of champagne-gold toning. The obverse doubling characteristic of the popular VAM-3 variety is most easily seen on the letters D and W in the motto. (#7374)

Lightly Toned MS65+ 1934-S Dollar

- 4499 1934-S MS65+ PCGS Secure. CAC.** A wisp of golden toning adorns this thoroughly lustrous Gem. Fully struck at the borders with only unimportant incompleteness at the centers. Infrequent minor grazes are all that preclude an even finer grade. Most of the '34-S production went into West Coast circulation, which makes the issue the series key in Mint State. (#7377)

PROOF SUSAN B. ANTHONY DOLLARS

- 4500 1981-S Type Two PR70 Deep Cameo PCGS.** A perfect proof with extraordinary contrast, this light gray specimen features deeply mirrored fields of limitless depth, surrounding frosty devices. Population: 92 in 70 Deep Cameo (5/12). (#99595)
- 4501 1981-S Type Two PR70 Deep Cameo PCGS.** An amazing, perfect proof example with extraordinary contrast, this piece exhibits fully and deeply mirrored fields around lustrous light gray devices. Population: 92 in 70 Deep Cameo (5/12). (#99595)
- 4502 1981-S Type Two PR70 Deep Cameo PCGS.** The popular Type Two version of what was thought to be the last proof Susan B. Anthony dollar issue for well over a decade. This technically perfect specimen offers absolute contrast. Population: 92 in 70 Deep Cameo (4/12). (#99595)

PRESIDENTIAL DOLLAR

- 4503 (2008) James Monroe, Satin Finish — Missing Edge Lettering — SP68 PCGS.** A William Henry Harrison dollar without edge lettering, which can be traced to 2009 (by the design) and a mint set (by the satin finish) but cannot be definitively assigned to the Philadelphia or Denver facilities. Crisply struck with essentially flawless butter-gold surfaces.

COMMEMORATIVE SILVER

- 4504 1893 Isabella Quarter MS65 PCGS.** Strong luster under rich patina that shifts through blues and greens on its way to small windows of gold-orange. This Gem is well-defined for the design with great eye appeal. (#9220)

Premium Gem 1893 Isabella Quarter Superior Toning and Luster

- 4505 1893 Isabella Quarter MS66 PCGS.** It is difficult to decide which is superior, the toning or the luster, on this marvelous Isabella quarter. The luster is of the cartwheel kind, blatant on each side, while the obverse patina shows jade prevailing against ice-blue. The reverse displays more jade against pinkish tinges. Abrasions are simply a nonissue on this sharply struck piece. PCGS has seen 36 submissions finer (4/12). (#9220)

1893 Isabella Quarter, MS67 Impeccable Preservation

- 4506 1893 Isabella Quarter MS67 NGC.** Vibrant luster adorns both sides of this Superb Gem Isabella quarter. The obverse toning is mostly purple-gray with whispers of sky-blue, while the reverse displays yellow-gold and cobalt-blue centers yielding to more purple at the borders. Sharply struck and impeccably preserved. Census: 43 in 67, 8 finer (4/12). (#9220)

- 4507 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C.** Lavender and golden-gray colors embrace this lustrous and crisply struck near-Gem. Thorough study locates a couple of unimportant marks near Washington's jaw, but overall, unusually clean for this conditionally scarce early commemorative type. (#9222)

- 4508 1921 Alabama MS65 PCGS.** Better struck than usual for the issue, the lustrous and lightly toned surfaces are pristine save for moderate contact on the two governors. The Alabama is among the semikeys to the commemorative series and has been highly prized by collectors for decades. Housed in a green label holder. Ex: *New York Signature (Heritage, 7/2002), lot 5148, which realized \$1,667.50.* (#9224)

- 4509 1921 Alabama 2x2 MS65 NGC.** The surfaces are bright-white with dazzling mint luster. Each side has just a hint of golden-brown patina around the margin. The clean surfaces and overall appeal of this coin make it an exceptionally attractive value. (#9225)

- 4510 1921 Alabama 2x2 MS65 PCGS.** The 2x2 variant of the Alabama Centennial half dollar created additional collector interest at the time they were issued in 1921. This piece is fully brilliant with silver-white surfaces and no evidence of toning. (#9225)

- 4511 1936 Albany MS67 PCGS. CAC.** Concentric rings of russet and sky-blue near the rims complement softly glowing silver centers on this Superb Gem Albany half dollar. The 1936 Albany commemorates the 250th anniversary of the granting of the city charter, an event of strictly local import — one of many such in the commemorative series — and one that even the residents of Albany had minimal interest in. Population: 90 in 67 (1 in 67+), 1 finer (5/12). (#9227)

- 4512 1937 Antietam MS67 NGC.** Ex: J & L Collection. Spectacular, deep iridescent patina on both sides of this Superb Gem includes sunset-orange, violet, aqua, and cherry in incredible array. Full luster resides underneath. A prize for toning enthusiasts, and seldom seen in higher grades, where NGC has certified only 15 submissions (5/12). (#9229)

- 4513 1935/34-S Boone MS66 PCGS.** An important variant in the extensive Boone commemorative half dollar series with a small 1934 included as part of the reverse design. This satiny Premium Gem is brilliant and essentially untuned with wispy iridescence. (#9264)

- 4514 1936 Boone MS67 PCGS. CAC.** Splashes of golden-brown and iridescent toning are evident over portions of each side on this highly lustrous Superb Gem. Population: 65 in 67, 1 finer (5/12). (#9266)

- 4515 1937-D Boone MS67 PCGS.** This well-preserved Superb Gem exhibits extraordinary eye appeal. Satin luster is seen on this coin through light-Champagne toning while glimpses of bright orange and sea-green gleam from the borders. Population: 44 in 67, 2 finer (4/12). (#9271)

- 4516 1938-D Boone MS67+ PCGS.** Essentially one of the finest 1938-D Boones obtainable, this piece displays pinkish-gold, highly lustrous surfaces with pastel jade accents close to the rim. Even under a loupe, the surfaces appear unmarked. Population: 53 in 67 (3 in 67+), 3 finer (5/12). (#9275)

- 4517 1936 Bridgeport MS67 PCGS.** A lovely Superb Gem example that exhibits light gold patina with touches of ice-blue. This piece shows smooth, satin luster and a well-defined strike. Housed in a green-label PCGS holder. Population: 57 in 67 (1 in 67+), 0 finer (4/12). (#9279)

- 4518 1925-S California MS66 NGC.** The gold-panner design on the California commemorative half dollar is one that continues to have relevance today. This lustrous Premium Gem offers powder-gray and pinkish patina on both sides over lovely luster. (#9281)

- 4519 1925-S California MS66+ PCGS.** Flashy luster dominates both sides of this lovely California half, a piece that could easily reside in a Superb Gem holder. Pinkish-gray centers prevail against multicolored rim accents. Population: 13 in 66+, 90 finer (5/12). (#9281)

- 4520 1925-S California MS66+ PCGS. CAC.** Bright silver luster has a vague air of frostiness. High-quality detail as usual with just a few scattered marks precluding an even finer designation. (#9281)

- 4521 1925-S California MS67 NGC.** A brightly lustrous Superb Gem with a decent strike for the type. Gleaming silver interiors have green-gold touches near the rims. (#9281)

- 4522 1936 Cincinnati MS66 PCGS. CAC.** Each is lustrous, mostly still silver-gray, but some random accents of russet and amber-gold occur, more prominently on the reverse. Excellent eye appeal for this conditionally elusive issue. PCGS has seen only three finer (5/12). (#9283)

- 4523 1936 Columbia MS67+ PCGS.** The Columbia half dollars were another example of commemorating local events of strictly no national significance, which the year 1936 typifies more than any other. This MS67+ example boasts softly glowing luster over satiny gray surfaces with reddish-gold rim accents and top-notch eye appeal. Population: 59 in 67 (3 in 67+), 0 finer (5/12). (#9291)

Lightly Toned 1936-S Columbia Half, MS68

4524 1936-S Columbia MS68 PCGS. The Columbia half dollars celebrated the sesquicentennial of Columbia, South Carolina, but had absolutely no national import. This MS68 1936-S is one of the few finest survivors of the issue, one of five at PCGS (4/12). Pale pastel patina on each side comprises ice-blue and copper-gold more prominent at the rims, while the centers show less color. A marvelous and mark-free coin, yet subtle in its toning. (#9293)

4525 1936 Delaware MS67 PCGS. Amber-gold prevails against ice-blue accents on this startlingly beautiful Superb Gem Delaware half dollar, with softly glowing luster and essentially the finest grade obtainable. Population: 81 in 67 (6 in 67+), 1 finer (5/12). (#9301)

4526 1936 Delaware MS67 NGC. Frosty powder-white surfaces complement glints of gold and iridescence near the rims on each side of this attractive Superb Gem. The highest grade practically obtainable. Census: 93 in 67, 3 finer (5/12). (#9301)

1922 Grant With Star Half Dollar A Satiny Near-Gem Example

4527 1922 Grant With Star MS64 PCGS. Satin surfaces are typical of all genuine Grant With Star commemorative half dollars. This near-Gem exhibits subdued mint luster shining through light gray-gold toning with some hints of iridescence on each side. Careful examination finds a few scattered marks that deflect a higher grade. (#9307)

Choice 1922 Grant, Star Half Dollar

4528 1922 Grant With Star MS64 PCGS. Rich caramel-gold, gunmetal-blue, and rose-red toning embraces this sharply struck and unmarked near-Gem. Only one obverse die was used to coin the Star variety, and it clashed early in its life. The obverse die was lapped to remove the clash marks, leaving myriad raised lines in the fields, as made and as seen on the present piece. (#9307)

4529 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc. This coin has largely retoned since a past cleaning. Each side shows colors ranging from steel gray to yellow-orange on this Mint State commemorative half dollar. (#9309)

Near-Gem 1928 Hawaiian Half Key to the Commemorative Silver Halves

4530 1928 Hawaiian MS64 PCGS. CAC. The surfaces are highly lustrous and display intermingled ice-blue and copper-russet accents on this near-Gem Hawaiian half dollar, one of the keys to the commemorative silver half complete series. Gems are available but will cost considerably more. A loupe reveals only minor marks on the Hawaiian chieftain's legs. Nice for the grade. (#9309)

1928 Hawaiian Half Dollar, MS65 Sesquicentennial of Cook's Arrival

4531 1928 Hawaiian MS65 NGC. Commemorating the 150th anniversary of the arrival of British explorer and navigator Captain James Cook at the Hawaiian Islands, this lustrous example features a few splashes of delicate gold toning over each side, and the design features are well impressed. Just a few small, insignificant marks are noted on Cook's face. (#9309)

4532 1935 Hudson MS64 NGC. This frosty Choice example exhibits an even gold-gray surface while hints of russet-orange are noted at 6 o'clock on the obverse of this softly struck example. (#9312)

4533 1946 Iowa MS68 NGC. Just the faintest hints of ice-blue and pinkish, primarily rim iridescence, appear over an essentially silver-white example well into the Superb Gem range. Census: 35 in 68, 2 finer (5/12). (#9316)

Superb Gem 1918 Illinois Half Dollar

4534 1918 Lincoln MS67 PCGS. CAC. A generous amount of butter-gold toning invigorates this coruscating and razor-sharp Superb Gem. An immaculate example of this state centennial issue. Since Illinois is known as the "Land of Lincoln," he was an obvious selection for the obverse portrait. Population: 84 in 67 (2 in 67+), 1 finer (5/12). (#9320)

**Spectacularly Toned 1936 Long Island Half
MS67 ★**

4535 1936 Long Island MS67 ★ NGC. This is among the most spectacular Long Island commemoratives we have ever seen. The silver centers cede to obverse rim toning that includes emerald, burgundy, sunset-orange, and lavender. Similar hues dominate on the reverse, including golden-gray at the center. The NGC Star is appropriate, and this piece will be a star in any collection. Census: 53 in 67 (18 in 67 ★, 2 in 67 ★+), 3 in 68 (4/12). (#9322)

4536 1920 Maine MS66 PCGS. Mainers will not be the only ones interested in this stunning Premium Gem Maine half dollar, displaying as it does engaging luster over pinkish-gold centers and sage-tinted rims on the obverse, contrasting with grayish-gold and russet on the reverse. PCGS has seen only 20 numerically finer (5/12). (#9326)

4537 1921 Missouri MS65 PCGS. Ample luster is flashy at the proper angle to the light. Though the strike is typically soft at the shoulder strap, golden peripheral glints grant great eye appeal. (#9330)

4538 1921 Missouri 2x4 MS65 NGC. Rich russet-gold at the high outer rims coalesces at the lower obverse, providing emphatic contrast with the deeply frosted centers. This example shows greater-than-usual detail on the devices, including the shoulder strap on the standing frontiersman. Only 59 pieces have been graded finer by NGC (4/12).
Ex Long Beach Signature (Heritage, 2/2012), lot 4421. (#9331)

4539 1923-S Monroe MS65 PCGS. CAC. Engaging luster emanates from beneath powder-gray surfaces complementing faint pink and green accents. Seldom seen finer than Gem condition. (#9333)

Moderately Toned 1923-S Monroe Half, MS66

4540 1923-S Monroe MS66 NGC. Superlative luster graces each side of this Premium Gem Monroe Doctrine half, notwithstanding the presence of a moderate layer of lovely patina on each side, comprising jade, sky-blue, and pinkish-gold. No observable contact appears on this coin, one of 47 such at NGC with seven finer (4/12). (#9333)

4541 1938 New Rochelle MS67 NGC. Silver centers yield to powder-gray and amber-gold at the rims, with ice-blue accents and generous luster throughout. Excellent eye appeal and no mentionable contact. NGC has seen 14 submissions finer (5/12). (#9335)

4542 1926 Oregon MS67 PCGS. CAC. This stunning Superb Gem has frosty mint brilliance with attractively blended lime-green and reddish-gold toning. Myriad dark toning spots are noted on each side. Population: 66 in 67 (4 in 67+), 3 finer (5/12). (#9340)

4543 1937-D Oregon MS67+ ★ NGC. The deeply lustrous surfaces are largely powder-gray but offer marginal hints of jade, amber, and pink on this marvelous top-notch example. Census: 27 in 67+ (6 in 67+ ★), 71 finer (5/12). (#9347)

4544 1938 Oregon MS67 PCGS. CAC. Silver-gray overall with narrow arcs of orange and plum at top and bottom on the reverse. Like many Oregon half dollars sold directly to collectors, this late-date piece is impressively preserved. Population: 77 in 67 (6 in 67+), 2 finer (4/12). (#9348)

**1938-D Oregon Trail Half Dollar, MS68
Key Commemorative in High Grade**

4545 1938-D Oregon MS68 PCGS. CAC. The Oregon Trail half dollar is acknowledged as one of the most beautiful designs of the commemorative series. This incredible MS68 specimen shows the design to great advantage, with sharply detailed devices and vibrant mint luster, highlighted by iridescent shades of green, lavender, and ice-blue toning. Population: 35 in 68 (3 in 68+), 2 finer (4/12). (#9349)

4546 1939 Oregon MS67 NGC. This Superb Gem is remarkably well preserved with a uniform satin appearance, while the obverse remains primarily gunmetal-gray the reverse displays rose-orange patina along the borders. (#9352)

4547 1939-D Oregon MS67 NGC. This boldly defined Superb Gem displays luminous silver-gray patina, while orange illuminates the borders on this always-popular design type. (#9353)

4548 1915-S Panama-Pacific MS64 NGC. This attractive Choice specimen exhibits razor-sharp definition on the design elements, with strong mint luster and light shades of blue and gold toning. The 1915-S Panama-Pacific half dollar was struck to commemorate the opening of the Panama Canal. (#9357)

4549 1915-S Panama-Pacific MS65+ NGC. This commemorative exhibits outstanding eye appeal with obverse color fading from ice-blue to russet-orange, while the reverse remains primarily white with toning only residing around the borders. This coin would be an excellent addition to any high quality commemorative half dollar collection. (#9357)

4550 1921 Pilgrim MS66+ NGC. CAC. Radiant cartwheel luster is this Premium Gem's hallmark, with hints of amber-gold near the rims and superlative eye appeal. Census: 2 in 66+, 26 finer (5/12). (#9360)

4551 1936-D Rhode Island MS67 NGC. CAC. Gold-gray, orange, and twilight-violet overtones merge into one another on this D-mint Rhode Island Superb Gem. The underlying luster is luminous and smooth. Census: 34 in 67, 2 finer (4/12). (#9364)

4552 1937 Roanoke MS67+ ★ NGC. Silver and light orange gradually cede to all-encompassing deep amber on the obverse of this spectacular Roanoke. The reverse hosts similar hues but in a peripheral ring. The Star designation is apt. Census: 7 in 67+ (2 in 67+ ★), 27 finer (5/12). (#9367)

- 4553 1936 Robinson MS67 NGC.** Pastel pink and blue notes grace the obverse of this Superb Gem, while the reverse is blanketed in pale gold. No marks are visible on either side, and the exquisite luster places this piece in a distinct minority for the issue. Census: 30 in 67, 0 finer (5/12). (#9369)
- 4554 1935-S San Diego MS67+ NGC. CAC.** The 1935-S San Diego (California Pacific International Exposition) issue has a net distribution more than twice that of its 1936-D sibling, 70,000 pieces to 30,000. This MS67+ 1935-S exhibits excellent eye appeal through complete luster over unmarked powder-gray surfaces with iridescent rim accents. Census: 86 in 67 (1 in 67+), 4 finer (5/12). (#9371)
- 4555 1936-D San Diego MS67+ NGC.** The beautiful design of the San Diego half dollar is here represented by an equally lovely coin, boasting full luster over pinkish-gray surfaces with glints of honey-gold near the rims. A flashy and first-rate coin. Census: 47 in 67 (1 in 67+), 2 finer (5/12). (#9372)
- 4556 1935 Spanish Trail MS65 PCGS.** Bright luster has a faint frosty "skin" and is essentially silver with just a hint of green-gold at parts of the margins. A well-defined Gem example of this classic commemorative key. (#9376)
- 4557 1935 Spanish Trail MS66 NGC.** The satin, nearly matte-like surfaces are typical of the Spanish Trail half dollars. This piece has delicate golden-brown toning on the light gray surfaces with full luster and trivial grade-consistent marks. (#9376)
- 4558 1935 Spanish Trail MS67 NGC.** Powder-gray surfaces show just a slight hint of gold at the extreme rims, with satiny texture and excellent eye appeal. Even under a loupe, no marks are apparent. NGC has seen only five numerically finer (5/12). (#9376)
- 4559 1936-D Texas MS67+ PCGS.** The brilliant ivory surfaces of this Superb Gem are essentially untuned. Both sides are pristine and nearly flawless. Here is an important example bound for a top Registry collection of commemorative coins. (#9387)
- 4560 1937-S Texas MS67+ PCGS.** Lightly gold-tinged overall with broad luster and a deepening toward orange along parts of the rims. Quality luster and preservation make this later-date Texas half a winner. Population: 83 in 67 (2 in 67+), 0 finer (4/12). (#9392)

**1938 Texas Half Dollar, MS67
Only One Finer Coin at NGC**

- 4561 1938 Texas MS67 NGC.** Texas commemorative half dollars were minted from 1934-1938, but enthusiasm for the issue was beginning to lag by the final year, and only 3,780 examples of the 1938 Philadelphia issue were distributed. This magnificent Superb Gem is one of the finest survivors, with sharply detailed design elements, pristine fields, and satiny mint luster. Census: 44 in 67, 1 finer (4/12). (#9394)
- 4562 1925 Vancouver MS66 NGC.** Light golden toning covers the lustrous obverse, while the well-struck reverse has russet patina in arcs at the periphery. Only 14,994 examples are noted in the net mintage.
Ex: *Dallas Signature* (Heritage, 11/2006), lot 1714. (#9399)

- 4563 1925 Vancouver MS66 NGC.** This heavily toned Premium Gem exhibits lovely iridescence over satiny luster with a few specks of bright silver and deep gold on each side. Slight central weakness is typical of this issue. (#9399)
- 4564 1927 Vermont MS66+ NGC.** A tale of two sides: The obverse shows rather deep sandy-pink patina, the reverse some of the same complementing pastel lemon and jade hues. A pristine piece with top-flight eye appeal. (#9401)
- 4565 1927 Vermont MS66+ PCGS.** Flashy luster complements pastel ice-blue, jade, and gold hues on this spectacular Vermont, an unabraded, rim-toned Premium Gem with lots of eye appeal. The August 1777 Battle of Bennington, commemorated on the coin, saw the defeat of British General John Burgoyne and led to his eventual surrender at Saratoga later that same year, during the Revolutionary War. Population: 10 in 66+, 21 finer (5/12). (#9401)
- 4566 1946 Booker T. Washington MS67 NGC. CAC.** Boldly toned gold, orange, and forest-green overall with small windows to silver on each side. Amazing quality for this first-year Booker T. Washington half dollar issue. Census: 59 in 67, 0 finer (4/12). (#9404)
- 4567 1946 Booker T. Washington MS67 PCGS. CAC.** Pale silver-blue luster is dominant on this Superb Gem, while claret and carrot-orange toning forms crescents at the left on each side. Well-defined with just a few planchet flaws that were not struck out on Washington's face. Population: 46 in 67 (3 in 67+), 1 finer (5/12). (#9404)

**1947-D Booker T. Washington Half Dollar, MS67
Rare in This Level of Preservation**

- 4568 1947-D Booker T. Washington MS67 NGC.** After the extensive distributions of 1946, the 100,017 Booker T. Washington half dollars distributed at each mint (Denver and San Francisco) for 1947 reflected more modest ambitions (David Bowers, 2008). This frosty, boldly struck Superb Gem displays virtually undetectable pale gold patina. A few of the usually seen tiny planchet marks on the profile are noted. Census: 5 in 67 (1 in 67+), 0 finer (4/12). (#9409)

**MS67+ 1947-D Booker T. Washington Half
Sole Finest Certified at NGC**

- 4569 1947-D Booker T. Washington MS67+ NGC.** This is an interesting and lovely Booker T. Washington coin that has almost a perfect square of untuned silver-white brilliance complementing olive, jade, and gold hues on the reverse of this piece, which was mounted that-side-up in the NGC holder for display. The obverse shows mingled gold, russet, and blue-green against a silver background. Census: 5 in 67 (1 in 67+), 0 finer (4/12). (#9409)

**Pleasingly Toned Superb Gem 1949
Booker T. Washington Half Dollar**

- 4570 1949 Booker T. Washington MS67 PCGS. CAC.** With just 6,000 pieces struck plus assay coins, the 1949 is one of the more challenging Booker T. Washington halves, particularly in high grades. This is a lightly toned and exquisitely preserved Superb Gem with strong luster under light gold-to-green patina that has greater thickness and intensity of hue on the obverse, particularly at the margins. Population: 9 in 67, 0 finer (4/12). (#9416)

**1949 Booker T. Washington Half
MS67, None Certified Finer**

- 4571 1949 Booker T. Washington MS67 PCGS. CAC.** Originally issued only as part of a PDS set, the 1949 Booker T. Washington half has a mintage of just 6,000 pieces, with an additional four coins destined for assay. Despite its small production, examples are affordable even in the finest available grade. Lightly toned straw-gold with vibrant luster and no post-strike contact. Population: 9 in 67, 0 finer (5/12). (#9416)
- 4572 1950-D Booker T. Washington MS66+ PCGS. CAC.** This impressive Premium Gem represents a low-mintage commemorative issue, part of the extensive Booker T. Washington series struck from 1946 to 1951. Both sides have frosty silver luster with hints of champagne toning. PCGS has only certified three finer (5/12). (#9421)
- 4573 1950-S Booker T. Washington MS67 PCGS.** Pale blue overtones complement hints of pink over the light silver-gray surfaces. A well-defined Superb Gem with little of the usual planchet roughness on the jaw. Population: 21 in 67 (2 in 67+), 0 finer (5/12). (#9422)
- 4574 1951 Washington-Carver MS66+ PCGS.** Mottled pastel pinkish-gray centers cede to aqua and saffron near the rims on this lovely piece. Generous luster permeates each side, and a loupe reveals minor marks. Population: 52 in 66 (4 in 66+), 0 finer (5/12). (#9430)

**1952 Washington-Carver Half Dollar, MS67
Among the Finest Certified**

- 4575 1952 Washington-Carver MS67 PCGS. CAC.** The 1952 Washington-Carver half dollar issue was an extremely high release for a commemorative half — Bowers estimates that something over 1.1 million pieces were released, net after melting — and predictably, many ended up in circulation and most were poorly made. To add insult to injury, most of them were made from melted-down Booker T. Washington commemorative halves that had failed to sell earlier and were recast into the Washington-Carver pieces. The present coin, however, is one of those miraculous top few pieces that managed to be well-struck and nearly pristine. In addition to its immaculate preservation, it has developed the most extraordinarily beautiful toning, concentric rings of red, green, blue, and yellow, with intense luster underneath. An amazing coin that has to be seen to be appreciated. Population: 7 in 67 (1 in 67+), 0 finer (4/12). (#9434)
- 4576 1952-S Washington-Carver MS66+ PCGS. CAC.** Both sides of this lovely Premium Gem have considerable reddish-gold and cobalt-blue toning that is intermingled with silver brilliance. PCGS has only certified five finer (5/12). (#9436)
- 4577 1953 Washington-Carver MS67 NGC.** Only the palest hints of jade and gold are visible on this Superb Gem Washington-Carver, but the luster is blatant and thoroughly engaging, and mentionable marks are nil. Tied for the finest at either service. Census: 2 in 67, 0 finer (5/12). (#9438)
- 4578 1936 Wisconsin MS67+ PCGS.** Deeply lustrous surfaces are nearly mark-free with powder-gray and pinkish-gray prevailing with a touch of iridescence near the rim. PCGS has seen only 25 finer (5/12). (#9447)

COMMEMORATIVE GOLD

4579 1903 Louisiana Purchase/Jefferson MS64 NGC. Excellent detail through the portrait's hair. This orange-kissed Jefferson dollar is luminous and lightly patinated with a copper spot inside the second O of EXPOSITION. (#7443)

4580 1903 Louisiana Purchase/Jefferson MS66 NGC. Strongly struck with a smooth, subtly frosted yellow-gold obverse that displays well. The reverse is a technical match, though it also has copper streaking from the center to the lower-right rim. (#7443)

1903 Jefferson Gold Dollar, MS67 Louisiana Purchase Exposition

4581 1903 Louisiana Purchase/Jefferson MS67 PCGS. A splendidly toned Superb Gem with rich peach-gold at the centers and glimpses of olive-green and ruby-red near the rims. Dynamic luster further increases the eye appeal. Well struck save for selected portions of the dentils. Pristine aside from light grazes on the right obverse field. (#7443)

1903 Louisiana Purchase Gold Dollar, MS67 Jefferson Portrait None Certified Finer

4582 1903 Louisiana Purchase/Jefferson MS67 PCGS. CAC. The Louisiana Purchase issues, which revived an abolished denomination and displayed the nation's first gold commemorative designs, were minted to the maximum quantity permitted by the authorizing law, and the distributors had high hopes for sales; however, more Exposition attendees were interested in Olympic gold than commemorative gold (the third Olympic Games were held in St. Louis in conjunction with the Exposition). The vast majority of pieces struck were later melted.

The outstanding representative offered here must have caught the eye of an interested purchaser, and the numismatist of today can look upon it with equal admiration. The devices are boldly impressed throughout, and the strongly lustrous yellow-gold surfaces offer occasional canary accents. Exquisitely preserved with elegant and undeniable visual appeal. Population: 72 in 67, 0 finer (4/12). (#7443)

1903 Louisiana Purchase Gold Dollar McKinley Type, MS67

4583 1903 Louisiana Purchase/McKinley MS67 PCGS. Peach-gold centers are bounded by olive-green margins. A lustrous and needle-sharp Superb Gem of this scarce early gold commemorative type. Pristine aside from a die ejection mark on the first I in LOUISIANA. President McKinley authorized the Louisiana Purchase Exposition, better known as the St. Louis World's Fair. Population: 77 in 67, 1 finer (5/12). (#7444)

4584 1904 Lewis and Clark MS63 NGC. First year of this scarcer two-year commemorative issue. This piece has slightly subdued mint luster and small abrasions on each side. Light orange-gold color. (#7447)

1904 Lewis and Clark Gold Dollar, MS66 Conditionally Elusive

4585 1904 Lewis and Clark MS66 PCGS. Although the 1904 version of this commemorative gold dollar is not a rarity, it is truly elusive in Premium Gem quality, and a condition rarity any finer. Of course, specialists in the series understand the importance of the similar issue dated 1905. This is a remarkable example with frosty yellow-gold luster on both sides. The surfaces are virtually perfect and the strike is essentially full. It appears that this piece is a late die state with considerable die wear or erosion visible in the fields. A few faint die cracks are also visible on the reverse. (#7447)

4586 1905 Lewis and Clark MS63 PCGS. Highly lustrous with a bright, satiny, yellow-gold sheen that is only marred by a single faint reddish alloy spot, near 7 o'clock on the obverse border. A few wispy marks on each side prevent a higher grade assessment, but this coin is nice for an MS63.

Ex: FUN Signature (Heritage, 1/2007), lot 7900. (#7448)

**1905 Lewis and Clark Gold Dollar, MS66
Unusual Two-Headed Design**

- 4587 1905 Lewis and Clark MS66 PCGS.** Paul Gilkes, in an April 4, 1996 *Coin World* article, wrote that the design of the Lewis and Clark Exposition gold dollar, with the date 1904 or 1905, is one of the most unusual on U.S. commemorative coins, being the only U.S. coin issue to bear single portraits of two different individuals on the obverse and reverse of the same coin. Captain Meriwether Lewis' portrait appears on the obverse, while the reverse shows Captain William Clark. This Premium Gem specimen displays dazzling luster and rich yellow-gold patination. A well executed strike emboldens the design elements, and both sides have been well cared for. Population: 67 in 66, 3 finer (4/12). (#7448)

**1915-S Panama-Pacific Gold Dollar, MS67
None Certified Finer**

- 4588 1915-S Panama-Pacific Gold Dollar MS67 PCGS.** Extraordinary eye appeal and exemplary preservation converge on this special and spectacular commemorative. The surfaces, canary-gold with elements of straw and butter-yellow, offer lovely luster. Even under magnification, the fields and solidly struck devices show only a handful of minuscule ticks. Neither NGC nor PCGS has certified a numerically finer representative (4/12). (#7449)

**1915-S Gold Dollar, MS67
Panama-Pacific Commemorative**

- 4589 1915-S Panama-Pacific Gold Dollar MS67 PCGS. CAC.** The Panama-Pacific International Exposition was held in San Francisco in 1915, and celebrated the opening of the Panama Canal. The actual Central American facility was constructed to conveniently link the Atlantic and Pacific oceans to shipping, without the need for an overland portage, or a voyage around South America. As part of the 1915 celebration, numismatist Farran Zerbe embarked on an ambitious offering, including commemorative half dollars, gold dollars, quarter eagles, and fifty dollar pieces, the latter in two different shapes to further promote sales.

The gold dollar features a profile of a canal laborer and the reverse features two dolphins. At the time they were issued, and even today, there are some who mistook the obverse figure for that of a baseball player. This Superb Gem is an amazing example with virtually flawless surfaces. Both sides are highly lustrous with frosty yellow and pink-gold surfaces. A few splashes of coppery toning are also visible on the obverse and the reverse. Population: 50 in 67, 0 finer (4/12). (#7449)

**Pristine MS66 1915-S Quarter Eagle
Panama-Pacific Exposition**

- 4590 1915-S Panama-Pacific Quarter Eagle MS66 NGC.** A high grade apricot-gold representative whose lustrous and pristine fields and devices are fully struck and exude exemplary eye appeal. One of the final design collaborations between Charles Barber and George Morgan, who had both been Mint engravers since the 1870s. (#7450)

- 4591 1916 McKinley MS65 NGC.** Frosty luster takes on various yellow and apricot shadings with the usual windows of brilliance above the memorial on the reverse. A fundamentally pleasing Gem from the first of two years for the design. (#7454)

- 4592 1916 McKinley MS66 PCGS.** The deep orange-gold surfaces on this Premium Gem are essentially unmarked on this first-year of the two-year McKinley type, offering excellent eye appeal. Seldom seen finer. (#7454)

**Superb Gem 1917 McKinley Gold Dollar
None Graded Finer**

- 4593 1917 McKinley MS67 PCGS. CAC.** Pastel cherry-red and lemon-gold toning provides superior eye appeal. Lustrous and pristine with a good strike. McKinley was previously honored on a 1903 commemorative gold dollar. Scarcer than its 1916 predecessor, since type collectors of the day passed on the second-year issue. Population: 53 in 67, none finer (5/12). (#7455)

**Gem 1922 Grant No Star Gold Dollar
Rich Orange-Gold Color**

- 4594 1922 Grant No Star MS65 PCGS. CAC.** This Gem Grant gold dollar displays rich orange-gold color over both sides there are no surface defects that warrant individual mention. The strike is strong overall, leaving no objections to this lovely piece of commemorative gold. Commemorative gold dollars are especially good value today. (#7458)

No Star Grant Gold Dollar, MS67

- 4595 1922 Grant No Star MS67 NGC.** A virtually pristine apricot-gold Superb Gem. Fully struck except on the tree trunk left of the frame house window. Classic commemorative gold dollars have not performed as well as matte proof Lincoln cents in recent years, but it is only a matter of time until the series rebounds, and high grade examples are again the subject of auction bidding wars. (#7458)

**1922 Grant No Star Gold Dollar, MS67
Virtually Perfect Surfaces**

- 4596 1922 Grant No Star MS67 PCGS. CAC.** The Grant gold dollars were the first gold issues that were tied by design to the half dollar commemoratives. Twice as many No Star dollars were struck as the With Star issue, making the No Star the logical selection as a type coin. Each side of this lustrous dollar is almost perfectly preserved. Rich orange-gold color distinguishes this coin and the upper reverse fields possess noticeable reflectivity through the motto. (#7458)

- 4597 1922 Grant With Star MS64 PCGS.** Well-defined for the design with stronger yellow color than usually seen. A few small coppery areas are visible on this lustrous With Star near-Gem. (#7459)

**Superb Gem 1922 Grant Gold Dollar
With Star Variant**

- 4598 1922 Grant With Star MS67 PCGS. CAC.** Sharply struck and highly lustrous with rich honey-gold color and hints of pale olive toning. This is a lovely Superb Gem that is essentially the finest available quality for the issue, although PCGS has certified a single finer MS68 grade coin (4/12). (#7459)

- 4599 1926 Sesquicentennial MS64 PCGS.** This near-Gem Sesqui has much to offer to the value-minded collector. The coin displays the usual soft mint frost, but what is exceptional here is the rich mixture of reddish-gold and lilac color on each side. Lightly abraded as well. (#7466)

- 4600 1926 Sesquicentennial MS64+ PCGS. CAC.** A gorgeous near-Gem with swirling apricot-gold and peach luster. Well-defined with just a few grazed areas on the scroll and a handful of pinpoint marks. (#7466)

- 4601 1926 Sesquicentennial MS64+ PCGS. CAC.** Subtly frosted on the devices with strong and sweeping apricot-gold luster. An excellent coin in most respects, though it shows just a few too many small marks to qualify for the coveted Gem level. (#7466)

- 4602 1926 Sesquicentennial MS65 PCGS.** Deep orange-gold with lighter patches of yellow-frost at parts of the interiors. Great detail with a tiny irregularity at the bottom end of the scroll as the sole individually mentionable flaw. Housed in a green label holder. (#7466)

- 4603 1926 Sesquicentennial MS65 NGC.** A lovely quarter eagle showing quality matched by few of the last classic gold commemorative, Gem status. Swirling luster graces yellow-orange surfaces with peach and rose accents. NGC has certified 88 finer representatives (11/10). (#7466)

**Premium Gem 1926 Sesquicentennial
Quarter Eagle, None Graded Finer**

- 4604 1926 Sesquicentennial MS66 PCGS.** The 150th anniversary of the signing of the Declaration of Independence was commemorated with two coins — a half dollar and quarter eagle gold coin, both dated 1926. This Premium Gem two and a half displays yellow-gold lustrous surfaces with hints of light green. Both sides are well-struck and minimally abraded. PCGS has seen none finer (5/12). (#7466)

MODERN BULLION COINS

Ultimate Grade MS70 1987 Silver Eagle

- 4605 1987 Silver Eagle MS70 PCGS.** More than 11 million Uncirculated finish silver eagles were struck in 1987, but most went into tubes, were lightly handled, had production flaws, or simply came into contact with another coin while at the Mint. Immaculate examples, such as the present fully struck pearl-gray piece, are surprisingly rare. Population: 10 in 70 (5/12). (#9808)

-
- 4606 1993-P Silver Eagle PR70 Ultra Cameo NGC.** This perfect Ultra Cameo example has a razor-sharp strike with amazing black-and-white contrast. (#9867)

- 4607 1994-P Silver Eagle PR70 Ultra Cameo NGC.** Brilliant fields gleam from the surfaces of this perfect American Eagle, with outstanding contrast between the fields and frosty-white devices. (#9877)

- 4608 1994-P Silver Eagle PR70 Ultra Cameo NGC.** A perfect PR70 example of the highly popular and universally liked Walking Liberty design that was originally created by Adolph Weinman for the 1916 to 1947 half dollars. The amazing Ultra Cameo contrast of this piece brings the design up to its full potential. (#9877)

**1995-W Silver Eagle, PR70 Ultra Cameo
Low-Mintage Condition Rarity**

- 4609 1995-W Silver Eagle PR70 Ultra Cameo NGC.** This West Point proof date became a modern legend virtually at the time of its issue. It was propelled by its skimpy mintage of only 30,125 pieces, a figure sharply contrasting with the millions produced in nearly all other dates of the silver bullion American Eagle series. Many descriptive words come to mind when this coin is examined, but immaculate is the only word to describe its breathtaking perfection of strike and luster. A textbook example of the highest possible grade in today's assessment of condition, and a series key pursued by legions in this popular series. (#9887)
-

**PR70 Ultra Cameo 1995-W Silver Eagle
Ultimate Series Rarity in Ultimate Grade**

4610 1995-W Silver Eagle PR70 Ultra Cameo NGC. Distributed only in the 10th Anniversary sets, the 1995-W proof silver American Eagle is the key to its one-ounce series, as only 30,125 of the pieces were distributed. This is a technically flawless representative of the now-popular issue, exquisitely contrasted in the best modern Ultra Cameo fashion with fathomless mirrors and thickly frosted devices. The obverse presents as black-and-white, while the reverse shows a tiny milk-spot below the first A in AMERICA. On one point, though, the two sides agree: the grade is not defined by any marks or hairlines, but only their absence. (#9887)

4611 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC. NGC found no flaw with this modern Mint execution of the classic Saint-Gaudens design. Gleaming mirror-fields show wispy die polishing lines on the obverse. (#407404)

**MS70 Prooflike 2009 Ultra High Relief Twenty
John Mercanti Insert Autograph**

4612 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. The PCGS insert is autographed by noted Mint engraver John M. Mercanti. Former Mint Director Edmund C. Moy was the proponent for this unusual modern bullion issue. Unlike the American Gold Eagle or Buffalo series, no specific legislation compelled its release. The present needle-sharp specimen has lustrous, flawless surfaces. (#506602)

**Prooflike MS70 Ultra High Relief
MMIX Gold Twenty Dollar**

4613 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. A flashy and flawless canary-gold representative of this popular modern Mint issue. The strike is razor-sharp and the concave fields are pristine. Struck with the diameter of a ten dollar eagle but on a double-thick flan, inspired by the Judd-1917 pattern owned by the Smithsonian. (#506602)

COINS OF HAWAII

**MS64 Brown 1847 Hawaiian Cent
Plain 4, 13 Berries, Small Letters**

4614 1847 Hawaii Cent MS64 Brown PCGS. CAC. M. 2CC-5. Plain 4, 13 berries. A chocolate-brown near-Gem that retains glimpses of the initial orange-red within design crevices. Boldly struck and void of detectable abrasions. Privately struck in Attleboro, Massachusetts for the Kingdom of Hawaii. Population: 33 in 64 Brown, 6 finer (4/12). (#10965)

**Magnificent Premium Gem 1883
Hawaii Ten Cent**

4615 1883 Hawaii Ten Cents MS66 PCGS. CAC. The 1883 one-year type Umi Keneta, or Hawaii one dime, had a reported mintage of 250,000 pieces, but a large number were likely melted when Hawaii became a Territory of the United States. Walter Breen writes in his *Complete Encyclopedia* that the U.S. Treasury at that time decided that the Islands should use American coins. As a result, orders went out to banks and commercial establishments in the Islands ordering withdrawal of all 1883 Hawaiian coins from circulation.

Soft luster resides on both sides of this Premium Gem example, each of which displays a delicate mix of gray, sky-blue, lavender, and yellow-gold patina. A well executed strike leaves virtually complete definition on the design elements. Nicely preserved throughout. Population: 11 in 66, 1 finer (4/12). (#10979)

Condition Rarity MS67 1883 Hawaii Quarter

4616 1883 Hawaii Quarter MS67 PCGS. CAC. Variegated sea-green and russet coloration atop scintillating luster defines this Superb Gem Hawaiian quarter. The quarter dollar issues of Hawaii saw less attrition through melting than the larger half dollar and dollar coins, so high grade examples are readily available in near-Gem or better condition, but the handful of extant MS67 pieces occupy only the most fortunate of cabinets. As of (4/12), only 12 examples of this issue have earned the MS67 grade at PCGS with none grading finer. (#10987)

**Richly Toned 1883 Hawaii Half Dollar
MS64+, Rare Any Finer**

4617 1883 Hawaii Half Dollar MS64+ PCGS Secure. Richly toned with a degree of reflectivity under blue-gray patina edged in green. Though more half dollars were struck than any other Hawaii denomination, the date suffered disproportionately from melting compared to the quarter dollar, and high-grade examples pose a challenge for today's collectors. Population: 58 in 64 (3 in 64+), 15 finer (4/12). (#10991)

A grid of 10 historical coins, arranged in 5 rows and 2 columns. The coins are mostly copper or bronze, showing various designs including portraits of monarchs and royal crests. The designs are somewhat worn and aged. The coins are: Row 1: Left, a profile of a monarch; Right, a royal crest with a crown. Row 2: Left, a profile of a monarch; Right, a royal crest with a crown. Row 3: Left, a profile of a monarch; Right, a royal crest with a crown. Row 4: Left, a profile of a monarch; Right, a royal crest with a crown. Row 5: Left, a profile of a monarch; Right, a royal crest with a crown.

"1883" Dollar Reverse Hub Impression MS66 PCGS. Toned mahogany-brown with peach-red in the recesses of the legends. A couple of tiny flakes on the lower right quadrant within the coat of arms. (Total: 10 coins)

WORLD

Saudi Arabia Gold Pound, AU58 Struck at Philadelphia Mint

- 4619** (1947) Saudi Arabia, Abdal Aziz bin Saud, Gold Sovereign (Pound) AU58 NGC. KM-35. Struck at the Philadelphia Mint to exchange for Saudi oil. Very close to Mint State, but the luster on the fields is slightly subdued. Per the reverse inscription, contains 0.2354 troy ounces of gold. One of the few gold coin issues struck by the U.S. Mint during the era when private gold ownership was illegal.

Near-Mint Saudi Arabia 4 Pounds

- 4620** (1945-1946) Saudi Arabia, Abdal Aziz bin Saud, Gold 4 Pounds AU58 NGC. KM-34. A Philadelphia Mint issue struck to pay for oil exports. Saudi Arabia was familiar with British gold denominations. The recessed relief legends and motifs are lustrous, though the open fields display scattered small marks. AGW 0.9419 oz.

ERRORS

Double-Struck 1904 Cent, AU55 Partial Brockage on Obverse

- 4621** 1904 Indian Cent — Struck Twice, Second Strike 25% Off-Center With Obverse Brockage — AU55 NGC. This dramatic Indian cent error had a normal first strike but failed to eject from the dies. It rotated partway out instead, causing a second strike 25% off-center that shows a small impression from a brockage. Blue-brown surfaces show a touch of wear; perhaps this error was kept as a pocket-piece for a brief time.

Popular '11 Cents' 1957 Cent on 1957 Dime A Near-Mint Error in Silver

- 4622** 1957 Lincoln Cent — Double-Denomination on a 1957 Dime — AU58 PCGS. PCGS does not list a date for the dime, but the four digits of the date are plain to read in the area near IN (GOD WE TRUST) on the obverse. Roosevelt's outlined head forms a frame for Lincoln's portrait, though only snippets of the torch and leaves remain on the reverse. The piece shows a touch of rub; perhaps it spent as a dime a time or two before it was saved as unusual.

1999 Cent on a 1999-P Dime, MS67 Double Denomination "11 Cent" Piece

- 4623** 1999 Lincoln Cent — Struck on a 1999-P Dime — MS67 NGC. The dime date and mintmark are clear, as is the final 99 in the cent date. Roosevelt gazes south relative to the portrait of Lincoln. The flame of the torch is beneath the right wing of the Memorial. An immaculate example of the popular double denomination error.

MS68 2000 Cent on a 2000-P Dime 11-Cent Piece, Double Denomination

- 4624** 2000 Lincoln Cent — Struck on a 2000-P Dime — MS68 NGC. The cent date is bold, the dime mintmark is clear, and the dime date is faint. Roosevelt gazes south relative to the memorial. The torch flame is above the date. Pristine and lustrous with a glimpse of lime-gold toning over silver-white surfaces.

**2001 Cent on a 2001-P Dime
MS67, Double Denomination**

- 4625** 2001 Lincoln Cent — Struck on a 2001-P Dime — MS67 NGC. The cent date is bold. The date dime and mintmark are very faint. Roosevelt gazes at 4:30 relative to the Lincoln Memorial. The flame of the torch is left of the cent date. Lustrous and immaculate with light olive-gray toning.

**VF Three Cent Nickel Error
Mirror-Brockage Obverse**

- 4626** Undated Three Cent Nickel — Mirror-Brockage on Obverse — VF20 NGC. A moderately worn piece with a distorted, diffuse impression from a three cent nickel coin's reverse where Liberty's portrait should be. Unlike most such errors, this lavender-tinged gold-gray piece has considerable wear; perhaps it was carried as a pocket-piece.
From The JG Collection, Part Two.

**Off-Center 1920 Buffalo Nickel Error, MS64
15% Toward One O'clock**

- 4627** 1920 Buffalo Nickel — Struck 15% Off-Center — MS64 NGC. A simple-and-clean error — the off-center striking is one of the easiest for even beginning numismatists to grasp — but the series is far from common. Specialists know how elusive Buffalo nickel errors can be, especially ones so well-preserved as this near-Gem with strong luster and considerable gold and lavender patina.

**Select Undated Roosevelt Dime
Major Obverse Die Break**

- 4628** Undated Roosevelt Dime — Major Obverse Die Break — MS63 PCGS. The date is obliterated on this dime — as is the entire bottom-right half of the obverse design, thanks to a major die break that must have seen half the die fall away. The reverse of this gold-tinged error shows a similar void at the corresponding place, as metal rushed to fill the lost-die gap and so did not squeeze into the fine details.

**1961-D Half Dollar on a Cent Planchet
Uncirculated Details**

- 4629** 1961-D Franklin Half — Struck on a Cent Planchet, Damaged — NGC Details. Unc. 3.1 gm. A seldom-seen off-metal combination. Both the date and mintmark are fortuitously present, and the eagle and TRUST are also complete. Appropriately, the denomination is absent. The chocolate-brown surfaces are unworn but four small parallel marks are noted near the date and the reverse has a horizontal scratch on the right end of the bell post.

**Undated Kennedy Half Dollar on Dime Planchet
Uniface Obverse, MS67**

- 4630** Undated Kennedy Half Dollar — Struck on a Dime Planchet With Uniface Obverse — MS67 NGC. 2.2 gm. The obverse was completely obliterated — against another planchet, perhaps? — while a partial Great Seal eagle remains on the reverse. A distorted and disconcerting error with minor green-gold toning and almost impeccable preservation.
From The JG Collection, Part Two.

**Double Struck in Collar
1921 Morgan Dollar**

- 4631 1921 Morgan Dollar — Double Struck in Collar, Graffiti on Obverse — Genuine PCGS.** In our opinion this coin has the details of an AU specimen that has graffiti and minor rim damage. The first strike was normal, but the coin remained in the collar, and rotated slightly clockwise prior to the second impression. Both sides exhibit prominent strike doubling, especially dramatic on LIBERTY. Toned cream-gray and autumn-brown with a few minor rim nicks and the letters JON stenciled into the cheek.

**Die Adjustment Strike on an
Eisenhower Dollar**

- 4632 Undated Copper-Nickel Clad Eisenhower Dollar — Die Adjustment Strike — NGC.** The strike is remarkably soft. Ike's head is outlined except for his nose. On the central reverse, the eagle's legs can be distinguished. Toned tan-gray with myriad planchet marks unaffected by the strike. There are several different causes for this rare error, with improperly spaced dies the most likely culprit.

**Double Clipped, Off Center
Gem 1976-D Ike Dollar**

- 4633 1976-D Type Two Eisenhower Dollar — Struck Off Center on a Double Clipped Planchet — MS65 NGC.** Two curved clips, one large and one huge, are centered at 6 and 8 o'clock. The clips, caused when the planchet was punched from stock, likely caused the piece to be misfed. It is struck several degrees off center toward 1 o'clock, with LIBERTY and ONE DOLLAR partly off the flan. The devices are well struck. Lustrous with light honey toning.

SO-CALLED DOLLARS

- 4634 1909 Hendrik Hudson Gold Daalder MS63 NGC. HK-371.** Gold, 15 mm, the size of a U.S. regular-issue gold dollar. R.7 according to the Hibler-Kappen revision (2008), with only 50-100 pieces struck. New York City coin dealer Thomas L. Elder was responsible for the issuance of these pieces. This piece has lustrous surfaces with lemon-gold toning.
Ex: Long Beach (Heritage, 9/2008), lot 29420, which realized \$1,725.

- 4635 1939 Charbneau Gold Dollar MS64 NGC. HK-488, R.8.** Issued at the Golden Gate Exposition "by Jules Charbneau, San Francisco fine arts appraiser and dealer," per the second edition of Hibler-Kappen. Lemon-gold and lime toning with a sharp strike and undisturbed surfaces.

- 4636 1898 Alaska Gold One Pinch MS64 NGC. Gould-Bressett 135, HK-844.** Indian head right, 16 stars, octagonal format. Part of "Hart's Coins of the West" series. A fully struck apricot-gold example with one tiny spot behind the Indian's neck.

**Gold 1946 U.N. Monetary Pattern
HK-873, MS63**

- 4637 1946 United Nations Monetary Pattern MS63 NGC. HK-873, R.6.** Per the second edition of Hibler-Kappen, HK-873 is from a mintage of 314 pieces and was struck in 900 Fine gold. The private pattern was conceived in 1945 by noted coin dealers Abe Kosoff and Hans M. F. Schulman, but their actions were opposed by the U.S. Mint after specimens were struck by the Medallic Art Co. This is a prooflike canary-gold piece that boasts a sharp strike and only inconsequential hairlines.

HARD TIMES TOKEN

- 4638 1837 Feuchtwanger Three Cent, Coat of Arms — Improperly Cleaned — NGC Details. AU. Low-117, HT-262, R.3.** The New York State coat of Arms inspires the obverse design. A hairlined but only lightly circulated silver-gray example. Much scarcer than the HT-268 Feuchtwanger cent variety. Listed on page 400 of the 2013 *Guide Book*.

CIVIL WAR TOKEN

1861 Major Robert Anderson/Fort Sumter
Copper Medal, MS63 Brown

- 4639 1861 Maj. Robert Anderson Fort Sumter Medal MS63 Brown NGC.** Copper, 67 mm, 162.2 gm. This large copper medal, struck from the original dies, portrays the CSA naval bombardment of Fort Sumter, South Carolina, with dates April 12 & 13 1861 below. On the reverse, the central inscription reads TO MAJ. ROBERT ANDERSON / U.S.A. / FROM THE CITIZENS OF / NEW YORK CITY, / AS A / SLIGHT TRIBUTE / TO HIS / PATRIOTISM. A Latin motto above praises his prudence, fidelity, and audacity, promising rewards to the faithful. Luminous surfaces have deep mushroom-brown color with light olive and violet overtones. A small spot appears in the upper obverse field above the smoke from the fort.

ALASKA TOKENS

- 4640 Alaska AYPE (1909) Three-Piece Souvenir Gold Set MS63 NGC.** The round quarter-pennyweight, half-pennyweight, and one pennyweight versions of the Alaska-Yukon-Pacific Exposition souvenir gold pieces, differing only in diameter and weight, as the three share a basic design. Making this lot special is the included box, weathered burgundy cardboard with a half-rubbed Exposition logo and small affixed label with typed name "EMMA." (Total: 3 coins)

20TH CENTURY TOKENS AND MEDALS

1940 Gold 'Valor in Citizenship' Medal Given
To Ellis Bradford Wood by *Liberty Magazine*

- 4641 Liberty Magazine Valor in Citizenship 14 kt Gold Medal.** 136.8 gm, 57 mm. Marked on edge for "14 kt gold." Obverse: flaming sword upright in hand, glory and wreath around, outermost legend LIBERTY MAGAZINE VALOR IN CITIZENSHIP AWARD. Reverse: stylized laurel branch at left with two lengths of scroll unfolding across, above AWARDED, on scroll 1940 / ELLIS BRADFORD WOOD, below FOR / OUTSTANDING BRAVERY / IN THE WAR OF CIVIC / RIGHTEOUSNESS, with TIFFANY & CO. in tiny letters at bottom. Excellent condition aside from a few light rim marks.
- Liberty magazine* (1924-1950), a nationwide "nickel weekly," was the sponsor; at one luncheon for the award, FBI director J. Edgar Hoover was a featured speaker. The medal comes with a brown Tiffany & Co. presentation case (good condition) and a once-ivory outer box (staining, some tearing, name WOOD written on top and underlined twice).

Medallic Art Co. Hawaii Statehood Medal
Serial #11, 50 or So in Gold, MS67 NGC

- 4642 Three-Piece NGC-Certified Set of Medallic Art Co. Hawaii Statehood Medals.** Set #11, all items 63.5 mm in diameter. The centerpiece of the lot is the **gold medal MS67 NGC**, 216.3 gm of .900 fine gold, one of approximately 50 pieces sold out of an authorization of only 100 items; not all of these survive today, as some were melted down during the run-up in gold prices during the late 1970s and 1980. The gold medal and **sterling silver medal MS66 NGC** both have the serial number "11" on the edge; the **bronze medal MS65 NGC** does not. The gold medal originally was offered for \$850 and the silver medal \$30, sizable sums at the time of Hawaii's statehood; the bronze medal, by contrast, cost a mere \$4 and was produced far more heavily. Offered with a hard plastic case where these NGC-certified pieces formerly were displayed, though no paperwork is present. (Total: 3 medals)

GSA DOLLARS

- 4643 1880-CC MS64 ★ NGC. CAC.** Gorgeous patches of gold, orange, green, blue, and violet patina enliven the obverse, while the reverse is silver aside from an arc of peach at right. Band-certified in the black GSA holder of issue and offered alone (no box or papers). (#7100)
- 4644 1880-CC MS65 NGC.** The largely silver obverse has only a hint of the green-gold color that drapes most of the luminous reverse. This charming Gem is band-certified in the black holder of issue and comes with a box, though no paperwork is included. (#7100)
- 4645 1882-CC MS66 NGC.** Frosty with gorgeous detail. Toning appears only in iridescent olive-violet strips at the upper obverse and bottom-left reverse rims. Band-certified in the black GSA holder of issue and offered alone (no box or paperwork). (#7134)

- 4646 1882-CC MS66 NGC.** Frosty and largely silver with a significant cartwheel effect in the fields, a great “type coin” for the collector seeking a better-than-Gem Carson City dollar from the GSA auctions. Band-certified in the black GSA holder of issue and offered alone (no box or paperwork). (#7134)
- 4647 1882-CC MS66 NGC.** Both sides have silky luster with a hint of cartwheel. The obverse is richly toned with olive, blue, violet, and occasional rose shadings, while the reverse is largely silver aside from a gold-rooted arc along the lower right rim. Band-certified in the black GSA holder of issue and offered alone (no box or paperwork). (#7134)
- 4648 1884-CC MS65 ★ Prooflike NGC. CAC.** Prominently reflective on each side with rainbow toning down the left half of the obverse and at the upper left reverse margin. A low-contrast but high-appeal coin, band-certified in the black GSA holder of issue and offered alone (no box or papers). (#7153)
- 4649 1890-CC MS62 NGC.** A minimally toned later GSA dollar, moderately abraded but lustrous with decent appeal for the grade. Band-certified in the black GSA holder and offered with box (no papers). (#7198)
- 4650 1891-CC MS61 NGC. VAM-3.** A Top 100 Variety. The so-called “Spitting Eagle” in a GSA holder, significantly abraded but with strong silver cartwheel luster nonetheless. Well-defined with quality reverse eye appeal for the grade. Band-certified in the black GSA holder of issue and offered alone (no box or paperwork). (#7206)

REDFIELD DOLLARS

Near-Gem 1893-CC Dollar Sealed in Redfield Holder

- 4651 1893-CC MS65 Paramount (MS64 NGC).** Here is a rarity: not only an 1893-CC dollar in a Redfield Collection holder, but one that is (almost) properly graded to boot! NGC rates this piece as an MS64, and while the NGC guarantees do not apply to this Redfield-held coin, there are fewer than two dozen true Gems in the combined certified population (4/12), so this near-Gem of the final Carson City silver dollar issue is a coin of great importance. Border-toned blue, green, and violet, it has subtly frosted silver centers. While the softly struck central devices show a number of light marks and a couple of deeper abrasions, the MS64 assessment is fair. (#7222)

Near-Gem Semikey 1895-S Dollar
Ex: Redfield

- 4652** 1895-S MS65 Paramount (MS64 NGC). A Redfield dollar in its original Paramount holder, rated MS64 by NGC. This is an excellent example of the semikey issue with strong silver luster partly dappled in olive-gold and blue-violet on the obverse. Modest abrasions on the decently struck portrait contribute to the grade, but the overall eye appeal is strong on this piece, and numerically finer examples are hard to come by. (#7238)
-

BOOK

- 4653** *A Guide Book of United States Coins, First Edition (1947), First Printing.* Use of "this date" at the bottom of page 135 separates the first printing from the second. One of the first 9,000 published copies of what would become the celebrated "Red Book" reference and a piece of numismatic literature history. Binding weak but not frayed, pages 124-128 showing score marks (no tearing), bookplate in front cover with several layers of whiteout over successive owners' names.

U.S. COINS SIGNATURE® AUCTION

AUGUST 2-3, 2012 | PHILADELPHIA | LIVE & ONLINE

Heritage, the World's Undisputed
#1 Numismatic Auctioneer,
Is Waiting to Serve You!

Philadelphia 2012

PLATINUM NIGHT & SIGNATURE AUCTIONS

Consignment Deadline: June 20, 2012

Philadelphia 2012 will be a superb venue for you to realize top dollar.
Heritage's auctions will appeal to the attendees while
their wallets are stuffed and their checkbooks full.

Please call our Consignor Hotline today to
discuss your important consignment and how we can best serve you.
800-872-6467 Ext. 1000

Free catalog and *The Collector's Handbook* (\$65 value) for new clients. Please submit auction invoices of \$1000+ in this category, from any source. Include your contact information and mail to Heritage, fax 214-409-1425, email CatalogOrders@HA.com, or call 866-835-3243. For more details, go to HA.com/FCO.

PATTERNS

1836 'Cap and Rays' Judd-67 Gold Dollar
A Pattern Classic, PR63 Cameo

4654 1836 Gold Dollar, Judd-67, Pollock-70, R.5, PR63 Cameo PCGS. CAC. The obverse features a Liberty cap surrounded by rays of glory, similar in design to certain Mexican coin designs of the era. The reverse features the denomination 1 D. within a coiled palm frond, with the date below and UNITED STATES OF AMERICA above. Christian Gobrecht is credited with both designs. Struck in gold with a plain edge. This first U.S. Mint pattern introduced a new potential denomination, the gold dollar, though it would not be realized until 1849. This lightly hairlined Select example has gleaming yellow-gold fields with a hazy patch to the right of the 1 in the denomination. Attractive contrast enhances the eye appeal. (#11260)

1838 Gobrecht-Designed Seated Liberty Half
Judd-79a, PR64

4655 1838 Seated Liberty Half Dollar, Judd-79a, Pollock-86, Low R.7, PR64 PCGS. The obverse has the Seated Liberty design, close to that adopted for circulation strikes, with Judd's "straight date" and the word LIBERTY incused on the shield. The reverse shows Gobrecht's Flying Eagle design, with UNITED STATES OF AMERICA on the upper rim and HALF DOLLAR at the lower margin. Struck in silver with a reeded edge. The dozen or so pieces known are medallically aligned, and the one in the Smithsonian was double struck with a 20-degree rotation between strikes. This piece shows bright reflectivity in the fields and even reddish-golden toning over each side. A few light hairlines are all that prevent an even higher grade. (#11328)

**(1849) Three Cent Pattern, Mostly Silver
Judd-113 Original, PR64**

- 4656** (1849) Three Cent Silver, Judd-113 Original, Pollock-127, High R.7, PR64 PCGS. CAC. Popularly known as the Ugly Duckling, this pattern combines “Arabic” and Roman numerals 3 and III, one on each side, with no other legends, date, denomination, or other device. Not only is this a “coin without a country,” it is a numerator without a denominator, a quantity with no units. The silver-copper alloy varies on these pieces, but this example has a known alloy that is stated on the insert: 97.8% silver, 1.9% copper, and .03% magnesium, with a weight of 19.14 grains. Gray-rose toning is seen on each side with some hairlining present also. (#11495)

**Famous ‘Ugly Duckling’ Three Cent Pattern
Judd-114, Struck in Copper-Nickel**

- 4657** Undated Three Cent Piece, Judd-114, Pollock-128, Low R.7, PR65 PCGS. This simple design has a large Arabic 3 on one side, the other depicts a Roman III. The denticles are slanted and toothlike. Struck in copper-nickel with a plain edge. An early Mint response to the hoarding of silver coins in the wake of the California Gold Rush. W. Elliot Woodward, in his catalog of the Mickley sale, referred to this design as “the ugliest of all known coins and certainly one of the rarest.” The dies were made in 1849 but per Judd, “the copper-nickel issues are restrikes.” Well struck and satiny with lilac-gray toning on the open fields and the initial butter-gold color in design crevices. (#11498)

**PR66 Red and Brown 1852 Annular
Gold Dollar Struck in Copper, Judd-147**

- 4658** 1852 Gold Dollar, Judd-147, Pollock-175, Low R.7, PR66 Red and Brown NGC. CAC. An annular pattern with a large central perforation, which would have allowed a larger-diameter gold dollar. The annular format limits the devices to a wreath and scrollwork. Gold dollars were vital to commerce in 1852, since silver coins were worth more than face value and did not circulate. Struck in copper with a plain edge, of which perhaps a dozen survive. These were also struck in gold, silver, and copper-nickel. USPatterns.com indicates that some of the gold pieces hail from 1852, but most of the rest (including this copper strike) are restrikes made circa 1859. The heavy die crack through the second L in DOLLAR indicates a later striking. This piece is attractively toned in cherry-red and apple-green, and the surfaces are flawless aside from light Mint-made roller marks on the reverse near 4 o'clock. Ex: Phoenix ANA Signature (Heritage, 3/2008), lot 1321; Boston ANA Signature (Heritage, 8/2011), lot 5642. (#11611)

Judd-161 Original 1854 Cent, AU50

- 4659** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, AU50 ANACS. The design resembles the Mature Head large cent, although the obverse lacks stars, the diameter is smaller, and the reverse wreath is downsized. Struck in bronze with a plain edge. Originals and restrikes are mentioned of the Judd-161, but very few pieces are certified as restrikes. Toned mahogany-brown and sea-green with one small flan flaw beneath the E in CENT. (#11663)

**1854 Smaller Sized Cent Pattern in Bronze
Judd-161, PR64 Brown**

- 4660** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR64 Brown PCGS. CAC. The obverse and reverse designs are similar to the adopted Braided Hair designs, but without stars on the obverse and struck on a smaller-sized planchet. These popular patterns are known in copper, bronze, and oriole. This example is struck in bronze and has a plain edge. Considerable reflectivity is seen in the fields in spite of the substantial presence of brown and blue patina. Die clashed under the chin of Liberty, and certified in a first generation holder. (#11663)

**1854 Cent Pattern in Bronze
Judd-161 Restrike, PR64 Brown**

- 4661** 1854 One Cent, Judd-161 Restrike, Pollock-187, R.4, PR64 Brown PCGS. 95.52 grains. The smaller-size large cent design has no stars on the obverse, the reverse has two leaves under the E in STATES. Struck in bronze with a plain edge. It is exceptionally difficult to determine if these pieces are copper or bronze without metallurgical analysis. Pollock reports dozens of weights that vary from 90.9 to 100 grains. Outliers include two pieces that weighed 113.4 and 113.9 grains. This is a lovely brown example with just a hint of underlying red. The strike is a bit soft in the centers, but there are no obvious or detracting contact marks. While labeled as a Restrike, there is no evidence of the die rust seen on some later restrikes. (#11667)

**Transitional Shield Reverse Judd-228
MS65 1859 Indian Cent**

- 4662** 1859 Indian Cent, Judd-228, Pollock-272, Snow-PT4, R.1, MS65 PCGS. This is a transitional pattern that combines the standard Indian Head cent obverse with the adopted reverse design of 1860. Struck in copper-nickel with a plain edge. This pattern exists in both business strike and proof formats. This particular piece is a business strike, and shows satiny cartwheel luster on both sides. The strike is bold aside from the top of the shield. Minor left obverse carbon determines the grade. (#11932)

**Gem Judd-228 1859 Indian Cent
Transitional Shield Reverse**

- 4663** 1859 Indian Cent, Judd-228, Pollock-272, Snow-PT4, R.1, MS65 PCGS. CAC. A popular transitional Indian cent pattern. The obverse has the regular issue 1859 Indian cent obverse design, and the reverse displays the issued 1860 Indian cent reverse. Struck in copper-nickel with a plain edge. A satiny and crisply struck caramel-gold Gem. Only trivial carbon is detected beneath a loupe. (#11932)

**1859 Judd-234 Quarter, PR65
Paquet's Reverse Design**

- 4664** 1859 Quarter Dollar, Judd-234, Pollock-281, Low R.7, PR65 PCGS. The obverse features the regular design for the year; the reverse is a pattern design by Anthony Paquet. It features a perched eagle in a plain field surrounded with Paquet's distinctive tall letters on UNITED STATES OF AMERICA and the denomination QUARTER DOLLAR below. Struck in silver with a reeded edge. Fewer than a dozen examples are believed known of this pattern. The reverse was used in 1858, 1864, and 1865, as USPatterns.com points out. This brilliant, fully struck Gem example displays a number of striation marks in the fields, lending it an interesting texture. (#11958)

PR63+ Brown Judd-240 1859 Half

- 4665 1859 Half Dollar, Judd-240, Pollock-296, R.5, PR63+ Brown PCGS.** The "French Head" portrait, paired with a larger scale version of the cereal wreath design introduced on the dime in 1860. Tall letters in UNITED STATES OF AMERICA are consistent with Paquet's style, although the bust of Liberty is attributed to Longacre. Struck in copper with a reeded edge. Deeply patinated and mildly reflective surfaces exhibit iridescent apple-green and lavender-red shades when rotated beneath a light. Tiny mint-made lint marks and a few delicate hairlines correspond to the grade. (#11974)

**Very Rare Paquet 1859 Half Dollar
Judd-249, Silver, PR63**

- 4666 1859 Half Dollar, Judd-249, Pollock-288, High R.7, PR63 NGC.** The Paquet Liberty Seated obverse. She supports a fasces and a legend-free shield. An olive branch and three arrowheads rest near the base of the shield. Thirteen stars encircle the rim. The reverse depicts the cereal wreath from issued Seated coinage with the denomination inside the wreath expressed in the tall, thin letters typical of Paquet's style. Struck in silver with a reeded edge. Like all known examples, the reverse displays extensive speckles of die rust, as made. Well struck and nicely mirrored with attractive peripheral ocean-blue and tan-gold toning. (#12000)

**1861 GOD OUR TRUST Half Dollar
Judd-277, Select Proof**

- 4667 1861 Half Dollar, Judd-277, Pollock-326, 328, Low R.7, PR63 PCGS.** The design is similar to the regular issue Seated half dollar, but GOD OUR TRUST is placed within a scroll above the eagle. Struck in silver with a reeded edge. There are two variants of this scarce pattern, the difference depending on the placement of the date in the exergue. This particular piece shows the 1 in the date below the shield point rather than shifted to the left. Probably fewer than a dozen of each are known. Each side of this piece has bright centers with rings of russet and blue around the margins. The strike is full, and there are a few light, wispy hairlines in the fields that limit the grade. (#12100)

**1862 Copper With Motto Half Dollar
Judd-294, PR63 Brown**

- 4668 1862 Half Dollar, Judd-294, Pollock-352, Low R.7, PR63 Brown NGC.** The design is similar to that used on regular issue 1862 Seated half dollars, except that a scroll with the motto GOD OUR TRUST is present above the eagle's head. Struck in copper with a reeded edge. At least a dozen examples are believed known today of this pattern. This piece displays rich blue patina intermixed with brown on each side. The fields are deeply reflective, and the design fully struck throughout. (#60444)

**Washington 1863 Two Cent Piece
PR64 Brown, Judd-305**

- 4669 1863 Two Cents, Judd-305, Pollock-370, R.4, PR64 Brown PCGS. CAC.** A patriotic portrait of Washington faces right with GOD AND OUR COUNTRY around and the date and two stars below. Reverse with the denomination 2 CENTS centered in a wheat wreath with UNITED STATES OF AMERICA around. The word CENTS is curved dramatically. Struck in copper with a plain edge. A sharply struck chocolate-brown near-Gem with an undisturbed and attractive appearance. (#60460)

**1863 Three Cent Bronze Pattern
Judd-319, PR66 Red and Brown**

- 4670 1863 Three Cents, Judd-319 Restrike, Pollock-384, R.5-6, PR66 Red and Brown NGC.** The obverse is similar to the Braided Hair large cent design that was discontinued seven years earlier, only with much smaller digits in the date. The reverse has a design similar to the issued 1864 two cent piece, but the wreath is smaller and the legend UNITED STATES OF AMERICA is larger. Struck in bronze with a plain edge. Approximately 50-60 pieces are believed extant of this experimental striking. This piece retains considerable original mint red on each side. Only the occasional dab of blue or brown interrupts the bright mint luster, especially on the reverse. The surfaces are exceptionally well preserved and the fields are nicely mirrored. (#70476)

**1863 GOD OUR TRUST Half in Copper
Judd-339, PR65 Brown**

- 4671 1863 Half Dollar, Judd-339, Pollock-411, Low R.6, PR65 Brown NGC.** The obverse die is from the Seated Liberty design used for regular-issue coinage in 1863. The reverse die features the standard perched eagle motif with the addition of a scroll with the motto GOD OUR TRUST inscribed. Struck in copper with a reeded edge. It is estimated that around two dozen examples are known in copper and a similar number in silver. This fully struck example has moderately reflective fields with considerable brown-blue patina over each side. (#60501)

**1863 Silver With Motto Half
Judd-340, Toned PR64**

- 4672 1863 Half Dollar, Judd-340, Pollock-412, Low R.6, PR64 NGC.** Virtually identical to the adopted design with the motto GOD OUR TRUST set directly into the upper reverse field with no banner or scroll. Struck in silver with a reeded edge. Struck by George Eckfeldt for Governor Pollock in 1863. The fields flash brightly through the streaks and dabs of gray, blue, and russet toning that is evenly distributed from side to side. Sharply struck. (#60502)

**1864 With Motto Half in Copper
Judd-392, PR65 Cameo Red and Brown**

- 4673 1864 Half Dollar, Judd-392, Pollock-460, R.7, PR65 Cameo Red and Brown NGC.** Struck from the regular obverse die, and paired with the regular reverse die of 1866 with the motto above the eagle. Struck in copper with a reeded edge. Only a dozen or so pieces are known with this obverse/reverse combination. A similar number are known in silver, but only 2-3 examples are known in aluminum and nickel. The exceptionally deep mirrors on this piece are made possible by the presence of most of the original red luster. Just the faintest hint of blue is seen. Excellent value. (#70563)

**1865 Two Cent Copper-Nickel Dies Trial
Judd-409, PR64**

- 4674 1865 Two Cents, Judd-409, Pollock-478, High R.6, PR64 PCGS.** Termed a "trial piece struck from regular dies" by Judd, this is the standard two cent design, but struck in copper-nickel with a plain edge. Pale apricot, green-gold, mint, and blue shadings appear in various places on this near-Gem specimen with diffuse mirrors and scattered minor spotting. Population: 7 in 64, 2 finer (4/12). (#60588)

Copper 1866 Motto Seated Dollar, Judd-541

- 4675 1866 Dollar, Judd-541, Pollock-606, Low R.6 — Obverse Scratched — NGC Details. Proof.** 25.3 gm. NGC lists the alloy as 100% copper. A trial piece struck from regular issue reeded edge Motto Seated dollar dies. Fully struck and unworn with deep mahogany-brown toning. Scratches on the left and right obverse field emerge when the coin is studied beneath a loupe. (#60739)

**1867 Longacre Indian Head Five Cent, PR64 Brown
Struck in Copper, V on Shield Reverse, Judd-564**

- 4676 1867 Five Cents, Judd-564, Pollock-625, High R.7, PR64 Brown PCGS.** The James B. Longacre Indian Princess Head design appears on the obverse. Liberty faces left wearing a headdress with long feathers curving down and back, four stars at the front, a trailing ribbon reading UNION & LIBERTY. The date 1867 is in exergue, with LONGACRE F. below the bust and UNITED STATES OF AMERICA around the margin. The reverse is the "V on Shield" die according to Judd, a V placed over a shield similar to that on the obverse of the Shield nickel but rounder, with IN GOD WE TRUST at the top and terminal volutes top and bottom. Struck in copper with a reeded edge.

Less than a half-dozen are known of this rare pattern, per USPatterns.com; only the Judd-561 and Judd-562 patterns appear with any regularity, and we note that the Lemus/Queller Collection (Heritage, 1/2009) went from Judd-561 to Judd-566. The LONGACRE F. may have been inspired by the C. GOBRECHT F. of the 1836 Gobrecht dollars. This medium-brown near-Gem displays trouble-free surfaces and good eye appeal. A tiny patch of carbon appears on the lower reverse inside the shield. Population: 1 in 64 Brown, 0 finer (4/12). (#60774)

**1867 Five Cent Pattern in Nickel
Judd-570, PR65 Cameo**

- 4677 1867 Five Cents, Judd-570, Pollock-638, 640, R.5, PR65 Cameo NGC.** A bust of Liberty wearing a coronet and facing left dominates the obverse design. UNITED STATES OF AMERICA is around the periphery with the date below. The reverse shows 5 CENTS centered within a laurel wreath with the motto IN GOD WE TRUST at the top. Struck in nickel with a plain edge. Mostly brilliant with deeply mirrored fields. The devices are nicely frosted and present strong cameo contrast on each side. (#60780)

**1867 Judd-591 Half Dollar, PR66 Red and Brown
Regular Dies, Copper Impression**

- 4678 1867 Half Dollar, Judd-591, Pollock-655, High R.7, PR66 Red and Brown PCGS.** Ex: Simpson. The obverse and reverse are from the regular dies for the 1867 half dollar. Struck in copper with a reeded edge. About a half a dozen pieces are known. As with many off-metal strikings that have previously been considered as die trials pieces, it appears that these pieces were actually struck for inclusion in complete copper sets for the year. This is a lovely example that has a pronounced two-toned appearance depending on how it is angled in the light. Turned one way the surfaces are deep blue, turned another they are predominantly mahogany. A few dabs of original, unfaded mint red can still be seen around the peripheries. Close inspection reveals a few small contact marks, but as one can assume from the PR66 grade, none are worthy of individual mention. (#70803)

**1868 'Five Cent Nickel,' PR66 Ultra Cameo
Judd-633, Similar to the Three Cent Nickel
Finer Than the Lemus-Queller Example**

- 4679** 1868 Five Cents, Judd-633, Pollock-705, R.5, PR66 Ultra Cameo NGC. The overall design is similar to the circulating three cent nickel, in larger format and with a V in the central reverse to indicate a five cent piece. But Liberty has a small star on her coronet, and the date 1868 is in exergue. The reverse has a wreath with small Maltese cross atop, surrounded by a scroll bearing IN GOD WE TRUST. Struck in nickel with a plain edge. Two obverse die varieties exist, High Date (Pollock-705, as here) and Low Date (Pollock-704). This is a stunning silver-white example with lots of vibrant contrast. The Lemus Collection, Queller Family Collection Part Two example that we handled in January 2009 was a PR65 Cameo specimen (lot 1678) which realized \$1,955.
Ex: Fort Worth Signature (Heritage, 3/2010), lot 1943, which brought \$3,450. (#60851)

**The Kosoff-Pittman 1868 Ten Cent Pattern
Judd-647, PR66, Similar to the
Large Cent Design of a Decade Earlier**

- 4680** 1868 Ten Cents, Judd-647, Pollock-720, Low R.6, PR66 PCGS. CAC. *Ex: Pittman.* The obverse features the almost identical design used on large cents from 1843 to 1857, while the reverse is similar except that TEN CENTS is in the center of the wreath. Struck in nickel with a plain edge. The 1 and final 8 in the date are repunched, and the top of a stray letter appears between AM in AMERICA. This earlier die state lacks the die crack above the denomination. A popular pattern due to the enigmatic return of the obsolete large cent obverse design. A well struck and impressively preserved Premium Gem with light ice-blue and pinkish patina.
Ex: ANA Convention sale (Abe Kosoff, 1958), lot 51, where it sold for \$50; John Jay Pittman Collection (Akers, 10/1997), lot 795, where it realized \$5,170; Portland Signature (Heritage, 3/2004), lot 6653; which brought \$4,370; Milwaukee ANA (Heritage, 8/2007), lot 2725, which realized \$5,175; Orlando FUN Signature (Heritage, 1/2008), lot 3594, which garnered \$8,625. (#60865)

**1868 Eagle in Aluminum, PR64 Cameo
Judd-663, Die Trial or Mint Delicacy?**

- 4681** 1868 Ten Dollar, Judd-663, Pollock-736, Low R.6, PR64 Cameo PCGS. CAC. The obverse has a design not far different from the contemporary three cent nickel: bust of Liberty facing left, wearing a coronet inscribed LIBERTY. Around, 13 stars, and below, the date. On the reverse, an ungainly eagle with wings spread symmetrically and tail feathers skewed quite *asymmetrically* clutches three arrows and an olive branch. A ribbon carries the motto IN GOD WE TRUST. Around, the legend UNITED STATES OF AMERICA, and below, the denomination TEN D. Struck in aluminum with a reeded edge. These may have been Mint delicacies but they also could have been real trial strikes, made at a time when aluminum was worth just about as much as gold. This is a sharply struck piece with good contrast and a few light hairlines that define the grade. Excellent eye appeal. (#60881)

**1869 Five Cent Pattern, Judd-684, PR64
Similar to the Contemporary Three Cent Nickel**

- 4682** 1869 Five Cents, Judd-684, Pollock-763, R.5, PR64 NGC. This five cent pattern is reminiscent of the contemporary three cent nickel, but Liberty's coronet has a star, the Roman numeral V replaces the Roman III, and a Maltese cross and a scroll bearing the motto closes the reverse wreath. Struck in nickel with a plain edge. Satiny and untuned with a good strike and a few tiny gray freckles on each side.
Ex: Thompson Collection of US Patterns / Chicago Signature (Heritage, 8/2011), lot 5251. (#60909)

**1869 Judd-696 Ten Cents, PR66
Standard Silver Series**

- 4683** 1869 Standard Silver Ten Cents, Judd-696, Pollock-775, R.5, PR66 NGC. A Liberty head faces right on the obverse, wearing a Phrygian cap with three large stars. The reverse, the only Standard Silver dime die of the year, reads STANDARD SILVER around the upper edge, with 10 CENTS inside a wreath of oak and laurel. Struck in silver with a reeded edge. Deep blue dominates the obverse, while the reverse has even reddish patina. Both sides are deeply reflective, and there are no obvious contact marks. (#60921)

**Gem Proof 1869 Standard Silver Quarter
Judd-732, Struck in Aluminum**

- 4685** 1869 Standard Silver Quarter Dollar, Judd-732, Pollock-813, Low R.7, PR65 NGC. CAC. Standard Silver design with Liberty wearing a diadem and a scroll with IN GOD WE TRUST below, the reverse reads STANDARD SILVER 1869 around the rim with 25 CENTS in the center of an oak and laurel wreath. Struck in aluminum with a plain edge. Light pearl-gray toning visits this undisturbed Gem. Well struck aside from softness near IN. A few trivial retained laminations, as made, are all that limit the grade. Certified in a former generation holder. (#60959)

**1869 Judd-714 Ten Cent, PR64
Seated Liberty Obverse
Date on Reverse**

- 4684** 1869 Ten Cents, Judd-714, Pollock-793, Low R.7, PR64 PCGS. The obverse features the regular issue Liberty Seated design without the date. The reverse is inscribed SIL. 9 NIC. 1 and the date, 1869 below a solid line. Struck in nickel composition with a reeded edge. According to David Cassel, who has made an extensive study of Postage Currency and related patterns, the silver-nickel alloy as it is stated on the reverse of this pattern are incompatible metals and do not alloy. SEM-EDX testing on several Judd-714 pieces has shown them to be struck in the standard 75% copper, 25% nickel alloy in use at the time. Cassel attributes these pieces as Judd-715a. Pale champagne toning over pewter-gray surfaces. Very sharply struck and yet only slightly reflective. (#60939)

**Judd-744 1869 Standard Silver Half
PR62 Red and Brown Cameo**

- 4686** 1869 Standard Silver Half Dollar, Judd-744, Pollock-825, Low R.7, PR62 Red and Brown Cameo NGC. Liberty faces right and wears a cap ornamented by two stars. The reverse has the date, STANDARD SILVER, and the denomination, with a wreath of oak and laurel leaves separating the legends. Struck in copper with a reeded edge. The present well struck specimen displays rich apple-green and fire-red toning. The flashy fields exhibit occasional patches of wispy hairlines. (#70972)

**1869 Standard Silver Half, PR63 Brown
Judd-745, Plain Edge, Copper**

- 4687** 1869 Standard Silver Half Dollar, Judd-745, Pollock-826, Low R.7, PR63 Brown PCGS. CAC. Liberty faces right, and wears a cap ornamented by two stars. The reverse features a wreath of oak and laurel leaves, with 50 CENTS tightly fit within the wreath and the date depicted below. The borders exhibit the usual legends for the Standard Silver series. Repunching is noted on the initial B, the L in LIBERTY, and the lower left reverse star. Struck in copper with a plain edge. The obverse is cherry-red with hints of forest-green. The reverse displays deep aquamarine and ruby-red patina. One small obverse spot is at 3 o'clock, and portions of the motifs are incompletely brought up. (#60973)

1869 Cameo PR64+ Standard Silver Half, Judd-754

- 4688** 1869 Standard Silver Half Dollar, Judd-754, Pollock-838, R.5, PR64+ Cameo PCGS. A bust of Liberty wearing a headband inscribed LIBERTY and ornamented with a star faces right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse has 50 CENTS centered in a wreath of oak and laurel with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. The fields are highly mirrored and there is noticeable mint frost over the devices, yielding the Cameo designation. Each side shows just the slightest trace of golden patina. Very close to a Gem grade. (#60984)

1870 Standard Silver Quarter
Judd-888, Toned PR66

- 4689** 1870 Standard Silver Quarter Dollar, Judd-888, Pollock-987, R.5, PR66 NGC. A bust of Liberty wears a cap ornamented with three stars and faces right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse reads 25 CENTS 1870 in the center and is surrounded by a wreath of cotton and corn. Struck in silver with a reeded edge. A splendid, richly toned pattern with shades of rose, deep blue, and gray on each side.
Ex: Long Beach Signature (Heritage, 9/2008), lot 3447. (#61132)

Gem Proof 1870 Standard Silver Quarter
Judd-889, Struck in Silver

- 4690** 1870 Standard Silver Quarter Dollar, Judd-889, Pollock-988, Low R.7, PR65 PCGS. A bust of Liberty wearing a cap ornamented with three stars facing right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse reads 25 CENTS 1870 in the center and is surrounded by a wreath of cotton and corn. Struck in silver with a plain edge. About a dozen examples are believed known of this Standard Silver variant, which was also struck in copper, nickel, and aluminum. A moderately mirrored pearl-gray Gem with a full strike and a pair of tiny strike-throughs (as made) near the profile. (#61133)

Copper 1870 Standard Silver Half
Judd-929, PR64 Red and Brown Cameo

- 4691** 1870 Standard Silver Half Dollar, Judd-929, Pollock-1034, High R.7, PR64 Red and Brown Cameo NGC. The obverse portrays a seated figure of Liberty with shield and olive branch. A scroll is draped over the shield with the word LIBERTY inscribed in raised letters; a Liberty pole is positioned behind the shield. Thirteen stars surround the central devices, with the date in the exergue. The reverse features the denomination 50 / CENTS encircled by an agricultural wreath, with the word STANDARD spelled out above. Struck in copper with a reeded edge. Generally deep cherry-red with gunmetal-blue present on the open obverse field. Well struck and impressively mirrored. Retained laminations, as made, are noted on the reverse near the left ribbon end and the CEN in CENTS. (#71174)

Copper 1870 Standard Silver Half, Judd-930
PR64 Red and Brown Cameo

- 4692** 1870 Standard Silver Half Dollar, Judd-930, Pollock-1035, High R.7, PR64 Red and Brown Cameo NGC. This William Barber design features Liberty seated and facing left, surrounded by 13 stars. She steadies a shield with her right hand, while her left hand holds an olive branch. A Liberty pole is partly concealed behind the shield. A scroll crossing the shield features a raised inscription of LIBERTY. The date is centered below. The reverse has a wreath of corn and cotton, with 50 CENTS inside and STANDARD above. This muling of pattern Seated and Standard Silver dies led to the absence of UNITED STATES OF AMERICA. Struck in copper with a plain edge. Precisely struck and prominently mirrored with predominantly peach-red surfaces, though glimmers of blue-green are noted at the margins. Aqua freckles on the upper reverse rim identify the present piece. (#71176)

**William Barber 1870 Seated Half Pattern
PR66, Judd-933**

- 4693 1870 Half Dollar, Judd-933, Pollock-1039, Low R.7, PR66 NGC.** William Barber's Seated Liberty design, interesting for its placement of the shield behind her legs which is supported with her right hand. She holds an olive branch in her left. A liberty pole is behind the shield and a scroll crosses the shield and is inscribed LIBERTY in incused letters. The reverse is the type used for regular issue Seated halves. Struck in silver with a reeded edge. Deep lavender-gray surfaces transform into cherry-red and electric-blue once rotated beneath a light. A fully struck Premium Gem. (#61179)

**PR65 Brown 1870 Half Dollar Pattern in Copper
Judd-936, Iridescent Surfaces, Ex: Lemus**

- 4694 1870 Half Dollar, Judd-936, Pollock-1042, High R.6, PR65 Brown NGC.** Ex: Lemus Collection. A seated figure of Liberty faces left on the obverse with 13 stars surrounding. The date is below, a free-standing Liberty pole is behind, and LIBERTY is inscribed on a scroll crossing a small shield. Paired with a regular-dies Seated half reverse, struck in copper with a plain edge. The same design as Judd-935, but with a plain edge that was produced by a smooth, unreeded collar. Like Judd-935, about 15 or 16 examples of this copper pattern are known.

A remarkable display of medium green and gold iridescence appears over the fully and deeply mirrored fields on both sides of this Gem proof. A few tiny spots are evident but are of little consequence. The obverse and reverse design motifs are fully lustrous, creating an excellent cameo appearance.

Ex: *Stack's* (8/1971), lot 466; *Lemus Collection / Orlando FUN Signature* (Heritage, 1/2009), lot 1762; *Milwaukee Central States Signature* (Heritage, 4/2010), lot 3394. (#61182)

**1870 Seated Liberty Half in Copper
Judd-936, Exceptional PR65 Red Cameo**

- 4695 1870 Half Dollar, Judd-936, Pollock-1042, R.7, PR65 Red Cameo NGC.** William Barber's seated figure of Liberty faces left on the obverse. Thirteen stars surround Liberty with the date below. Liberty supports a shield with her right hand, and holds an olive branch in her left hand. A liberty pole is behind the shield, a scroll crosses the shield and is inscribed LIBERTY in raised letters. The reverse is the type used for regular issue Seated halves. Struck in copper with a plain edge. Over a dozen examples are known, according to USPatterns.com, but this is the only Red Cameo Gem certified by either service (4/12). The mint luster is undimmed by the passage of the years and the fields are brightly reflective. Set against the mirroring in the fields is substantial mint frost on the devices. Exceptionally attractive and sure to interest many pattern collectors. (#81182)

**1870 Standard Silver Half in Silver
Judd-940, Gem Proof**

- 4696 1870 Standard Silver Half Dollar, Judd-940, Pollock-1053, 1067, High R.6, PR65 PCGS.** Liberty faces left and wears a cap with two large stars and a ribbon inscribed LIBERTY in incuse letters. The legend UNITED STATES OF AMERICA arcs above, with a scroll inscribed IN GOD WE TRUST below. The reverse features the denomination 50 / CENTS / 1870 encircled in an agricultural wreath, with the word STANDARD above. Struck in silver with a plain edge. This is the Pollock subvariety with the end of Liberty's cap beneath the second S in STATES. Less than a dozen pieces are believed extant of this silver striking. The fields are brightly reflective and enhance the cobalt-blue and red toning seen over each side. (#61186)

**Cameo Gem Proof Judd-943 Aluminum
1870 'Standard Silver' Half**

- 4697** 1870 Standard Silver Half Dollar, Judd-943, Pollock-1057, 1071, R.8, PR65 Cameo PCGS. CAC. The Standard Silver reverse paired with a Liberty cap-and-stars portrait on the obverse. For the specific set of dies, the tip of the cap is under the ES in STATES. Struck in aluminum with a reeded edge. The experts at uspatterns.com suggest "2 or 3 known" as a population for this aluminum delicacy, though perhaps a couple more than that exist. This is the sole finest Cameo example certified by a major service (1/12), though of course it has little competition for the title. Well-preserved aluminum surfaces are minimally toned with excellent contrast. The reverse is rotated slightly counterclockwise relative to "coin turn." (#61189)

**1870 Judd-944, Pollock-1072 Half Dollar
Standard Silver Design
PR65 Cameo**

- 4698** 1870 Standard Silver Half Dollar, Judd-944, Pollock-1072, High R.7, PR65 Cameo PCGS. CAC. Ex: Denali Collection. On the obverse, Liberty faces right and wears a cap that is ornamented with two stars, a scroll is below with IN GOD WE TRUST on it, and around most of the periphery is UNITED STATES OF AMERICA. The tip of Liberty's cap is under the E of STATES. On the reverse 50 CENTS 1870 is in the center and is surrounded by a wreath of cotton and corn with STANDARD at the top. Struck in aluminum with a plain edge. Although designated as High R.7, this pattern variety is possibly a full R.8 with three or fewer examples known. This Gem Cameo proof has brilliant bluish-gray fields and lighter gray devices. (#61190)

**Choice Proof 1870 Standard Silver Half
Judd-951, Reeded Edge, Silver**

- 4699** 1870 Standard Silver Half Dollar, Judd-951, Pollock-1094, R.5, PR64 PCGS. The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in silver with a reeded edge. Dusky almond-gold and stone-gray toning graces this flashy and lightly hairlined Choice pattern. The strike shows only slight incompleteness at the obverse center. (#61197)

**1870 Standard Silver Half
Judd-957, Deeply Toned PR66**

- 4700** 1870 Standard Silver Half Dollar, Judd-957, Pollock-1108, R.5, PR66 PCGS. CAC. A bust of Liberty faces right and is surrounded by UNITED STATES OF AMERICA. She wears a headband inscribed LIBERTY, and has a large star on her forehead. IN GOD WE TRUST is below on a banner. The reverse features 50/CENTS/1870 within a wreath of cotton and corn. STANDARD is centered above the wreath. Struck in silver with a reeded edge. Deep blue is the dominant color over each side with a reddish center on the reverse. When angled properly the bright mirrors in the fields flash strongly. (#61203)

**1870 Standard Silver Half Struck in Copper
Judd-960, PR63 Brown, Bright Aqua Color**

- 4701** 1870 Standard Silver Half Dollar, Judd-960, Pollock-1112, Low R.7, PR63 Brown NGC. Standard Silver design showing Liberty wearing a coronet inscribed LIBERTY in raised letters. The reverse reads 50 CENTS 1870 in the center, surrounded by a wreath of cotton and corn. Struck in copper with a plain edge. USPatterns.com estimates that less than a dozen survive. The surfaces display bright aqua coloration over each side with a couple of reddish remnants of the original surface still showing around the margins. A short, shallow staple scratch just above the left side of the scroll on the obverse reveals a narrow streak of raw copper. Ex: St. Louis Central States Signature (Heritage, 5/2005), lot 8324. (#61206)

**Delicately Toned Judd-965 Half Dollar
Copper, PR66 Red and Brown**

- 4702** 1870 Standard Silver Half Dollar, Judd-965, Pollock-1061, R.7, PR66 Red and Brown NGC. The obverse with Liberty in exaggerated Phrygian cap with two stars visible, UNITED STATES OF AMERICA around above, IN GOD WE TRUST on scroll below. The reverse has the usual Standard Silver appearance with wreath, 50 / CENTS within, date below. Struck in copper with a reeded edge. Only mildly contrasted but decidedly reflective, this coin has great appeal thanks to delicate partial patina. Considerable copper-pink and peach color remains, though washes of lavender, blue, and violet grant this well-preserved Standard Silver pattern added eye appeal. (#71211)

**Copper 1870 Standard Silver Half
Judd-978, PR64 Red and Brown**

- 4703** 1870 Standard Silver Half Dollar, Judd-978, Pollock-1090, R.7, PR64 Red and Brown PCGS. CAC. A bust of Liberty faces right on the obverse with the motto IN GOD WE TRUST on a scroll below. Liberty wears a cap that is ornamented with two stars, and a ribbon that crosses her shoulder is inscribed with LIBERTY in raised letters. The initial B is seen within the folds of the ribbon behind Liberty's cap, and the legend UNITED STATES OF AMERICA is at the upper periphery. On the reverse, the denomination 50 CENTS is expressed within a wreath of oak and laurel. The date 1870 is below, the word STANDARD is above. Struck in copper with a plain edge. This is a scarce Standard Silver series with only a half dozen or so believed known of the six variants. A significant presence of original mint red is seen on each side, and the fields are brightly reflective. Scattered carbon spotting on the obverse is the only grade limitation. (#71224)

**1871 Standard Silver Dime Struck in Copper
Judd-1081, Gem Red Proof**

- 4704** 1871 Standard Silver Ten Cents, Judd-1081, Pollock-1217, R.7, PR65 Red NGC. This Red Gem proof dime is of the popular James B. Longacre Indian Princess design. Liberty is seated on a rock facing left, a globe with LIBERTY across it is behind her. She holds a Liberty pole and cap, and two staffs support the U.S. flag behind her. A ring of stars appears at the rim, date 1871 below. The reverse has an agricultural wreath with 10 CENTS in the center and STANDARD above. Struck in copper with a reeded edge. This Gem Red proof has mostly orange-red color with a bit of mellowing in the central obverse and a few minor flecks that appear under a loupe. Census: 2 in 65 Red, 0 finer (5/12). (#81340)

**1871 Indian Princess Ten Cent, Judd-1085
Struck in Copper, PR64 Brown**

- 4705** 1871 Ten Cents, Judd-1085, Pollock-1221, High R.6, PR64 Brown PCGS. The obverse bears the Longacre Indian Princess design, with 13 stars around the margin. The reverse is that of the regular-issue Seated dime. Struck in copper with a reeded edge. This near-Gem proof bears markedly attractive mingled aqua and gold tints, and the reverse blurriness is on the holder. Attractive for the grade. Population: 3 in 64 Brown, 0 finer (5/12). (#61344)

**PR67 Red and Brown Cameo 1871 Quarter in
Copper, Judd-1102, Remarkable Appeal**

- 4706** 1871 Quarter Dollar, Judd-1102, Pollock-1238, R.7, PR67 Red and Brown Cameo NGC. The regular dies for the Seated quarter of the year, struck in copper with a reeded edge. This high-grade "Red and Brown" coin actually displays generous mint orange color ceding gradually to deeper violet and blue, a remarkably attractive piece, fully struck throughout and distraction-free. (#71361)

**1871 Judd-1167 Three Dollar, PR63 Brown
Regular Dies Copper Impression**

- 4707** 1871 Three Dollar, Judd-1167, Pollock-1309, High R.7, PR63 Brown PCGS. Regular die trials issue for the three dollar gold piece. Struck in copper with a reeded edge. According to the USPatterns.com website, "Although these are described as regular die trial pieces in the standard references, the off-metal 'trials' of this year were deliberately made for sale to collectors." Nevertheless, this is a rare die trial with only six or so pieces believed known. Die trials were struck of all the gold denominations in 1871 in copper, aluminum, and nickel. This is a deeply patinated example that is predominately blue with faint accents of red on the obverse. (#61429)

**Gem Red Proof 1873 Quarter Pattern
Struck in Copper, Judd-1270, R.7
Marvelous Eye Appeal**

- 4708 1873 Quarter Dollar, Judd-1270, Pollock-1412, R.7, PR65 Red PCGS.** The Judd-1270 is struck from the regular-issue (Closed 3) dies for the Seated quarter, but in copper with a reeded edge. Probably fewer than a half-dozen survive in *any* grade. Rather than die trials, these pieces were probably part of a long list of patterns sold over decades from Mint personnel as delicacies to the well-connected, a practice that peaked under the two Mint directorships of Henry R. Linderman (1867-69, 1873-78) but continued through 1885. This is a stunning orange-red Gem proof with considerable contrast between the darker devices and reflective, bright fields. There is absolutely no trace of carbon or other distraction, and the eye appeal is marvelous. (#81555)

**1875 Dime in Copper, PR64 Brown
Rare Judd-1390 Pattern**

- 4709 1875 Ten Cents, Judd-1390, Pollock-1533, High R.7, PR64 Brown PCGS. CAC.** A rare off-metal dies trial of the Seated Liberty dime, struck in copper with a reeded edge. USPatterns.com states while these are described as trials striking, they are more likely off-metal pieces struck for collectors. Nevertheless, these pieces are very rare. It is estimated that only three or four examples are known in both copper and aluminum. It appears that this is the only copper striking we have offered at public auction in the past 18 years. While labeled as Brown, the surfaces of this piece are bright blue overall with an accent of red around the devices. The fields are bright and luminous, enhancing the color and giving the coin added vibrancy. A few tiny planchet flakes are seen on each side, but the only pedigree identifier of note is a spot on the lower shield stripes. (#61697)

**1879 Judd-1602 'Morgan Half Dollar'
Copper, PR66 Red and Brown**

- 4710** 1879 Morgan Half Dollar, Judd-1602, Pollock-1797, R.7, PR66 Red and Brown NGC. CAC. The obverse is similar to that used on regular issue 1879 Morgan dollars. The reverse depicts an eagle with spread wings perched atop an olive branch and a bundle of arrows. The legend UNITED STATES OF AMERICA is at the top, the denomination HALF DOLLAR is at the bottom, and the motto IN GOD WE TRUST arches around and below the eagle's portrait. Struck in copper with a reeded edge. Olive-gold and blue-green tints grace this well-preserved example. The fields have a great gleam, and frosty accents on the devices lend a hint of contrast. Great eye appeal for this very rare issue with a popular obverse motif. (#71980)

**Judd-1606 1879 Silver Dollar in Copper
PR64 Brown**

- 4711** 1879 Dollar, Judd-1606, Pollock-1802, Low R.7, PR64 Brown PCGS. The obverse portrait is a modified Washlady design with Coiled Head influences. Liberty's hair is tightly coiled with a ribbon at the back, and she wears a band in her hair with incused LIBERTY. The reverse shows an eagle on a perch surrounded by a wreath and irregularly spaced and misaligned statutory legends. The eagle holds an olive branch and a bundle of arrows. Struck in copper with a reeded edge. A fully struck chocolate-brown near-Gem with smooth surfaces aside from a single thin mark in front of the lips. (#61984)

**1879 Morgan Dollar in Copper
Judd-1612, PR63 Brown**

- 4712** 1879 Morgan Dollar, Judd-1612, Pollock-1808, Low R.7, PR63 Brown PCGS. This pattern Morgan dollar has the adopted obverse with a reverse that displays a broad and imposing "shield type" eagle with spread wings. Struck in copper with a reeded edge. The eagle on the reverse of this pattern was proposed to replace the adopted eagle, that some termed "scrawny." The surfaces are uniformly lackluster from the depth of the brown patina, and a deeper brown stain is noted on the right side of the obverse. Sharply struck, the surfaces show no overt signs of contact. (#61990)

**Unique 1879 Flowing Hair Stella Variety
Judd-1636a, PR60 Gilt
Ex: H.P. Smith, 1906**

- 4713 1879 Flowing Hair Four Dollar, Judd-1636a Gilt, Pollock-1837, Unique(?), PR60 NGC.** This is the apparently unique variant of the 1879 Flowing Hair stella. The design differences are listed and the coins depicted side-by-side on the USPatterns.com website. This design is described as, “with the point of Liberty’s neck pointing to the ‘1’ in the date and the pearl pointing to the first 7 is known by only a single gilt copper example and is listed by Pollock as J1636A/P1837. This obverse is probably the first die produced.”

It is sometimes debated whether patterns were gilt in the Mint or outside. We know definitively that this piece was gilt outside the Mint as it was listed as a copper piece in the H.P. Smith Sale in 1906. Since that time it has been cleaned and three prominent milling marks are located on the neck of Liberty which identify the coin.

It is difficult to overstate the rarity and importance of this design variant. All stellas are rare and exceptionally popular coins. This piece goes one step further. The design elements are placed differently from a normal stella and provide the advanced collector a unique opportunity.

Ex: H.P. Smith Sale (Chapman Brothers, 6/1906), lot 1447, at that time copper; Rio Rancho (Superior, 10/1974), lot 135; ANA Auction (NERCA, 7/1979), lot 1357; Western Reserve Historical Society Auction (Kagin’s, 3/1985), lot 1591. (#82015)

**1880 Goloid Metric Dollar in Copper
Judd-1652, PR63 Brown**

- 4714 1880 Goloid Metric Dollar, Judd-1652, Pollock-1852, High R.6, PR63 Brown PCGS.** On the obverse the head of Liberty faces left with E PLURIBUS UNUM above and the date below. The reverse has the statutory requirements for a goloid dollar in the center, surrounded by a circle of 38 stars. Outside the circle of stars is GOLOID METRIC DOLLAR DEO EST GLORIA, which is in turn surrounded by UNITED STATES OF AMERICA 100 CENTS. Struck in copper with a reeded edge. According to USPatterns.com “slightly over a dozen [are] known.” This piece has uniformly brown surfaces and the strike is strong throughout, the only exception being on the highest portions of Liberty’s curls. (#62037)

**Deep Cameo PR66+ Judd-1710
1883 Liberty Nickel Pattern**

- 4715 1883 Liberty Head Five Cents, Judd-1710, Pollock-1914, R.5, PR66+ Deep Cameo PCGS. CAC.** The obverse is similar to that on regular issue 1883 Liberty nickels, but UNITED STATES OF AMERICA substitutes for 13 stars around the periphery. The reverse reads 50 N. / 50C. within a wreath of corn and cotton, FIVE above and CENTS is below. Struck in nickel with a plain edge. This precisely struck high grade pattern is untuned with the appearance of aluminum alloy. Void of post-strike detractors. The margins display minor strike-throughs, as produced. (#62127)

**Zinc-Plated Steel 1942 Pattern Cent
Judd-2054, MS62**

- 4716** 1942 Cent, Judd-2054, Pollock-2074, High R.7, MS62 PCGS. This wartime variety was part of an effort to replace the copper in the cent alloy with a less-critical metal. The obverse motif is borrowed from a KM-198 Columbia two centavos. The reverse wreath is from a Baker-155 Washington medalet. Patterns were produced in various materials, but the present alloy was the one used for 1943 cent coinage. Struck in zinc-coated steel with a plain edge. Nicely struck and unabraded with a vertical roller mark (as made) behind Liberty's eye and one small spot each on the cheek and the second S in STATES. (#62401)

GOLD DOLLARS

- 4717** 1849 No L MS63 NGC. The widely repunched star pair beneath the bust identifies the No L variety, even before the truncation is checked for the presence of Longacre's initial. This bright apricot-gold piece is lustrous, and attractive. The upper reverse features bold dies cracks. (#7501)

**1849 No L, Open Wreath Gold Dollar, MS66
Top-Notch First-Year Type**

- 4718** 1849 No L MS66 PCGS. Open Wreath, two widely repunched stars below the bust, one near the lower hairbun. The frosty greenish-gold surfaces are fully struck on this Premium Gem first-year issue, like the double eagle created due to an excess of newly mined California gold. Only tiny ticks preclude an even finer grade. A super example for a first-year type set. Population: 8 in 66, 2 finer (5/12). (#7501)

**1849 No L Gold Dollar, MS67
Flashy Fields, Fully Struck**

- 4719** 1849 No L MS67 NGC. While some writers estimate the mintage of this first-issue gold dollar at around 1,000 circulation strikes, David Bowers (2011) suggests that the number is 10,000 or more. Whatever the original mintage, certified population data indicate that the majority of extant specimens are in the Mint State levels of preservation, which is not surprising as large numbers were saved for their novelty as the first year of the new denomination.

While fairly easily located through near-Gem, Gems and Premium Gems are scarce, and higher-grade examples are rare. Heavily basined dies produced noticeable reflectivity on this Superb Gem piece, especially on the obverse. Bright yellow-gold surfaces display occasional flecks of red and lilac patina, yield great luster, and are devoid of any obvious defects. The design elements exhibit sharp definition. Census: 4 in 67, 2 finer (4/12). (#7501)

- 4720** 1849-O Open Wreath MS62 PCGS. **Variety 1.** The ME in AMERICA is clearly repunched. A caramel-gold example of the sole Open Wreath New Orleans issue. The strike is crisp aside from minor inexactness at the centers. No marks are consequential to the grade. (#7508)

**MS62 1850-C Gold Dollar
Condition Census Quality**

- 4721 1850-C MS62 PCGS Secure. CAC. Variety 1.** Among the finest known examples of this low mintage (6,966 pieces) Charlotte issue. Both sides are fully struck, uncommon for the remote branch mint facility, although the '50-C gold dollar was one of its better-made issues. The apricot-gold and lime-green surfaces are mildly prooflike and are devoid of mentionable marks. For those who wish to track appearances of high grade pieces, we note a pinpoint carbon spot at the 1 o'clock point of the 11 o'clock star. The pedigree of the current lot is unknown. Population: 5 in 62, 1 finer (4/12). (#7510)

**Superb Gem 1851 Gold Dollar
Likely Struck From California Gold**

- 4722 1851 MS67 NGC.** This fully struck and highly lustrous Superb Gem has frosty yellow-gold color with tending toward light green. It is a well-made example with exceptional aesthetic appeal. A tiny die bulge near the forecurl attests to the late die state, as do minor die cracks at the lower left part of the obverse. Nearly vertical striae are barely seen in the fields on both sides, a feature that is only visible with magnification. Struck during the height of the California Gold Rush with a strong possibility that this piece was actually coined from gold mined in that region. Census: 4 in 67, 3 finer (5/12).
Ex: FUN Signature (Heritage, 1/2007), lot 3350; Chicago Signature (Heritage, 8/2011), lot 7404. (#7513)
- 4723 1851-C AU53 NGC. Variety 1.** The reverse die crack through the tops of F AM identifies this variety. Luster remains visible on both sides of this green- and orange-gold dollar with faint hairlines and a small mark in Liberty's hair. (#7514)
- 4724 1851-C AU58 NGC. Variety 1.** The die crack between OF and AMERICA indicates the usual die pair for this Charlotte Mint type coin. Original orange-gold luster outlines design elements and there is scant evidence of high point friction. (#7514)
- 4725 1852 MS64 PCGS.** Sharply struck with satiny butter-yellow surfaces. This near-Gem would fit well in a date set or a similarly graded type set. Great eye appeal.
From The Robert Dorsey Smith Collection. (#7517)

1852-C Gold Dollar, MS62
Elusive in All Grades

- 4726 1852-C MS62 PCGS. Variety 2.** This elusive Charlotte issue has a mintage of just 9,434 pieces. Bowers (2011) estimates that fewer than 100 Mint State examples are extant, most of which are in the MS60 to MS61 range. The yellow-gold surfaces of this MS62 specimen reveal a plethora of minute marks, largely unobtrusive. The design features are well brought up, though the second L and A in DOLLAR are soft, as typically seen. Population: 6 in 62, 12 finer (4/12). (#7518)

Type One 1853 Gold Dollar, MS65

- 4727 1853 MS65 NGC.** Luminous copper-gold and apricot surfaces shimmer with frost-satin texture. A pleasing Gem representative of this popular Type One type issue, which has a mintage of more than 4 million pieces and availability even at this lofty level, though finer coins are borderline condition rarities. (#7521)

Gem 1853 Gold Dollar
Popular Type One Issue

- 4728 1853 MS65 NGC.** From a mintage of more than 4 million pieces, the 1853 gold dollar is the most available date of the series in high grade, and an overwhelming favorite of type collectors seeking a Type One example. This sharply detailed Gem exhibits rose-gold surfaces with subtle satiny mint luster. (#7521)
- 4729 1853-C — Improperly Cleaned — NGC Details. AU Details. Variety 1.** The only reverse for 1853-C gold dollars. This lightly cleaned specimen has light wear and minor marks on its yellow-gold surfaces with a slight polished appearance.

Low Mintage 1853-D Gold Dollar
Sole CAC AU55 Example

- 4730 1853-D AU55 PCGS. CAC.** Luster brightens the margins and portrait of this light peach-gold representative. The sole remotely noticeable mark is near a star at 12 o'clock. Dahlonega, Georgia would appear to be an unlikely choice for a Federal Mint, but the location was selected for its proximity to gold mine camps in an era when travel was arduous. Only 6,583 pieces were struck. Population: 16 in 55, 33 finer (4/12). (#7523)

- 4731 1854 Type One MS64 NGC. CAC.** Butter-gold throughout save for a blush of cherry-red on the left-central portion of the reverse. Well struck with dazzling luster and a few wispy field grazes. Certified in a prior generation holder. (#7525)

- 4732 1854-S AU58 NGC.** The 1854-S is the first San Francisco gold dollar, from a low mintage of 14,632 pieces. This well-detailed near-Mint example exhibits lustrous yellow-gold surfaces. Census: 48 in 58, 53 finer (5/12). (#7527)

1854-S Gold Dollar, MS62
First S-Mint Gold Dollar

- 4733 1854-S MS62 NGC.** The 1854-S gold dollar is one of the more available issues from the first year the San Francisco Mint was open. The mintage was 14,632 pieces and Uncirculated examples can occasionally be found. The orange-gold surfaces on this coin are lightly abraded, and the strike is generally well brought up. Census: 19 in 62, 14 finer (5/12). (#7527)

1854 Type Two Gold Dollar, MS62
Well Struck for the Type

- 4734 1854 Type Two MS62 PCGS.** The 1854 Type Two gold dollar, from a relatively large mintage approaching 800,000 pieces, is an available date and a favorite choice of type collectors. The yellow-gold surfaces of this MS62 example are generally well struck, including a full LIBERTY. The usually seen clash marks are visible on both sides. (#7531)

**1855 Type Two Gold Dollar, MS62
An Unclashed Example**

4735 1855 MS62 PCGS. As a Type Two issue, the 1855 is not especially rare. It is, however, a much-in-demand date (along with the 1854), as a representative of the short-lived Type Two design. This example is uncommon as it lacks the die clashing almost always seen on this type. Even orange-gold color is present on each side, and the strike shows slight softness in the center of the reverse. (#7532)

1855 Gold Dollar, Attractive MS62

4736 1855 MS62 NGC. This example of the 1855 Type Two gold dollar displays attractive yellow-gold patina with slightly subdued mint luster. The 8 in the date is weak, but overall the design elements exhibit better definition than usually seen on this issue. Each side reveals the typically seen clash marks. (#7532)

**1855 Type Two Gold Dollar, MS62
Sharply Struck Throughout**

4737 1855 MS62 NGC. This example is uncommonly well struck for the issue, and each side displays bright, lustrous reddish-tinged orange-gold color with a significant presence of lilac also included. The fields show the usual die clashing, but the strike on this piece is especially noteworthy. (#7532)

**1855 Gold Dollar, MS62+
Short-Lived Type Two Design**

4738 1855 MS62+ PCGS. The 1855 gold dollar usually trades as a type coin, like its even more available counterpart from the previous year. This high-end MS62 example exhibits well-detailed design elements, with the often-seen softness on the central reverse. The lustrous surfaces show only minor signs of contact, but some impressive clash marks are visible on both sides. (#7532)

**1855 Gold Dollar, MS62
Deep, Original Color**

4739 1855 MS62 NGC. CAC. Perhaps the unquestioned originality of this piece is what warrants the CAC sticker. This piece has taken on a deep, rich, almost brownish tinged gold color. The fields show the usual clash marks seen on most 1855s, but the central details on the reverse are uncommonly strong. (#7532)

**1855 Gold Dollar, MS62
Popular Type Issue**

4740 1855 MS62 NGC. CAC. This attractive MS62 gold dollar displays a better-than-average strike, but the date and denomination are still lightly impressed, and extensive clash marks are evident on the reverse. The light greenish-gold surfaces exhibit satiny mint luster and show few contact marks for the grade. (#7532)

Select 1855 Gold Dollar
Dramatic Reverse Clash Marks

4741 1855 MS63 PCGS. Always in demand from type collectors seeking an example of the short-lived Type Two design, the 1855 gold dollar is slightly less available than its 1854 counterpart. This well-detailed Select specimen shows dramatic clash marks, especially on the reverse, where the profile is fully visible inside the wreath. The lustrous surfaces show only minor signs of contact. (#7532)

4742 1856-S Type Two — Scratched — Genuine ANACS. The sole San Francisco Type Two issue. This gold dollar has XF details but the straw-gold surfaces are subdued. There are a couple of pin scratches on the portrait but the parallel lines on the central reverse are probably mint-made roller marks, not struck out since they are opposite the high relief portrait. (#7536)

Luminous AU53 1857-C Gold Dollar
Lower-Mintage Issue

4743 1857-C AU53 NGC. Variety 1. Sole die pair for the year, unsurprising given a mintage of just 13,280 pieces. By 1857, the Southeast gold fields were almost played out, and the San Francisco Mint was absorbing much of the Western gold. This is a lightly worn but radiant example of this later Carolina gold issue, wheat-gold with several long, wispy abrasions on and near the portrait. (#7545)

4744 1858-S AU50 PCGS. Lavender and blue hints visit the worn zones on this earlier S-mint gold dollar. Glimmers of yellow-orange gold appear in pools around the obverse lettering. Population: 12 in 50, 45 finer (5/12). (#7550)

4745 1864 AU55 PCGS. The 1864 is a popular, low-mintage date with only 5,900 pieces struck. The surfaces are deep orange-gold and the fields have pronounced die striations. There are a few unfortunate scratches in the fields on each side. (#7563)

4746 1869 MS62 PCGS. A tiny mintage of 5,925 pieces ensures the rarity of the 1869 gold dollar. This well struck example displays rich orange-gold and lime-green patina. The cheek exhibits small marks. Housed in a green label holder. Population: 14 in 62, 38 finer (4/12). (#7568)

4747 1873 Open 3 MS64 PCGS. CAC. The Open 3 is a popular coin in the Type Three series and is frequently found in mint condition. This example has thick, yellow-gold mint luster and few abrasions. Sharply struck. (#7573)

1874 Gold Dollar, MS66+
LIBERTY Mostly Missing

4748 1874 MS66+ PCGS. CAC. The 1874 gold dollar is an available date in the series, from a mintage of 198,800 pieces. This well-detailed, high-end Premium Gem shows only faint vestiges of the first two letters in LIBERTY, as sometimes seen on this issue. The pristine yellow-gold surfaces radiate vibrant mint luster. Population: 55 in 66 (4 in 66+), 32 finer (5/12). (#7575)

4749 1876 MS62 Prooflike NGC. This centennial-year dollar exhibits highly reflective surfaces, though slight softness is noted on the hair. Minor ticks are commensurate with the grade on this flashy gold dollar. (#77577)

4750 1880 MS65 PCGS. This low-mintage example exhibits highly reflective surfaces accented by amazing sunset-orange. This Gem example has nearly unmarked surfaces though a small planchet flaw is noted on the reverse above the O in DOLLAR. (#7581)

1880 Gold Dollar, MS66
Classic Low-Mintage Date

4751 1880 MS66 PCGS. Numismatists have often marveled over the 1880 date, which boasts a minuscule mintage of 1,600 pieces. Despite that low figure, it appears that many pieces were preserved for reasons not wholly clear today, but numismatist Virgil Brand (1862-1926) reputedly owned hundreds of examples. Nonetheless, today's collectors are fortunately able to obtain high-grade examples ideal for any type collection. The present coin is rich gold with a delicate hint of clear rose. (#7581)

Semireflective MS67+ 1880 Gold Dollar

4752 1880 MS67+ NGC. Despite a mintage of just 1,600 business strikes, the 1880 gold dollar is relatively available in Mint State on the denomination's terms, as virtually none of the pieces ever reached circulation. This semireflective Superb Gem has sharp detail and occasional deepening of canary-gold surfaces near the rims. NGC has graded just 16 numerically finer examples (4/12). (#7581)

**1881 Gold Dollar, Reflective MS67
Bright Yellow-Gold Color**

- 4753 1881 MS67 NGC.** The 1881 gold dollar has an impressively low mintage of only 7,620 pieces, but an uncommonly large number were set aside at the time of issue and high-grade examples can frequently be found in auctions. This is an especially impressive piece that has dazzling fields on each side. The strike is strong throughout, and the bright yellow-gold surfaces show no mentionable abrasions. (#7582)

**Superb Gem 1881 Gold Dollar
Sought-After Low-Mintage Date**

- 4754 1881 MS67 NGC.** The 1881 gold dollar claims a low mintage of 7,620 pieces, but some high-quality examples were hoarded by contemporary collectors, making the date somewhat available in high grade today. This sharply detailed Superb Gem displays pristine prooflike surfaces, with tremendous eye appeal. Census: 63 in 67 (1 in 67+), 38 finer (5/12). (#7582)

- 4755 1883 MS65 PCGS.** A magnificent Gem that boasts an exemplary strike and a mark-free appearance. Orange-gold overall with glimpses of sea-green at the borders. Certified in a green label holder. (#7584)

**Reflective 1884 Gold Dollar, MS67
Pristine Surface Preservation**

- 4756 1884 MS67 PCGS.** Reflective surfaces display orange-gold prevailing over accents of lilac on this lovely Superb Gem. The surfaces appear essentially pristine, even under a loupe, putting this piece among the few finest survivors from the original mintage of a bit more than 5,000 circulation strikes. Population: 13 in 67, 5 finer (5/12). (#7585)

**Breathtaking 1887 Gold Dollar, MS68
An Important Condition Rarity**

- 4757 1887 MS68 PCGS. CAC.** Despite the relatively low mintage of 7,500 circulation strikes, the 1887 gold dollar is one of the most common issues for the Indian Princess Large Head type, as many were saved at or near the time of issue. Even Gem specimens can be located with minimal difficulty. The population begins to decline at the MS66 level, and MS67 coins are challenging.

The 1887 is an extreme condition rarity in the lofty grade of MS68, that of the present offering. PCGS and NGC have certified a mere five pieces at this level and none finer. Both sides are fully prooflike with deep field-motif contrast. The obverse displays orange-gold coloration accented with jade and ice-blue while the reverse yields greenish-gold hues. The strike is close to full, save for minor softness on the bowknot. Impeccably preserved surfaces reveal tiny diagonal planchet striations in the headdress that provide a pedigree identifier. The breathtaking eye appeal of this coin will satisfy the most discriminating connoisseur of gold coinage. Population: 2 in 68, 0 finer (4/12). (#7588)

**Last-Year 1889 Gold Dollar, MS67
Only One Example Finer at PCGS**

- 4758 1889 MS67 PCGS.** The 1889 gold dollar is always in demand as the last entry in the 40-year series. This Superb Gem example is worthy of careful study. Sparkling yellow-gold fields and precisely detailed devices are highlighted by a subtle accent of diffuse red that adds to the coin's overall appeal. PCGS has certified only a single example finer of this historic issue (4/12). (#7590)
-

PROOF GOLD DOLLAR

**Sharply Detailed Gem Proof
1876 Gold Dollar**

- 4759 1876 PR65 NGC.** The 1876 proof gold dollar claims a mintage of only 45 pieces, with a surviving population of just over two dozen specimens in all grades. Proofs can be distinguished from prooflike business strikes by a short die line that runs under the right foot of the first A in AMERICA. Many specimens, the present coin included, show loss of detail in the leftmost feather of the headdress, due to excessive die polishing.

The coin offered here is a sharply detailed Gem, with brightly reflective yellow-gold surfaces that show highlights of green color. Close inspection reveals only the most minor imperfections, none of them worthy of individual mention. Census: 1 in 65, 0 finer (5/12).
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4628. (#7626)

EARLY QUARTER EAGLES

1806/5 Quarter Eagle, AU58
Rare 7x6 Stars Variety, BD-2
Bright Yellow, Semiprooflike Fields

4760 1806/5 7x6 Stars AU58 NGC. BD-2, High R.5. The year 1806 was the penultimate date for the Capped Bust Right type, which was retired in favor of John Reich's Capped Bust Left design after the 1807 coinage. Two die varieties are known for the date, both from overdated dies. The present coin is a representative of the less available BD-2 variety, characterized by the 7x6 arrangement of the obverse stars. From a tiny original mintage of 480 coins, the BD-2 die marriage is quite rare today. Experts estimate only 25-35 examples are known in all grades. In *Early U.S. Gold Coin Varieties*, John Dannreuther calls the issue "one of the rarest of the early quarter eagles," with only the 1796 No Stars BD-1, 1797 BD-1, and the 1804 13 Star Reverse quarter eagles more difficult to locate. Considering both leading grading services, a total of eight examples have been certified in AU58, with eight finer (4/12).

In their *Encyclopedia of U.S. Gold Coins 1795-1933*, Jeff Garrett and Ron Guth explain the unusual circumstances of the 1806/5 striking:

"The 1806/5 overdate represents one of the rare instances when a die that had already been used to strike coins in one year was softened, overdated, rehardened, and then used to strike even more coins. Most other overdates occur on unused dies from previous years."

Perhaps the overdated obverse die failed quickly, accounting for the limited mintage.

The present coin is sharply struck, with bright, semiprooflike fields. Only slight, even wear is noted on the highest points of the design. A prominent die crack is visible through the top of LI in LIBERTY and a few adjustment marks are evident on the reverse center. (#7655)

**1807 Quarter Eagle, BD-1
Final Capped Bust Right Issue**

- 4761 1807 Genuine PCGS. BD-1, R.3.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has tooled surfaces. Capped Bust Right quarter eagles were struck for the last time in 1807, with a mintage of 6,812 pieces and a single die variety known for the date. Perhaps 250-350 examples survive in all grades and conditions. This lustrous piece is still attractive, despite the noted tooling, which shows mainly on the reverse. (#7656)
-

Rare 1829 Quarter Eagle, BD-1, AU50

- 4762 1829 AU50 PCGS. BD-1, High R.4.** The sole die pair for this challenging date. The *Guide Book* mintage of 3,403 pieces is the lowest of the reduced diameter subtype (1829 to 1834). Golden-brown luster accompanies protected regions, while the open fields and motifs are lightly toned wheat-gold. The fields display faint vertical hairlines. (#7669)
-

CLASSIC QUARTER EAGLES

- 4763 1834 AU50 NGC. Large Head, Breen-6140, Variety 2, R.3.** The "Wide AM" reverse die, also used on 1835 and 1836 coinage. An original first-year example. Peach-gold overall with olive-gray centers and many pockets of luster at the borders and on the motifs. (#7692)
- 4764 1834 AU53 NGC. Large Head, Breen-6140, Variety 2, R.3.** Sea-green, orange-gold, and rose-red tints encompass this sharply struck and unworn example. The fields are mildly reflective and display only wispy hairlines. (#7692)
- 4765 1834 AU55 NGC. Small Head, Breen-6138, Variety-1, R.1.** Apricot and olive toning alternates across this well defined introductory year example. Bright luster outlines individual stars and fills the legends. A trio of hair-thin marks above the portrait are of little import. (#7692)
-

**1836 Script 8 Quarter Eagle
Breen-6143, Mint State**

- 4766 1836 Script 8 MS60 NGC. Head of 1835, Breen-6143, Variety-11, R.2.** This obverse bears the Head of 1835 and shows star 6 nearly touching the tip of Liberty's diadem. The distinctive Script 8 in the date further defines this interesting variety. The late Walter Breen asserted that these "Classic Head" coins were the first gold pieces to freely circulate in the United States, and extensive use assured that Mint State examples would be scarce for today's collectors. (#7694)
-

**1838-C Quarter Eagle, AU58
First C-Mint Two and a Half**

4767 1838-C AU58 NGC. CAC. Variety-1. In its first year of operation, the Charlotte Mint produced only 7,880 quarter eagles, all from a single pair of dies. In addition to its first-year status, the 1838-C represents the short-lived Classic Head design. The issue is scarce-to-rare in all grades, and the surviving population of 150-200 pieces has to satisfy tremendous demand from series enthusiasts and mintmark type collectors alike.

The present coin is a lustrous near-Mint example, with well-detailed design elements that show a touch of softness on the stars, shield, and eagle's wings, along with a trace of wear on the high points of the design. The pleasing greenish-gold surfaces exhibit only minor signs of contact. Census: 22 in 58, 12 finer (4/12). (#7697)

Near-Mint 1839 Quarter Eagle

4768 1839 AU58 NGC. Breen-6148, Variety-21, R.3. Only a single die pair is known for the 1839. Designated as an overdate on the NGC insert, but according to the 2013 *Guide Book*, "so-called 9 over 8 varieties for the P, C, and D mints are made from defective punches." The present yellow-gold near-Mint quarter eagle is refreshingly unmarked with only a single small depression near star 9 worthy of mention. The strike is consistent and luster brightens the legends and motifs. (#7698)

4769 1839-O — Medallion Alignment — XF40 NGC. Low Date, Close Fraction, Breen-6153, Variety-28, R.4. The introductory New Orleans quarter eagle issue is scarce and from a low mintage. Toned tan-gold with clean surfaces and a sharply defined reverse. The usual die state with three prominent reverse die cracks. (#7701)

**1839-O Quarter Eagle, Well-Struck AU55
The First New Orleans Gold Coin**

4770 1839-O AU55 NGC. Breen-6152, Variety-27, R.3. The 1839-O quarter eagle has the distinction of being the first gold coin produced at the New Orleans Mint. A large number of the 17,781-piece mintage was apparently saved as the issue can be located in XF and AU without too much trouble. Uncirculated coins, on the other hand, are elusive. This Choice AU example displays light to medium yellow-gold surfaces imbued with hints of light green and displays a generally strong strike, though the star centers are soft as typically seen. Both sides are minimally abraded for a gold coin having seen some circulation. A small mark is located on Liberty's cheek just behind the mouth. (#7701)

LIBERTY QUARTER EAGLES

- 4771 1840-C — Improperly Cleaned — NGC Details. AU.** Nicely struck at the centers with a softer impression at the margins. This rare date almond-gold Charlotte quarter eagle is slightly glossy and faintly hairlined with two mint-made strike-throughs in front of the chin and on the base of the neck. (#7718)

1841-D Quarter Eagle, AU53 Rare Die Marriage

- 4772 1841-D AU53 NGC. Variety 2-D.** Much rarer than the usual Variety 2-C, which places the mintmark adjacent to the claw. On the present piece, the mintmark overlaps the base of the fletchings. This yellow-gold representative has glimpses of rose-red luster within protected areas. The centers offer a typical strike, though all stars are well defined. (#7722)

- 4773 1842-O — Cleaning — Genuine PCGS. AU Details.** This almond-gold quarter eagle is typically struck and a bit bright but noticeable luster peers from protected areas. A mere 19,800 pieces were coined for this early New Orleans issue.

1843 Quarter Eagle, MS62 Bright and Semiprooflike

- 4774 1843 MS62 NGC.** A great example from early in the Liberty quarter eagle series, pale canary-gold at the interiors with deeper butter-yellow color along the rims. Strongly struck for the type with excellent luster and semiprooflike fields, though scattered small marks and wispy abrasions preclude Select status. Census: 8 in 62, 5 finer (5/12). (#7727)

- 4775 1843-D Small D — Improperly Cleaned — NGC Details. AU.** Variety 4-F. Only moderately cleaned, although magnification reveals a few obverse pinscratches. This caramel-gold representative displays substantial faded luster at the margins.

Sharply Struck 1843-D Two and a Half, AU50 Small D Reverse

- 4776 1843-D Small D AU50 PCGS. Variety 4-F.** The 1843-D is “the best-struck of the early Dahlonega quarter eagles,” according to Doug Winter. That excellent strike is certainly in evidence here, with minor softness limited to Liberty’s highest hair curls. The stars and reverse details are all bold. Considerable luster remains on orange-gold surfaces. Population: 30 in 50, 79 finer (5/12). (#7730)

- 4777 1843-O Large Date, Plain 4 AU55 NGC.** The mintmark is repunched south, as always for the scarce Large Date variety. This is a luminous yellow-gold piece with pleasing sharpness and an absence of notable marks. (#7732)

Scarce 1844-C Quarter Eagle, XF45 Above-Average Strike and Surface Condition

- 4778 1844-C XF45 PCGS. CAC.** One die pair is known from a sparse mintage of 11,622 pieces. Douglas Winter (2008) writes that “the 1844-C is among the worst struck quarter eagles from this mint.” This Choice XF example does reveal the usual softness on the eagle’s legs, but the stars on the left obverse border, usually “extremely flat,” show some of the centrils, and individual strands in Liberty’s hair are relatively strong, *not* indiscernible as typically seen. Moreover, its peach-gold surfaces are only lightly marked, not showing “a plethora of obtrusive nicks and scratches.” CAC was right on for this coin. This is an excellent choice for the gold specialist. Population: 16 in 45, 45 finer (4/12). (#7735)

- 4779 1844-C — Improperly Cleaned — NGC Details. AU.** A faintly hairlined straw-gold example of this difficult Charlotte issue. A few wispy marks are noted between the olive branch and the left (facing) wing. A couple of minor rim imperfections are also evident. (#7735)

Choice AU 1844-D Quarter Eagle
Rare Die Pairing

4780 1844-D AU55 PCGS. Variety 5-I. The better die marriage with the mintmark tilted right and nearly touching the fraction bar. The Dahlonga issue is also rare overall due to a scant mintage of 17,322 pieces. Luster illuminates the peripheries and fills the eagle and Liberty's hair. The fields display clash marks but relevant abrasions are confined to a tick on the left base of Liberty's neck. (#7736)

4781 1845 MS61 PCGS. Sharply struck with rich luster and eye-catching color. The base hue is rich orange-gold, while the fields also show streaks of wild magenta, violet, and blue hues. A fascinating example. Population: 6 in 61, 22 finer (5/12). (#7737)

4782 1845 MS62 NGC. This is a well-produced and relatively available early Liberty quarter eagle. This example shines with semireflectivity in the fields from a striated planchet. The surfaces are lightly abraded, and the margins are sharply defined with some central softness. (#7737)

4783 1846 AU58 NGC. A near-Mint example of this scarce low mintage Philly issue. Well defined with evident luster and only a single mentionable mark, a small rim nick on the reverse at 3 o'clock. The date is lightly repunched west. (#7740)

Uncirculated 1846 Quarter Eagle
Surprisingly Scarce

4784 1846 MS61 NGC. The 1846 is surprisingly scarce, especially in mint condition. This is a bright yellow-gold example that is peppered with numerous small abrasions on each side, but the fields are bright and semireflective, adding an extra element of appeal. The strike is sharper than usually seen with only minor softness noted on the eagle's plumage. Census: 14 in 61, 3 finer (5/12). (#7740)

Condition Rarity MS61 1846-C Quarter Eagle

4785 1846-C MS61 NGC. Variety 1. Sole die pair for the year. With just 4,808 pieces struck and remarkably few of them surviving in any condition, the 1846-C is a challenging quarter eagle in XF, much less Mint State. This yellow-gold example is lightly abraded but has glossy fields and a strong obverse strike, though the eagle's legs are a trifle weak. A cloudy area is noted near the upper and left obverse rim, while the reverse shows a small rim nick over the space between STATES and OF. Despite these faults, this is an important Charlotte two and a half. Census: 2 in 61, 3 finer (5/12). (#7741)

4786 1847 AU58 PCGS. Pale lemon-gold surfaces offer bright radiance with considerable reflectivity and only a touch of rub. Excellent design definition with a bold "T-crack" that crosses the reverse. Population: 2 in 58, 12 finer (5/12). (#7744)

**Choice AU 1847-C Two and a Half
Bold Mint Luster**

- 4787 1847-C AU55 NGC. Variety 1.** Only 23,226 quarter eagles were struck in Charlotte in 1847, an amount that nonetheless places it among the most plentiful of the 1840s. This Choice AU specimen shows bold mint luster and is somewhat finer than the average certified example, which is more apt to be an AU50 coin. The obverse shows a few ticks under a loupe, more so than the reverse, and the strike on the reverse is weaker than normally seen. Census: 41 in 55, 66 finer (5/12). (#7745)

**1847-C Quarter Eagle, AU58
Above-Average Quality for the Issue**

- 4788 1847-C AU58 NGC. CAC.** The only known dies for this date. According to Doug Winter, the 1847-C is the most common Charlotte quarter eagle, possibly owing to a small hoard that existed at one time. The yellow- and peach-gold surfaces of this near-Mint State specimen display well-struck design elements. The few scattered marks are not detracting as is often the case on survivors of this issue. Census: 36 in 58, 30 finer (4/12). (#7745)

Well-Struck 1847-D Quarter Eagle, AU58

- 4789 1847-D AU58 PCGS.** The only known variety. The 1847-D Liberty quarter eagle claims a mintage of 15,784 pieces, and the surviving population, according to Doug Winter (2003) probably numbers around 175-200 examples in all grades. High-end AU and Mint State coins are scarce. The yellow-gold surfaces of this near-Mint State specimen display well-struck devices and are minimally abraded. Housed in a green label holder. Population: 18 in 58, 18 finer (4/12). (#7746)

- 4790 1847-O AU50 PCGS. Variety 1.** The 1 in the date is repunched above the base. The mintmark is centered over the 2 in the fraction. Peach-red luster illuminates the borders of this mildly bright AU New Orleans quarter eagle. The centers have a typical impression, and marks are absent aside from a line on Liberty's neck and another two lines on the upper reverse field. (#7747)

- 4791 1848 AU53 PCGS.** Although overshadowed by the famous CAL issue, the 1848 is a very scarce date with a mintage of just 6,500 pieces. The present example has moderately prooflike fields and iridescent peach, rose, and olive patina. Encased in a green label holder. Population: 7 in 53, 22 finer (5/12). (#7748)

- 4792 1848 AU55 NGC.** An attractive Choice AU example from a mintage of just 6,500 pieces, this well-detailed specimen displays lustrous greenish-gold surfaces. Census: 10 in 55, 29 finer (5/12). (#7748)

- 4793 1848-C — Improperly Cleaned — NGC Details. AU. Variety 1.** This moderately bright Charlotte two and a half is well defined and devoid of any identifying marks. From a scant production of 16,788 pieces.

Smooth 1848-C Two and a Half, AU53

- 4794 1848-C AU53 NGC. Variety 1.** Luster brightens the peripheral legends and motifs of this better date Charlotte Mint two and a half. The upper stars and the lower half of the eagle are lightly brought up, but the overall strike is good for the facility. The straw-gold surfaces lack any relevant abrasions. (#7750)

- 4795 1849 AU53 NGC.** Lustrous green and orange-gold surfaces and well-detailed design elements are the hallmarks of this low-mintage Liberty quarter eagle. Census: 11 in 53, 89 finer (5/12). (#7752)

- 4796 1849 AU58 NGC.** This example shows outstanding overall eye appeal. Under magnification one notes die polishing directly under the date on this well struck example. With colors ranging from honey-gold to fiery-orange this coin is sure to please any collector of quality quarter eagles. Census: 41 in 58, 18 finer (4/12). (#7752)

Scarce 1849 Quarter Eagle, MS62

- 4797 1849 MS62 PCGS.** The 1849 is an unheralded rarity in Mint State, primarily due to its low mintage of 23,294 pieces. Far more 1849 gold dollars were struck, since they were needed in commerce to replace hoarded silver coinage. This clean and mildly prooflike example has minor incompleteness of strike on the eagle's leg, and the fields have the expected moderate marks. Population: 4 in 62, 7 finer (4/12). Ex: *Houston Signature (Heritage, 12/2008)*, lot 1846, which realized \$4,600. (#7752)

**Luminous AU53 1849-D Quarter Eagle
Rarer 12-M Die Pair**

4798 1849-D AU53 NGC. Variety 12-M. The rarer of two die pairs for the year with the date logotype dipped almost to the nearby rim. This sunset-shaded example is primarily deep orange-gold with yellow elements at the upper reverse and a few copper-blue notes on the rims. Lightly worn but still-lustrous with the reverse rotated approximately 45 degrees clockwise. (#7754)

4799 1850 MS61 PCGS. Softly struck as usual but with great swirling luster, yellow-gold overall with apricot accents and frosty elements. Both sides show a number of fine abrasions, though individually significant marks are conspicuous in their absence. Population: 10 in 61, 38 finer (5/12). (#7755)

Orange-Gold AU50 1850-D Quarter Eagle

4800 1850-D AU50 NGC. Variety 13-M. Only 12,148 pieces were struck for this Dahlonega issue. The AU50 example offered here retains considerable luminosity in richly toned fields, orange-gold with glimpses of yellow and violet copper-specks dotting the rims. A soft strike exacerbates the appearance of wear, though the actual rub is light. (#7757)

4801 1851 MS63 NGC. Produced in huge numbers for a Liberty quarter eagle, the 1851 is still very scarce in Select condition. This well-detailed example displays lustrous greenish-gold surfaces. Census: 69 in 63 (1 in 63+), 45 finer (5/12). (#7759)

4802 1851-O AU55 PCGS. Variety 1. The date is repunched southwest. A sun-gold New Orleans representative void of noticeable marks. Slightly bright, but the strike is above average, with softness confined to the lower curls and the lower body of the eagle. (#7762)

4803 1852 MS64 PCGS. CAC. The large production of 1.1 million pieces makes the 1852 a relatively easy issue to locate in lower grades, and even Uncirculated examples can be found. Very few are finer than this near-Gem, though. The bright orange-gold surfaces are minimally abraded, and the fields gleam with bright semireflectivity. Population: 38 in 64, 12 finer (5/12). (#7763)

4804 1852-C — Improperly Cleaned — NGC Details. AU. Variety 1. The only known dies. This light green-gold example has a typical weak strike at the center, with slight surface roughness and minor marks on each side. (#7764)

4805 1854 MS63 PCGS. Boldly impressed on the obverse with particularly noteworthy detail on Liberty's hair, though the eagle is softer. Yellow-gold luster has wispy abrasions to define the grade, not marks of individual significance. Population: 44 in 63, 30 finer (5/12). (#7769)

**Mint State 1854-C Quarter Eagle
Sought-After Low-Mintage Issue**

4806 1854-C MS61 NGC. Variety-1. From a low mintage of 7,295 pieces, the 1854-C Liberty quarter eagle is scarce-to-rare in all grades, with a single variety known for the date. Doug Winter estimates no more than 105-145 examples remain extant in all grades, and most specimens seen grade no better than XF. The coin offered here is an attractive MS61 piece, with well-detailed design elements that show a little softness on Liberty's hair and the central reverse. The greenish-gold surfaces show a scattering of minor contact marks, with significant amounts of original mint luster. Census: 8 in 61, 10 finer (4/12). (#7770)

**1854-O Two and a Half, MS62
Unmarked Surfaces**

4807 1854-O MS62 PCGS. Variety 1. Despite a relatively low mintage of 153,000 pieces, at least five die pairs are known. There were likely a number of small deliveries struck to meet commerce demand fueled by the hoarding of silver coin from circulation. An orange-gold representative that has a mark-free appearance and is well struck save for blending near the centers. Luster illuminates the peripheries and devices. (#7772)

- 4808 1855 MS63 NGC.** Rich yellow-orange luster is frosty overall with light violet peripheral accents and a couple of dots of deeper color at the right reverse margin. A decently struck Select example of a Philadelphia issue that is conditionally rare this fine. Census: 21 in 63, 23 finer (5/12). (#7774)

**Near-Gem 1856-S Quarter Eagle
Seldom Seen Finer**

- 4809 1856-S MS64 PCGS.** A tough coin to find in this extremely pleasing near-Gem grade, this 1856-S quarter eagle is certainly one of the top few existing. The strike is full on the obverse stars and curls of Liberty, and similarly sharp on the eagle's shield and claws. The surfaces display satiny luster and attractive orange-gold color. Few Mint State coins retain the lovely surfaces and quality seen here, as most have far more handling marks and are cast into lower grades by time and attrition. Close examination finds little to fault, just a couple of trivial ticks and scuffs that keep this one from an even higher grade. A small planchet flake on the middle right of the A in STATES provides a pedigree marker. A delight for the series specialist and a coin that any collector would be proud to own. Population: 4 in 64, 3 finer (4/12).
Ex: Long Beach Signature (Heritage, 2/2005), lot 7587; FUN Signature (Heritage, 1/2006), lot 3426; FUN Signature (Heritage, 1/2011), lot 5028. (#7781)

- 4810 1857-O AU55 PCGS.** A sun-gold Choice AU New Orleans example that boasts a good strike and unmarked surfaces. Luster is especially evident on the eagle, curls, and margins. Scarce due to a scant mintage of 34,000 pieces. Population: 26 in 55, 59 finer (5/12). (#7784)

**1858 Two and a Half, MS63
Challenging P-Mint Date**

- 4811 1858 MS63 PCGS.** The 1858, along with the 1850 and 1859, are the most challenging P-mint quarter eagles to obtain in all grades from this decade. Only 250 or so pieces are believed extant out from an original mintage of 47,377 pieces. This sharply struck example has subtle reddish patina over each side and there are no singularly distracting blemishes present. Numerous thin die striations (as struck) are seen in the obverse field. Population: 11 in 63, 7 finer (5/12).
Ex: Long Beach Signature (Heritage, 9/2002), lot 7998; Long Beach Signature (Heritage, 2/2003), lot 8132; Baltimore Signature (Heritage, 7/2003), lot 10141. (#7786)

- 4812 1859 Old Reverse, Type One MS61 NGC.** Struck from the hub that had been in use since 1840, minor changes were made in 1859. This example has subdued yellow-gold centers that are surrounded by deep orange-gold at the margins. Lightly abraded. (#97788)

**Select 1859 Two and a Half
Type Two Reverse**

- 4813 1859 New Reverse, Type Two MS63 PCGS.** Green-gold with occasional splashes of peach. Boldly struck and lustrous. A couple of faint marks on the left obverse field deny an even higher grade. The small arrowheads are separated from each other, characteristic of the Type Two subtype. Housed in a green label holder. Population: 12 in 63, 4 finer (5/12).
Ex: FUN Signature (Heritage, 1/2009), lot 5229, which realized \$2,645. (#7788)

1859-D Quarter Eagle, XF45
Final Year of Denomination at Dahlonega

- 4814 1859-D XF45 NGC. CAC.** The only variety for the year, and the final year quarter eagles were struck at the Dahlonega Mint. The 1859-D is most frequently seen in Extremely Fine or low-end About Uncirculated. High-end AUs are very scarce, and Mint State examples are rare. The yellow-gold surfaces of this Choice XF specimen display hints of subdued red. The obverse is well struck, save for softness in the forehead curls. The eagle's legs, shield border and horizontal lines, and the right (facing) claw are weak as usual. (#7789)

Lustrous AU 1859-D Quarter Eagle
Last Year Issue

- 4815 1859-D AU50 PCGS. Variety 21-M.** Only dies known for this, the last year that Dahlonega would strike quarter eagles, in the meager extent of 2,200 pieces. This piece shows the bold obverse strike typical of the issue, although the reverse eagle's legs and wing top are a bit weak. Generous orange-gold luster proceeds from each side. A small planchet indent near the edge at 10 o'clock on the obverse is as made. Certified in an old-style, small-size PCGS holder. Population: 10 in 50, 55 finer (5/12). (#7789)

- 4816 1859-S AU58 NGC.** The 1859-S liberty quarter eagle claims a mintage of just 15,200 pieces. This attractive near-Gem offers well-detailed design elements and lustrous yellow-gold surfaces. Census: 24 in 58, 8 finer (5/12). (#7790)

- 4817 1860 New Reverse, Type Two MS61 NGC.** Rich lime-gold and apricot hues prevail on the lustrous surfaces of this conditionally scarce Uncirculated example. The Type Two or New Reverse design was made with smaller letters and arrowheads. Census: 25 in 61, 21 finer (5/12). (#7791)

- 4818 1861 New Reverse, Type Two MS63 NGC. CAC.** Strongly struck through the interiors with softer detail on peripheral devices such as the stars. Yellow-gold luster is largely luminous with scattered apricot and peach accents. (#7794)

Choice AU 1861-S Two and a Half
Much Better San Francisco Issue

- 4819 1861-S AU55 PCGS.** A lemon-gold Choice AU example with a prooflike reverse and partial cartwheel luster on the obverse. Void of any remotely relevant marks. Just 24,000 pieces were struck, all of which went into West Coast circulation. Certified in a green label holder. Population: 11 in 55, 11 finer (5/12). (#7795)

1862 Liberty Quarter Eagle, AU58
Scarce Civil War Issue

- 4820 1862 AU58 NGC.** Gold coinage did not circulate to any extent during the Civil War, due to government policy and widespread hoarding. Mintages were reduced accordingly, and high-grade examples of gold coins from this era are seldom encountered today. This lightly circulated 1862 quarter eagle is well-detailed, with slightly subdued mint luster, and some dark grease strike-through on the reverse. Census: 52 in 58, 51 finer (5/12). (#7796)

1862 Quarter Eagle, MS61
Conditionally Elusive

- 4821 1862 MS61 PCGS.** Boldly lustrous with surfaces displaying some tiny, widely scattered abrasions. Rich golden luster surrounds the reliefs, lightening in the fields. This "two-tone" surface adds materially to the visual appeal. Conditionally scarce issue with nice golden patina. Population: 5 in 61, 17 finer (4/12).
Ex: Long Beach Signature (Heritage, 2/2005), lot 7604. (#7796)

**Choice AU 1862-S Two and a Half
Ex: Norweb Collection**

4822 1862-S AU55 PCGS. Ex: Norweb. A rare issue with a mintage of just 8,000 pieces. Rich orange toning is predominant though the open fields are olive-green. Well struck and attractive to the unaided eye with minor planchet granularity near star 10 and a few faded pin scratches near the profile. Population: 6 in 55, 10 finer (4/12). Ex: *Norweb Collection, Part II (Bowers and Merena, 3/1988)*, lot 2052. (#7798)

4823 1863-S VF30 PCGS. The 1863-S Liberty quarter eagle is an underrated issue from a mintage of 10,800 pieces. This evenly worn VF specimen displays lightly abraded orange-gold surfaces. Population: 2 in 30, 30 finer (5/12). (#7799)

4824 1865-S XF40 PCGS. Faint sea-green accents visit wheat and orange-gold surfaces. An appreciably worn but pleasing example of this San Francisco minor gold issue struck in the final year of the Civil War. Population: 18 in 40, 32 finer (5/12). (#7802)

4825 1868 MS60 NGC. This piece is highly reflective, like many others of this issue. The lemon-yellow fields have numerous abrasions, but this coin is still well-preserved, at least compared to most of the survivors from the tiny mintage of 3,625 pieces. Census: 7 in 60, 14 finer (5/12). (#7807)

4826 1868 MS60 NGC. Both sides are flashy and even modestly contrasted, no surprise for this low-mintage issue. Solidly struck with no trace of wear, though numerous abrasions preclude a finer designation. Census: 7 in 60, 14 finer (5/12). (#7807)

4827 1868-S AU53 NGC. Wheat-gold luster overall with aspects of peach and a reddish copper streak from the rim to the E in STATES. Though lightly worn, this S-mint quarter eagle is still luminous and offers considerable eye appeal despite minor to moderate abrasions. (#7808)

4828 1868-S AU58 NGC. Although the NGC Census lists 95 pieces certified as AU58 (4/12), it is almost certain that many of those are resubmissions, since PCGS lists just 11 pieces at the same grade level. The present nicely struck example has pleasing peripheral luster and an interesting strike-through (as coined) on the obverse rim near 1 o'clock. (#7808)

**1869 Quarter Eagle, MS62
Only Two Finer Coins at NGC**

4829 1869 MS62 NGC. As might be expected from a coin with a mintage of just 4,320 pieces, the surfaces of this 1869 Liberty quarter eagle show prooflike reflectivity in sheltered areas. The design elements are sharply detailed, and the light yellow-gold surfaces exhibit only minor contact marks. Census: 3 in 62, 2 finer (5/12). (#7809)

4830 1870 AU58 PCGS. From a mintage of just 4,520 pieces, the 1870 Liberty quarter eagle is a major condition rarity in high grade. This impressive near-Mint example is well-detailed, with prooflike yellow-gold surfaces. Population: 14 in 58, 5 finer (5/12). (#7811)

4831 1871-S AU58 NGC. CAC. Ample remaining luster is pale lemon-gold on this modestly rubbed and lightly abraded S-mint quarter eagle. A mere 22,000 pieces were struck, and no numismatic consideration was given them until decades later. Census: 58 in 58, 28 finer (5/12). (#7814)

**1873-S Quarter Eagle, Semiprooflike MS63
Condition Census Quality**

4832 1873-S MS63 PCGS. The eagle's left leg and both claws are typically flat with little or no remaining detail. This amazing coin is almost certainly a candidate for the 1873-S Condition Census. PCGS has only certified three finer examples, and NGC has graded just one finer piece (4/12). The surfaces are brightly lustrous with satiny orange-gold color, the devices a bit lighter. A fine scratch from the hairbun to the border below star 12 is the only characteristic that prevents an even higher grade. Population: 1 in 63, 3 finer (4/12). (#7820)

4833 1874 AU58 NGC. Yellow-to-orange luster retains considerable flash despite the modest rub over the high points. Liberty's portrait is a trifle soft, but the eagle's feathers are sharp. Census: 54 in 58, 29 finer (5/12). (#7821)

Desirable 1875 Quarter Eagle, AU58
One of a Few Extant Pieces

4834 1875 AU58 NGC. The 1875 quarter eagles were minted to the extent of only 400 circulation strikes plus 20 proofs, making the date one of the most desirable in the Liberty Head quarter eagle series. Jeff Garrett and Ron Guth (2006) estimate only 20 to 30 business strikes extant, mostly in XF or AU grades. Mint State pieces are very rare and infrequently seen.

Jade and orange hues compete for territory on this near-Mint State coin that displays considerable prooflike effect. The design elements are well, but incompletely, struck; softness shows on the hair curls below the coronet. A loupe reveals minor scrapes and ticks, most notably a thin mark from star 6 to the top of the hair. A few others are scattered in the fields on both sides. The gold specialist cannot go wrong on this rare-date representative. Census: 15 in 58 (1 in 58+), 3 finer (4/12). (#7822)

4835 1875-S AU58 NGC. Strong overall detail despite light rub on the high points of the design. The luster is pale yellow-gold and unusually intense for this lower-mintage issue. Census: 62 in 58, 28 finer (5/12).(#7823)

4836 1876 AU58 PCGS. Both sides of this scarce quarter eagle show a trace of high-point wear as the grade suggests. A lovely yellow-gold specimen with splashes of rose toning, the fields are mildly prooflike. Faint hairlines and other minuscule marks are inconsequential. Population: 11 in 58, 10 finer (4/12).(#7824)

Mint State 1876 Quarter Eagle
Sought-After Low-Mintage Date

4837 1876 MS60 NGC. The 1876 Liberty quarter eagle inspires great collector interest because of its meager mintage of 4,176 pieces. Mint State survivors are quite rare in today's market. This well-detailed Mint State example exhibits semiprooflike yellow-gold surfaces, with a scattering of minor contact marks on both sides. Census: 1 in 60, 15 finer (5/12). (#7824)

Uncirculated 1876-S Two and a Half
Only 5,000 Pieces Produced

4838 1876-S MS61 PCGS. The 1876-S has an impressively low mintage of only 5,000 pieces. Since it was a San Francisco product, most of these were extensively circulated on the West Coast. This is one of the few Uncirculated pieces known. The bright yellow-gold surfaces show a few faint alloy spots on the reverse. The mint luster is broken by a few scattered abrasions on each side, none of which are individually significant. Population: 4 in 61, 14 finer (5/12). (#7825)

4839 1880 AU58 NGC. CAC. Quarter eagle mintages were low throughout the 1880s, beginning with a 2,960 piece production total for this year. This sharply detailed near-Mint specimen displays prooflike greenish-gold surfaces. Census: 43 in 58, 61 finer (5/12).(#7832)

4840 1880 MS62 NGC. Each side of this crisply detailed quarter eagle offers its own form of eye appeal. The yellow-gold obverse offers significant reflectivity in the fields, while the orange-suffused reverse is more dusky and luminous. An attractive example of this lower-mintage issue. Census: 14 in 62, 13 finer (5/12).(#7832)

**Mint State 1881 Quarter Eagle
Tiny Mintage of 640 Pieces**

4841 1881 MS60 NGC. From a minuscule mintage of only 640 pieces, the 1881 Liberty quarter eagle is one of the rarest, most sought-after issues of the series. This impressive Mint State example is sharply detailed, with prooflike greenish-gold surfaces that show only minor contact marks. Census: 4 in 60, 12 finer (5/12). (#7833)

4842 1882 MS62 NGC. From a paltry mintage of 4,000 pieces comes this pleasing P-mint quarter eagle. It is crisply struck with warm peach-gold color, glowing luster, and few individually significant marks. Census: 17 in 62 (1 in 62+), 28 finer (5/12). (#7834)

4843 1883 AU55 ANACS. Just 1,920 business strikes were made for this Philadelphia quarter eagle issue. This Choice AU example has considerable reflectivity in yellow-orange fields despite light wear. A pinscratch passes between stars 11 and 12, while other assorted abrasions contribute to the grade. (#7835)

4844 1884 MS62 NGC. A classic low-mintage date boasting a total production figure of only 1,950 pieces, with most survivors ranking below Mint State. Honey-gold centers are surrounded by frosty golden luster at the peripheries with a pale red dot near reverse center. Census: 13 in 62, 16 finer (4/12). (#7836)

**Select 1884 Quarter Eagle
Only 1,950 Pieces Struck**

4845 1884 MS63 NGC. Liberty quarter eagles of the 1880s were typically struck in small quantities, and only 1,950 pieces were produced in 1884. This sharply detailed Select specimen displays vibrant satiny mint luster over light yellow-gold surfaces. Eye appeal is outstanding. Census: 6 in 63, 10 finer (5/12). (#7836)

**1886 Quarter Eagle, MS63
Low-Mintage and Semiprooflike**

4846 1886 MS63 PCGS. From a minuscule emission of only 4,000 examples comes this pleasing coin, with honey-gold surfaces that are considerably reflective. There are a few faint abrasions seen under a loupe, but they are undistracting. Beautiful luster and superior eye appeal are this coin's chief characteristics. Ex: Long Beach Signature (Heritage, 9/2006), lot 3219. (#7838)

4847 1887 MS62 PCGS. Crisply struck with only a relative handful of light abrasions in the amber-gold fields, which have hints of green and orange color as well. The surfaces show a trace of reflectivity, unsurprising given the minuscule mintage. Population: 34 in 62, 40 finer (5/12). (#7839)

4848 1892 MS62 NGC. Bright luster is pale yellow-gold at the margins with a deeper lemon hue at the interiors. Well-defined and minimally abraded for this challenging and low-mintage issue. Census: 34 in 62, 31 finer (5/12). (#7844)

4849 1892 MS62 PCGS. Rich yellow-gold luster lights up at the correct angle to the light. Crisply detailed with scattered small digs on both sides that combine to account for the grade, though the eye appeal remains strong. A solid example of a lower-mintage issue. Population: 14 in 62, 48 finer (5/12). (#7844)

4850 1893 MS63 NGC. CAC Gold Label. Seldom seen on a Select Liberty coin, the gold CAC seal indicates the coin exceeds the designated grade. This is a needle-sharp quarter eagle with vibrant luster and lovely olive-gold toning. Unabraded save for a single diagonal hair-thin line on the cheekbone. (#7845)

**Low-Mintage 1896 Quarter Eagle, MS65
Great Overall Eye Appeal**

4851 1896 MS65 PCGS. The 1896 quarter eagle comes from a sparse mintage of 19,070 circulation strikes and is scarce in all levels of preservation. This magnificent Gem displays lustrous honey-gold surfaces accented with blushes of rose. The strike is sharp throughout, enhancing the coin's eye appeal. Nicely preserved. Population: 66 in 65, 22 finer (4/12). (#7848)

**1897 Liberty Quarter Eagle, MS66
Vivid Color, Vibrant Luster**

4852 1897 MS66 NGC. A modest mintage of 29,768 Liberty quarter eagles was accomplished at the Philadelphia Mint in 1897, making high-grade examples quite elusive today. This spectacular Premium Gem exhibits sharply detailed design elements, with especially vibrant mint luster and vivid greenish-gold surfaces. Census: 49 in 66 (1 in 66+), 17 finer (5/12). (#7849)

**1898 Quarter Eagle, MS65
Challenging in This Grade**

4853 1898 MS65 PCGS. CAC. The 1898 quarter eagle, with a mintage of 24,000 pieces, can be found in most grades through near-Gem. Gem examples are more challenging, and finer specimens are scarce to rare. This MS65 piece displays pleasing luster over the yellow-gold surfaces and is very nicely struck. A few minute marks are within the parameters of the grade classification. Population: 70 in 65, 35 finer (4/12). (#7850)

**1898 Liberty Quarter Eagle, MS67
No Coins in Higher Grades at NGC**

4854 1898 MS67 NGC. The 1898 Liberty quarter eagle claims a low mintage of 24,000 pieces, and this spectacular Superb Gem is among finest survivors. The design elements are sharply detailed throughout, with vibrant mint luster and vivid orange-gold surfaces that show highlights of lilac and green. Census: 32 in 67 (2 in 67+), 0 finer (5/12). (#7850)

**1901 Quarter Eagle, MS66
Exactingly Struck Conditional Rarity**

4855 1901 MS66 PCGS. This Philadelphia issue is often regarded as common, but study reveals that pieces in the highest grades are measurably scarce. This Premium Gem example is distinguished by rich, unbroken golden luster that drenches both sides to complement an exacting strike. The coin's assigned grade approaches the upper limit of availability, as the PCGS population shows only nine submissions finer (4/12). (#7853)

4856 1903 MS66 NGC. A subtle mix of peach-gold and mint-green graces the radiantly lustrous surfaces of the present Premium Gem. Solidly struck on the design features with no marks of consequence. (#7855)

4857 1904 MS66+ NGC. Sharply struck with gold-orange and butter-yellow hues on satiny surfaces. Crisp details enhance minimally marked devices, and the fields are just as smooth. (#7856)

**Fully Struck Superb Gem
1904 Quarter Eagle**

4858 1904 MS67 PCGS. CAC. The 1902-1905 quarter eagles are well-known type coins, boldly struck and generally surviving in quantity, even in the higher Mint State grades such as the present Superb Gem 1904. The full strike and generous luster over gold-tinged, pristine surfaces make this an obvious potential acquisition for a type set. (#7856)

- 4859 1905 MS65 PCGS.** The yellows on this shining Gem range from pale to sun-deep. Minor copper-spotting toward the margins lends the coin individuality and character. (#7857)
- 4860 1905 MS65 PCGS. CAC.** This highly lustrous quarter eagle, housed in a green-label PCGS holder, has outstanding eye appeal. This coin has a well-defined strike with yellow-gold surfaces this Gem has only the slightest surface abrasions. (#7857)

**Superb Gem 1905 Two and a Half
Top-Notch Coin for the Type**

- 4861 1905 MS67 NGC.** The 1905 quarter eagle has a well-deserved reputation as a type coin, and the present piece shows why, with a bold strike, generous luster radiating from both sides, and plenty of eye appeal to spare. The orange-gold surfaces are virtually mark-free. Both series have even graded examples at high as MS68 — although not many. (#7857)

**Superb Gem 1905 Quarter Eagle
Excellent Choice for a Type Set**

- 4862 1905 MS67 NGC.** The plentiful mintage exceeding 200,000 coins ensures the occasional Superb Gem survivor such as this delightful piece. Frosty orange-gold surfaces are highly lustrous and fully struck. A superlative choice for a type or date set. NGC has seen only six examples numerically finer (5/12). (#7857)

**Superb Gem 1906 Quarter Eagle
Only Two Finer Coins at NGC**

- 4863 1906 MS67 NGC.** This magnificent Liberty quarter eagle exhibits razor-sharp definition on all design elements, with fine detail present on Liberty's hair and the star centrils. The pleasing yellow-gold surfaces display highlights of rose and especially vibrant mint luster. A few microscopic copper alloy spots can be detected with magnification. Census: 73 in 67, 2 finer (5/12). (#7858)

- 4864 1907 MS65 PCGS.** This example displays subdued luster that is rarely encountered for the issue, while some small ticks are note in the fields. A small copper spot can be seen between the eagle's beak and left wing. (#7859)

- 4865 1907 MS65 PCGS. CAC.** Both sides of this Gem show a bold strike while the yellow-gold surfaces gleam with luster. No noteworthy abrasions are seen on this Gem quality example. (#7859)

**Two-Toned Superb Gem
1907 Two and a Half**

- 4866 1907 MS67 NGC.** A tale of two tones: Deep orange-gold alternates with mint-green hues on each side of this spectacular Superb Gem, one of the most available issues in high grade within the series. The surfaces are fully struck, and every bit as immaculate under a loupe as one would hope. NGC has certified four numerically finer (5/12). (#7859)

PROOF LIBERTY QUARTER EAGLES

Elusive 1881 Quarter Eagle, Gem Proof
Among the Finest at PCGS

- 4867 1881 PR65 PCGS. CAC.** The 1881 quarter eagle is very rare both as a circulation strike and as a proof. Only 640 business strikes were produced and 51 proofs. This coin, though not specifically listed as Cameo on the green-label holder, presents the boldest contrast that might be desired. The surfaces exhibit a rich reddish-golden gleam overall, and the fields provide a marvelous depth of reflectivity around the heavily frosted devices. Close examination of the fields shows the desirable orange-peel texture, a result of placing gold planchets in an annealing furnace that was previously used for copper, nickel, or silver coins and therefore at a higher than usual temperature. The surfaces are essentially free of post-striking impairments. The only easily identifiable surface "hallmark" is a copper alloy spot in the upper reverse field below the TE in STATES. Population: 6 in 65, 0 finer (4/12).
Ex: Central States Signature (Heritage, 4/2010), lot 2203, which brought \$38,812.50. (#7907)

Premium Gem Proof 1884 Quarter Eagle
Rare Example With Cameo Contrast

- 4868 1884 PR66 Cameo NGC.** Only 73 proof Liberty quarter eagles were struck in 1884, and the business-strike mintage was less than 2,000 pieces. Probably no more than 30-40 examples of the proof mintage remain extant in all grades. The present coin is a magnificent Premium Gem, with sharply detailed, richly frosted design elements that contrast boldly with the brightly mirrored fields. On close inspection, the light greenish-gold surfaces show the orange-peel effect characteristic of the best 19th century gold proofs. This coin should find a home in a fine collection of Liberty quarter eagles. Census: 4 in 66 Cameo, 1 finer (4/12). (#87910)

**Choice Proof 1891 Quarter Eagle
Rare Regardless of Grade**

4869 1891 PR64 PCGS. A clearly contrasted specimen of this later 19th century proof quarter eagle issue, though the green label holder does not acknowledge the cameo effect. Deeply mirrored fields balance aspects of lemon and honey, all under a thin partial veil of patina, while the crisply detailed portrait and eagle are largely frost-gold. Wispy hairlines close to the central devices determine the grade. Just 80 specimens were struck for this issue, but its survival and auction appearance rates are significantly lower than usual for a stated mintage of similar size. (#7917)

4870 1901 — Cleaned — ANACS. PR58 Details. A patch of hairlines near star 10 accounts for the ANACS notation. Frosty motifs contrast with the reflective fields, though faint marks from non-numismatic storage and handling indicate momentary circulation. (#7927)

INDIAN QUARTER EAGLES

4871 1908 MS64 PCGS. Dappled jade-green and tan-gold toning confirms the originality of this sharply struck and satiny first-year Indian type coin. Devoid of visible marks. Housed in a green label holder. (#7939)

4872 1908 MS64+ PCGS. CAC. Medium-yellow luster overall with a touch of orange toward the edges. The strike is solid overall but has a few small areas of localized weakness. (#7939)

4873 1908 MS65 NGC. CAC. Warm orange-gold luster shifts to yellow at certain angles to the light. The overall detail is decent, though softness is noted at the necklace and upper wing. Smooth eye appeal makes this coin look every bit the Gem. (#7939)

4874 1908 MS65 PCGS. Mint and orange vie for space on this gleaming first-year Gem, which shows no singular contact and excellent eye appeal under a loupe. Demand is intense for the 1908 in high grades. (#7939)

4875 1909 MS63 PCGS. The 1909 Indian quarter eagle is the third-scarcest issue of the series. This well-detailed Select example exhibits lustrous orange-gold surfaces, with attractive rose highlights. (#7940)

4876 1910 MS63 NGC. Rich gold-orange luster is low-key but pleasing. Solidly struck overall with only minor softness at the lowest pendant of the portrait's necklace. (#7941)

4877 1910 MS64+ NGC. Wheat-gold surfaces are satin-frosted with an apricot blush over a large part of the upper reverse. Attentively struck and impressively preserved. (#7941)

**1910 Quarter Eagle, MS66+
Single Finest Coin at PCGS**

4878 1910 MS66+ PCGS. The 1910 Indian quarter eagle claims a nominal mintage of 492,000 pieces, and the issue is a medium rarity in the series in high grade. However, the 1910 is definitely more difficult to locate than the 1908 and the 1925-1929 issues, with whom it is often mistakenly grouped. At the Premium Gem level, the 1910 is a very rare issue, and this coin is the only example awarded the coveted + designation by PCGS.

The coin offered here is a high-end Premium Gem, with well-detailed design elements and lustrous orange-gold surfaces. Attractive hints of rose accent the fields and devices. The surfaces exhibit only the most insignificant signs of contact, an important consideration since this issue is often seen with extensive bagmarks. Population: 8 in 66, 1 in 66+, 0 finer (4/12). (#7941)

- 4879 1911 MS64 NGC.** The near-Gem level of the present 1911 quarter eagle is as fine as easily obtainable for the issue; Gems are much more elusive. This piece displays a few tiny marks that define the grade over antique-gold, lustrous surfaces. (#7942)
- 4880 1911 MS64 NGC.** Better-defined than usually seen, especially on the portrait's necklace. Subtly frosted surfaces have pleasing luster, apricot-gold with elements of peach. (#7942)
- 4881 1911-D Weak D AU50 NGC.** At just the right angle, the D mintmark on this piece catches the light and is visible to the unaided eye. Weak mintmark or no, this is a lightly worn example of the famous key date, pale yellow at the interiors with deepening near the rims, that should find a receptive audience. (#7954)
- 4882 1911-D Weak D AU53 NGC.** The wire rim covering much of the reverse is the telltale sign for the Weak D quarter eagles. This piece shows no trace of the mintmark on antique-gold, still-lustrous surfaces.
From The JG Collection, Part Two. (#7954)

**1911-D Weak D Quarter Eagle, Choice AU
Lightly Circulated Example**

- 4883 1911-D Weak D AU55 NGC.** Like many surviving examples of the Weak D 1911-D quarter eagle, the mintmark is invisible, but the telltale is actually the wire rim around much of the reverse rim. This khaki-gold, lightly circulated coin boasts generous luster, and contact marks are few and minor. Census: 75 in 55, 33 finer (5/12). (#7954)

**1911-D AU Quarter Eagle, Strong D
Key to the Series**

- 4884 1911-D Strong D AU50 PCGS.** Strong D, and so indicated on the PCGS holder. With just 55,680 pieces, the 1911-D is the lowest mintage of the Indian quarter eagle series. Orange-gold color graces both sides of this AU specimen that exhibits nice design detail, save for areas of high point wear, such as on the eagle's shoulder. The few minute marks are consistent with a lightly circulated coin. (#7943)

AU Details 1911-D Two and a Half

- 4885 1911-D — Improperly Cleaned — NGC Details. AU.** The mintmark is low relief but fully outlined with a clear interior. The eagle's shoulder shows slight wear and the straw-gold surfaces are subdued. However, no hairlines are readily evident, and traces of luster glimmer within the recessed relief motifs. (#7943)

AU Details 1911-D Quarter Eagle

- 4886 1911-D — Removed From Jewelry — NGC Details. AU.** This key date Indian quarter eagle has a polished obverse and a mildly granular reverse. The reverse periphery displays wispy pincatches. The mintmark is bold and the eagle is sharp though the Indian displays greater wear. (#7943)

**1911-D Quarter Eagle, AU Details
Important Key to the Series**

- 4887 1911-D — Harshly Cleaned — NGC Details. AU.** Fascinating mattelike fields give this Denver strike its undeniable visual appeal. Collectors have long prized this date of the short-lived reduced relief series for its scarcity. Limited wear and strong detail recommend it as an example of a low-mintage branch mint issue to the thoughtful collector of classic U.S. gold. The cleaning noted does not detract from the coin's overall appearance.

**Key AU 1911-D Quarter Eagle
Deep Reddish-Orange Patina**

- 4888 1911-D AU50 NGC.** The memorably low mintage of 55,600 pieces separates the 1911-D issue from all of its siblings in the completable Indian quarter eagles, marking it as a must-have acquisition. This AU example boasts lovely deep reddish-orange patina over softly glowing, lustrous surfaces with super eye appeal. (#7943)

**AU Sharpness 1911-D Quarter Eagle
Standout Issue in the Indian Head Series**

- 4889 1911-D — Improperly Cleaned — NGC Details. AU.** The 1911-D quarter eagle is a standout issue within the Indian Head series, the only key standing between many collectors and completeness of the set. The cleaning on this piece is not at all blatant, and the orange-gold surfaces retain much luster and eye appeal. An excellent potential acquisition.

**Near-Mint 1911-D Quarter Eagle
Capstone to the Series**

- 4890 1911-D AU58 NGC.** The perennially popular sole key in all grades to the Indian Head quarter eagle set — as opposed to conditional rarities, which might also include the 1914 and 1914-D — the 1911-D quarter eagle saw a low mintage of 55,600 pieces. The present near-Mint State coin represents about the average grade of certified survivors, although there are many “problem children” around, lower-grade examples that have been mistreated through cleaning, tooling, filing, and the like, thus becoming uncertifiable. Golden-orange surfaces retain essentially full luster on this coin, with good eye appeal and few abrasions. (#7943)

Key 1911-D Quarter Eagle, Unc Details

- 4891 1911-D — Obverse Scratched, Cleaned — NGC Details. Unc.** The mintmark is bold, as is most of the detail on the design elements. Both sides display orange-gold color. This is a decent piece, the NGC disclaimers notwithstanding. A couple of shallow scratches are visible at the lower-right obverse and right reverse borders. The cleaning is not all that bad. The 1911-D is elusive even in lower Uncirculated grades.

**Mint State 1911-D Quarter Eagle
Colorful Lustrous Surfaces**

- 4892 1911-D MS61 NGC.** The 1911-D is the low-mintage key to the Indian quarter eagle series. This attractive Mint State example displays sharply detailed design elements and a bold mintmark. The lustrous surfaces are a light orange-gold color, with highlights of rose and lilac. Vibrant mint luster adds to the strong visual appeal. (#7943)

**Boldly Struck and Lustrous
1911-D Quarter Eagle, MS62**

- 4893 1911-D MS62 PCGS.** This 1911-D is certified as a Strong D example, and indeed the mintmark on reverse is remarkably bold. In fact, the strike is bold throughout, with all ornaments bold on the Indian's necklace and no visible weakness on the headdress feathers. Slight softness appears on the highest feathers of the eagle's wing. A couple of linear scrapes on the reverse define the grade, but the greenish-gold, mattelike surfaces radiate generous eye appeal, making this coin a superlative potential acquisition for a complete set. (#7943)

4894 1912 MS63 PCGS. A satiny peach-red Select representative with attractive surface and only slight incompleteness of strike within the lower reaches of the headdress. Housed in a green label holder. (#7944)

4895 1912 MS63 NGC. CAC. Khaki-gold surfaces show minor grade-defining abrasions amid generous luster and a bold strike on this eye-appealing Select Mint State example. (#7944)

**Near-Gem 1912 Quarter Eagle
Boldly Struck, Mattelike Surfaces**

4896 1912 MS64 NGC. The 1912 quarter eagle is among the scarcer series issues, ranked fifth overall by Mike Fuljenz. Yellow-gold surfaces radiate generous luster and show few marks on either side, and a bold if not quite full strike. The mattelike texture is typical but appealing, and a thin mark in the reverse field above the eagle is the only singular contact. (#7944)

4897 1913 MS64 PCGS. Broad and frosted luster enlivens this near-Gem from a higher-mintage issue. All pendants on the necklace are fully outlined, though the last is not rounded. PCGS has graded 98 examples as MS65 or better (4/12). (#7945)

4898 1913 MS64 NGC. CAC. Gold-to-orange at the margins with paler yellow through the centers. Interior detail is impressive, though the lowest pendants on the necklace show a degree of softness. (#7945)

**1913 Quarter Eagle, MS65+
Only Five Finer at PCGS**

4899 1913 MS65+ PCGS. CAC. The 1913 quarter eagle, from a mintage of 722,000 business strikes, is available through the near-Gem level of preservation. MS65 examples are quite challenging, however, and high-end Gems such as the present offering, as well as higher-grade pieces, are elusive. Indeed, PCGS has seen only two MS65+ specimens, and five finer (4/12). Highly lustrous, light to medium yellow-gold surfaces exhibit well struck design elements and are nicely preserved. (#7945)

4900 1914 MS62 PCGS. Deep mustard-gold color complements some smoke-gray accents on this 1914 quarter eagle, a boldly struck example with few marks for the grade. (#7946)

**Select Mint State 1914 Two and a Half
Nice for the Grade and Issue**

4901 1914 MS63 NGC. The 1914 is the second-rarest Philadelphia Mint issue among Indian Head quarter eagles. This Select Mint State representative features consistent orange-gold coloration on each side with a good strike and a few minimal abrasions that preclude an even finer grade. A nice coin for the grade and issue. (#7946)

**Near-Gem 1914 Quarter Eagle
Mattelike Orange-Gold Surfaces**

4902 1914 MS64 PCGS. The 1914 is the second-rarest Indian Head quarter eagle behind the 1911-D, and an important rarity in Gem or finer condition. This near-Gem displays mattelike orange-gold surfaces with copious luster and only a few scattered marks that are in concert with the grade. The certified PCGS population drops precipitously in Gem grade. (#7946)

4903 1915 MS64 PCGS. CAC. Orange and mint hues cover each side of this near-Gem 1915 two and a half, a piece that shows little sign of contact and excellent eye appeal. The issue is about in the middle of the pack in overall rarity. (#7948)

4904 1925-D MS64+ PCGS. Yellow-orange luster has unusual quicksilver properties that blossom into flashiness at the correct angle to the light. A few light horizontal marks in the reverse fields keep the coin just shy of Gem status. (#7949)

- 4905 1925-D MS65 NGC.** The first quarter eagle issue in a decade also would prove to be the last at Denver. This example of the 1925-D is softly struck through the middle but has well-preserved yellow-orange luster for amazing eye appeal. (#7949)
- 4906 1926 MS64 PCGS. CAC.** Swirling apricot-gold luster and a decent strike are this near-Gem's great assets. The grade comes down to a few small but visible marks near the portrait's mouth and to the left of the eagle's head. (#7950)
- 4907 1926 MS65 PCGS.** This apricot-gold Gem has a pale and forbidding beauty, frosted in its luster with a bold inner strike and ethereal eye appeal. One of the most eye-catching examples imaginable for the issue. (#7950)

**1926 Quarter Eagle, MS65+
Appealing Gem Type Coin**

- 4908 1926 MS65+ PCGS. CAC.** The 1926 quarter eagle is one of the most plentiful of the entire series. Even MS65 examples can be located with patience. High-end Gems, such as this coin, and numerically finer specimens are much more difficult, however. Its rose-gold surfaces offer pleasing luster and well-defined devices, including the eagle's shoulder feathers. This is a minimally marked and appealing coin. (#7950)
- 4909 1927 MS64 PCGS. CAC.** A sharply detailed Choice example of this late-series issue, which is elusive in grades above the Gem level. This lustrous greenish-gold specimen shows attractive highlights of rose. *From The Robert Dorsey Smith Collection.* (#7951)
- 4910 1927 MS64+ PCGS. CAC.** Yellow-gold surfaces have touches of orange, more so on the reverse. The obverse comes across as having Gem quality, while the reverse has a luster scrape above the motto IN GOD WE TRUST. (#7951)

**1927 Quarter Eagle, Lustrous MS65+
Elusive in This Grade**

- 4911 1927 MS65+ PCGS. CAC.** The 1927 quarter eagle can be obtained with minimal difficulty through near-Gem, and even MS65 specimens are available with patience. High-end Gems such as this MS65+ offering, however, are elusive. PCGS has graded only three pieces at this level and 17 finer (4/12). The surfaces are yellow-gold with subtle rose undertones and pleasing luster. Sharply struck throughout, including the eagle's shoulder. A few minute marks are visible on the upper reverse. (#7951)
- 4912 1929 MS64+ NGC. CAC.** The mattelike surfaces are greenish-gold and close to Gem grade; only the tiny scuffs in the obverse field likely hold this piece back. The reverse is relatively pristine, and both sides display ample luster. (#7953)

**1929 Indian Two and a Half, MS65
Thick Mint Frost**

- 4913 1929 MS65 PCGS.** Final year of the design as well as the denomination, the 1929 is a relatively available coin for type purposes. This is an especially attractive piece that displays rich mint frost that is virtually unbroken by the usual abrasions. Sharply struck as well, with the only exception being the usual area of softness on this design, the lowest feather in the headdress. (#7953)

PROOF INDIAN QUARTER EAGLES

Premium Gem Proof 1914 Quarter Eagle
Unusually Clean Fields

4914 1914 PR66 NGC. The Mint continued to experiment with different matte proof or sandblast finishes in 1914 in an effort to appease collectors who continued to prefer the brilliant finishes of earlier years. For 1914, a sandblast finish with coarser texture than the 1912 and 1913 issues was attempted. The granular surfaces were darker and less reflective than their immediate predecessors, and proved even less popular. Only 117 proof quarter eagles were struck in 1914, and it is likely that many specimens went unsold and were melted after the end of the year.

The present coin is a spectacular Premium Gem, with sharply detailed design elements and pristine olive-gold surfaces. The unmarked fields are especially attractive, as this issue is usually found with many wispy contact marks. This coin would be a welcome addition to fine collection of Indian quarter eagles. Census: 6 in 66, 16 finer (4/12). (#7963)

Superb Gem Proof 1914 Quarter Eagle
An Immaculate Example

4915 1914 PR67 NGC. The 1914 quarter eagle business strike is a conditional rarity, although one overshadowed by the low-mintage 1911-D. The 1914 proof quarter eagle, on the other hand, is downright rare in any grade, and more so in the Superb Gem proof level of the present piece. The Mint reported a mintage of 117 examples, but this specimen of one of an even dozen submissions (likely not all different coins) at NGC, with but four finer (4/12). The preservation on each side is essentially perfect, to the degree that there are really no visible pedigree identifiers. The strike is a tad soft on the lowest headdress feather, and the surfaces display a deep, brownish-tinged gold color throughout. (#7963)

THREE DOLLAR GOLD PIECES

- 4916 1854 XF45 NGC.** A nice first-year type coin for a midgrade set, this 1854 three shows yellow-gold surfaces with scattered light abrasions but no singular contact. Ample luster remains on each side. (#7969)
- 4917 1854 AU55 NGC.** This Choice AU first-year three dollar gold would fit well into a mostly Mint State type set. Deep orange-gold surfaces display good luster remaining and no overt abrasions. (#7969)
- 4918 1854 AU58 NGC.** Only a whisper of high-point rub separates this piece from Mint State and a much higher price. Greenish-yellow original surfaces show much appeal and no singular contact. The strike is bold. (#7969)

1854 Three Dollar Gold Piece, MS62 Popular First-Year Type Coin

- 4919 1854 MS62 PCGS.** Three dollar gold pieces were struck for the first time in 1854, making the date an important one for type collectors. The large mintage of 138,618 pieces ensured an abundant supply of high-grade coins for numismatists to choose from. This attractive MS62 example is sharply detailed in most areas, with just a touch of softness on the central reverse. Vibrant satiny mint luster enlivens the pleasing surfaces. (#7969)

1854 Three Dollar, MS62 Eye-Appealing First-Year Type

- 4920 1854 MS62 NGC.** The three dollar gold piece was introduced in 1854, making the date extremely popular with type collectors. Nearly 140,000 pieces were struck for circulation. This attractive MS62 example displays lightly marked yellow and greenish-gold surfaces with well-detailed design elements and satiny mint luster. The eye appeal is excellent for the assigned grade.
Ex: New York Signature (Heritage, 12/2011), lot 4494. (#7969)

Near-Mint 1854-D Three Dollar
Legendary D-Mint Issue
Virtually Unobtainable in Finer Grade

4921 1854-D AU58 NGC. CAC. Variety 1-A. As the only D-mint issue in the three dollar gold series, the 1854-D is a desirable coin that is high on the want list of every gold collector. Unfortunately, the issue's paltry original mintage of 1,120 pieces and poor survival rate mean that only the most affluent collectors will be able to obtain a high-quality representative. The total number of 1854-D three dollar gold pieces extant is probably no more than 65-75 pieces, most of them grading between VF20 and XF40. Above the Choice XF level the 1854-D is a major rarity, and we have only handled a few examples in AU58 over the past couple of decades (along with a couple of extremely rare Mint State coins). The last AU58 NGC example we handled was in our Long Beach Signature (Heritage, 5/2009), which brought \$44,562.50, a piece of similar technical and aesthetic quality to the present example.

This is another "old friend come back to revisit," after more than a decade away. Bold strike definition appears around the peripheries, unusual for this issue which is normally weak in those areas. The surfaces are original and appealing, bathed in orange-gold color with tinges of crimson patina scattered about. Traces of frosty luster adhere to both sides, and the overall definition, while typically soft over Liberty's brow and the reverse ribbon, is sharper than normal for the issue. The few abrasions are small and well-scattered, although a group of small indents in the reverse field above the S in DOLLARS provides a pedigree marker. A pleasing coin for the near-Mint State grade, virtually unobtainable any finer, and a legendary issue that always performs well at auction.

Ex: Long Beach Signature (Heritage, 2/2001), lot 6909. (#7970)

- 4922 1855 XF45 PCGS. CAC.** A lightly worn second-year three dollar gold piece with still-luminous surfaces showing a mix of yellow and orange hues. Three small copper spots appear in the fields around Liberty's portrait. (#7972)
- 4923 1855 AU53 NGC.** A luminous second-year example with faint glimmers of yellow-orange luster in the protected areas. Lightly worn surfaces are modestly marked save for a pinscratch to the left of the 3 in the denomination. (#7972)

**1855 Three Dollar, MS62
Conditionally Scarce**

- 4924 1855 MS62 NGC.** Ex: South Texas Collection. This sophomore year three dollar gold piece displays vibrant luster on design elements. The strike is good with slight blending on the high points. A curly abrasion is noted near the bust tip and the peripheries display the occasional brief thin mark. The 1855 has one of the highest mintages of the series but most certified pieces are in XF or AU grades. (#7972)
- 4925 1855-S VF35 NGC.** From a mintage of just 6,000 pieces, the 1855-S three dollar gold piece is a scarce issue in all grades. This moderately worn Choice VF specimen exhibits lustrous greenish-gold surfaces. (#7973)

**1855-S Three Dollar, AU53
First-Year S-Mint of the Denomination**

- 4926 1855-S AU53 PCGS.** Ex: South Texas Collection. Slanted 5s, as always. The 1855-S three dollar is the first and one of the few available issues from San Francisco for this denomination, although only 6,600 were struck in the second year of its operations. This survivor is far finer than usually seen, exhibiting prooflike reflectivity remaining in the protected areas and softly glowing canary-yellow surfaces. Population: 4 in 53, 15 finer (5/12). (#7973)

**AU58 1855-S Three Dollar
Subtly Reflective Luster**

- 4927 1855-S AU58 NGC.** In its early history, the three dollar gold piece was struck at a trio of branch mints: Dahlonega and New Orleans for the first year only, and San Francisco starting the year after in 1855. This near-Mint example from the first West Coast issue of the odd denomination has a faint orange cast to subtly reflective yellow-wheat surfaces. Striking details are crisp wherever wear has left them intact, including on the wreath's bow-knot, and the small amount of friction on the high points scarcely influences this minimally abraded example's generous eye appeal. NGC has certified just three examples as Mint State (4/12). (#7973)
- 4928 1856 AU55 PCGS.** A surprisingly bright third-year example with a mix of pale yellow and deeper orange shadings. A shallow pinscratch trails from Liberty's feathered crown, and the bow on the wreath shows striking softness. (#7974)
- 4929 1856-S XF45 PCGS.** Medium S. A caramel-gold representative with smooth surfaces and moderate wear on the wreath and hair. San Francisco threes are scarcer than their Philadelphia counterparts, particularly in better grades. (#7975)

**Choice AU 1856-S Three Dollar
Elusive Small S Mintmark**

4930 1856-S AU55 NGC. Small S, scarcer than its Medium S alternative. The 1856-S is the only relatively available S-mint three, as the mintages of the 1855-S and 1860-S were only about one-fifth as large, and the 1870-S is, of course, unique. This Choice AU example is nonetheless nicer than usual, with generous luster remaining over bright orange-gold surfaces that show only minor marks, largely confined to the reverse. A popular issue as a San Francisco three. (#7975)

**1857-S Three, AU55
Still Partially Prooflike**

4933 1857-S AU55 PCGS. By definition, this San Francisco issue is scarce in high grades as gold and silver coins produced in that western mint were dropped into circulation and are usually found heavily worn. This is one of the better-preserved examples. Even though each side displays numerous small to medium-sized abrasions, the fields still retain significant reflectivity. Orange-gold color, the devices show even wear from side to side. (#7977)

Scarce AU 1857-S Three Dollar

4931 1857-S AU50 PCGS. CAC. A better San Francisco date, scarcer than its 1856-S predecessor. A scant 14,000 pieces were issued, and those were given little numismatic consideration, since PCGS has certified only two pieces as Mint State. The present example has light wear on the curls and forehead but the caramel-gold surfaces are without any consequential marks. Population: 22 in 50, 29 finer (4/12). (#7977)

**1858 Three Dollar, AU58
Early, Low-Mintage Date**

4934 1858 AU58 PCGS. As suggested by its limited mintage of 2,133 business strikes, the 1858 is one of the rarest three dollar gold pieces. Nearly all went into circulation, leaving just a handful of coins in Mint State. Considerable luster resides on the yellow-gold surfaces of this AU58 specimen, and both sides are well struck. There are no marks out of the ordinary for the grade. Population: 11 in 58, 10 finer (4/12). (#7978)

**Choice AU 1857-S Three Dollar
Popular Branch Mint Issue**

4932 1857-S AU55 NGC. A mintage of 14,000 pieces entered circulation, and survival was a matter of chance. The average certified grade is about XF40, and Choice AU or finer pieces are rarely encountered. Subdued yellow-gold surfaces appear on this scarce three dollar gold piece. Hints of green are evident on each side with traces of satin luster in the protected areas. Census: 29 in 55, 11 finer (5/12). (#7977)

**Two-Toned Select 1860 Three Dollar
Frosty and Well-Struck**

4935 1860 MS63 PCGS. With an initial mintage of only 7,036 pieces, the 1860 three dollar gold piece is a scarce coin today. Q. David Bowers states, "Only a few hundred coins exist of this date, most of which are in circulated grades." This piece offers significant "wow" factor, well struck with frosty devices and hints of lavender on deep sunset-orange surfaces. Population: 15 in 63, 16 finer (5/12).
Ex: Cincinnati Central States (Heritage, 5/2009), lot 3714. (#7980)

**Near-Mint 1860-S Three Dollar Gold
Last Collectible Mintmarked Three**

- 4936 1860-S AU58 NGC.** Ex: South Texas Collection. Excluding the unique-as-we-know-it 1870-S, the 1860-S is the last mintmarked three dollar gold issue, and it caps the non-Philadelphia series in a practical sense. This near-Mint representative, one of just 7,000 pieces struck, has plenty of flash and radiance. Its yellow color is largely pale but deepens at parts of the margins, where a touch of green appears. Modestly rubbed with a few post-striking marks, though the sizable yet smooth planchet depression to the left of the headdress does not influence the technical grade. NGC has graded just five Mint State examples (4/12). (#7981)

Uncirculated Details 1861 Three Dollar

- 4937 1861 — Cleaned — ANACS. MS60 Details.** A nicely struck sun-gold piece, one of just 5,959 examples minted. The surfaces display no trace of wear, though the lightly hairlined fields have subdued luster. A few copper spots are noted on the upper right obverse and traces of mint-made roller marks are on the central reverse.
Ex: FUN Signature (Heritage, 1/2007), lot 5708.
From The Jones Beach Collection. (#7982)

Honey-Gold 1861 Three Dollar, MS62

- 4938 1861 MS62 PCGS.** Ex: South Texas Collection. The 1861 three dollar gold saw a meager mintage of 5,959 business strikes. Most of the post-1850s strikes were token emissions for the unpopular and little-loved denomination, which competed unsuccessfully with the quarter eagle and half eagle. This honey-gold piece shows a few stray ticks in concert with the grade over reflective, somewhat prooflike surfaces. Population: 19 in 62, 29 finer (5/12). (#7982)

**Low-Mintage 1869 Three Dollar, MS61
Deep Red-Orange Color, Reflective Fields**

- 4939 1869 MS61 NGC.** Given the meager mintage of 2,500 pieces for circulation, it is unsurprising that Mint State examples such as the present MS61 piece show prooflike reflectivity in the protected areas. Lovely reddish-orange color throughout complements considerable field-device contrast. The fields show light chatter rather than overt marks that preclude a finer grade. Census: 11 in 61, 7 finer (5/12). (#7990)

1870 Prooflike Three Dollar, Near-Mint

- 4940 1870 AU58 Prooflike NGC.** Only 3,500 circulation strikes were produced for the 1870 three dollar, and many of the high-grade survivors are prooflike as is this piece. Many 1870s are so deeply reflective that they have been confused with proofs in the past. This is a brightly reflective example with slight reddish-tinted surfaces. Minimal handling marks are present, none of which are worthy of mention. Census: 4 in 58 Prooflike, 7 finer (5/12). (#77991)

- 4941 1874 AU50 ANACS.** Distinctly worn on the high points but still a flashy yellow-to-orange example of the popular odd-denomination type issue. Small abrasions that dot the fields are grade-consistent. Housed in a small-format holder. (#7998)

- 4942 1874 AU50 NGC.** The 1874 three dollar gold piece is a popular type issue from a mintage of 41,800 pieces. This lightly circulated example is well-detailed, with lustrous greenish-gold surfaces. (#7998)

- 4943 1874 AU53 NGC.** Well-defined for this type issue despite appreciable wear on the high points. Yellow-orange fields are slightly dusky yet luminous, and a few small digs in the fields are consistent with the AU53 designation. (#7998)

Appealing Mint State 1874 Three Dollar

- 4944 1874 MS61 NGC.** The 1874 is one of the three large-mintage issues in the series, well-suited for type set purposes. This Mint State example is highly appealing and boasts lovely apricot-gold color with hazel tints and good luster. Only a few minor abrasions scattered around each side account for the grade. (#7998)

**Select 1874 Three Dollar
Strong Type Coin**

- 4945 1874 MS63 PCGS.** This Select example of the popular three dollar gold type issue offers a good balance of quality and price. While grade-defining abrasions are present, these are generally light or wispy, and the luster is strong and swirling with a mix of paler canary and deeper sun-gold shadings. A touch softly struck but with quality eye appeal. (#7998)

- 4946 1878 AU55 NGC.** This Choice AU example remains quite lustrous with warm honey-gold accents in the protected areas. Only light wear is noted on the high points, as one would expect for a Choice AU example. (#8000)

- 4947 1878 — Improperly Cleaned — NGC Details. Unc.** A gently wiped but nonetheless impressive three dollar type coin. Honey-gold and lime-green surfaces shimmer with luster and show only inconsequential contact. (#8000)

**1878 Three Dollar, MS62
Good Type Coin Choice**

- 4948 1878 MS62 NGC.** The typical 1878 three dollar piece is in the lower range of Mint State with a fair number of bagmarks, probably from having been tossed around in bags stored in banks. The bright gold surfaces of this MS62 offering reveal distributed minute marks that are less detractive than often seen. Liberty's hair and plumes and the lower wreath show a light strike, as typically seen on this issue. A good choice for a type coin. (#8000)

Orange-Red Near-Gem 1878 Three

- 4949 1878 MS64 PCGS.** This near-Gem example of the last high-mintage issue in the three dollar gold series might represent an important opportunity for type set or complete set collectors. The surfaces abound with copious luster and deep orange-red color. There is no mentionable contact, although a bit of die roughness appears on the foremost feather tops. (#8000)

**1878 Three Dollar Gold, MS64+
Ideal Type Coin**

- 4950 1878 MS64+ PCGS.** With a reported mintage of 82,304 pieces, the 1878 three dollar gold piece is one of the most available dates of the series. High-end Choice examples, like the present coin, are always in demand from type collectors. This well-detailed specimen exhibits a touch of softness on the central devices, with vibrant satiny mint luster, and only minor signs of contact. (#8000)

**1879 Three Dollar, MS61
Only 3,000 Pieces Produced**

- 4951 1879 MS61 PCGS.** In spite of the low mintage of only 3,000 circulation strikes for the 1879, few were actually needed in the channels of commerce. Thus, they languished in bank vaults until called for by dealer/collectors of the day. This is a well-produced example that displays rich reddish patina over each side. The fields show the often-seen mixture of semiprooflikeness and cartwheel luster. Minimally marked for the grade. (#8001)

Select Mint State 1880 Three
Two-Toned, Relatively Unmarked Surfaces

- 4952 1880 MS63 PCGS. CAC.** The 1880 three dollar saw a skimpy mintage of only 1,000 business strikes, but more survive than might be expected, apparently the result of contemporary numismatists salting away examples. This Select piece displays bold luster over orange-gold surfaces accented with hazel glints. Only a few tiny, scattered marks define the grade. Population: 41 in 63, 84 finer (5/12). (#8002)

Near-Gem 1882 Three Dollar
Highly Reflective Surfaces

- 4953 1882 MS64 PCGS.** By 1882, the U.S. Mint manufactured small-denomination gold coins — quarter eagles and half eagles — in the millions of pieces, to the detriment of double eagles and the long-since-unneeded three dollar denomination, whose paltry emission was 1,500 business strikes. The Mint State survivors are unsurprisingly (but delightfully) prooflike to semiprooflike in many instances, as on the present near-Gem, which displays ample prooflike qualities. Rich reddish-orange color is augmented by tinges of greenish-hazel near the rims. This piece is well-struck, and only a few tiny ticks and scrapes away from the Gem level.
Ex: *Central States Signature* (Heritage, 4/2011), lot 5358. (#8004)

Attractive MS62 1887 Three Dollar

- 4954 1887 MS62 ANACS.** Designated as Doubled Die Obverse on the ANACS insert, though we note this feature is common to all business strikes of the issue, since only one obverse die was used to coin the meager mintage of 6,000 pieces. For the record, doubling is strongest on the RICA in AMERICA. This is a precisely struck piece with good luster, minimal marks, and pleasing sun-gold and lime-green toning. (#8009)

Reflective Near-Gem 1887 Three Dollar

- 4955 1887 MS64 PCGS.** A Choice Mint State specimen, the 1887 three dollar gold piece is often available in higher circulated and lower Mint State grades, but seldom as fine as the present example. Only 6,000 coins were minted, yet that is the highest mintage of any date in the 1880s. Nearly all survivors grade either AU or Mint State. However, it is uncertain how many have survived, or even how many left the Mint in the first place. It seems that an unknown quantity may have been melted, having never entered circulation. This near-Gem displays deep orange-gold color over unabraded, highly reflective surfaces with much eye appeal. Population: 68 in 64, 33 finer (5/12).
Ex: *FUN Signature* (Heritage, 1/2009), lot 5339. (#8009)

Low Mintage 1888 Three Dollar, MS62

- 4956** 1888 MS62 PCGS. This peach-gold three dollar coin has ample luster and an absence of consequential contact. Slight blending of detail is limited to the eyebrow and the hair above the ear. UNITED is lightly die doubled, as seen on all business strikes, because only one obverse die was used to produce the scant mintage of 5,000 pieces. Encapsulated in a green label holder. (#8010)

PROOF THREE DOLLAR GOLD PIECES

Rare Proof 1885 Three Dollar

- 4957** 1885 — **Altered Surfaces** — ANACS. PR60 Details. Since the 1885 has a proof mintage of just 109 pieces, the present specimen seems to be a great find upon first glance. Intricately struck and void of visible contact, but the obverse field has been carefully smoothed. The reverse appears unimpaired. An affordable example of a rare date. The corresponding 1885 business strike is also difficult to find, since only 801 pieces were issued. (#8049)

Select Cameo Proof 1887 Three Dollar

- 4958** 1887 PR63 Cameo PCGS. CAC. With an official mintage of 160 specimens and significantly over half of those coins still extant today, the 1887 is among the most accessible proof three dollar gold issues. Though lightly hairlined, most visibly off the U of UNITED, this Select specimen is pleasing overall, thanks to quality field-to-device contrast. Yellow-gold is the dominant color, though a prominent reddish-brown copper area is noted just below the tip of Liberty's bust. Parts of the obverse and much of the reverse fields show the "orange-peel" texture associated with proof gold coinage. Population: 3 in 63 Cameo, 15 finer (4/12). (#88051)

1888 Three Dollar Gold, PR62
Struck From Proof-Only Dies

- 4959 1888 PR62 PCGS. The recorded mintage of the 1888 proof three dollar gold was 291 pieces, largest of the series, although some may have been melted or otherwise traded away — see the Breen *Proof Encyclopedia* for much more. There are two proof varieties, although the present piece is struck from the proof-only dies, showing a long rust patch on the neck and no doubling on LIBERTY; the other dies with doubled LIBERTY were used as well for business strikes. This PR62 piece shows a few faint field hairlines and tiny contact marks that account for the grade. Deep orange-red surfaces show the expected needle-sharp strike and excellent eye appeal for the grade. (#8052)
-

PROOF FOUR DOLLAR GOLD PIECES

PR45 Details 1879 Flowing Hair Stella
Accessible Example of Judd-1635

- 4960 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3 — Ex-Jewelry — ANACS. PR45 Details. “It’s still a stella.” For an interesting data point concerning the intense demand that the unusual stella or four dollar gold pieces see from collectors, one need look no further than lot 4831 of our FUN Platinum Night (Heritage, 1/2012), an 1879 Flowing Hair stella, whose description began as quoted above. Described as “Plugged, Harshly Cleaned, — NGC Details. XF,” the lot was already bid up to \$13,800 within a week after the Platinum Night auction was launched. The final sale price was a healthy \$32,200, indicative of the incredible market strength this type coin enjoys. We use the words “type coin” advisedly, as this pattern issue has been collected alongside regular-issue type coins for generations and is included in the *Guide Book* right after three dollar gold pieces — *not* in the patterns section.

Though this stella was used in jewelry and shows numerous contact marks and cleaning aftereffects, “It’s still a stella.” Perhaps this light yellow-gold example is the right coin for your set? (#8057)

1879 Flowing Hair Stella, Judd-1635, PR64
Distinctive Reddish Peripheries

4961 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR64 PCGS. The 1879 Flowing Hair stella is one of America's most popular gold coin types, one that is strictly a pattern but usually collected alongside regular-issue coinage — or alongside the few other patterns that have “made it” into the wider world outside of the pattern specialists' domain.

Q. David Bowers writes in *Guide Book of United States Type Coins* concerning the stellas and their special status:

“By any evaluation these are patterns, not regular issues, and are in the purview of specialists in the pattern series. However, the wide availability of the 1879 Flowing Hair has made it a stock-in-trade item for coin sales and auctions for more than a century, with the majority of buyers being collectors of regular coins, not pattern specialists. Furthermore, the curious \$4 patterns have been neatly adopted into nearly all books that list regular coins but not patterns (or just a few patterns, such as the 1856 Flying Eagle cent and the 1859 transitional half dime, as examples). The old Wayte Raymond *Standard Catalogue* (1934 to 1958 publication run) and the *Guide Book of United States Coins* followed suit.”

The 1879 Flowing Hair stellas are variously estimated to have been made in an extent ranging from 400+ coins up to 725 or so pieces. The closest parallel to the 1879 Flowing Hair stella is another pattern issue that was produced in unusually large quantities, the 1856 Flying Eagle cent, another coin issue universally collected as part of the regular series. This is a deeply reflective example that displays rich reddish patina around the margins. There are almost no noticeable contact marks, and the usual die striations run diagonally across each side. Housed in a first-generation holder. (#8057)

EARLY HALF EAGLES

1795 Capped Bust Right Five, AU50 First U.S. Gold Issue Rare BD-4 Variety

4962 1795 Small Eagle AU50 PCGS. BD-4, R.5. The 1795 half eagles were the first gold coins produced by the United States, and the Philadelphia Mint struck all 8,707 pieces of the reported mintage by September 16 of that year. The public saved many 1795 half eagles as souvenirs. Despite its low mintage, this issue required seven obverse and nine reverse dies. At least two of those dies survived beyond the year, and were later used to produce the famous 1796/5 and 1797/5 varieties.

This coin represents the very scarce BD-4 variety, which probably accounted for 1,000-1,500 pieces of the reported mintage. Some of the diagnostics for the BD-4 are: the tip of 5 in the date barely overlaps the drapery above; the upper point of obverse star 11 extends onto the Y in LIBERTY; the lower two points of star 11 intersect the upper two points of star 12; a die crack at star 12 to the rim; and only three berries on the reverse wreath. John Dannreuther estimates a surviving population of just 60-75 examples of the BD-1 in all grades.

Robert Scot designed both sides of this initial half eagle design. Liberty faces right and wears a conical cap or hat on the obverse. She is surrounded by peripheral devices that include the date, 15 stars (ten to the left side, five to the right), and the word LIBERTY. On the reverse, an eagle perches on a palm branch with nine leaves, and clutches a circular wreath in its beak, with UNITED STATES OF AMERICA around the periphery. This AU example displays generally well made devices and modestly reflective fields. While the obverse features are crisply defined, the reverse shows obvious striking weakness on the eagle's neck, breast, and leg feathers. There are numerous wispy marks and hairlines on both the obverse and the reverse, as well as a couple of moderate blemishes on the upper reverse, and a heavy abrasion in the left obverse field. Rich green-gold and peach patina adorns each side of this highly attractive survivor.

Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 1893, realized \$36,800. (#8066)

1795 Small Eagle Half Eagle, AU58
Very Rare BD-2 Variety
20-25 Examples Extant

4963 1795 Small Eagle AU58 NGC. BD-2, R.6. Bass-Dannreuther Die State a/c. Gold coins were struck at the Philadelphia Mint for the first time in 1795, with both the five and ten dollar denominations delivered during the year. The official reported mintage of 1795 half eagles was only 8,707 pieces, but some 1795-dated coins may have been struck in 1796, until the dies failed. The coins struck in 1795 (and possibly 1796) employed a Small Eagle reverse design, with 12 die varieties known for the date and type. A few years later, some 1795-dated obverse dies were combined with Heraldic Eagle reverses to produce three more die varieties of the date. The study of die varieties of this issue began early, as John Colvin Randall knew of at least eight varieties in 1885, and William Woodin knew of 11 varieties when he displayed his collection at the 1914 ANS Exhibition. Waldo Newcomer was able to acquire all 12 of the known Small Eagle varieties by 1931.

The coin offered here represents the very rare BD-2 variety, with star 11 touching both Y in LIBERTY and star 12. On the reverse, one leaf merges with U and another touches the left foot of N in UNITED. The BD-2 probably accounted for 500-1,000 pieces of the reported mintage, possibly constituting the August 11, 1795 delivery of 520 coins. John Dannreuther believes the surviving population numbers no more than 20-25 examples in all grades, with the lower figure being more likely.

The present coin is an attractive near-Mint specimen, with slightly reflective lemon-yellow surfaces. The design elements are well-detailed, with a touch of softness showing on the eagle's breast and some stars. Only the slightest trace of actual wear shows on the high points of the design. A few minor contact marks are evident, the worst being a thin scratch in the left obverse field, near the hair. Faint traces of adjustment marks can be detected at the top of the reverse. This coin possesses absolute rarity, intense historic interest, and strong aesthetic appeal. We expect spirited competition when this lot is called. Census (for all varieties): 63 in 58, 59 finer (4/12). (#8066)

**1798 Heraldic Eagle Five, AU Details
Very Scarce BD-4 Variety, Terminal Die State**

- 4964** 1798 Large Eagle, Large 8, 13 Star Reverse — Improperly Cleaned — NGC Details. AU. BD-4, High R.4. Bass-Dannreuther Die State d/e. This coin shows the cuds on the reverse rim, between ES of STATES and by O in OF, that signify the terminal die state of the very scarce BD-4 variety. This coin retains much of its original design detail, but the surfaces show the unnatural sheen resulting from an earlier cleaning. (#8078)
- 4965** 1803/2 — Repaired, Tooled, Whizzed — ANACS. VF30 Details. BD-4, R.4. The fields are extensively smoothed, and the coin has been whizzed and cleaned. The surfaces are hairlined and glossy. Nonetheless, a collectible scarcer date example of this challenging early gold series. (#8084)

1805 Five Dollar, Bright MS64
BD-1, Popular Early Issue

4966 1805 MS64 NGC. BD-1, High R.3. Obverse State a / Reverse State a. A substantial mintage of 33,183 half eagles was achieved in 1805, with five die varieties known for the date. The present coin is a representative of the Close Date BD-1 variety, characterized by the perfect numeral 1 in the date, the close positioning of the letters IT in UNITED and the leaf touching I in AMERICA. John Dannreuther believes the BD-1 variety accounts for 10,000-15,000 pieces of the original mintage, as it is the most available of the five die varieties today. Perhaps 175-225 specimens survive in all grades, with most seen in circulated or lower Mint State grades. The issue can be located in MS62 or MS63 without too much difficulty, making the date a popular choice for type collectors. As might be expected with coins from this era, examples in Choice Mint State condition are rare, and anything finer is virtually unobtainable. Current population data reveals NGC has certified 23 specimens in MS64, with only two finer, while PCGS has graded 19 examples at the Choice level, again with two finer (4/12).

The 1805 half eagle has always been popular with collectors, and its auction history extends back to the A.C. Cline Sale (M. Thomas & Sons, 6/1855), when an example was offered as lot 180. Students of the series began to differentiate between the different die varieties as early as 1885, when a Close Date specimen was offered as lot 900 of the Randal Collection (Woodward, 7/1885), "1805 No. 2; close date, figures touch, fine." The date has enjoyed increasing popularity in recent years, as knowledge of the series has grown.

This is a marvelous Choice Mint State example, with pleasing greenish-gold surfaces and abundant mint luster. The striking details are sharp for an early gold issue, with fine detail present in Liberty's hair and the feathers on the eagle's breast. A few light adjustment marks on the bust can be detected with the naked eye, but it requires close examination with a loupe to detect the marks hidden in the details of the cap. Aside from these mint-made blemishes, the surfaces are remarkably free of distractions. One shallow scratch in the obverse field is the only mentionable flaw. Few examples of early U.S. gold coinage can match the eye appeal of this magnificent specimen. We expect intense competition from type collectors and early gold specialists alike when this lot is called.

Ex: Long Beach Signature (Heritage, 9/2010), lot 5316. (#8088)

Choice 1805 Half Eagle
Close Date, BD-1 Variety
Only Two Finer Coins at PCGS

4967 1805 MS64 PCGS. CAC. BD-1, High R.3. Bass-Dannreuther Die State b/b. According to Mint records, a nominal mintage of 33,183 Capped Bust Right half eagles was achieved in 1805, but it is possible that some of these coins were dated 1804. There are five die varieties known for the date, with this coin representing the most available BD-1 variety, characterized by the perfect 1 in the Close Date, the leaf touching I in AMERICA, and the letters IT in UNITED being spaced close together. John Dannreuther estimates the BD-1 variety accounted for 10,000-15,000 pieces of the original mintage, with a surviving population of 175-225 specimens in all grades. Examples in Choice Mint State condition are rare. The obverse die was also used to strike the BD-2 variety of this date, but the BD-1 is the only use of this reverse die.

The Capped Bust Right half eagles were collected from the earliest days of the hobby, and much has been learned from the study of die states and die varieties. Serious numismatists began to differentiate between the different die varieties at a surprisingly early date. In the Randall Collection (W. Elliot Woodward, 7/1885), the cataloger listed three coins representing different die varieties of the 1805 half eagle. Of course, the study of die varieties in the 19th century was limited to series specialists, and the average collector did not pursue this kind of specialized knowledge until much more recent times. Lot 900 in the Randall sale may have been an example of the Close Date BD-1 variety, "1805 No. 2; close date, figures touch, fine." Present-day collectors know that the BD-2 variety also features a Close Date (actually, the varieties employ the same obverse), so it is impossible to tell for sure if this description is for a BD-1.

The present coin is an impressive Choice example, with well-detailed design elements and especially vibrant mint luster. The attractive greenish-gold surfaces display only minor contact marks, with faint traces of adjustment marks in the clouds on the reverse. Eye appeal is outstanding. Population: 19 in 64, 2 finer (4/12). (#8088)

4968 1806 Round Top 6, 7x6 Stars — Cleaned — ANACS. Fine 12 Details. BD-6, R.2. A well-worn straw-gold Heraldic Eagle five dollar type coin. The surfaces are cloudy with hairlines and display minor abrasions commensurate with the details grade. (#8089)

**Choice AU 1806 Half Eagle, BD-6
7x6 Stars, Knob 6**

4969 1806 Round Top 6, 7x6 Stars AU55 NGC. BD-6, R.2. BD-6 is the sole die marriage of the Capped Bust type with a 7x6 star arrangement but is collectible relative to the overall rarity of the series. This honey-gold example has extensive luster for the AU55 level and is void of any distracting marks. The strike is good with blending noted on the vertical shield lines. A high quality yet affordable representative of a desirable early gold type. (#8089)

**1806 Half Eagle, AU58
Popular Knobbed 6, BD-6 Variety**

4970 1806 Round Top 6, 7x6 Stars AU58 NGC. BD-6, R.2. Bass-Dannreuther Die State b/c. The 1806 Capped Bust Right half eagle claims a mintage of 64,093 pieces, with six die varieties known for the date. The present coin represents the popular BD-6 variety, the only one with a knobbed 6 in the date. The BD-6 is the most available variety of the year and probably accounted for 35,000-50,000 pieces of the original mintage. With an estimated surviving population of 600-900 pieces in all grades, the BD-6 is a favorite choice of type collectors seeking an example of the Capped Bust Right design.

The coin offered here is a well-detailed near-Mint example, with just a slight touch of wear showing on the high points of the design elements. A little softness shows on the shield and minute traces of adjustment marks can be seen in the reverse dentils at 2 o'clock. The attractive greenish-gold surfaces retain much of their original mint luster. (#8089)

**Attractive Choice Fine 1806 Half Eagle
Pointed Top 6, 8x5 Stars, BD-1**

- 4971 1806 Pointed Top 6, 8x5 Stars Fine 15 NGC. CAC. BD-1, R.4.** A fairly available yet still very scarce die pairing, the BD-1 is easily recognized by the Pointed 6 with 8x5 Star obverse, star 1 nearly touching the lowest curl at two points, and the broken T's on the reverse. Despite the even, fairly extensive wear consistent with the grade, this piece retains a lot of eye appeal. There are no planchet adjustment marks, and the reverse shows more remaining detail than the obverse. The yellow-gold surfaces display excellent eye appeal. A nice example for a midgrade type set. (#8090)

**1807 Capped Bust Left Half Eagle, Unc Details
BD-8 Variety, New Bass-Dannreuther Die State b/a**

- 4972 1807 Bust Left — Improperly Cleaned — NGC Details. Unc. BD-8, R.2.** Bass-Dannreuther Die State b/a. This obverse die was used to strike the previous variety for the date, BD-7, where it was observed in Die States a and b, the latter showing extensive clash marks. For the BD-8 variety, the Bass-Dannreuther reference lists Die State c, with the clash marks removed by lapping, as the earliest state of the obverse die, but adds:

“...probably the first state, although the previous state of the obverse, State b, may exist with this state of the reverse...”

We believe this coin represents the obverse Die State b, with dramatic clash marks visible in many areas around the bust, combined with reverse Die State a, as John Dannreuther postulated in his statement above. The clash marks are most easily observed between the date and the bust. The surfaces of this sharply detailed example show the unnatural sheen imparted by a previous cleaning, but collectors of early gold die varieties will find this new discovery exciting and worth a serious bid. (#8101)

Mint Director Robert Patterson

Very Rare 1808/7 Close Date Five, MS64, BD-2
Satiny, Well-Struck, and Near-Pristine

4973 1808/7 Close Date MS64 PCGS. BD-2, High R.4. Two 1808/7 die marriages are known, both of which share a common reverse die with a closely spaced denomination. Although the obverses for BD-1 and BD-2 are quite similar, they can be distinguished by the alignment of denticles below the date. BD-2 also has an open curl (from die lapping) above the 0 in the date. According to *Early U.S. Gold Coin Varieties, A Study of Die States, 1795-1834*, (2006), quoting from the Bass Notebook:

“OBV: 8 over 7. Wide date. Numerals evenly spaced. Numerals widely spaced. 1 is centered over two denticles. Top of 1 higher than that of 8. Cross bar of 7 within top opening of 8. Serif of 7 atop 8 at left. No foot of 7 visible beneath bottom loop of 8. Large round die center punch lump within a depressed circle on jaw in front of hair curl. Die has been lapped, resulting in bottommost curl being weak and broken at right side. This interior is hollow. REV: That of 1807 (Y). Clash visible within shield. Clashed and lapped.”

This very scarce near-Gem example has a crisp strike, and the field areas on each side are virtually untouched. No planchet adjustment marks are visible. One of the lower points of obverse star 13 is malformed (as made — the so-called “secret signature” of designer John Reich). Lovely satin luster illuminates the clean fields and well-formed devices. The essentially yellow-gold coloration is imbued with lime-green undertones. Although this piece is remarkably well preserved, thin horizontal marks appear across Liberty’s neck and cheek. The reverse seems virtually blemish-free.

From an estimated mintage of 7,500 to 12,500 (for the BD-2 variety, from a total for the date of 55,578+ pieces), this specimen is one of just three coins certified at the MS64 grade tier by NGC and PCGS combined, and only a single Gem has been encapsulated, by PCGS (4/12).

Ex: FUN Signature (*Heritage*, 1/2007), lot 3518; Long Beach Signature (*Heritage*, 2/2012), lot 4758. (#8103)

**1812 Half Eagle, AU Details
Narrow 5D, BD-2 Variety**

- 4975** 1812 — Cleaned — Genuine PCGS. AU Details. Narrow 5D, BD-2, High R.4. Bass-Dannreuther Die State c/a. This variety of the two known for the historic date 1812 is distinguished by the unmistakably narrow 5D on the reverse. Pale gold luster intensifies around the boldly defined reliefs on both sides of this example of the final date of John Reich's matronly Capped Bust design. The noted cleaning, while visible, is of little import.

Bold XF 1813 Half Eagle, BD-1

- 4976** 1813 XF40 PCGS. BD-1, R.2. The Capped Head Left ranks among the rarest gold designs. The 1813 is the most available date within the series, and is often selected by early type collectors. The present apricot-gold representative appears to grade AU upon first glance, due to its sharpness and luster extent. However, thin marks are noted near the lips, beak, and wingtips. Housed in a first generation holder. (#8116)

**AU Sharpness 1813 Half Eagle, BD-1
Boldly Struck and Appealing**

- 4977** 1813 — Filed Rims — Genuine PCGS. AU Details. BD-1, R.2. The minor rim filing on the reverse is not at all distracting and scarcely worthy of mention. This piece still retains broad appeal and excellent depth of detail. The yellow-gold surfaces show no planchet adjustment marks, the strike is bold, and there are few signs of contact. An excellent and affordable potential acquisition.

1813 BD-1 Half Eagle, AU Details

- 4978** 1813 — Surfaces Tooled — Genuine PCGS. AU Details. BD-1, R.2. Apparently an early die state with no visible clash marks, although slight lapping is noted. Minor surface tooling on the obverse and reverse of this half eagle gives the appearance of a cleaned specimen. Both sides are bright greenish-gold with light wear on the high points. The central design motifs are sharp.

CLASSIC HALF EAGLES

- 4979** 1834 Plain 4 AU50 NGC. Second Head, Breen-6502, McCloskey 2-A, R.1. This yellow-gold AU Classic five is void of noticeable marks and displays vibrant luster on the eagle, curls, and margins. The strike is good aside from blending on the hair above the ear. (#8171)

- 4980** 1834 Plain 4 AU55 NGC. First Head, Breen-6501, McCloskey 3-B, R.1. This undisturbed olive-gold Choice AU half eagle exhibits copious luster on the eagle, hair, and margins. Nicely struck and generally unabraded aside from one mark on the jaw. (#8171)

- 4981** 1834 Plain 4 AU58 NGC. First Head, Breen-6501, McCloskey 3-B, R.1. Peach-gold luster and lime-green fields ensure the eye appeal of this well struck and partly satiny near-Mint Classic type coin. The smattering of minor marks are of singular unimportance. (#8171)

- 4982** 1834 Crosslet 4 VF30 PCGS. Second Head, Breen-6503, McCloskey 5-D, R.4. The desirable, distinctive, and scarce Crosslet 4 variety. The caramel-gold surfaces are mildly glossy and have only one noticeable mark, located above the eagle's neck. The high points show wear but much detail is present. (#8172)

- 4983** 1835 AU55 NGC. First Head, Breen-6504, McCloskey 1-B, R.3. A lemon-gold Choice AU Classic five that exhibits substantial glimmering luster and a nice strike. Lightly abraded despite a pair of moderate marks on Liberty's face. The shield is clashed near the ear, as made. (#8173)

**Near-Mint 1835 Half Eagle
McCloskey 1-A, Sharp Detail**

- 4984** 1835 AU58 PCGS. First Head, Breen-6504, McCloskey 1-A, R.2. This near-Mint example of the second year of Classic half eagle coinage is better-defined than usually seen. Only a touch of rub is visible on the highest design elements, and the overall level of detail is actually *better* than on many Mint State coins despite the wear. Small, scattered marks and a few heavier digs also are present. Population: 40 in 58, 57 finer (5/12). (#8173)

4985 1837 AU50 ANACS. Large Date, Large 5, Breen-6512, McCloskey 2-B, R.3. Cherry-red luster fills design recesses of this otherwise olive-gold Classic type coin. Devoid of visible abrasions, and the wingtips and hair exhibit only moderate wear. (#8175)

4986 1838-C — Improperly Cleaned — NGC Details. VG. Breen-6517, Normal 5, Variety 1, R.4. A well-worn first-year Charlotte half eagle with extensive rim merging at the upper and right reverse. Though cleaned in the past, this moderately abraded example's orange-gold color and violet accents remain pleasing. One of the most accessible examples of this historic issue. (#8177)

1838-C Half Eagle, XF40 One of the Keys to the Classic Series

4987 1838-C XF40 PCGS. Variety 2, R.5. The single leaf below the U in UNITED nearly touches that letter. The 1838-C is one of the keys to the Classic five dollar series, and is very difficult to find above Extremely Fine. Yellow-gold surfaces display better definition than ordinarily seen. Light marks are scattered about, but are fewer and less severe than is typical on the issue, which is usually very heavily abraded. A bold diagonal reverse die break often seen on this variety is visible on this piece. (#8177)

LIBERTY HALF EAGLES

4988 1839-D — Improperly Cleaned — NCS. AU Details. Variety 1-A. The rarer of the two known die varieties. This Dahlonega five is coated with hairlines but the margins, stars, and eagle team with luster. The sole obverse D mintmark issue of the Liberty type. (#8193)

4989 1840 Narrow Mill AU50 PCGS. This lightly circulated 1840 Liberty half eagle represents the more available Narrow Mill variety, with well-detailed design elements and lustrous greenish-gold surfaces. Population: 25 in 50, 64 finer (5/12). (#8194)

1840-C Half Eagle, AU55 First C-Mint Reverse Mintmark Five

4990 1840-C AU55 NGC. CAC. Variety 2. This is a high-grade example of the first Charlotte date displaying its mintmark on the reverse, a discrete variety that brought the then-new design into step with most other U.S. gold coins. The Liberty coins were to circulate freely for the next six decades, and in the years before Augustus Heaton published his study *Mint Marks* in 1893, few collectors saw any reason to preserve examples of generally elusive branch mint issues. The present coin shows relatively light circulation with no special problems; the mintmark is well-centered and boldly impressed. A single die crack links the left wingtip to the denticles. Census: 17 in 55, 19 finer (4/12). (#8196)

Surprising MS61 1842-D Half Eagle Small Date and Letters

4991 1842-D Small Date MS61 NGC. Variety 8-E. The date and reverse lettering (mintmark excepted) appear practically petite on this variant. The MS61 example offered here has great charm. Powerful golden luster is either pale yellow or has the richness of cheddar, occasionally appearing marbled in the obverse fields with a paler appearance on the devices. The reverse detail is excellent, and only minor blending is noted on the high points of the obverse. Though a number of wispy abrasions and a few more significant digs determine the grade, this is a rare and important Mint State survivor of the Small Date variant. (#8210)

Choice XF 1843-C Five Dollar

4992 1843-C XF45 NGC. CAC. Variety 1. The 1843-C is even scarcer than its mintage of 44,227 pieces suggests. However, two reverse dies are known, with slightly different placement of the Charlotte mintmark. The present butter-gold example is only moderately abraded and has pleasing definition on the eagle's wings. The strike shows the usual blending on the curls, fletchings, and eagle's neck. (#8214)

Condition Rarity MS61 1843-C Half Eagle

- 4993 1843-C MS61 NGC.** This lightly abraded better date Charlotte half eagle exhibits ample flashy luster, especially near the rims. Portions of the devices are incompletely brought up, but the eye appeal is impressive. The butter-gold surfaces are free of serious abrasions, though a couple of small reed marks in the field over the eagle's head act as convenient pedigree markers. In the (conservatively graded) Pittman catalog, the listed grade was "Extremely Fine to Almost Uncirculated," but NGC had a far higher opinion of the piece. *Ex: John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 964. (#8214)*

1843-D Medium D Five Dollar Well-Struck Choice XF Example

- 4994 1843-D Medium D XF45 PCGS. CAC. Variety 10-H.** The Medium D half eagle of 1843 is far more obtainable than the Small D counterpart (Variety 10-G). Both combined saw a mintage of nearly 100,000 pieces. This Medium D is a well-struck coin like many of the issue, although 15 points of high-point wear dulls the effect some here. The surfaces are attractive deep reddish-orange with hazel outlines on the devices. Scattered small abrasions are grade-consistent. Population: 37 in 45, 74 finer (5/12). (#8215)

-
- 4995 1843-O Large Letters XF40 NGC. Variety 1.** A wheat-gold No Motto O-mint five that possesses a nice strike and unblemished albeit mildly luminous surfaces. An early die state for the variety with sharp letters on the IC in AMERICA. (#8216)

MS61+ 1845-D Half Eagle Uncirculated Dahlonega Type Coin

- 4996 1845-D MS61+ NGC. Variety 12-I.** Well struck for its Dahlonega origin, since only the right-side denticles show incompleteness. The butter-gold and lime-green surfaces display copious luster at the margins and on the devices. Careful study beneath a lens locates occasional moderate field marks consistent with the third party grade. Census: 15 in 61 (1 in 61+), 5 finer (4/12). (#8224)

-
- 4997 1846-D/D VG8 PCGS. CAC. Variety 16-L.** The mintmark is widely and boldly repunched. This circulated but problem-free Dahlonega half eagle displays sea-green and rose-red undertones. Some wing plumage persists. (#8229)

1847 Liberty Half Eagle, MS63 Only Five PCGS Coins in Higher Grades

- 4998 1847 MS63 PCGS.** The 1847 Liberty half eagle is one of the most common issues of the 1840s in circulated grades, but Mint State survivors are scarce, and examples in Select condition are rare. This well-detailed Select specimen exhibits slightly reflective yellow-gold surfaces, with only a few minor contact marks on both sides. Population: 19 in 63 (1 in 63+), 5 finer (5/12). (#8231)

Bright 1847-C Half Eagle, AU55

-
- 4999 1847-C AU55 NGC.** This yellow-gold Choice AU Charlotte five has a crisp strike and noticeable pockets of luster. Moderate abrasions are prevalent on both sides, with thin lines on the cheekbone and horizontal shield lines mentioned as identifiers. Census: 42 in 55, 60 finer (5/12). (#8233)

**Select 1848 Half Eagle
Well-Detailed Orange-Gold Surfaces**

- 5000 1848 MS63 PCGS.** The 1848 Liberty half eagle is more difficult to locate than its 1847 counterpart, and high-grade examples are quite rare. This well-detailed specimen displays pleasing orange-gold surfaces that show prooflike reflectivity in sheltered areas. Certified in a green-label holder. Population: 5 in 63, 0 finer (5/12).
Ex: Tampa FUN Signature (Heritage, 1/2011), which brought \$7,487.65; Beverly Hills Signature (Heritage, 11/2011), which realized \$9,200. (#8236)

- 5001 1848-D VF20 NGC. Unlisted Variety.** A very rare die variety unlisted in the 2003 Winter reference, notable for a die crack through the upright of the R in AMERICA and a heavy horizontal die line in the shield. Liberty's neck is well worn but the stars and left wing display substantial detail. No marks are noticeable, though a slender retained lamination bisects the obverse between 11 and 5 o'clock. (#8238)

- 5002 1850-D Good 6 ANACS. Variety 24-P.** This entry-level Dahlonega gold coin has complete peripheral stars and legends though the rim approaches the tops of AMERICA. The glossy surfaces are unblemished. The mintmark was unevenly entered but the upper half is bold. (#8245)

- 5003 1850-D XF40 PCGS. Variety 23-O.** A green-gold Dahlonega representative that has light hairlines but lacks individually consequential marks. Wear is moderate though the strike is soft on the curls, fletchings, and eagle's neck. (#8245)

- 5004 1851 AU58 NGC.** Close to Mint State, with frosty greenish-gold surfaces, a bold strike, and relatively few contact marks on either side. (#8246)

- 5005 1851 AU58 PCGS. CAC.** This 1851 Liberty half eagle displays a large date, with well-detailed design elements, and prooflike reflectivity in sheltered areas. The 1851 is very scarce in high grade. Population: 19 in 58, 36 finer (5/12). (#8246)

Green-Gold AU 1851-C Half Eagle

- 5006 1851-C AU50 NGC. CAC. Variety 1.** An olive-gold example with ample luster and only one moderate bagmark, located above the right (facing) wing. The CAC seal is presently highly elusive for the '51-C, with a population of two coins in all grades. The usual die pairing with the Charlotte mintmark over the E in FIVE, though a very rare variety is known with the mintmark over the V in FIVE. (#8247)

- 5007 1851-O XF45 NGC. Variety 1.** The low mintmark reverse. A straw-gold representative of this lower mintage new Orleans issue. Glimpses of luster are particularly abundant on the legends. No marks are consequential. (#8249)

**1852 Half Eagle, MS62
Scarce Issue in Mint State Grades**

- 5008 1852 MS62 NGC.** The 1852 Liberty five is one of the more available issues of the series in circulated grades, and the date is a favorite of type collectors seeking a Type One example. The issue is surprisingly scarce at the MS62 level, however. This well-detailed specimen displays pleasing orange-gold surfaces, with slightly subdued mint luster. Census: 53 in 62, 36 finer (5/12). (#8250)

**Two-Toned Select 1852 Half Eagle
Boldly Struck and Minimally Abraded**

- 5009 1852 MS63 PCGS. CAC.** Despite the high mintage approaching 600,000 business strikes, Mint State examples of the 1852 half eagle are scarce, and Choice pieces are rare. This Select coin exhibits deep orange-gold color at the centers melding into lilac accents at the rims, a stunning piece with much eye appeal, boldly struck and minimally abraded for the grade. Population: 21 in 63, 9 finer (5/12). (#8250)

- 5010 1852-C VF35 PCGS. CAC. Variety 1.** This khaki-gold Charlotte Mint type coin has minutely granular fields without individually relevant marks. Lightly impressed on the eagle's neck and Liberty's curls, usual for the C-mint series. (#8251)

- 5011 1852-C XF45 NGC. Variety 2.** The rarer of the two known obverses for this popular Charlotte Mint issue. The 1 in the date is centered over a dentil and does not touch the bust. A mildly granular wheat-gold example with a typical strike and no obtrusive abrasions. (#8251)

Popular 1852-C Half Eagle, AU53

- 5012 1852-C AU53 NGC. Variety 1.** This butter-gold example has an original appearance and exhibits ample glimpses of luster. A good strike save for softness on the eagle's neck. Two obverse dies are known for this Charlotte issue. On Variety 1, the 1 in the date touches the bust. The date is placed slightly lower and further left on the scarcer Variety 2. (#8251)

Uncirculated 1852-C Half Eagle

- 5013 1852-C MS61 NGC. Variety 1.** A beautiful Charlotte Mint representative with bright prooflike sun-gold luster at the borders and throughout the eagle. A good strike despite moderate softness on the eagle's neck. Diverse small marks fail to distract. Census: 13 in 61, 28 finer (4/12).

Ex: Long Beach Signature (Heritage, 6/2005), lot 7779, which realized \$5,462.50. (#8251)

AU 1852-D Half Eagle

- 5014 1852-D AU50 PCGS. Variety 27-U.** Three die pairs are known for this popular Dahlonega type issue. This yellow-gold example has plentiful satin luster at the borders and is clean aside from a couple of small marks on Liberty's jaw. The dentils are softly impressed, as are the claws and fletchings, though the wings display nearly full design detail. (#8252)

1853-C Five Dollar, MS61 Important Condition Rarity

- 5015 1853-C MS61 NGC. Variety 1.** From a substantial mintage of 65,571 pieces, the 1853-C half eagle is reasonably available through the About Uncirculated level of preservation. Mint State examples, however, are rare. This brilliant yellow-gold MS61 specimen displays reflective fields and satin devices. Trivial marks are noted on each side, with the small one below ATE of STATES serving as a pedigree identifier. Census: 7 in 61, 13 finer (4/12). (#8254)

1853-D Large D Half Eagle, AU58 Above-Average Strike

- 5016 1853-D Large D AU58 NGC. Variety 29-T.** On this reverse, the D is high and left, with the upright over the center of V in FIVE. Ample luster resides in the recesses of this yellow-gold AU58 specimen. Much better struck than the majority of this issue that according to Doug Winter (2003): "... are softly struck with weak borders." Relatively clean surfaces round out the coin's eye appeal. *Ex: Long Beach Signature (Heritage, 6/2007), lot 2346. (#8255)*

Mint State 1853-D Half Eagle Well-Struck, Lustrous Yellow-Gold Surfaces

- 5017 1853-D Large D MS61 NGC. Variety 29-V.** Nearly 90,000 examples were made of the 1853-D five, making it the most available overall and in high grades, perfect for type or mintmark sets. This Mint State piece shows an excellent strike save for minor weakness on the eagle's lower legs. Good luster permeates the yellow-gold surfaces, which display a scattering of small marks. Census: 19 in 61, 15 finer (5/12). (#8255)

- 5018 1854-C Weak C XF40 PCGS. CAC. Variety 2.** All of the mintmark is visible beneath a loupe, but was entered with such low relief that it is difficult to see with the unaided eye. This charming green-gold XF Charlotte Mint five is minimally abraded and shows moderate softness of strike on the curls and fletchings. (#98257)

- 5019 1854-D Weak D — Cleaning — Genuine PCGS. XF Details.** The lower left obverse quadrant exhibits parallel hairlines, but the khaki-gold color is undisturbed. A good strike with moderate blending on the curls and fletchings. (#98258)

- 5020 1856-C — Planchet Lamination Obverse — XF45 PCGS. Variety 1.** This specimen exhibits the antique-gold surfaces one would expect on a moderately worn Charlotte five from the 1850s. While a lamination can easily be seen extending from star 4 into the hair of Liberty, it is of no consequence to the overall eye appeal of this elusive Southern mint coin. (#8267)

Mint State 1856-S Half Eagle

5021 1856-S MS61 NGC. Medium S. The First San Francisco Mint preferred to strike double eagles, which were essential to Western banking. Other gold denominations were struck but only in limited quantity. The 1856-S five is scarce in all grades and an underappreciated rarity in Mint State. The present sharply struck piece has peach-gold and steel-blue toning. Only delicately abraded for the MS61 grade. Census: 5 in 61, 1 finer (4/12). (#8270)

5022 1857-O XF45 ANACS. A meager mintage of 13,000 pieces confirms the rarity of the No Motto 1857-O. This luminous yellow-gold New Orleans example is only lightly abraded and the borders are crisply struck. Liberty's hair and the fletchings are typically impressed. (#8274)

1858-D Five Dollar, AU53 Seldom Seen in Any Grade

5023 1858-D AU53 PCGS. Variety 35-CC. The 1858-D half eagle, from a mintage of 15,362 pieces, is seldom seen in any grade. It is elusive in Almost Uncirculated, and Mint State examples are rare. Peach-gold patina shows on both sides of this AU53 specimen. The design elements exhibit slightly better definition than ordinarily seen on this issue, though Liberty's hair at the temple and the reverse arrow feathers are a tad soft. Scattered circulation marks are not serious. Population: 12 in 53, 48 finer (4/12). (#8278)

1858-S Half Eagle, AU50 An Important Condition Rarity

5024 1858-S AU50 NGC. Relatively few of the 18,600 1858-S half eagles have survived owing to their extensive use in the channels of commerce. About Uncirculated is the finest that can reasonably be acquired as Mint State pieces are virtually unobtainable. The yellow-gold surfaces of the present offering display traces of luster in the recesses and are well defined, save for the usual softness on the arrow feathers. The few scattered marks do not detract. (#8279)

5025 1859 AU55 PCGS. CAC. Two-toned reddish-orange and yellow-gold surfaces lend this Choice AU low-mintage date (16,700 circulation strikes) much eye appeal. The strike is bold and few abrasions appear. Population: 6 in 55, 5 finer (5/12). (#8280)

1859-C Half Eagle, MS61 Appealing Red-Gold Surfaces

5026 1859-C MS61 PCGS Secure. Variety 1. The only known dies for the issue. This is a textbook example of a complicated Charlotte date showing a typically sharp obverse impression that contrasts with the imprecise reverse strike for which the issue is famous. Researchers suggest that an imperfect reverse die was used to produce the 31,847 reported coins, as all share the same interesting strike characteristics. The present Mint State example shows colorful rose-red patina over deep reflective gold surfaces. PCGS shows two coins at this grade level with three finer, while NGC shows eight in MS61 with two finer (4/12). (#8281)

5027 1859-D Medium D — Improperly Cleaned — NGC Details. AU. Variety 36-CC. The sun-gold fields and motifs are unnaturally bright. Though Liberty's curls are softly defined due to the strike, there is scant wear from circulation. There are no detrimental marks. (#8282)

5028 1859-S Fine 12 PCGS. CAC. An important early S-mint half eagle from a mintage of just 13,220 pieces, well-worn but pleasingly luminous with violet peripheral accents on the orange-gold obverse. Two long near-vertical abrasions descend from near the underside of the eagle's left (facing) wing. Population: 2 in 12, 31 finer (5/12). (#8283)

1861-C Five Dollar, XF45 Better Preservation Than Most

5029 1861-C XF45 NGC. Only a single die pair is known for this final Charlotte issue, struck just prior to the start of the Civil War. It is the final coin produced at the Charlotte Mint, boasting a small mintage of 6,879 pieces. Most of all, it is associated with the Confederacy, as 887 coins were struck after the mint was seized by Southern forces. The reddish-gold surfaces of this Choice XF specimen show distributed small marks which are a far cry from the "deep digs and cuts" typically seen on surviving examples (Doug Winter, 2008). (#8289)

1862 Liberty Half Eagle, AU50
Low-Mintage Civil War Issue

5030 1862 AU50 NGC. Only 4,430 Liberty half eagles were struck in 1862, during the most uncertain days of the Civil War. The light orange-gold surfaces of this well-detailed AU50 specimen show only minor abrasions, with remnants of prooflike reflectivity in sheltered areas. Census: 3 in 50, 23 finer (5/12). (#8292)

5031 1866-S No Motto VF25 NGC. The 1866-S No Motto half eagles saw a mintage about one-quarter that of its With Motto siblings. This VF25 No Motto piece displays amber-gold surfaces with only moderate abrasions, aside from a dig above the eagle on the reverse. Census: 8 in 25, 35 finer (5/12). (#8300)

AU Details No Motto 1866-S Five

5032 1866-S No Motto — Improperly Cleaned — NGC Details. AU. A tiny mintage of 9,000 pieces ensures the rarity of this transitional year half eagle, struck during the window between the arrival of an obverse die dated 1866 and the arrival of a reverse die of the Motto subtype. Philadelphia made all dies during the 20th century, and the journey to San Francisco was arduous. The present honey-gold example is glossy and displays fine hairlines but is richly detailed. (#8300)

Choice AU 1870 Half Eagle
Low-Mintage Issue, Semiprooflike Surfaces

5033 1870 AU55 NGC. One can discern at a glance from the semiprooflike luster that this issue is at minimum a low-mintage date, or else a strike from fresh dies front and back. In this case the mintage is low, 4,035 pieces for the 1870 half eagle. Honey-gold surfaces on this Choice AU example show light chatter rather than mentionable abrasions. Census: 15 in 55, 24 finer (5/12). (#8319)

1871-CC Half Eagle, AU53
The Usual 1-A Variety

5034 1871-CC AU53 NGC. Variety 1-A. Even though the mintage of the 1871-CC half eagle, at 20,770 coins, is nearly three times as large as its illustrious predecessor, most of the certified survivors today have circulated down to the range of VF30 or thereabouts; gold coinage was in high demand in the early days of the Carson City Mint. The surfaces show minor, even wear over the device high points, with light orange-gold color. Numerous small abrasions are scattered about, none of singular importance. Census: 4 in 53, 21 finer (4/12). (#8323)

1872 Five Dollar, AU50
Well Impressed

5035 1872 AU50 PCGS. CAC. The 1872 five dollar was struck to the tune of just 1,660 business strikes, making it one of the lowest mintages of any Liberty Head half eagle. The date is rare in any grade, despite a small hoard that surfaced in the 1950s. The brassy-gold surfaces of this AU example are sharply impressed and minimally abraded. Population: 3 in 50, 18 finer (4/12). (#8325)

Mint State 1873 Closed 3 Half Eagle
Deep Peach-Gold Color

5036 1873 Closed 3 MS61 NGC. The 1873 Closed 3 is thought rarer than its Open 3 counterpart, but the difficulty in distinguishing the two varieties or resubmissions of one or the other likely skew the population data. This Mint State example displays deep peach-gold coloration with some scattered lilac (obverse) and charcoal (reverse) accents. A few small- to medium-sized abrasions pepper the surfaces and account for the grade. (#8329)

**The Only 1875-S Half Eagle Awarded
A Mint State Grade by NGC or PCGS**

- 5037 1875-S MS60 NGC.** Just 9,000 pieces were struck for this half eagle issue, not so unusual for a non-double eagle in the earlier San Francisco days, and virtually all of them went into commerce. This is the *only* Mint State representative certified by either NGC or PCGS (4/12), and though it earns its MS60 designation with a series of light abrasions and deeper marks, its impressively lustrous surfaces, yellow-to-orange with lavender accents, show zero wear. A noteworthy coin for the series specialist who will accept nothing but the best, housed in a prior-generation holder. (#8338)

Scarce 1877-CC Half Eagle, XF45

- 5038 1877-CC XF45 PCGS. Variety 1-B.** The 1877-CC five dollar is scarce in all grades. The typical coin grades Very Fine to low-end Extremely Fine. Choice XFs such as this one are very scarce, and finer specimens are rare. The yellow-gold surfaces are imbued with hints of light green and orange and exhibit relatively well defined design elements, save for the usual softness on the eagle's neck. Scattered marks do not unduly detract. Population: 16 in 45, 22 finer (4/12). (#8343)

**AU50 1878-CC Half Eagle
Straw-Gold Luminosity**

- 5039 1878-CC AU50 NGC.** A low survival rate and a minimal mintage of 9,054 pieces ensures the rarity of this Carson City emission. The typical example grades XF, and AU50 and better pieces are condition rarities. The present representative is straw-gold with smooth and slightly luminous surfaces. A lint mark over the branch stem is of mint origin, and the only two remotely mentionable abrasions are cheek of Liberty and the back of her neck. The strike is good by the standards of the Western facility, though the eagle's neck and Liberty's neck display incompleteness. Census: 5 in 50, 16 finer (5/12). (#8346)

**Near-Gem 1879 Half Eagle
Important Condition Rarity in the Series**

- 5040 1879 MS64 PCGS.** The 1879 half eagle is an important condition rarity in the series. Surviving examples are usually found in circulated or low Mint State grades. The issue is rare in MS63 or finer grades, and Choice Mint State pieces like the one offered here are extremely rare. This piece exhibits frosty yellow luster with delicate pink overtones. The surfaces show a creamy, smooth texture with a few minor marks that prevent an even higher grade. Population: 8 in 64, 4 finer (5/12).
Ex: *Long Beach Signature* (Heritage, 2/2011), lot 4472; *Orlando Summer FUN Signature* (Heritage, 7/2011), lot 4765. (#8348)

**1879-CC Half Eagle, AU50
Conditionally Scarce**

- 5041 1879-CC AU50 NGC. Variety 2-A.** A prominent die line through the ER of LIBERTY instantly identifies this variety. The 1879-CC Liberty half eagle is one of the more available dates of the 1870s in lower circulated grades. AU pieces are scarce, however, and Mint State examples are rare. The reddish-gold surfaces of this AU coin are well defined and minimally marked.. (#8349)

**Lightly Circulated 1879-CC Half Eagle
Choice AU, Far Finer Than Usual**

- 5042 1879-CC AU55 NGC. Variety 1-A.** No die line through ER of LIBERTY. This is a lovely, lightly circulated example of the 1879-CC half eagle, struck to the extent of only 17,281 pieces. Most of those pieces circulated heavily in the Old West. This apricot-gold, hazel-accented piece boasts radiant luster and excellent eye appeal through a bold strike and relatively few abrasions. Census: 12 in 55, 47 finer (5/12). (#8349)

- 5043 1880 MS64+ PCGS. CAC.** The strike is close to full on the obverse, with minor central weakness and full star centrils. The reverse is similarly weak around the eagle but full on the legends and denticles. Antique-gold color with interesting die cracks around the reverse periphery. (#8351)

**1880-CC Half Eagle, MS62
Condition Census Example**

- 5044 1880-CC MS62 PCGS. Variety 1-A.** The 1880-CC Liberty half eagle claims a mintage of 51,017 pieces, with at least three varieties known for the date. The present coin represents the more available Variety 1-A, with the second C in the mintmark positioned over the serif of the V in FIVE. Despite the substantial mintage, the 1880-CC is an elusive issue in Mint State grades and examples in MS62 condition are very rare. This specimen should challenge for second place in the Condition Census, as only one coin has been certified finer, an MS63 example at PCGS (4/12).

The present coin displays sharply detailed design elements, with full centrils on the stars. The attractive almond-gold surfaces are brimming with vibrant mint luster and show only minor contact marks. Eye appeal is extraordinary. Population: 3 in 62, 1 finer (4/12). (#8352)

- 5045 1881 MS62 Prooflike NGC.** Uncommonly reflective through yellow-gold fields with mild contrast on the softly struck devices. Though moderately abraded, this coin offers intriguing eye appeal. Census: 9 in 62 Prooflike, 4 finer (5/12).(#78354)
- 5046 1881/0 MS62 NGC. CAC. FS-301.** Only light magnification is required to see the curve of the 0 beneath the 1 in the date. The 8s exhibit obvious recutting. A radiant sun-gold half eagle with an intricate strike and the expected number of wispy obverse field marks. Census: 27 in 62, 9 finer (4/12).(#8355)
- 5047 1882 MS64+ PCGS. CAC.** This khaki-gold near-Gem appears to verge on a full strike, and the surfaces show only a few stray marks (along with some die clashing on each side) that define the grade. Excellent eye appeal.(#8358)

**Appealing 1882-CC Five Dollar, MS61
Rare in Mint State**

- 5048 1882-CC MS61 NGC.** The only known variety from a mintage of 82,817 coins. The 1882-CC half eagle is one of the more available Carson City issues through the Extremely Fine grade level, and is quite popular with mintmark type collectors. About Uncirculated examples are a bit scarcer and Mint State coins are quite rare, especially in MS62 and higher.

Both sides of this MS61 specimen yield generous cartwheel luster on khaki-gold surfaces, and the design features are sharply struck, especially on the reverse. A few inconsequential ticks are consistent with the grade, and some roughness on each side near the denticles probably represents metal flowlines. This piece exudes excellent eye appeal for the designated grade. Census: 21 in 61, 9 finer (5/12). (#8359)

**1884-CC Five Dollar, AU55
Better Struck and Less Abraded Than Most**

- 5049 1884-CC AU55 NGC.** The 1884-CC half eagle, from a mintage of just 16,402 pieces, is scarce in all grades. Doug Winter estimates only 100-125 coins are known, most in VF and XF condition. AU examples are very scarce and Mint State specimens are extremely rare. This Choice AU piece is better struck than most; in particular the stars, often flat on the issue, which are sharp on this example. The hair near the ear reveals the usual softness. Yellow- and brass-gold surfaces show fewer and less serious marks than usually seen. (#8365)

- 5050 1884-S MS63 NGC. CAC.** An attractive Select example of this underrated issue, this coin displays well-detailed design elements and vibrant mint luster, on lightly marked greenish-gold surfaces. Census: 62 in 63, 22 finer (5/12).(#8366)
- 5051 1891-CC MS61 NGC. Variety 2-A.** A band of bright luster dominates the borders of this canary-gold Carson City type coin. We note a depression on Liberty's jaw and a shallow strike-through (as coined) near the FI in FIVE.(#8378)

**Marvelous 1892 Five Dollar, MS66
An Important Condition Rarity**

- 5052 1892 MS66 PCGS.** Although the 1892 five dollar, with a mintage of 753,480 business strikes, is thought of as a common date, high-grade examples, i.e., those in MS64 and finer, are actually quite scarce. This marvelous Premium Gem displays great luster on its orange-gold surfaces and the strike is solid throughout. Nicely preserved and showing some light peripheral die cracks. Population: 20 in 66, 2 finer (4/12). (#8379)

- 5053 1892-CC AU58 NGC. CAC.** Nearly mint state with substantial luster and original apricot-gold toning. Crisply struck and free from detrimental abrasions. Conditionally scarcer than its 1891 Carson City predecessor.(#8380)

- 5054 1893 MS64+ PCGS.** A small tick on the chin and two on the reverse rim are likely all that keep this razor-sharp pinkish-gold near-Gem from an even finer grade. The mintage was a large 1.5 million pieces. Population: 9 in 64+, 29 finer (5/12).(#8383)

- 5055 1893 MS64+ PCGS. CAC.** Pinkish rim accents complement antique-gold centers on this near-Gem 1893 half eagle. The strike is bold if not quite absolute, and the eye appeal is excellent. (#8383)

- 5056 1893-CC AU58 NGC. Variety 1-A.** This partly lustrous Borderline Uncirculated final year Carson City five has lovely khaki-gold color and only a single relevant mark, found on the reverse rim at 4 o'clock.(#8384)

- 5057 1893-O MS61 PCGS. Variety 2.** This sun-gold New Orleans Motto five is sharply struck and free from singularly mentionable abrasions. The obverse displays faint flan streaks, as made. The A late die state with a retained die break over the UNI in UNITED. (#8385)

- 5058 1894-O AU58 NGC. CAC. Variety 1.** Two die pairs are currently known for this low mintage (16,600 pieces) New Orleans Motto issue. The present lightly abraded caramel-gold piece displays ample luster at the peripheries and throughout the devices.(#8388)

- 5059 1894-O MS61 PCGS. Variety 1.** Luster illuminates the motifs and margins of this nicely struck and moderately abraded honey-gold better date five. A low mintage New Orleans issue. Population: 19 in 61, 7 finer (5/12).(#8388)

1895-S Half Eagle, MS63
One of the Finest of This Underrated Issue

5060 1895-S MS63 PCGS. In spite of its rather substantial mintage of 112,000 pieces, few pieces were set aside in Uncirculated grades. It was tagged as an underrated issue more than 30 years ago by David Akers. The condition scarcity of this issue can be seen by examining the population data. Both services have only certified four in MS63 (all at PCGS) with six finer (4/12). This is a bright yellow-gold coin that is minimally marked. The strike is strong, as expected. (#8391)

5061 1900 MS64 NGC. This lustrous turn-of-the-century type coin displays sharply detailed design elements and attractive yellow and rose-gold surfaces.
From The JG Collection, Part Two.(#8400)

5062 1901-S MS64 PCGS. CAC. Green-gold surfaces on this near-Gem show the sharp strike this plentiful issue is known for. Only minor field abrasions on the reverse appear to preclude an even finer grade.(#8404)

5063 1901-S MS64+ NGC. CAC. The 1901-S is among the most available Liberty Head half eagles in high grades. This MS64+ example shows a bold strike over relatively unmarked greenish-gold surfaces.(#8404)

5064 No Lot

Premium Gem 1902 Half Eagle
Superlative Type Coin

5065 1902 MS66 PCGS. CAC. The mintage of Philadelphia Mint half eagles declined dramatically in 1902 to 172,400 pieces, making high-grade specimens rare in today's market. This magnificent Premium Gem is sharply detailed throughout with vibrant mint luster and unmarked rose-gold surfaces. A superlative type set acquisition. Population: 6 in 66, 1 finer (5/12).
Ex: New York Signature (Heritage, 12/2011), lot 4609, which realized \$7,475. (#8405)

Gem 1903-S Half Eagle, Fully Struck

5066 1903-S MS65 PCGS. The high mintage exceeding 1.8 million pieces makes the 1903-S a type coin collector's favorite. This Gem is nonetheless the highest grade readily obtainable, as PCGS has seen only 15 submissions numerically finer (5/12). This frosty khaki-gold example displays a full strike and no mentionable abrasions, a top-notch piece. (#8408)

1904-S Half Eagle, MS63
Rare Issue in Mint State

5067 1904-S MS63 PCGS. CAC. The mintage of Liberty half eagles was drastically reduced at the San Francisco Mint in 1904, with only 97,000 pieces struck. The issue is usually seen in circulated grades today, and examples in MS63 condition are quite rare. This sharply detailed Select specimen displays vibrant mint luster over light orange-gold surfaces, with only minor signs of contact. Population: 10 in 63, 9 finer (4/12). (#8410)

Better Date Gem 1905 Five

5068 1905 MS65 PCGS. CAC. The relatively low mintage 1905 is much scarcer at the MS65 level than common dates such as the 1901-S. The present precisely struck and lustrous olive-gold Gem has pleasing eye appeal despite the expected number of inconsequential grazes. Population: 37 in 65 (1 in 65+), 12 finer (4/12). (#8411)

5069 1907 MS64 NGC. CAC. Orange-gold centers compete with mint accents near the rims on each side, a beautiful effect. Marks are minimal and the strike is bold. (#8416)

5070 1907-D MS64 PCGS. Popular as one of just two D-mint Liberty half eagles, the 1907-D is usually available in high grade. This sharply detailed Choice example exhibits attractive orange-gold surfaces with lilac highlights. (#8417)

**1908 Liberty Half Eagle, MS65
Final Philadelphia Series Issue**

5071 1908 MS65 PCGS. Here is a thoroughly pleasing example of the final Philadelphia date of Gobrecht's long-lived Liberty design. Like most Philadelphia strikes from the 1890s through the 1900s, this date is relatively easy to obtain in lower grades but elusive above the MS64 level. The smooth surfaces on this sharply struck piece are free of distracting bagmarks, and satisfying satin luster accents the pleasing orange-gold color.
Ex: Long Beach Signature (Heritage, 10/2000), lot 7664. (#8418)

PROOF LIBERTY HALF EAGLES

**Ultra Cameo Gem Proof 1896 Half Eagle
Assertive Eye Appeal**

5072 1896 PR65 Ultra Cameo NGC. One of 103 proofs of this 1890s date struck in the half eagle denomination, this carefully preserved specimen displays the kind of assertive eye appeal that demanding collectors desire. The deeply mirrored fields provide vivid contrast to the sharply defined devices, with a suggestion of deeper gold in the field increasing the attractions. The frost on the Liberty bust is especially outstanding. Proof mintages in this era were uniformly low and fell even lower after 1896. Researchers have found that significant numbers of proofs failed to sell in most years, and the unsold remainders were melted to liberate precious metal for use in later years' proof production. Census: 1 in 65 Ultra Cameo, 6 finer (4/12). (#98491)

**1902 Liberty Half Eagle, PR58
Only 162 Pieces Struck**

5073 1902 PR58 PCGS. CAC. The Mint switched to an all-brilliant finish for its proof coins in 1902, and achieved a nominal mintage of 162 proof Liberty half eagles. This sharply detailed specimen shows some scuffing in the reflective fields and a few contact marks on the devices. Population: 4 in 58, 23 finer (5/12). (#8497)

Collectible Proof 1904 Half Eagle

- 5074 1904 Genuine PCGS. Proof.** The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a PR60 specimen that has altered surfaces. This is a fully struck honey-gold proof half eagle with a carefully smoothed obverse field. The reverse is lightly hairlined but lacks obvious smoothing. Perhaps half of the initial mintage of 136 pieces has survived. (#88499)

Choice Proof 1907 Half Eagle Final Liberty Proof Issue

- 5075 1907 PR64 PCGS.** Only 92 proof Liberty half eagles were struck in 1907, and experts doubt that more than 30-35 examples survive today in all grades. Although some business-strike coins of the Liberty design were struck in 1908, no proofs were produced, making the 1907 the final proof Liberty half eagle.

This delightful Choice example features brightly mirrored fields, with a lemon-yellow tint, that frame the sharply detailed design elements. The Mint's all-brilliant finish, which was first employed on the proof issues of 1902, eliminated the cameo contrast of earlier years. Housed in a green label holder. Population: 11 in 64, 7 finer (5/12). (#8502)

INDIAN HALF EAGLES

1908 Indian Five, MS64 Remarkably Clean Surfaces

- 5076 1908 MS64 PCGS.** The strike details are remarkably strong on this popular issue with just the slightest softness noted. Each side has smooth, even, satiny mint luster and are remarkably clean. There is only one mark that identifies this as an MS64: An abrasion connects stars 5 and 6. Yellow-gold color. (#8510)

1908 Five Dollar Indian, MS64+ Vibrant Mint Luster

- 5077 1908 MS64+ PCGS. CAC.** What distinguishes this coin, both as a + and a CAC piece, is the remarkably bright and vibrant mint luster. In addition, the strike is strong throughout with only the slightest weakness at the top of the eagle's wing. The orange-gold surfaces show only the slightest signs of contact. (#8510)

1908 Indian Half Eagle, MS64+ Excellent First-Year Type Coin

- 5078 1908 MS64+ PCGS. CAC.** A high-end Choice example of this important first-year Indian half eagle, with well-detailed design elements and lustrous orange-gold surfaces that show highlights of rose. The 1908 is a favorite choice of type collectors, and high-grade examples are usually available because many coins were saved by collectors. (#8510)

**1908 Indian Half Eagle, MS65+
Gem First-Year Example**

5079 1908 MS65+ PCGS. This MS65+ coin is an ideal specimen of the first year of Bela Lyon Pratt's innovative sunken relief style. Artist Pratt never received the publicity accorded to fellow designer Augustus Saint-Gaudens, but his design received savage criticism from veteran coin dealer S. Hudson Chapman in scathing letters to the Mint. Chapman alleged that dirt would collect in the recesses, spreading disease, and found the gaunt-featured Indian offensive. Few Americans agreed with his criticism, and the design remained in production until the end of U.S. gold coinage on the eve of the Depression. Deeply glowing golden luster adds appreciably to this coin's visual appeal. PCGS has seen only 19 submissions finer (4/12). (#8510)

5080 1908-D MS64 NGC. The 1908-D Indian half eagle is very rare above the Choice level. This well-struck Choice example displays lustrous yellow-gold surfaces, with few signs of contact. NGC has graded only four coins in higher numeric grades (4/12).
From The JG Collection, Part Two.(#8511)

5081 1909-D MS64+ PCGS. CAC. A high-end Choice example of this popular type issue, this coin displays vibrant mint luster, sharply detailed design elements, and only minor signs of contact. (#8514)

**Choice AU 1909-O Half Eagle
Last New Orleans Gold Coin Issue**

5082 1909-O AU55 NGC. CAC. Variety 1. The New Orleans Mint discontinued coinage operations after 1909, making the 1909-O half eagle the last gold coin produced at the historic facility. In addition, the 1909-O is the only Indian Head half eagle with the popular O mintmark. The issue is always in great demand from mintmark type collectors as well as series enthusiasts.

This attractive Choice AU example is well-detailed, with just a trace of wear on the devices and some softness on the mintmark. The light orange-gold surfaces retain much original mint luster and show only minor abrasions. This coin should find a home in a fine collection or type set. (#8515)

**1909-O Half Eagle, AU58+
Rarest Date of the Indian Type**

- 5083 1909-O AU58+ NGC. CAC. Variety 1.** From an exceptionally low mintage of 34,200 pieces, the 1909-O is the rarest Indian Head half eagle. It is also extremely important to mintmark type collectors because it is the only O-mint half eagle to feature the Indian Head design and the final gold coin of the New Orleans series. Demand for this issue has increased tremendously in recent years and any auction appearance inspires intense competition.

The present coin shows the weak, slightly doubled mintmark characteristic of variety 1. The design elements are sharply detailed with minimal signs of wear and the light green and orange-gold surfaces are remarkably free of serious abrasions. This high-end near-Mint specimen is a prize for the discerning collector. (#8515)

- 5084 1910 MS64 NGC.** The surfaces of this attractive Choice example are nearly flawless and the color is exceptional. The fields have frosty luster with pleasing honey-gold color and pale pink highlights. (#8517)
-

**MS64+ 1910 Half Eagle
Deep Orange-Gold, Mattelike Surfaces**

- 5085 1910 MS64+ PCGS. CAC.** The 1910 Philadelphia half eagle is quite rare in MS65, even though overall it is among the more available issues in the series. This MS64+ example boasts mattelike, deep orange-gold surfaces that are well-struck and possibly only a couple of tiny ticks away from the Gem level. (#8517)
-

Golden-Orange 1910-D Five, MS63

- 5086 1910-D MS63 PCGS.** The 1910-D half eagle is fairly scarce in the Select grade, although survivors at the Choice level are far fewer. This glowing golden-orange piece shows good luster with moderate strike weakness at the lower obverse, where the lowest ornament in the necklace is mushy. The mintmark is bold, and a few scattered, minor marks define the grade. (#8518)
-

- 5087 1911-D XF45 PCGS.** The 1911-D Indian half eagle is an elusive low-mintage date and this Choice XF specimen should be a welcome addition to an otherwise high-grade collection. The orange-gold surfaces are lustrous and lightly abraded. (#8521)

- 5088 1911-D XF45 PCGS. CAC.** A Choice XF example of this low-mintage key date, this lightly worn specimen presents still-lustrous rose-gold surfaces that show only minor abrasions for the grade. (#8521)

Well-Defined 1911-D Half Eagle, AU58

5089 1911-D AU58 PCGS. CAC. Though not as famous as its quarter eagle counterpart, the 1911-D five dollar also has a five-figure mintage (72,500 pieces), and is one of the great rarities of the series. It is difficult to find in Mint State grades. This near-Mint State example displays peach-gold surfaces and is well defined. The reverse shows a few more marks (though light) than the obverse. (#8521)

AU58+ 1911-D Half Eagle A Key to the Indian Head Series

5090 1911-D AU58+ PCGS. CAC. Even though the 1911-D half eagle is less notorious than the quarter eagle, it is nonetheless a key to its series, if not the only one. The mintage was still meager at 72,500 pieces, and few were set aside at the time, judging from the available evidence. This deep-gold example shows nearly complete luster remaining, with a few small abrasions — one on the Indian's chin, a couple in the reverse fields near the eagle — that attest to a brief spate in circulation. (#8521)

Mint State 1911-D Half Eagle Challenging Low-Mintage Issue

5091 1911-D MS61 NGC. CAC. Like its more famous quarter eagle counterpart, the 1911-D Indian half eagle is a low-mintage key, with a reported production total of 72,500 pieces. In absolute terms, the 1911-D is the second-rarest business-strike Indian half eagle, trailing only the elusive 1909-O. Even in lower Mint State grades, the 1911-D is difficult to locate, and series enthusiasts prize any example of this challenging date. The present coin is a pleasing MS61 specimen, with well-detailed design elements and a bold mintmark. The light orange-gold surfaces retain much original mint luster, with a few hints of rose color. Only minor contact marks are evident, the worst being a few scratches in the reverse field near UNITED. Census: 83 in 61, 94 finer (4/12). (#8521)

1911-S Half Eagle, MS63
Deep Orange and Yellow Patina

- 5092 1911-S MS63 PCGS Secure.** This gorgeous Select Mint State piece has deep yellow luster with orange overtones. The surfaces are brilliant and frosty, and the design definition is bold. Here is a remarkable example of a date that is elusive in higher grades. PCGS has only certified 28 finer pieces (4/12).
Ex: ANA Signature (Heritage, 8/2010), lot 6003. (#8522)

'Sleeper' Near-Gem 1914 Half Eagle, MS64

- 5093 1914 MS64 PCGS. CAC.** The 1914 is an "undervalued sleeper" in the series, according to Mike Fuljenz in his series reference, second only to the 1929 issue. This Choice piece displays frosty mattelike surfaces that show a few scattered marks mostly on the reverse. The obverse is virtually pristine, and both sides are well-struck and highly engaging. PCGS has seen only 28 numerically finer (5/12). (#8527)

- 5094 1914-D MS63 NGC.** The 1914-D is a median rarity within the Indian Head fives. This Select piece boasts deep orange coloration with some smoky accents and generous luster. (#8528)

1914-D Half Eagle, MS64+
Condition Rarity in Finer Grades

- 5095 1914-D MS64+ PCGS. CAC.** This near-Gem could find a ready home in many a collection of Indian Head half eagles, as it is a conditional rarity within the series at the Gem level. The present example displays softly glowing luster over mattelike apricot-gold surfaces that show few abrasions on either side. Population: 5 in 64+, 15 finer (5/12). (#8528)

Uncirculated 1914-S Five Dollar
Scarce in Mint Condition

- 5096 1914-S MS61 NGC.** Based upon its mintage of 263,000 pieces, the 1914-S should be fairly plentiful in Mint State. However, more San Francisco examples entered local commerce than ended up in European bank vaults, and the 1914-S is a better date at the MS61 level. The luminous and unmarked sun-gold surfaces retain good eye appeal. (#8529)

Mint State 1914-S Half Eagle
Scarce Issue in High Grade

- 5097 1914-S MS61 PCGS. CAC.** The 1914-S Indian half eagle is more difficult to locate in high grade than its mintage of 263,000 pieces would suggest. This sharply detailed Mint State example displays vibrant mint luster over attractive greenish-gold surfaces, with a few rose highlights. Only minor contact marks are evident, the worst being a short scratch under the eagle's beak. (#8529)

- 5098 1915-S AU58 PCGS.** The 1915-S half eagle is among the most elusive issues in the Indian Head series. This near-Mint example shows essentially full mint luster and attractive orange-gold color. A few abrasions are scattered about, none mentionable. (#8531)

MS62 1915-S Five Dollar
Seldom Seen Finer

- 5099 1915-S MS62 PCGS.** Yellow-gold surfaces show smoke-gray high points on this lustrous 1915-S half eagle, among the rarest issues in the Indian Head series. A few scattered marks are in concert with the grade, but they are minor. The strike is good overall, save for the usual blob of a mintmark. (#8531)

**MS62 1915-S Half Eagle
Among the Rarest in the Series**

- 5100 1915-S MS62 PCGS. CAC.** This lustrous MS62 1915-S has some hazy charcoal and smoke-gray surface accents that come from coin-to-coin contact within a bank or Mint bag, an effect that some collectors prize. There are few mentionable marks, save for a vertical scrape at the D of GOD on the reverse. The 1915-S is among the rarest issues in the series. PCGS has seen 41 submissions numerically finer (5/12). (#8531)

**1915-S Indian Half Eagle, MS62
Conditionally Scarce in Higher Grades**

- 5101 1915-S MS62 PCGS. CAC.** From a small mintage of 164,000 pieces, the 1915-S Indian half eagle is one of the scarcest issues of the series in high grade. This pleasing MS62 example exhibits well-detailed design elements, with lustrous orange and rose-gold surfaces. A scattering of minor contact marks on both sides explains the grade. (#8531)

- 5102 1916-S MS61 NGC.** The light orange and rose-gold surfaces of this well-detailed Mint State Indian half eagle show only minor, grade consistent contact marks, with slightly subdued mint luster. (#8532)

**'Crusty Gold' 1916-S Half Eagle, MS62
Median Rarity in the Series**

- 5103 1916-S MS62 NGC.** Charcoal accents complement excellent underlying luster on this otherwise-golden-orange MS62 1916-S half eagle. The surfaces have an original "crusty gold" mattelike appearance that will appeal to many collectors. The 1916-S half eagle is a median rarity in the complete collection, about 12th of 24 issues in the series overall. (#8532)

**1916-S Five Dollar, MS62
Last S-Mint Series Issue**

- 5104 1916-S MS62 NGC. CAC.** Orange-gold centers compete with charcoal-gray accents near the rims on each side of this 1916-S half eagle, the last S-mint in the series and the last until the 1929 singleton that would conclude the series. This is an extremely well-struck coin, despite a few distributed minor marks that define the grade. (#8532)

PROOF INDIAN HALF EAGLE

Premium Gem Matte PR66
1914 Half Eagle, Outstanding Appeal

5105 1914 PR66 PCGS. CAC. The Mint fiddled with the matte proof or sandblast surface in 1914 for gold, increasing the size of the microscopic particles and imparting a darker finish to the coins. This Premium Gem is a deep mustard color, with the only minuscule disruptions in the fabric a tiny "dot" in the obverse field before the Indian's neck, and one on the reverse above the last T in TRUST. The eye appeal is outstanding, despite those picayune quibbles. The mintage of 125 pieces is largely irrelevant today. Tied for finest at PCGS with two others (5/12). (#8545)

EARLY EAGLES

Near-Mint 1796 Eagle
Rare Early Gold Issue
BD-1, Only Dies For the Date

5106 1796 AU58 NGC. BD-1, R.4. Bass-Dannreuther Die State c/b. This piece has the vertical die crack almost always seen at through the cap, below the E in LIBERTY. The reverse die is early in its life, proving that this piece was coined before 1797 pieces that used the same reverse die. Some later die states of the 1796 eagle were coined after the 1797 Small Eagle tens. The scenario creates confusion regarding original mintage figures. Some of the 4,146 eagles reported for 1796 were actually dated 1795, and some of the 3,615 eagles of 1797 were actually dated 1796.

While the 1795 Small Eagle tens are plentiful, those dated 1796 and, especially, 1797, are much rarer. John Dannreuther estimates a total survival of about 500 1795-dated eagles, about 150 1796-dated eagles, and only 60 1797 Small Eagle tens. For all of those issues, higher grades are much rarer. An accurate condition census of early eagles is nonexistent but such a record is highly needed. There are probably only 10 to 12 different Mint State 1796 eagles surviving today, with a couple dozen AU coins also known. The 1796 eagles have long been a favorite of collectors and recent auction appearances include the attractive AU58 PCGS coin in lot 4980 of the Pittsburgh Signature (Heritage, 10/2011) that realized \$92,000.

This near-Mint specimen is highly lustrous with only a trace of wear on the high points. Both sides have minuscule marks that are expected for the grade, and light adjustment marks are visible in the hair. This impressive piece, with its slightly reflective fields and bright yellow surfaces, has excellent eye appeal and will grace a fine cabinet of early eagle varieties. Census: 29 in 58, 15 finer (4/12). (#8554)

Mint State 1797 Eagle
Heraldic Eagle Reverse
Rarest Variety, BD-3

5107 1797 Large Eagle MS61 NGC. BD-3, R.5. Bass-Dannreuther Die State d/b. The Small Eagle reverse design was retired in 1797, in favor of the majestic Heraldic Eagle motif. A reported mintage of 10,940 Capped Bust Right eagles was accomplished with the new design, and three die varieties are known for the date and type. The present coin represents the rarest of the 1797-dated varieties, the BD-3, which probably had an original mintage in the 1,750-2,500 piece range, but may not have been struck in 1797. The BD-3 is easily recognized by the short thin neck on the eagle and the irregular cross pattern of the stars on the reverse. John Dannreuther estimates no more than 40-50 examples of the BD-3 remain extant in all grades.

Die state evidence indicates the BD-3 was actually struck after both varieties of the 1798/7 eagle, which employ the same reverse die in earlier states. There is some doubt about the engraver of this reverse die, as the tail feathers and shield stripes resemble other dies by John Smith Gardner, while the short eagle's neck is more typical of Robert Scot's work. Perhaps both men had a hand in engraving this die. The same obverse die was used to strike all three varieties of the date.

The present coin is a rare Mint State example of the BD-3, which is seldom encountered in higher grades. The vivid greenish-gold surfaces display vibrant mint luster, with the expected number of minor contact marks for the grade. Some faint adjustment marks are visible in the obverse rim and the lower bust. The design elements are well-detailed, with just a touch of softness on the central devices. This coin will be a welcome addition to a fine collection of early gold. Census (for all varieties): 34 in 61, 19 finer (4/12). (#8559)

Smooth Choice AU 1799 Eagle
Small Stars Obverse, BD-6

- 5108** 1799 Small Stars Obverse AU55 NGC. BD-6, R.5. Bass-Dannreuther Die State d/a. 1799 was a banner year for ten dollar production. Ten die marriages are known, the record for the Capped Bust type. But among those varieties, only BD-7 and BD-10 are generally available, with the others varying from very scarce to very rare. The present briefly circulated representative has consistent butter-gold toning and displays substantial luster at the borders and on the devices. The strike is consistent and there are no noticeable abrasions, though a few faint adjustment marks are present on the central reverse. (#98562)

Semireflective AU53+ 1801 Eagle, BD-2

- 5109** 1801 AU53+ NGC. BD-2, R.2. Bass-Dannreuther Die State b/b, showing the spines in Liberty's cap. Though lightly worn, this piece has broadly diffuse reflectivity in the fields, most evident in yellow-gold pools sheltered by the stars. Appreciable frostiness on the softly struck devices creates a cameo effect that is particularly strong on the reverse. A shallow pinscratch down from Liberty's mouth contributes to the grade. Thanks to the longevity of this die pair, it is the go-to type coin among early eagles in all conditions, and this AU53+ example combines strong all-around eye appeal with excellent value. (#8564)

Choice AU 1801 Eagle, BD-2
Lustrous Deep Orange-Gold Surfaces

5110 1801 AU55 NGC. BD-2, R.2. The two die pairings known for the 1801 eagles are easily discerned by the closer placement of star 1 to the lowest hair curl on the far rarer BD-1. The BD-2 is “readily available” within the context of early eagles — which are nonetheless among the rarest U.S. gold types overall. This makes the BD-2 widely sought by type or date collectors trying for a high-grade 19th century piece.

This Choice AU example boasts excellent eye appeal over deep orange-gold surfaces with copious luster remaining. A few scrapes appear: in the left field near star 2, across the neck, right field before the face, one through the cheek, nose, out into the right field. The reverse also shows a couple of scrapes, but it takes a loupe to see all of them clearly, and they are not overly distracting, given the otherwise broad eye appeal. (#8564)

BD-2 1801 Eagle, MS62
Popular Type Coin

5111 1801 MS62 PCGS. BD-2, R.2. Bass-Dannreuther Die State b/b, with enigmatic “spines” in Liberty’s cap; they bear a superficial similarity to the lines of the reverse shield but do not match up with them. The 1801 eagle is the most accessible of its early type, thanks to the BD-2 die pair which is uncommon (R.2) overall. Mint State examples are scarce, however, with the population data inflated by resubmissions. This MS62 example is bright yellow-gold with a partial apricot overtone. Semireflective surfaces have an assortment of wispy abrasions, while the left obverse field has a few shallow digs. (#8564)

1803 Small Reverse Stars BD-3 Ten, AU53

- 5112 1803 Small Stars Reverse AU53 NGC. BD-3, R.4.** Minor clash marks are evident, with a faint reverse die crack at the top of IT in UNITED. A single obverse die was combined with six different reverse dies to create the six known 1803 eagle marriages. The BD-3 die combination uses the same die that previously appeared on 1801 BD-2 eagles, that variety recognized as the most plentiful in the early eagle series. Even yellow-gold surfaces retain traces of luster within the peripheral details, with sharp design elements including the eagle's breast feathers. A few scattered marks on each side are mostly inconsequential. Small marks around the drapery and across the horizontal shield lines will serve as identifiers in the future.
Ex: Stack's (6/2008), lot 2100. (#8565)

LIBERTY EAGLES

- 5113 1843-O AU55 NGC. Variety 2.** The low date, low mintmark die variety. This luminous yellow-gold Choice AU New Orleans No Motto eagle is well struck and has no mentionable abrasions. Luster brightens much of the reverse. (#8589)

Mint State Sharpness 1844-O Ten

- 5114 1844-O — Sea Salvaged — NGC Details. Unc. Variety 1.** This intricately struck and unworn better date No Motto New Orleans ten has evenly granular matte surfaces from long-term exposure to warm seawater. Only lightly abraded. The mintmark is repunched within the loop, and the top of an errant 8 is misplaced in the dentils between the 18 in the date. (#8591)

- 5115 1846-O XF45 NGC. Variety 3.** The scarce early die state with repunching visible at the top of the mintmark. Glimpses of rose-tinged luster are especially evident on the reverse. The obverse is subdued and displays incompleteness of strike on the hair above the ear. (#8595)

- 5116 1846-O XF45 NGC. Variety 3.** This is the usual '46-O variety, once called an overdate but is actually the result of a damaged date punch. Three other (and rarer) die varieties are known for the issue. Well defined for the Choice XF level. The wheat-gold surfaces are luminous and display scattered small marks. (#8595)

- 5117 1847-O AU55 NGC. Variety 2.** The base of the 1 is repunched, and the mintmark is low and left. We have identified six different die pairs of the '47-O, the highest mintage New Orleans eagle. Curiously, the '47-O five has a very low mintage and is rare. An evenly struck green-gold example. The borders display much luster and mentionable marks are absent. (#8598)

- 5118 1848 AU53 NGC. CAC.** A lightly circulated specimen, with just a trace of wear on the well-detailed design elements, this attractive AU53 example offers lustrous greenish-gold surfaces. (#8599)

1848-O Ten Dollar, AU53 Conditionally Scarce in This Grade

- 5119 1848-O AU53 PCGS. Variety 3.** No shield ring. The 1848-O ten dollar, from a mintage of 38,850 pieces, can be located in grades Very Fine to Extremely Fine. About Uncirculated coins are very scarce, and Mint State specimens are rare. While the star centrils are weak, the design elements of this AU53 example are generally better defined than usually seen; the E in LIBERTY, often illegible is very strong on this coin. The few light marks are inconsequential. Population: 13 in 53, 17 finer (4/12). (#8600)

**Condition Rarity 1849 Eagle, MS64
Among the Finest Certified**

- 5120 1849 MS64 NGC. CAC.** The 1849 is one of the most common No Motto eagles and can be found in circulated grades through About Uncirculated with little much trouble. Mint State coins are scarce and most commonly seen in MS60 to MS62. The issue is elusive at the Select level and infrequently seen any finer. NGC and PCGS combined have graded six near-Gems and none finer.

Both sides of this MS64 example display semiprooflike orange-gold surfaces with good field-device contrast, stronger on the reverse. The obverse die was close to failure, giving a "bulging" look on the coin's left obverse and resulting in weakness on the stars. The central obverse and the reverse, on the other hand, are sharply struck. Raised die lines are visible in the arc of the eagle's neck and left (facing) wing. A few small contact marks on :Liberty's cheek and neck preclude an even finer grade. Census: 4 in 64, 0 finer (4/12). (#8601)

**Seldom-Seen 1849-O Eagle, AU
Second-Rarest of the Decade Behind 1841-O**

- 5121 1849-O AU50 NGC.** Minted to the extent of only 23,900 pieces, the 1849-O is among the rarest O-mint issues of the 1840s, second only to the 1841-O (the New Orleans Mint made eagles consecutively between those two guideposts, nine in all). Muted luster clings to yellow-gold surfaces on this attractive example, which shows extensive but minor marks. (#8602)
- 5122 1851 AU58 PCGS.** Despite its substantial mintage, the 1851 Liberty eagle is an elusive date in high grade. This lightly circulated specimen displays pleasing green and orange-gold surfaces with ample mint luster. (#8606)
- 5123 1851-O AU55 NGC. Variety 1.** Remaining luster is particularly plentiful on the reverse margin. This luminous straw-gold New Orleans No Motto ten is only lightly abraded for the grade. The shield ring atop the second vertical strike is usual for the issue. (#8607)

Borderline Uncirculated 1851-O Ten

- 5124 1851-O AU58 NGC. Variety 1.** A green-gold New Orleans No Motto type coin with noticeable luster and no singularly detracting abrasions. The strike is crisp except on the star centers. As always for the '51-O, a shield ring is present atop the second vertical stripe. Variety 1 is the high date, low mintmark die pair, one of three confirmed. (#8607)

**AU 1852-O No Motto Ten
Low Mintage Issue**

- 5125 1852-O — Planchet Lamination Obverse — AU50 PCGS. Variety 1.** A slender vertical lamination above star 13 corresponds to the PCGS notation. Otherwise, this is a well defined rare date No Motto New Orleans ten with subtle golden-tan luster and no obtrusive marks. A scant 18,000 pieces were struck. Population: 16 in 50, 19 finer (5/12). (#8609)

No Motto 1853/2 Ten Dollar, AU58

- 5126 1853/2 AU58 NGC. FS-301.** The lower curve and point of an underdigit 2 is obvious within the 3. A sharply defined yellow-gold example of this scarce overdate. Luster brightens the borders and motifs, and though the fields show abrasions, the sole mentionable mark is a diagonal line on the cheek. Census: 23 in 58, 1 finer (4/12).

Ex: Milwaukee Central States (Heritage, 4/2010), lot 3717. (#8611)

- 5127 1854-S AU50 NGC.** A lightly circulated example of the first San Francisco Mint eagle issue, this well-detailed AU specimen exhibits satiny mint luster on pleasing greenish-gold surfaces. (#8615)

- 5128 1855 AU55 NGC.** The 1855 Liberty eagle marked the last use of the slanted 5s in the date. This lustrous greenish-gold example exhibits well-detailed design elements and a scattering of minor contact marks on both sides. (#8616)

- 5129 1855 AU58 NGC.** Slanted 5s, as always. Just a whisper of high-point wear away from Mint State, this piece boasts a good strike and luster along with minimal abrasions. (#8616)

- 5130 1856 AU55 NGC.** The 1856 eagle is a scarce No Motto issue, struck in the meager amount of 60,490 circulation strikes. This Choice AU specimen displays ample luster over canary-yellow, relatively unmarked surfaces, save for a couple of ticks on Liberty's neck. (#8619)

- 5131 1857-S XF45 NGC.** Unlike the double eagles that were produced in quantity at San Francisco in 1857 (and preserved in quantity onboard the wrecked S.S. *Central America*), the 1857-S eagle has a low mintage and is conditionally rare even at the Choice XF level, as offered here. Orange-kissed yellow-gold surfaces are lightly abraded in the fields but flashy. Census: 11 in 45, 31 finer (5/12). (#8624)

Low-Mintage 1858 Eagle, Choice XF

- 5132 1858 XF45 PCGS.** The 1858 eagle is a remarkable low-mintage rarity for the Philadelphia Mint, struck in the extent of a meager 2,521 circulation strikes. (Proofs exist, possibly four in all.) This Choice XF piece is about average for the survivors, displaying lots of luster remaining over somewhat prooflike orange-gold surfaces with lilac accents in protected areas. Abrasions are minor, save for a rim hit on the obverse at 9:30. Population: 11 in 45, 14 finer (5/12). (#8625)

Choice XF 1859-O Eagle Rarest New Orleans Ten

- 5133 1859-O XF45 PCGS. CAC. Variety 1.** From a mintage of just 2,300 pieces, the 1859-O Liberty eagle is the rarest ten dollar gold coin from the New Orleans Mint. Doug Winter estimates the surviving population at no more than 45-55 specimens in all grades, with most examples seen in the VF-XF range. The present coin is a lightly worn Choice XF example, with a decent strike that shows some softness on the stars and rims. The attractive greenish-gold surfaces display only minor abrasions, with prooflike reflectivity in sheltered areas. This coin should find a home in a fine collection of Southern gold. Population: 9 in 45, 19 finer (4/12). (#8629)

Original Near-Mint 1861 Eagle Civil War-Era Issue

- 5134 1861 AU58 NGC.** Bulging or sixfold bun subtype. This dusky tan-gold Civil War-era eagle has an original appearance and a crisp strike. Distributed small marks are unavoidable for the grade, but are fewer in number and less in severity than usually seen. Ex: Atlanta ANA (Heritage, 4/2006), lot 1996. (#8633)

5135 1868 AU53 NGC. Given the low mintage of a bit more than 10,000 circulation strikes for the 1868 eagle, it is unsurprising that this piece displays prooflike reflectivity despite seven points of wear. The color is beautiful yellow-gold, and there are no singular marks. (#8653)

5136 1872-S AU50 PCGS. From a mintage of 17,300 pieces, this attractive greenish-gold specimen exhibits lightly abraded surfaces with much original mint luster. Population: 12 in 50, 14 finer (5/12). (#8665)

5137 1874-CC VG10 PCGS. CAC. This glossy honey-gold Carson City ten has the expected extent of wear but lacks any singularly distracting abrasions. Though still rare, the most collectible CC-mint issue from the 1870s. (#8670)

5138 1874-S VF35 NGC. CAC. Moderately worn with scattered light abrasions but generous eye appeal nonetheless. This orange-laced wheat-gold example from an issue of just 10,000 pieces has a small rim nick to the left of the date. Census: 7 in 35, 68 finer (5/12). (#8671)

Rare Choice XF 1875-CC Ten

5139 1875-CC XF45 PCGS. Variety 2-B. Considerably rarer than its 1874-CC predecessor, the 1875-CC has a mintage of just 7,715 pieces and a low survival rate. PCGS has graded just one piece as Mint State. The present Choice XF example has pleasing luster extent at the borders and on the coronet and eagle. The pale gold fields and devices display only minor abrasions aside from a brief line between stars 1 and 2. Population: 14 in 45, 19 finer (4/12). (#8673)

Choice Fine 1877-CC Eagle Only 3,332 Pieces Issued

5140 1877-CC Fine 15 PCGS. CAC. Variety 1-A. The usual die pairing, though a second and very rare mintmark variety is known. The present straw-gold rare date Carson City eagle displays a surprising amount of plumage definition, though Liberty's hair is well worn. Smooth aside from a few faded marks on the obverse field. (#8678)

5141 1878-S AU55 NGC. Light field chatter rather than mentionable marks defines the grade on this Choice AU low-mintage survivor, with attractive luster remaining on yellow-gold surfaces. Census: 38 in 55, 31 finer (5/12). (#8682)

Borderline Uncirculated 1881-CC Ten

5142 1881-CC AU58 PCGS. CAC. The motifs and margins exhibit abundant bright luster. The honey-gold surfaces display distributed tiny marks but lack obtrusive contact. Boldly struck and impressive for the near-Mint level. The low mintage of 24,015 pieces was produced from one die pair. Population: 28 in 58, 18 finer (4/12). (#8692)

5143 1881-O — Improperly Cleaned — NGC Details. AU. Other than silver dollars, the New Orleans Mint only struck gold eagles during the 1880s. The 1881-O is a low mintage issue, rare in all grades. The present piece has only a trace of actual wear but the untuned surfaces are hairlined and a bit bright. (#8693)

5144 1884-S MS62 PCGS. CAC. Apricot and peach overtones lend this intensely lustrous example great character. Lightly patinated surfaces show scattered minor to moderate marks that combine to preclude Select status. Population: 86 in 62 (3 in 62+), 11 finer (5/12). (#8705)

1886 Liberty Eagle, MS63 Only Four Coins Finer at NGC

5145 1886 MS63 NGC. CAC. The 1886 Liberty eagle boasts a substantial mintage of 236,100 pieces, but the issue circulated extensively in foreign trade, and examples in Select condition are rare. This well-detailed Select specimen features attractive greenish-gold surfaces that show prooflike reflectivity in sheltered areas. Census: 32 in 63, 4 finer (5/12). (#8708)

5146 1888 MS61 PCGS. CAC. Completer luster remains on each side of this greenish-gold Mint State piece, with a peppering of minor abrasions on each side that determine the grade. (#8712)

**Reflective 1889 Ten Dollar, MS61
Low Mintage of 4,485 Circulation Strikes**

5147 1889 MS61 PCGS. The 1889 eagle was produced in remarkably low numbers, 4,485 circulation strikes, at a time when the Mint's focus was on making Morgan dollars instead; they flowed from Philadelphia to the tune of a gigantic 21.7 million coins, the largest annual mintage of the entire series, except for the 1921-P.

Today the average certified 1889 ten is apt to be no more than AU58. This Mint State piece shows the expected prooflike reflectivity over orange-gold surfaces with a peppering of light abrasions but a bold strike. Population: 27 in 61, 6 finer (5/12). (#8715)

**Choice 1889-S Eagle
Conditionally Rare at This Level**

5148 1889-S MS64 PCGS. CAC. From a substantial mintage of 425,400 pieces, the 1889-S Liberty eagle is not difficult to locate in lower Mint State grades, but the issue is conditionally rare in MS64, and only a single Gem has been certified. This sharply detailed Choice example displays vibrant mint luster and attractive green and orange-gold surfaces. Population: 19 in 64, 1 finer (4/12). (#8716)

Mint State 1890-CC Ten Dollar

5149 1890-CC MS61 NGC. A pumpkin-gold representative of this low mintage (17,500 pieces) Carson City issue. Crisply struck, and though small marks are distributed, they are altogether inoffensive for the MS61 level. Mint luster is particularly prominent at the borders. Census: 82 in 61, 47 finer (5/12). (#8718)

**Mint State 1890-CC Eagle
Lustrous Yellow-Gold Surfaces**

5150 1890-CC MS61 NGC. CAC. Variety 1-A. The 1890-CC eagles were the first struck in Carson City since the 1884-CC pieces. The moderate mintage was 17,500 coins, but most found today are lightly circulated. This Mint State example boasts glowing luster over yellow-gold, moderately abraded surfaces. Census: 82 in 61, 47 finer (5/12). (#8718)

5151 1891-CC MS61 NGC. Variety 1-A. Original orange-gold and lime-green toning adorns this lustrous and precisely struck Carson City type coin. A few traces of struck-in grease on the eagle are as made. Smooth save for a slender mark on the lower left obverse field. (#8720)

5152 1892-CC AU58 NGC. Variety 1-A. A crisply struck canary-gold Liberty ten with a few moderate obverse marks. Luster is abundant throughout the peripheries and motifs. IN GOD WE TRUST is die tripled, as always for this penultimate Carson City issue. Just 40,000 pieces were struck. (#8722)

**Gem 1893 Liberty Ten
No Finer Coins at PCGS**

5153 1893 MS65 PCGS. CAC. The 1893 Liberty eagle enjoyed a huge mintage of 1.8 million pieces, making the date generally available and extremely popular with type collectors. The population thins out considerably in higher grades, however, and the 1893 is quite rare at the Gem level. This well-detailed Gem is one of the finest survivors certified at PCGS, with satiny mint luster and pleasing yellow and rose-gold surfaces. Population: 4 in 65, 0 finer (4/12). (#8725)

5154 1894 MS61 Prooflike NGC. Heavily abraded but intensely reflective, this Prooflike representative gleams even in the field-hollows around the letters in LIBERTY. Luster is pale yellow-gold with aspects of apricot. Census: 26 in 61 Prooflike, 37 finer (5/12). (#78729)

5155 1895-O MS62 NGC. Variety 1. This lustrous better date Liberty ten has honey-gold color and a sharp strike. The number of tiny marks correspond to the grade. Less than 100,000 pieces were issued. (#8733)

Colorful MS65 1901 Eagle

5156 1901 MS65 NGC. Interiors are pale yellow and copper-spotted, yielding swiftly to richer cheddar-gold hues with only occasional spots in the fields. A generally well-defined Gem, this is a carefully preserved piece with only a couple of light abrasions visible on the central portrait. NGC has graded 66 numerically finer examples (4/12). (#8747)

5157 1901-S MS65 PCGS. CAC. This lustrous, fully struck Gem displays a three-toned approach: primarily greenish-gold with accents of yellow-gold and deep orange, beautiful and unusual. (#8749)

**1903 Ten Dollar, MS65+
Tied for Finest Certified**

5158 1903 MS65+ PCGS. The 1903 ten dollar can be acquired with relatively little trouble through the MS63 level of preservation. Near-Gems are scarce and Gems are extremely elusive. Beyond that, this issue is virtually unobtainable. The smooth, highly lustrous yellow-gold surfaces of this high-end Gem display sharply struck devices. A minute squiggly mark on Liberty's jaw might help pedigree the coin. Population: 9 in 65 (2 in 65+), 0 finer (4/12). (#8752)

**MS65 1903-S Ten Dollar
Sharp Central Detail**

5159 1903-S MS65 NGC. Effusive yellow-gold cartwheel luster centers around sharply struck inner devices, though modest striking softness is noted on the stars closest to Liberty's coronet. Color variations into apricot and copper-gold lend personality to this carefully preserved San Francisco Gem. (#8754)

5160 1906-D MS64+ PCGS Secure. This charming peach-gold near-Gem 1906-D ten boasts an exemplary strike and prominent cartwheel luster. The first of only two Denver Mint Liberty eagle issues. Population: 5 in 64+, 26 finer (5/12).
Ex: Boston ANA Signature (Heritage, 8/2010), lot 6080. (#8760)

5161 1906-D MS64+ PCGS. CAC. Excellent all-around detail for this initial Denver eagle issue. Only a few small reed marks and other disturbances keep this coin from full Gem status. PCGS has graded 26 pieces as MS65 or better (4/12). (#8760)

**1907-D Ten Dollar, MS64
Elusive in This Grade**

5162 1907-D MS64 PCGS. The 1907-D ten dollar, despite a mintage exceeding 1 million pieces, is scarce in mint condition. Near-Gem examples such as this piece are elusive, and a mere two NGC-certified coins are finer. Radiantly lustrous peach-gold surfaces exhibit sharply defined design features. The few grade-consistent marks do not detract. Population: 49 in 64, 0 finer (4/12). (#8764)

PROOF LIBERTY EAGLES

1872 PR64 Deep Cameo Ten Dollar

Ex: H.R. Lee/J.F. Bell Collections

Probably No More Than 12 Pieces Extant

5163 1872 PR64 Deep Cameo PCGS. Ex: J.F. Bell. **Plate coin in the Breen Proof Encyclopedia.** This supremely preserved two-toned specimen combines dramatic eye appeal with irrefutable rarity. Struck with the pinpoint sharpness expected of a proof, the sparkling yellow-gold surfaces were obviously carefully preserved by generations of collectors, in spite of financial panics, world wars, and even a great depression. Future identification of this particular representative is made easy by a nearly straight lint mark to the left of Liberty's chin and a curlicue lintmark on the nose. Of course, these minor disturbances have no effect on the coin's technical merits and are mentioned primarily for reasons of pedigree.

In determining the importance of the proof 1872 ten dollar, the normal demand associated with a particular date and denomination is compounded due to the extreme rarity of business strikes, a coin that is at least as challenging as its paltry mintage of 1,620 pieces would suggest. Only a handful of Mint State pieces have been certified by both leading grading services combined, one of the finest of which we had the privilege of selling twice, an MS62 PCGS from the Floyd Starr Collection tracing back to legendary dealer Henry Chapman. Since no Choice to Gem examples were available, even a century ago, major early collections (most notably Garrett and Eliasberg) concentrated on the acquisition of high-quality proofs.

In the recent write-up for the most recent sale of this coin, Q. David Bowers explained the background of this piece's pedigree:

"If you are a devotee of numismatic literature, then you know details of the pedigree. If not, H.R. Lee was the name given to our sale of duplicate coins consigned by Louis E. Eliasberg, Sr. when he was consolidating his collection in 1947. At that time he had extra examples, including in the choice and gem categories, of many rarities. The buyer in the sale was Jacob Shapiro, a Chicago financier, who used a bell as the symbol of his finance company, and adopted it as a pseudonym in numismatic circles, otherwise known as Shapiro to his friends. His son, David Shapiro, developed an interest in numismatics, and years later was president of the Professional Numismatists Guild. Jake Bell was very prominent in numismatic circles in the 1940s and 1950s"

Ex: Possibly the coin in lot 1450 of the William Cutler Atwater Collection (B. Max Mehl, 6/1946), not plated but described as "A very light, hardly noticeable, irregular hair-line in the left obverse field. It appears as though it is a die defect, as there are no other imperfections of any kind on the coin. Wire edge."; H.R. Lee Collection (Stack's, 10/1947), lot 1527; Jacob Shapiro (also known as J.F. Bell); Memorable Collection (Numismatic Gallery, 3/1948), lot 571; J.F. Bell Collection, Part II (RARCOA, 4/1963), lot 384; Charles Jay Collection (Stack's, 10/1967), lot 320; George F. Scanlon Collection (Stack's, 10/1973), lot 2495; Auction '86 (Paramount, 7/1986), lot 1942; Buddy Ebsen Collection (5/1987), lot 2704; Baltimore Auction (Stack's Bowers, 11/2011), lot 9707. (#98812)

1879 Liberty Eagle, PR65 Cameo
Classic 19th Century Rarity
Only One Coin Certified Finer

5164 1879 PR65 Cameo NGC. The 1879 proof Liberty eagle is a classic rarity in the U.S. gold series. While not as well known as the 1877 and 1878, the 1879 proof Liberty eagle is just as elusive. Only 30 specimens were struck, and experts agree no more than 10 to 12 individual coins are known today. We could only account for seven distinct specimens in our roster below, but a few examples may not have appeared in our auction survey. Two coins are impounded in Institutional collections, further reducing the number available to collectors. This coin is tied with one other specimen for second-finest certified (4/12), but it is difficult to imagine an example with greater eye appeal.

As with all proofs of this date, the hair curls behind Liberty's head are detached by excessive die polishing and seem to "float" in back of the neck. Further evidence of this heavy die polishing can also be seen on the detached left end of the scroll, and below the second T in TRUST. The surfaces display lovely honey-gold coloration and the fields are deeply mirrored with a significant amount of mint frost over the devices; this produces impressive cameo contrast on each side. Close examination with a magnifier shows a few light hairlines, but these do not impair the overall appearance or Gem quality of this important 19th century gold coin.

1879 Proof Eagle Roster

1. PR65 Cameo NGC. FUN Signature (Heritage, 1/2007), lot 3659, realized \$50,312.50, **the present coin.**

2. PR65 Cameo NGC. Atlanta Signature (Heritage, 8/2001), lot 7946; FUN Signature (Heritage, 1/2006), lot 3546.

3. PR64 Cameo PCGS. FUN Signature (Heritage, 1/2007), lot 3772.

4. PR64 PCGS. T. Harrison Garrett, purchased directly from the Mint; Robert Garrett; John Work Garrett; Johns Hopkins University; Garrett Collection, Part IV (Bowers and Ruddy, 10/1980), lot 1675; Auction '84 (Stack's, 7/1984), lot 1454, Ed Trompeter; FUN Signature (Heritage, 1/1999), lot 8241; Santa Clara Signature (Heritage, 11/1999), lot 6901; Central States Signature (Heritage, 5/2000), lot 7797.

5. PR64 PCGS. Massachusetts Historical Society Collection (Stack's, 10/1970), lot 955; Harry W. Bass, Jr; Bass Collection, Part II (Bowers and Merena, 10/1999), lot 1571; Bass Collection, Part IV (Bowers and Merena, 11/2000), lot 728; Central States Signature (Heritage, 4/2011), lot 5438.

6. PR64 Cameo, Uncertified. A specimen in the National Numismatic Collection, Smithsonian Institution, formerly in the Mint Cabinet, purchased from the coiner in January 1879, per Walter Breen. Grade courtesy of Jeff Garrett and Ron Guth.

7. Proof. R.C.W. Brock, purchased from the Mint in 1879; J.P. Morgan; donated to the American Numismatic Society in 1908, exhibited at the 1914 ANS Exhibition.

Other Appearances

A. World's Greatest Collection (Numismatic Gallery, 1/1946), lot 684; Memorable Collection (Numismatic Gallery, 3/1948), lot 577; ANA Convention Auction (Abe Kosoff, 8/1968), lot 1033; Florida numismatist, part of an assembled 1879 gold proof set, possibly the same as number 2 above.

B. William Cutler Atwater Collection (B. Max Mehl, 6/1946), lot 1457.

C. David S. Wilson Collection (S.H. Chapman, 3/1907), lot 339, part of a complete six piece gold proof set.

D. Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 430, part of a complete six piece gold proof set.

E. William B. Wetmore Collection (S.H. & H. Chapman, 6/1906), lot 162, part of a complete six piece gold proof set.

F. Somerset Collection (Bowers and Merena, 5/1992), lot 1541, listed as PR60, polished, possibly a business strike. (#88819)

Rare 1887 Ten Dollar, PR65 Cameo
Magnificent Eye Appeal

5165 1887 PR65 Cameo NGC. Ex: Miller Collection. The original mintage for the 1887 ten dollar proof (80 pieces) was the highest it had been since proofs were first offered to the public in 1859. Jeff Garrett and Ron Guth write in their *Encyclopedia of U.S. Gold Coins, 1795-1933* (2006): "... the difference is that in 1859, the Mint struck 80 proofs in *anticipation* of demand, but in 1887, the Mint struck 80 proofs in *response* to increased demand from collectors. Why the survival rate is so low remains a mystery, but today the total population is less than 30 pieces."

Walter Breen estimates in his *Encyclopedia* (1988) that "possibly 15-20 survive." Examination of our records indicates that 1887 proof eagles have made 15 appearances at auction between 1974 and 2011. These include Cameos and Ultra/Deep Cameos as well as non-Cameo examples. NGC and PCGS have certified a total of 25 1887 proof eagles — nine non-Cameos, 11 Cameos, and five Ultra/Deep Cameos.

The present Gem Cameo offering displays deep "gold-on-black" contrast on both sides; indeed, it appears to verge on Ultra Cameo. A solid strike imparted razor-sharp definition on the design features, further enhancing the coin's magnificent eye appeal. We mention tiny nicks on the eyebrow, forehead above, and the bridge of the nose solely for identification purposes.

The above attributes synergistically result in overall eye appeal above and beyond the numerical Gem designation. Census: 6 in 65 Cameo, 2 finer (4/12). (#88827)

Gem Cameo Proof 1900 Eagle Important Type Coin

5166 1900 PR65 Cameo NGC. This turn-of-the-century proof Liberty eagle issue has the single highest mintage within that series, though the official production was just 120 specimens. Using the “half-and-half” rule that suggests half of those coins have been lost to melting or other attrition, and a surviving population of approximately 60 coins appears, right in line with contemporary estimates.

Even though the proof 1900 eagle is a rare coin regardless of grade, it is nonetheless an important type coin for collectors, as virtually all other proof Liberty eagle dates are even less accessible. Fortunately for cameo enthusiasts, the 1900 also falls within the tail-end of the first cameo era, and contrasted coins are the rule. NGC records show 11 certification events for PR65 Cameo coins as of (4/12) with six Cameo coins finer, compared to just six no-designation certification events total.

This attractively preserved example has its own personality, solidly contrasted between fields and devices but also showing copper spots against the dominant yellow-gold hue; the spots appear mainly at the rims but also appear in the obverse fields, one to the left of star 11 and another to the right of star 4. Mirrored fields have considerable orange-peel texture, while the sharply struck portrait and eagle offer light but undeniable frost. Great overall eye appeal with only a few wispy faults and pinpoint flaws. (#88840)

Superb Gem Proof 1902 Eagle
Tied for Finest Certified

5167 1902 PR67 NGC. Mintages can be deceiving, a lesson learned by many collectors with Morgan dollars or Saint-Gaudens twenties but equally applicable to the proof 1902 ten dollar issue. As Garrett and Guth put it in the *Encyclopedia of U.S. Gold Coins*, "The 1902 eagle has the second-highest mintage of any Proof Liberty Head eagle, but it is certainly not the second most common today. Rather, the 1902 issue is difficult to find in any grade and is especially elusive in Gem condition."

Why is the proof 1902 eagle so rare relative to its official mintage? While any assessment must contain its fair share of speculation, the influence of the change in finish cannot be ignored. Taken as a whole, the proof eagles from 1902 to 1907 have both low survival rates compared to their immediate predecessors and smaller total pools of survivors. In the case of the 1902 eagle, perhaps 30 to 35 pieces survive after resubmissions are culled from the pool of certified pieces. The two NGC PR67 specimens graded are the finest in the combined certified population, as of (4/12).

This is one of them, a gleaming beauty with just a hint of field-device contrast. Sharply impressed on the devices with stunning mirrors, this is a truly elite specimen with only a few tiny planchet depressions. Easily the finest specimen of the issue ever offered by Heritage, this is an important opportunity for the dedicated proof gold collector. (#8842)

INDIAN EAGLES

1907 Wire Rim Ten Dollar, XF45
A Popular Low-Mintage Issue

5168 1907 Wire Rim XF45 PCGS. CAC. Despite the low mintage (542 pieces, according to recent research by Roger Burdette, of which 70 unsold specimens were melted, leaving a net of 472 1907 Wire Rim tens that were released, see James Halperin et al., 2006), the Wire Rim issue is not a condition rarity. Halperin states: "Because of their novelty as a first-year issue and particularly beautiful design, many were saved from circulation; perhaps as many as three-fourths can still be accounted for."

This Choice XF example displays deep reddish-gold color with considerable remaining luster. A tick is visible on the middle feather of the headdress, as is a thin vertical scrape from the eagle's forewing nearly down to the leaf triplet. Nevertheless, this is still a nice representative of this popular issue.

From The Robert Dorsey Smith Collection. (#8850)

Famous 1907 Wire Rim Saint-Gaudens Ten
Attractive MS61 Example

5169 1907 Wire Rim MS61 PCGS. With an official mintage of just 500 pieces (and perhaps 472 net released), the Wire Rim ten dollar is one of the most elusive commonly collected Saint-Gaudens eagles — and one of the most popular. The wire edge on this MS61 example contrasts with the striking softness on the high points, where the Mint's production facilities could not keep up with the technical demands placed on it by the early Saint-Gaudens design. Orange-kissed yellow-gold surfaces also show areas of pale lavender accenting the margins. A pinscratch back from the corner of Liberty's mouth defines the grade, though the reverse presents a much cleaner appearance. Housed in a green label holder. (#8850)

5170 1907 No Periods — Improperly Cleaned — NGC Details. Unc. This coruscating apricot-gold first-year Indian ten is nearly imperceptibly hairlined but will be the marvel of most collectors due to its crisp strike and unabraded surfaces. (#8852)

5171 1907 No Periods MS62 NGC. A well-detailed MS62 specimen of this popular first-year issue, with just a touch of softness on the hair and lower headdress feathers. A scattering of minor contact marks on the lustrous greenish-gold surfaces explains the grade. (#8852)

1907 Ten Dollar Indian, MS63
Remarkably Pristine for the Grade

- 5172 1907 No Periods MS63 PCGS.** One of the trademarks of the 1907 ten dollar Indian is how clean the surfaces usually appear. That generalization holds true for this piece, and each side is remarkably free from coin-to-coin contact that would be expected on an MS63. The coin is satiny with slight reddish-golden and lilac patina interspersed over the sharply struck surfaces.
From The Robert Dorsey Smith Collection. (#8852)

Choice 1907 No Periods Ten Dollar
Bright Mint Frost

- 5173 1907 No Periods MS64 PCGS.** Another hallmark of the 1907 No Periods ten is exceptional mint luster. Seen here, the luster is bright and frosted, swirling around each side in a cartwheel fashion. Close examination also shows few out-of-Mint abrasions. The most notable flaw is actually of Mint origin, a tiny planchet flake in the left reverse field. (#8852)

1907 No Periods Ten Dollar, MS64
Lustrous and Well Defined

- 5174 1907 No Periods MS64 PCGS.** The 1907 ten dollar No Periods, with a mintage of 239,406 pieces, is one of the most available of the Indian Head eagles. Mint engraver Charles Barber made some modifications to Saint-Gaudens' design, including removing the triangular stops or periods, reshaping the branch, and strengthening the feather ends. Variegated apricot-gold and mint-green patina resides on the highly lustrous surfaces of this near-Gem, and the design elements are well impressed. Some minute obverse marks define the grade. Housed in a green-label holder.
Ex: Summer FUN (Heritage, 7/2007), lot 2749. (#8852)

1908 No Motto Ten, MS62
Excellent Type Coin, Good Eye Appeal

- 5175 1908 No Motto MS62 PCGS.** The second-year Saint-Gaudens No Motto issue is far rarer than the 1907 No Periods, with its meager mintage of only 33,500 coins. The present MS62 example shows typical greenish-gold color, but the surfaces have above-average preservation and eye appeal for the grade. The only mentionable contact marks are a few hits in the reverse fields. (#8853)

- 5176 1908 Motto MS63 PCGS.** Popular as the first year of the Motto type, the 1908 Motto is available well into the higher Mint State grades for a price. This Select example will appeal to more modest budgets with its combination of glowing luster over well-struck, mattelike orange-gold surfaces. (#8859)

- 5177 1908 Motto MS63 NGC.** Typical mattelike golden-orange surfaces display exuberant eye appeal and only a few scattered marks that define the grade. A popular first-year type issue. (#8859)

- 5178 1908 Motto MS63 PCGS.** This sharply detailed Select specimen would make an excellent choice for a first-year type collector seeking a representative of the Motto design. The lustrous orange-gold surfaces exhibit strong eye appeal. (#8859)

Choice 1908 Indian Eagle
First Year of Motto Design

- 5179 1908 Motto MS64 PCGS.** This impressive Choice Indian eagle exhibits sharply detailed design elements, with vibrant satiny mint luster. The pleasing green and orange-gold surfaces show some highlights of lilac and rose. The fields exhibit only minor signs of contact and visual appeal is quite strong. (#8859)

**1908 Motto Ten Dollar, MS64
Clean and Problem-Free for the Grade**

5180 1908 Motto MS64 PCGS. A mid-year design change resulted in the addition of the motto on the reverse. This is a bright, satiny example that reveals subtle rose and lilac flecks of color when closely examined. The strike is strong throughout and there are no mentionable abrasions, just a reddish alloy spot on the obverse rim near 8 o'clock. (#8859)

5181 1908-D Motto MS61 NGC. The 1908-D With Motto is close to the top quartile in overall rarity within the Indian Head series. This Mint State piece shows a number of overt, grade-defining marks on Liberty's cheek but is nonetheless highly attractive, with reflective cartwheel luster over orange-gold surfaces. (#8860)

5182 1908-D Motto MS61 PCGS. A well-detailed Mint State representative from the first year of the Motto design, this coin offers lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. (#8860)

5183 1908-D Motto MS62 NGC. Wheat-gold at base with a considerable apricot effect, particularly at the margins. Liberty's cheek shows a wedge-shaped mark and a few other light abrasions, accounting for the grade. (#8860)

5184 1908-S AU55 NGC. This briefly circulated specimen from the San Francisco Mint has an original mintage of only 59,850 pieces. Luster gleams from the protected areas. The surfaces show moderate abrasion and the high points display slight rub that accounts for the grade on this Choice AU example. (#8861)

**Mint State 1908-S Indian Eagle
Fewer Than 60,000 Examples Struck**

5185 1908-S MS61 NGC. Despite the low mintage of less than 60,000 coins, the 1908-S is available even at the Gem level. This more modest Mint State piece shows the excellent eye appeal the issue is known for, with radiant luster over orange-gold mattelike surfaces and few abrasions for the grade. The strike is a bit blunt on the high points. (#8861)

5186 1909 MS62 NGC. The 1909 Indian eagle is a better date in the series, and this well-detailed MS62 specimen displays lustrous yellow-gold surfaces, with highlights of rose. A minor obverse rim bruise at 4 o'clock is the only mentionable flaw. (#8862)

5187 1909-S AU58 PCGS. CAC. This near-Mint coin is orange-gold with smoke-gray accents on each side. A few stray contact marks are in concert with the grade. The 1909-S is among the rarer S-mint issues in the series. (#8864)

**MS62 1910-S Eagle
Excellent Eye Appeal**

5188 1910-S MS62 PCGS. Most of the large mintage of 800,000-plus 1910-S eagles was melted later, and today only a few thousand survive in all grades, averaging Choice AU. This is a lustrous reddish-orange MS62 example with excellent eye appeal, mattelike surfaces, and only a few marks that define the grade. Nice type set potential. (#8867)

5189 1911 MS64 NGC. Only a single mark on the obverse, a tick under Liberty's eye, perhaps precludes an even finer grade on this mattelike orange-gold ten. The eye appeal is superlative, in any case. (#8868)

5190 1911 MS64 NGC. The 1911 Indian eagle is an available date and a popular type coin. This well-detailed Choice example displays vibrant mint luster on the pleasing yellow and rose-gold surfaces. (#8868)

5191 1911 MS64 PCGS. An attractive Choice example of this popular date, with well-detailed design elements and vibrant satiny mint luster. The slightly granular surfaces display orange-gold and lilac tints. (#8868)

5192 1911 MS64 NGC. Bold cartwheel luster is uncharacteristic of this issue but combined with the light yellow-gold surfaces it emphasizes the open "cameo effect" fields created by the Saint-Gaudens design. Remarkably appealing with fine-grained mattelike surfaces. (#8868)

5193 1911-D XF45 PCGS. The 1911-D Indian eagle is an elusive date in all grades. This lightly worn Choice XF specimen shows only minor abrasions on the attractive orange-gold surfaces. *From The Robert Dorsey Smith Collection.* (#8869)

5194 1911-D AU50 NGC. The 1911-D ten had a lower mintage, at 30,100 coins, than its counterparts in the quarter eagles and half eagles. This AU example shows muted luster over peach-gold surfaces with charcoal accents. (#8869)

5195 1911-D AU53 NGC. The low-mintage leader among Indian Head eagles, the 1911-D is in demand in all grades. This AU53 example boasts excellent eye appeal, with generous luster emanating from orange-gold surfaces accented by charcoal-gray. (#8869)

**Choice AU 1911-D Eagle
Mattelike Surfaces With Good Appeal**

- 5196 1911-D AU55 NGC.** The 1911-D eagle actually has a smaller mintage than its half eagle or quarter eagle counterparts, at 30,100 pieces. This mattelike Choice AU piece could nearly pass for low Mint State, as the high-point rub is scarcely noticeable, and mentionable surface marks are nonexistent. The color is a lovely reddish-gold. (#8869)

Low-Mintage 1911-D Eagle, MS62

- 5197 1911-D MS62 PCGS.** The 1911-D eagle has the lowest official mintage of any 20th century U.S. coin issue produced for circulation, just 30,100 pieces. Select and finer coins are borderline condition rarities in the aggregate, and even MS62 pieces such as this one are genuinely scarce. Apricot-gold luster is light at certain angles but insistent with delicate texture. Softly struck on the obverse but with few significant abrasions on that side, this coin derives its grade largely from the reverse, which has several nicks on the rim and eagle, as well as a coppery streak just back of the eagle's head. (#8869)

-
- 5198 1912-S AU58 PCGS. CAC.** Yellow-gold surfaces show smoke-gray accents on this near-Mint State 1912-S ten, among the rarest S-mint eagles in the series. (#8872)

- 5199 1912-S MS60 NGC.** Mint luster is complete but numerous abrasions, more prominent on the obverse, define the grade on this 1912-S ten. Orange-gold surfaces show charcoal high-point accents. (#8872)

**Near-Gem 1913 Eagle
Good Type Set Potential**

- 5200 1913 MS64 PCGS. CAC.** This near-Gem 1913 eagle appears quite close to the Gem grade, as there are scarcely any mentionable surface marks appearing, even under a loupe, and the bold strike complements the overall excellent eye appeal. A few tiny ticks on Liberty's jaw and cheek are perhaps all that limit an even finer grade. The color is a beautiful yellow-gold, with full cartwheel luster. (#8873)

Well-Struck, Lustrous 1913 Gem Ten Dollar

- 5201 1913 MS65 NGC. CAC.** The 1913 ten dollar, from a mintage of 442,000 business strikes, is available through near-Gem. Gems are much more challenging and finer specimens are rare. The mattelike surfaces of this Gem yield pleasing luster and attractive light to medium yellow-gold color with copper-gold overtones. The strike is sharp throughout. The obverse is impeccably preserved, while the reverse reveals some marks, including a moderate horizontal abrasion on the shoulder of the right (facing) wing. Some fine linear marks are also visible on the lower-right part of the eagle. Census: 90 in 65 (2 in 65+), 15 finer (4/12). (#8873)

**1913-S Ten Dollar, AU58
Great Overall Appeal**

- 5202 1913-S AU58 PCGS. CAC.** The 1913-S ten dollar, from a mintage of just 66,000 pieces, is scarce in Mint State grades. The present near-Mint State offering features attractive peach-gold coloration with rose highlights, ample luster, well defined motifs, and minimal, unobtrusive marks. The CAC seal confirms its overall appeal. (#8874)

**Two-Toned 1914-D Eagle, MS63
Top-Drawer Eye Appeal**

- 5203 1914-D MS63 PCGS.** The lovely two-toned surfaces on this Select coin show greenish-gold alternating with orange-gold, an effect more prominent on the obverse. A loupe confirms the mattelike texture of the surfaces and reveals a few marks — on Liberty's cheek, the middle headdress feathers, the upper eagle's wing — that likely define the grade. The eye appeal is nonetheless top-drawer. (#8876)

**Engaging 1914-S Ten Dollar, MS61
Mattelike Greenish-Gold Surfaces**

- 5204 1914-S MS61 NGC.** An underrated series issue, the low-mintage (208,000 pieces) 1914-S is far from a common date. This Mint State example shows engaging, mattelike greenish-gold surfaces with good luster and high-end eye appeal for the grade, despite a scattering of light marks that appear only under a loupe. (#8877)

**1914-S Eagle, MS63
Scarce in Finer Grades**

- 5205 1914-S MS63 PCGS.** The yellow-gold surfaces are beautifully smooth and even on this delightful coin, from a healthy mintage of 208,000 examples. A couple of ticks on Liberty's cheek and the high point of the eagle's wing apparently account for the grade — and some minor planchet roughness, as made, appears on the reverse under a loupe — but there is much commendable about this piece, which seems high-end for the assigned grade.
Ex: Long Beach Signature (Heritage, 5/2008), lot 3499. (#8877)

-
- 5206 1915 MS63 PCGS.** Collectors seeking a meticulously detailed example of the Saint-Gaudens Indian design need look no further than the present coin. Close inspection under a loupe reveals a few widely scattered contact marks that detract little from the coin's overall lustrous golden beauty. (#8878)

**1915 Ten Dollar, MS64
Great All-Around Quality**

- 5207 1915 MS64 PCGS. CAC.** The 1915 ten dollar is one of the better produced Indian Head eagles. Most examples, the present near-Gem included, possess great luster, a sharp strike, and above-average surface preservation. Both sides yield attractive yellow-gold coloration with rose highlights. (#8878)

-
- 5208 1915-S AU55 NGC.** Most of the luster remains on this Choice AU 1915-S eagle, which exhibits smoke-gray accents over otherwise orange-gold surfaces. Scattered marks, including some in prime focal areas, are in concert with the grade. (#8879)

- 5209 1916-S MS61 NGC.** Luminous wheat-gold with considerable patina and several scattered copper spots. The strike on the high points is soft, but as a Mint State example of the lower-mintage 1916-S, this is a coin that will please many collectors. (#8880)

**AU53 1920-S Saint-Gaudens Eagle
Famous Melt Rarity**

5210 1920-S AU53 PCGS. CAC. The last five issues of the Saint-Gaudens eagle series form an unusual pattern: melt rarity (1920-S), type coin (1926), melt rarity (1930-S), type coin (1932), and melt rarity (1933). This is a lightly worn example of the first issue, which is scarce today regardless of condition. Peach-kissed yellow-gold surfaces retain considerable luster despite wear across the softly struck high points. Liberty's portrait shows several cuts toward the left and a short dig just off the chin, while the reverse has a few similar flaws in more out-of-the-way areas. Population: 3 in 53, 44 finer (5/12). (#8881)

5211 1932 MS64 PCGS. CAC. A near-Gem of this plentiful type issue, the present 1932 displays cartwheel luster over greenish-gold to orange-gold, relatively unabraded surfaces. (#8884)

5212 1932 MS64+ PCGS. CAC. This high-end Choice Indian half eagle features well-detailed design elements and lustrous yellow and rose-gold surfaces. The 1932 eagle was the penultimate issue for the denomination. (#8884)

5213 1932 MS65 PCGS. Rich lemon-gold toning endows this thoroughly lustrous and well impressed Indian type coin. The reverse center shows a faint rose alloy spot, and a few wispy marks emerge beneath a lens. The only readily collectible gold issue from the 1930s. Certified in a green label holder. (#8884)

LIBERTY DOUBLE EAGLES

5214 1850 XF40 PCGS. The greenish-gold surfaces of this XF first-year example show only minor abrasions, but the worst are clustered on Liberty's face. Remnants of prooflike reflectivity are noticeable around the devices. (#8902)

**AU 1850 Twenty Dollar
Perennially Popular Debut Issue**

5215 1850 AU50 NGC. Considerable luster still glimmers from the orange-gold surfaces of this AU first-year double eagle, a perennially desired issue among type collectors. The surfaces show the usual peppering of marks over orange-gold surfaces. The coins were handled roughly in the Old West, largely in bank-to-bank transactions and/or internationally. (#8902)

**AU53 1850 Double Eagle
Greenish-Gold Lustrous Surfaces**

5216 1850 AU53 PCGS. The large mintage of the first-year Philadelphia double eagle was more than 1.1 million coins, and survivors are available and popular today, mostly in circulated grades. This example boasts still-lustrous greenish-gold surfaces that are peppered with myriad contact marks, likely not only from circulation but also from coin-to-coin contact bouncing around in bank-sewn bags. A loupe reveals a few larger marks among the small ones. (#8902)

**Choice AU 1850 Twenty Dollar
First Obtainable Issue of the Denomination**

5217 1850 AU55 NGC. CAC. The 1850 is always popular as the first year obtainable for the twenty dollar type. Rarely is it found in Mint State. Slight traces of luster can faintly be made out around the devices, more prominently on the reverse. The strike is strong throughout, and the surfaces are peppered with numerous small marks.
Ex: Boston ANA Signature (Heritage, 8/2010), lot 6133. (#8902)

Choice VF 1850-O Double Eagle
Good Eye Appeal

- 5218 1850-O VF35 PCGS.** The 1850-O double eagle is a better issue, always popular because of the series' debut in this year and as the first New Orleans strike in the series. The mintage was far smaller than the 1850 Philadelphia at 141,000 coins. This Choice VF piece displays good eye appeal remaining over orange-gold surfaces that have some luster clinging to the protected areas, despite 25 points of wear. (#8903)

Elusive 1850-O Double Eagle, XF45

- 5219 1850-O XF45 PCGS. Variety 2.** This straw-gold New Orleans twenty displays wear on the high points but retains glimmers of luster within the letters, wings, and shield. The slightly subdued surfaces are devoid of mentionable marks. The '50-O is scarcer than its '51-O successor, though all O-mint double eagles are in demand, since only the first three issues of the series had a mintage of more than 100,000 pieces. (#8903)

AU Sharpness 1851-O Twenty
Boldly Struck and Relatively Unabraded

- 5220 1851-O — Improperly Cleaned — NGC Details. AU.** This piece shows orange-gold surfaces that are relatively unabraded for the details grade, but the luster is fairly drab, due to the noted cleaning. Nonetheless, the strike is quite bold, and abrasions are few. The 1851-O is among the more available O-mint issues from the first decade of the new double eagle denomination, and as such this piece might find a ready home.

- 5221 1852-O Genuine PCGS.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned. The present New Orleans double eagle has olive-gold toning and displays only light wear on the hair and wingtips. Both sides are thickly hairlined. (#8907)

Still-Lustrous AU53 1852-O Twenty

- 5222 1852-O AU53 PCGS. Variety 1.** A surprisingly lustrous example despite light circulation, this earlier O-mint twenty has notes of green and orange set against a yellow-gold base. Original luster is most prominent at the peripheral protected areas. Though lightly abraded overall with a deeper cut to the right of the word STATES, this is an important example of an issue that is scarce any finer. (#8907)

1854 Liberty Double Eagle, AU58
Popular Small Date Variety

- 5223 1854 Small Date AU58 PCGS.** Small Date 1854 Liberty double eagles are seen more often than their Large Date counterparts, but the issue is still very scarce at the AU58 level. This lightly circulated near-Mint example displays well-detailed design elements and lustrous yellow and rose-gold surfaces. Population: 40 in 58, 18 finer (4/12). (#8911)

Choice AU 1855 Twenty
Top-Notch Eye Appeal

- 5224 1855 AU55 NGC.** Top-notch eye appeal remains on this Philadelphia 1855 double eagle, despite the minor high-point wear consistent with the Choice AU level. The well-struck orange-gold surfaces show remarkably few abrasions, and the interesting die lines in the lower shield on the reverse only add further to the appeal. (#8914)

**1856-S Double Eagle, AU55
Sharply Detailed**

- 5225 1856-S AU55 NGC. CAC.** Once a rarity in high grade, the supply of 1856-S double eagles was significantly augmented by the salvage of the *S.S. Central America*. Despite the influx of new coins, it is still a scarce date in Choice AU. The present coin, which bears no evidence of having been immersed in salt water, is sharply detailed with peach-gold surfaces and traces of luster in the recessed areas. A scattering of minor abrasions is noted on both sides. (#8919)

**Lustrous Near-Mint 1856-S Twenty Dollar
Ex: *S.S. Central America***

- 5226 1856-S AU58 PCGS. Variety 17E.** Ex: *S.S. Central America*. SSCA 5268. Most of the double eagles recovered from the famous shipwreck were 1857-S examples, though a number of '56-S pieces were also found. Those were attributed by die variety, and the present coin is described as "Full Serif, Faint Left S" on the gold insert of the circa-2001 PCGS holder. The mint luster is essentially complete and the reverse is well preserved. The grade appears conservative but is determined by wispy grazes on the left obverse and a shallow mark on Liberty's neck. (#8919)

**1857 Liberty Twenty, AU55
Scarce Date in High Grade**

- 5227 1857 AU55 NGC. CAC.** Unlike its San Francisco counterpart, the 1857 P-mint double eagle was not heavily represented in recent shipwreck finds, and Choice AU specimens, like the present coin, are scarce. Only a trace of actual wear shows on the high point of the well-detailed design elements, and the light greenish-gold fields are lustrous and lightly abraded. (#8920)

**MS61 1857-S Double Eagle
Ex: *S.S. Central America***

- 5228 1857-S MS61 PCGS. Variety 20E.** Ex: *S.S. Central America*. SSCA 2319. The crossbar of the A in STATES is partly polished out, leading to the "Broken A" variety name. While the obverse of this well-defined example has a number of long, light abrasions crossing the obverse, it is an important "treasure coin" and high-end Type One double eagle type coin nonetheless. Pale yellow surfaces are brightly lustrous with deeper yellow at the rims and a reddish-violet copper spot over the top part of the W in TWENTY. (#8922)

**Mint State 1857-S Double Eagle
Ex: *S.S. Central America*, Bold S**

- 5229 1857-S MS61 PCGS. Variety 20B.** Ex: *S.S. Central America*. SSCA 4220. The "Bold S" variety with a deeply entered mintmark. A lemon-gold representative with dynamic cartwheel luster and bright, lightly marked surfaces. One strike-through noted between obverse stars 12 and 13. The strike is precise save for softness on the first two vertical shield stripes. (#8922)

**Near-Gem 1857-S Spiked Shield Twenty
S.S. Central America Gold Label**

- 5230 1857-S Spiked Shield MS64 PCGS. CAC.** Ex: *S.S. Central America*. SSCA 4030. An attractive near-Gem example of the famous treasure/type coin, pale yellow on the reverse with a deeper overall tone on the obverse and the usual shift from richer color at the rims to lighter interiors. The shift is marked by a milky line on the lustrous obverse. Comes with certificate of authenticity, faux-book case, and presentation box.
From The Robert Dorsey Smith Collection. (#8922)

1859-O Double Eagle, AU50
Rare in All Grades

5231 1859-O AU50 PCGS. All New Orleans double eagles minted after 1853 are rare. Douglas Winter, in the second edition of *Gold Coins of the New Orleans Mint, 1839-1909* (2006), contends that the 1859-O, coming from a mintage of only 9,100 pieces, is the fourth-rarest New Orleans twenty behind the 1855-O and the ultra-rare 1854-O and 1856-O issues. He writes:

“The 1859-O double eagle is a very scarce issue in all grades. It is most often seen in Very Fine to Extremely Fine grades and it is rare in About Uncirculated. Most pieces in this grade range are no better than AU53, and the 1859-O becomes very rare in properly graded AU55.”

This AU50 example displays apricot-gold coloration with high-point glints of hazel-gray. The date shows orange accents in the background. Considerable prooflike reflectivity remains in the protected areas around the date, peripheral stars, and recesses of the portrait. This attribute is similar around the reverse elements. A loupe reveals a few singular contacts, including a small patch of reeding marks inside the small circle of reverse stars, and a second patch of such marks between the Y in TWENTY and D. Occasional light field chatter is also visible. All in all, this is a nice, attractive coin for having been in circulation for a short period of time. Indeed, we suggest that it possesses above-average eye appeal for an issue that is typically below-average in this regard. Population: 9 in 50, 17 finer (5/12). (#8927)

Choice AU 1859-S Double Eagle
Struck a Decade After the Gold Rush Began

5232 1859-S AU55 PCGS. CAC. Type One S-mint double eagles are a subseries that are certainly coming into their own, as our remarkable recent offering of the Galt's Gulch Collection in the Orlando FUN Signature (Heritage, 1/2012) pointed up, realizing record prices for top-grade coins. The 1859-S typifies the allure of the Old West, as many examples were recovered from the shipwreck of the *S.S. Republic*, and the issue was produced in San Francisco a decade after the Gold Rush began in 1849, a period in which the population of the city would double from 25,000 to 50,000 people. This Choice AU example is not provenanced specifically but it is alluring in its own right, with orange-gold surfaces that are still brightly lustrous. Population: 42 in 55, 61 finer (5/12). (#8928)

MS61 1860 Double Eagle
Variegated Color

5233 1860 MS61 PCGS. This moderately abraded but strongly lustrous pre-Civil War Philadelphia twenty has distinctive color, largely yellow-gold but with obvious variations into orange at the upper left obverse and through much of the central reverse. The strike is decent, if a trifle soft on the high points. Rare any finer. (#8929)

Mint State 1860 Double Eagle
High-End Appeal for the Grade

5234 1860 MS61 NGC. This piece displays high-end eye appeal for the grade. The radiant cartwheel luster is the first attribute that greets the viewer, even though a few surface marks are visible without a loupe. The strike is quite bold on orange-gold surfaces, and we have seen coins with far more abrasions in the same grade. (#8929)

Scarce Choice AU 1860-S Twenty Dollar

5235 1860-S AU55 PCGS. CAC. The 1860-S can be found in Very Fine and Extremely Fine condition with little trouble. The issue is scarce in About Uncirculated and rare in Mint State. The yellow-gold surfaces of this Choice AU specimen exhibit well struck design elements and reveal a fair amount of luster. Light scattered marks do not detract. (#8931)

5236 1861 AU55 NGC. This Type One double eagle enjoys widespread popularity from type collectors as well as Civil War enthusiasts. This example exhibits considerable luster while scattered abrasions are consistent with the grade. Soft copper toning is noted in the protected areas. (#8932)

5237 1861 — Improperly Cleaned — NGC Details. Unc. The reverse appears unimpaired, but parallel hairlines emerge on the obverse when it is tilted away from the light. The lower left obverse has speckles of struck-in grease, and the portrait exhibits a couple of noticeable marks. A boldly struck and lustrous caramel-gold example. (#8932)

**AU53 1861-S Twenty Dollar
Counterpart to the Paquet Reverse Coins**

5238 1861-S AU53 NGC. The 1861-S double eagle basks in reflected glory from the far more elusive 1861-S Paquet twenty, struck before the regular coins such as this piece. Some prooflike reflectiveness lurks in protected areas on the orange-gold surfaces. A loupe reveals a scattering of mostly minor marks and some amber-gold accents around the devices. (#8935)

5239 1863-S XF45 PCGS. The vivid greenish-gold surfaces of this Choice XF specimen show a scattering of minor contact marks on both sides, the worst being a short scratch on Liberty's chin. This example retains much original luster and appeal. (#8940)

**Borderline Uncirculated 1863-S Twenty
Scarce Small S Mintmark**

5240 1863-S AU58 NGC. Breen-7217. Small S mintmark, introduced in 1863 and designated as "rare" by Breen in his 1988 *Encyclopedia*. A majority of 1863-S twenties possess the Medium S in use since 1855. On the present piece, luster outlines all design elements and the apricot-gold surfaces are only moderately abraded. (#8940)

5241 1865 AU53 NGC. Medium orange-gold surfaces show considerable luster clinging to each side of this, the last Civil War-era (and last Type One) P-mint double eagle issue. Abrasions are minimal for the grade. (#8943)

**Select Mint State 1865 Double Eagle
Recovered From the S.S. Republic**

5242 1865 MS63 NGC. CAC. Ex: S.S. Republic. This double eagle seemingly never had a chance to circulate, as it was still in its year of issue when it was loaded onto the *Republic* and sank to the bottom of the Atlantic. A well-defined coin overall, it has faintly frosty accents on the high points with broad cartwheel luster swirling through pale gold fields. The reverse has faint die cracks through UNITED STATES OF AMERICA. A few light abrasions affect the portrait and luster grazes appear elsewhere, but this is a quality representative of its Type One Philadelphia issue. (#8943)

5243 1866-S Motto VF35 PCGS. CAC. A Choice VF example from the first year to include the motto IN GOD WE TRUST, this coin retains much original luster and design detail, with attractive greenish-gold surfaces. (#8950)

**Near-Mint 1867-S Liberty Twenty
Type Two Double Eagle in Relatively High Grade**

- 5244 1867-S AU58 NGC. CAC.** Like most Type Two Liberty double eagles, the 1867-S is rare in Mint State grades, and collectors prize attractive near-Mint specimens, like the present coin. This lightly circulated example is well-detailed and lustrous, with only minor abrasions. NGC has certified only 22 coins in higher numeric grades (4/12). (#8952)

**1869-S Twenty Dollar, AU58
Conditionally Scarce**

- 5245 1869-S AU58 NGC.** The 1869-S twenty dollar saw a mintage approaching 700,000 pieces, and today the date is plentiful in grades Very Fine and Extremely Fine. About Uncirculated examples are scarce and Mint State coins are rare. The reddish-gold surfaces of this near-Mint State example retain ample luster and display well struck design elements. Scattered marks are consistent with a large, heavy gold coin that saw light circulation. (#8956)

**1870-S Double Eagle, MS61
Difficult to Locate Any Finer**

- 5246 1870-S MS61 NGC.** The 1870-S double eagle was produced in large numbers approaching 1 million pieces. Most were exported or destroyed (Jeff Garrett and Ron Guth, 2006). Surviving coins are mostly in Very Fine to About Uncirculated grades. Mint State examples are scarce in the lower levels thereof and extremely rare in higher levels.

This MS61 offering displays orange-gold lustrous surfaces and well struck design elements. Myriad small- to medium-sized marks, more prominent on the obverse, preclude a higher grade. That said, this coin is still very scarce in the designated grade, and realistically, may be the finest that is likely to be encountered. Census: 25 in 61 (2 in 61+), 9 finer (4/12). (#8959)

- 5247 1871-S AU58 PCGS. CAC.** Pleasingly detailed for this Type Two San Francisco issue with excellent luster. Light abrasions pepper the straw-gold surfaces, but the devices show only a trace of friction. (#8962)

Eye-Appealing 1871-S Twenty, MS61

5248 1871-S MS61 NGC. The 1871-S is rather available for a Type Two double eagle, but MS61 is about the finest grade usually obtainable. This example shows a scattering of light marks that define the grade, as expected, but the strike is well-executed. Generous cartwheel luster over khaki-gold, frosty surfaces nonetheless impart plenty of eye appeal. Census: 62 in 61 (1 in 61+), 21 finer (5/12). (#8962)

5249 1872-S AU58 NGC. Luster illuminates design recesses of this butter-gold Type Two double eagle. The distributed marks are mostly moderate, though we note a horizontal line on the jaw. (#8965)

5250 1872-S AU58 PCGS. CAC. Small Squat S. Unlike certain later dates in the series, the 1872-S was principally released into circulation instead of shipped overseas to line foreign bank vaults. As a result, the 1872-S becomes conditionally rare near Mint State, and is extremely rare above the MS62 grade. This is a generally lustrous and problem-free example with scattered minor abrasions. Ex: *Phoenix ANA Signature (Heritage, 3/2008)*, lot 1676. (#8965)

1873 Open 3 Double Eagle, MS62 An Excellent Type Choice

5251 1873 Open 3 MS62 PCGS. The 1873 Open 3 twenty dollar is most commonly found in grades from Very Fine to About Uncirculated, and can be found in the lower Mint State grades without too much trouble. This MS62 has apricot-gold, lustrous surfaces that exhibit nicely struck devices. A few light scuffs are inconsequential, as is a spot in the lower-left reverse. (#8967)

1873 Double Eagle, MS62 Popular Open 3 Type

5252 1873 Open 3 MS62 NGC. The 1873 Liberty double eagle, with the Open 3 in the date, is probably the most popular choice of type collectors seeking an example of the Type Two twenty. Although the issue is not difficult to locate in lower Uncirculated grades, it becomes quite scarce above the MS62 level. This attractive specimen exhibits well-detailed design elements, with vibrant mint luster and pleasing orange-gold surfaces. A scattering of minor contact marks on each side explains the grade. (#8967)

1873, Open 3, Double Eagle, MS62 In-Demand Type Two Twenty

5253 1873 Open 3 MS62 PCGS. CAC. The 1873, Open 3, Liberty double eagle is probably the most available issue of the Type Two design, making it a favorite choice of type collectors. This attractive MS62 specimen exhibits well-detailed design elements, with lightly marked rose-gold surfaces and much original mint luster. (#8967)

Mint State 1873-S Closed 3 Twenty

5254 1873-S Closed 3 MS61 NGC. Lustrous orange-yellow surfaces show a light overlay of smoke-gray on this Mint State coin. A peppering of mostly light abrasions on each side gives the fields a typical "chatter" look that survivors in this grade often display. The charcoal accents come from coin-to-coin contact in bank or mint bags rather than any mentionable circulation. (#8969)

**Mint State 1873-S Double Eagle
Scarcer Open 3 Variety**

5255 1873-S Open 3 MS60 PCGS. Unlike its Philadelphia counterpart, the 1873-S, Open 3 double eagle is seen less often than the Close 3 variety. Examples in Mint State condition are rare. This attractive MS60 specimen is well-detailed and lustrous, with vivid orange-gold surfaces that show the usual number of minor contact marks for the grade. Population: 23 in 60, 26 finer (4/12). (#8979)

5256 1874 MS60 NGC. This orange-kissed yellow-gold example is softly struck but has no trace of wear. Extensive abrasions in the left obverse field and on the portrait account for the grade. (#8970)

5257 1874-CC — Improperly Cleaned — NGC Details. AU. Variety 5-A. A scarce die variety identified by specific date placement. This honey-gold Carson City twenty has light wear but pockets of bright luster emerge on both sides. (#8971)

Fascinating 1874-CC Double Eagle, AU50

5258 1874-CC AU50 PCGS. Here is a coin that calls out to numismatists determined to assemble a quality collection of Type Two double eagles or gold coins of the historic Carson City Mint. Deep honey-gold luster contrasts with swaths of smoldering red to boost the visual distinction of this piece. Careful study with a loupe reveals a scattering of minute bagmarks as often seen, but the overall eye appeal is far above average, amplified by the coin's freedom from the heavy circulation more typical of 1870s dates. Thoughtful collectors are certain to profit from careful consideration devoted to this appealing specimen. (#8971)

**1874-S Double Eagle, MS61
Vivid Color and Strong Luster**

5259 1874-S MS61 PCGS. The 1874-S Liberty double eagle claims a mintage of over 1 million pieces but, like most Type Two twenties, few examples have survived in high grade. This well-detailed Mint State example features lustrous greenish-gold surfaces and considerable eye appeal. A scattering of minor contact marks explains the grade. Housed in a green label holder. (#8972)

Choice AU 1875-CC Twenty Dollar

5260 1875-CC AU55 NGC. Variety 7-A. A butter-gold double eagle from the legendary Old West Carson City Mint. Luster dominates design crevices. The obverse has a moderate smattering of small marks, while the reverse has surprisingly few abrasions. Variety 7-A is best identified by the die chip on Liberty's neck beneath the largest curl. (#8974)

**1875-CC Double Eagle, AU58
Attractive Carson City Strike**

5261 1875-CC AU58 NGC. Substantial luster outlines the devices on this pale yellow-gold example. Evidence of this Carson City coin's brief circulating life is seen only on the higher points of Liberty's cheek and hair. This coin may be ideal for an aspiring type collection of the double eagle denomination or of Western mint gold coinage. (#8974)

5262 1875-CC — Rim Filing — NGC Details. Unc. Variety 7-A. The obverse rim is filed throughout, though the casual collector would likely not notice. This is a lustrous caramel-gold representative with a smooth reverse and wispy obverse grazes. (#8974)

**Mint State 1875-CC Double Eagle
Ideal Mintmark Type Coin**

5263 1875-CC MS60 PCGS. The 1875-CC is the most available Type Two double eagle from the Carson City Mint, and the most popular choice of mintmark type collectors seeking an example of the design. This pleasing Mint State specimen displays well-detailed design elements, vivid orange-gold surfaces, and vibrant luster that mixes with prooflike reflectivity in sheltered areas. Housed in a green label holder. (#8974)

Select 1875-CC Type Two Twenty

- 5264 1875-CC MS63 NGC. Variety 2-B.** Though the '75-CC ranks among the more available Type Two Carson City issues, the mintage is less than one-tenth its San Francisco cousin, and the typical survivor grades XF45. But the present Select example features unbroken cartwheel luster and has no trace of high point friction. We note a thin streak of struck-in grease from star 13 to the neck curls, but the reverse is minimally abraded and the obverse lacks any individually consequential marks. Virtually unobtainable any finer. Census: 25 in 63 (1 in 63+), 1 finer (5/12). (#8974)

Popular 1876-CC Twenty, AU53

- 5265 1876-CC AU53 NGC. Variety 2-C.** This lightly circulated apricot-gold Carson City type coin has surprisingly few marks given its brief stint in Old West commerce. The reverse displays substantial luster, and luster also fills the recesses of the hair and obverse stars. The 1876-CC is available by CC-mint standards but has less than one-tenth the mintage of its San Francisco cousin. (#8977)

Borderline Uncirculated 1876-CC Twenty
Centennial-Year Type Two Issue

- 5266 1876-CC AU58 NGC. Variety 1-A.** Seven die marriages are currently known from five obverses and four reverses. A peach-gold Centennial-year Type Two Carson City twenty that boasts a good strike and a minimally abraded reverse. The obverse displays a few bagmarks and a pinscratch near star 3. Luster is prevalent though diminished across the open fields. (#8977)

Near-Mint 1876-CC Twenty Dollar
Extensive Mint Luster

- 5267 1876-CC AU58 NGC. Variety 5-A.** A Borderline Uncirculated sun-gold Carson City twenty with extensive luster and a precise strike. Minor marks are scattered, but none merit mention aside from a thin line beneath the right (facing) wingtip. The 1876-CC has a plethora of die combinations despite a relatively low mintage of 138,441 pieces. (#8977)

1876-CC Twenty, Well Struck AU58
Popular Type Two CC Issue

- 5268 1876-CC AU58 NGC.** The 1876-CC, with a generous mintage of 138,441 pieces, is one of the more frequently seen Carson City double eagles. The peach-gold surfaces of this near-Mint State example yield well struck design features showing slight high-point wear. Both sides reveal the expected number of distributed minute marks common to this issue. (#8977)

**1876-CC Twenty, AU58
Bright Prooflike Fields**

- 5269 1876-CC AU58 NGC. CAC. Variety 3-D.** The mintmark is widely spaced on this variant. While the 1876-CC twenty is relatively available for a Carson City twenty, its demand as a Type Two far outstrips the number of coins on the market at any given time. This is a bright, glistening example that displays prooflike fields on each side. The strike is sharp throughout and there are only minor abrasions scattered over each side. (#8977)

**1876-S Type Two Twenty
Well Struck MS62**

- 5270 1876-S MS62 NGC.** Double eagles of 1876 from the San Francisco Mint become a challenging issue above MS62. NGC has certified fewer than 100 pieces in a higher grade, and some of these are likely resubmitted or crossover coins. This MS62 example is well struck, including strong definition on the obverse stars and eagle's plumage. A few more marks are noted on the obverse than reverse. (#8978)

**1876-S Double Eagle, MS62
Pleasing Type Choice**

- 5271 1876-S MS62 NGC.** Yellow- and wheat-gold patination resides on the lustrous surfaces of this well struck Type Two double eagle. The usually seen bagmarks, though relatively light in this case, account for the grade. A nice example for an MS62 that will make for a pleasing type choice. (#8978)

Well-Defined 1876-S Double Eagle, MS62

- 5272 1876-S MS62 PCGS.** Large numbers of the 1876-S twenty dollar were shipped to Europe and South America at the time of issue, and have been returning to the States in the last two or three decades. This is a well-defined MS62 specimen, save for minor softness in the first few obverse stars. Scattered light marks and an occasional unobtrusive hairline do not detract. (#8978)

MS62 Type Two 1876-S Twenty

- 5273 1876-S MS62 ANACS.** A thoroughly lustrous canary-gold double eagle that displays the expected number of small to moderate marks. The Type Two design is known for its scarcity in Mint State, although this Centennial-year issue trades near bullion value in circulated grades. (#8978)

**1876-S Liberty Twenty, MS63
Last Type Two Double Eagle**

- 5274 1876-S MS63 NGC.** The 1876-S Liberty double eagle is the last date of the Type Two design. The issue is not difficult to locate in circulated grades, but high-grade specimens are quite scarce. This well-detailed Select example would make an ideal type coin, with light orange-gold surfaces that display hints of lilac and especially vibrant mint luster. Census: 78 in 63, 12 finer (4/12). (#8978)

**Trebley Popular 1876-S Twenty Dollar, MS63
Centennial S-Mint Type Two Issue**

- 5275 1876-S MS63 NGC.** The Centennial S-mint Type Two issue, the 1876-S is trebley popular as such, and the Select grade is about as good as it gets for the issue, generally speaking. The present MS63 example is host to swirling cartwheel luster over glamorous reddish-orange surfaces. The strike is bold, and interesting peripheral die cracks appear on the reverse. NGC has seen only 12 submissions finer (5/12). (#8978)

**1876-S Select Twenty Dollar
Scarce in This Grade**

- 5276 1876-S MS63 NGC.** Double eagles of 1876 from the San Francisco Mint can be located through the MS61 level of preservation with little trouble. MS62 examples are a bit more challenging, and Select pieces such as this one are scarce. Its lustrous yellow-gold surfaces display well-defined design features, and the few minute marks do not significantly detract. Census: 78 in 63 (1 in 63+), 12 finer (4/12). (#8978)

1876-S Twenty, Well Struck MS63

- 5277 1876-S MS63 NGC.** The demand for Type Two Mint State double eagles makes the 1876-S twenty very popular among collectors. Both sides of this Select example display attractive yellow-gold color with hints of apricot, and the design elements show a strong, even strike. Some scattered light marks are in line with the designated grade. (#8978)

**1876-S Double Eagle, MS63
Difficult to Locate Any Finer**

- 5278 1876-S MS63 PCGS.** Double eagles of 1876 from the San Francisco Mint are difficult to locate above MS63, the grade of the piece in this lot. Indeed, PCGS has certified just 13 coins finer and NGC 12 finer (4/12). Yellow-gold surfaces exhibit well-impressed design features, and distributed minute marks are within the parameters of the grade designation. (#8978)

**1876-S Double Eagle, MS63
Scarce in This High Grade**

- 5279 1876-S MS63 NGC. CAC.** As Garrett and Guth note in their study of U.S. gold coins, this San Francisco date is one of several ordinarily noted for serious bagmarks and generally difficult to locate in grades anywhere above basic Uncirculated. Even the most casual examination of the present coin quickly reveals surfaces that are wonderfully free of distracting marks. The strike is full, and the coin's overall beauty is further amplified by a wealth of deep golden luster that covers both sides. Census: 78 in 63, 12 finer (4/12). (#8978)

VF30 1877-CC Double Eagle

- 5280 1877-CC VF30 NGC. Variety 3-D.** The mintage of the '77-CC is less than one-third that of its '76-CC predecessor, the first significant decline in double eagle production at the Old West facility. This canary-gold example displays pockets of bright luster that are more extensive on the reverse. Small marks are scattered, particularly on the central reverse, with a minor rim nick noted on the reverse at 7 o'clock. (#8983)

Well-Struck 1877-S Double Eagle, MS62

5281 1877-S MS62 PCGS. CAC. Much of the generous mintage of 1.7 million 1877-S twenty dollar gold pieces was shipped to Europe and South America and became heavily abraded by the time it returned to the States. Most Mint State examples are thus in the MS60 to MS62 range, above which the issue is rare. Lustrous peach-gold surfaces display reddish-rose overtones and exhibit sharply struck devices. Light scuffs and marks determine the grade. PCGS has seen only 28 finer (4/12) (#8984)

**Choice XF 1878-CC Twenty
Better Carson City Issue**

5282 1878-CC XF45 NGC. Variety 1-A. Sharply defined for the Choice XF level, and luster is evident near design elements, especially on the reverse. Minor marks are scattered but of little consequence. Significantly scarcer than its 1874 to 1877 Carson City predecessors. The usual Wide CC variety. The bold raised die line on Liberty's neck is mint-made. (#8986)

**Softly Glowing MS62 1879 Twenty
Orange-Gold and Green-Gold Surfaces**

5283 1879 MS62 PCGS. Softly glowing luster swirls on each side of this 1879 double eagle, a frosty example with orange-gold and greenish-gold tinges competing for territory. The eye appeal is blatant, despite the few moderate marks that appear under a loupe and define the grade. Seldom seen finer. Population: 45 in 62, 21 finer (5/12). (#8988)

**1879-S Liberty Twenty, MS61
Colorful Lustrous Specimen**

5284 1879-S MS61 PCGS. A large mintage of 1.2 million Liberty double eagles was accomplished at the San Francisco Mint in 1879, but few examples were saved for numismatic purposes. The issue is easily found in circulated grades, but Mint State specimens are scarce. This well-detailed MS61 example exhibits bright mint luster and vivid orange-gold surfaces. A scattering of minor contact marks on both sides explains the grade. (#8991)

Sharply Struck 1879-S Double Eagle, MS61

5285 1879-S MS61 NGC. Most surviving examples of 1879-S double eagles are in Extremely Fine or About Uncirculated grades. The population drops off at the Mint State level. The outstanding attribute of this MS61 example is its sharply struck design elements; Liberty's hair is especially well delineated. Scattered marks account for the grade. NGC has seen just 36 pieces finer (4/12). (#8991)

5286 1880 AU55 NGC. Radiant cartwheel luster remains on this Choice AU 1880 double eagle, which exhibits a bold strike, excellent eye appeal, and remarkably few abrasions. (#8992)

1882 Double Eagle, AU53
Exceptional High-Grade Example

5287 1882 AU53 PCGS. This elusive date possesses the second-lowest mintage of all circulation-strike double eagles. Only the 1861-S Paquet reverse issue can boast a smaller total mintage. With only 571 pieces struck, the 1882 is eagerly sought in any and all business-strike grades, and numismatic researchers estimate that fewer than 25 exist in any condition for today's collectors. We have no way of knowing whether the small group of contemporary collectors were aware of the date's limited mintage, but it is obvious that few were saved at the time.

Most collectors of the 1880s, of course, were unwilling or unable to tie up more than two weeks' wages to buy a single just-issued circulating coin. Nor was proof coinage of this date a realistic alternative to the rare business strikes, since a mere 59 proofs were struck, of which no more than 12-15 pieces are believed to survive. In their gold coin researches, Jeff Garrett and Ron Guth found that even the National Numismatic Collection housed in the Smithsonian Institution lacks a business strike example of this historic date. In a numismatic world now hyperfocused on grade, the 1882 calls for deliberate reappraisal, since the minuscule number of survivors assures that even circulated examples are condition rarities.

This coin's fields retain tantalizing traces of their original flash, with the reverse measurably more reflective than the obverse. The strike is sharp and pleasingly bold, but close examination reveals a scattering of small abrasions. The only really large marks can be discovered on the obverse between stars 7 and 8 and below star 13. Scarcity joins with visual appeal to recommend this coin to thoughtful bidders. PCGS population statistics underscore the issue's rarity, with only two pieces achieving the grade of AU53 and seven representing all higher grades (4/12). (#8996)

**Choice XF 1882-CC Twenty
Lustrous Orange-Red Surfaces**

- 5288 1882-CC XF45 PCGS. Variety 1-B.** Ex: Rainy Day Collection. The low-mintage 1882-CC was struck to the extent of only 39,140 pieces. This Choice XF example is made from the more commonly seen die pair, with the second C in the mintmark higher than the first and a die crack through the denomination. Much luster remains on orange-red surfaces with good eye appeal, despite the expected light wear. A few moderate abrasions are well within the context of the grade. (#8997)

**1882-S Double Eagle, Sharply Struck MS62
Elusive Any Finer**

- 5289 1882-S MS62 PCGS.** For 1882-S double eagles, MS62 is the highest grade that is likely to be encountered. PCGS and NGC combined have certified fewer than 50 examples finer, and some of these are probably resubmitted or crossover coins. Subtle reddish-gold patina covers lustrous surfaces that exhibit sharply struck devices. Scattered light marks determine the grade, the most noticeable occurring between the D and S of UNITED STATES. (#8998)

- 5290 1884-CC VF35 PCGS. CAC.** An apricot-gold Carson City twenty that displays traces of luster despite wear on the curls, cheek, and wings. The reverse is only minimally abraded, though we note a few bagmarks on the portrait and a subtle obverse rim ding at 2 o'clock. (#9001)

- 5291 1884-CC XF45 NGC.** A conservatively graded Carson City twenty that lacks mentionable marks despite its short stint in circulation. Bright luster is evident at the stars, hair, and across much of the reverse. Certified in a former generation holder. (#9001)

**Near-Mint 1884-CC Double Eagle
Popular Mintmark Type Coin**

- 5292 1884-CC AU58 NGC. Variety 1-A.** The 1884-CC Liberty double eagle is one of the more available dates of the decade, and mintmark type collectors prize near-Mint specimens, like the present coin. Only the slightest traces of wear are evident on the high points of the well-detailed design elements, and the pleasing yellow and rose-gold surfaces show only the expected number of minor abrasions. (#9001)

**1884-CC Double Eagle, MS62
Sharply Detailed With Vibrant Luster**

- 5293 1884-CC MS62 PCGS. CAC. Variety 1-A.** A relatively large mintage of 81,139 Liberty double eagles was achieved by the Carson City Mint in 1884, but only a single die variety has been recognized so far. Examples in circulated grades are not difficult to locate, as Doug Winter estimates a surviving population of 1250-1500 specimens in all grades, but the issue becomes very scarce at the MS62 level. The present coin is a pleasing MS62 piece, with sharply detailed design elements and lustrous green and rose-gold surfaces. Only minor contact marks are present and visual appeal is quite strong. Population: 41 in 62, 4 finer (4/12). (#9001)

5294 1885-S MS62 NGC. This is a remarkably appealing Type Three double eagle, with orange-gold and green tints over generous cartwheel luster over boldly struck surfaces. (#9005)

**Two-Toned Select 1885-S Double Eagle
Super Type Set Candidate**

5295 1885-S MS63 PCGS. This is a beautiful Type Three S-mint double eagle, with radiant cartwheel luster on each side. The orange-gold centers cede to greenish-gold coloration closer to the margins. The strike is bold, and the eye appeal is excellent. PCGS has seen only 33 submissions finer (5/12). A super acquisition for a type set. (#9005)

**1887-S Liberty Double Eagle, MS62
Lower-Mintage Issue**

5296 1887-S MS62 NGC. The mintage of Liberty double eagles was sharply reduced at the San Francisco Mint in 1887, to only 283,000 pieces. Examples in high grade are quite scarce. This well-detailed MS62 specimen features lustrous yellow-gold surfaces, with a few rose highlights. NGC has graded only 22 finer specimens (4/12). (#9007)

Condition Rarity 1888 Twenty, MS63

5297 1888 MS63 ANACS. The 1888 double eagle is relatively plentiful through MS62, but rare any finer. This Select coin is satiny with pleasing original yellow-gold color and minimal abrasions for the grade. Strongly struck. Sure to attract the attention of knowledgeable gold collectors.
Ex: FUN Signature (Heritage, 1/2001), lot 8394. (#9008)

**1888-S Select Double Eagle
Sharply Defined**

5298 1888-S MS63 PCGS. The 1888-S is one of the most common double eagles from the San Francisco Mint struck in the 1880s. It is readily available in grades below MS63, at which point it can be found with search and patience. The honey-gold, lustrous surfaces of this Select specimen exhibits sharply defined motifs, with Liberty's hair being especially strong. Scattered light marks determine the grade. PCGS has seen only 46 pieces finer (4/12). (#9009)

5299 1890-CC XF40 NGC. Variety 2-B. The rarer of the two known die marriages. This almond-gold XF example is lightly marked for the grade and has mildly granular borders. Luster is especially plentiful on the reverse. (#9014)

5300 1890-CC XF45 NGC. A Choice XF example that exhibits the usual lapped tail feather and reverse die crack. This coin shows luster peeking through the protected areas commensurate with the grade. Soft gold covers both sides of the coin, while a minute rim ding is noted a 7 o'clock on the obverse. (#9014)

Near-Mint 1890-CC Double Eagle

5301 1890-CC AU58 PCGS. Variety 1-A. The cartwheel sheen is essentially complete, although slight friction on the curls denies a Mint State assessment. Much less abraded than is usual for a briefly circulated Carson City twenty. An early die state with complete tail plumage. The reverse is lightly die doubled, most visible on portions of TWENTY and PLURIBUS. (#9014)

Mint State 1891-CC Twenty Dollar
Low-Mintage Conditional Rarity

5302 1891-CC MS61 NGC. CAC. Variety 1-A. Only a single die pair is known for this low-mintage issue. The Carson City Mint was halfway through its five-year coinage stint when this coin was struck. The legendary Western facility had opened in 1870 but was never able to compete operationally with the San Francisco Mint or politically with the mints in Philadelphia and New Orleans. Carson City was closed for coinage from 1886 until 1889, and the 1891 double eagle was struck to the extent of only 5,000 pieces, by far the lowest emission of the final five years.

With such a low total mintage, the 1891-CC was a rarity virtually from the day it was struck. Apparently some examples may have been shipped overseas in the decades after production, as an occasional hoard has surfaced, usually yielding coins in the AU to MS61 range.

This piece may be one such: Even though there is strictly no sign of wear or circulation — as attested by the complete, engaging mint luster throughout both sides — numerous abrasions pepper each side, accounting for the grade and likely the product of coin-to-coin contact in bank bags. The surfaces display even reddish-gold color with bright, semiprooflike field reflectivity more pronounced on the obverse. The strike is full in the centers, but the peripheral stars around the obverse margins show softness. The 1891-CC is quite rare in Select condition, making this piece worthy of serious consideration among specialists in double eagles or Western mint gold. NG has seen 16 submissions in this grade with 11 finer, while PCGS has seen eight and five, respectively (4/12). (#9017)

**Choice 1891-S Double Eagle
Conditionally Rare in Higher Grades**

- 5303 1891-S MS64 PCGS.** Despite the substantial mintage of 1.2 million pieces, the 1891-S Liberty double eagle is a very scarce issue in MS64 condition, and Gems are virtually unobtainable. This delightful Choice example is sharply detailed in most areas, with just a touch of softness on the obverse stars. The lustrous orange and rose-gold surfaces exhibit only minor signs of contact. Population: 85 in 64, 1 finer (4/12). (#9018)

**MS63 1892-S Twenty Dollar
High-Quality Type Three Issue**

- 5304 1892-S MS63 PCGS.** The Type Three S-mint Liberty double eagles could well form their own collecting specialty among many numismatists, as they are popular and far more available than Type One or Type Two issues. This Select 1892-S also attests to the remarkable *quality* that San Francisco achieved late in the series. Swirling luster complements a bold strike over orange-gold surfaces with little sign of distraction. (#9021)
- 5305 1893-CC — Improperly Cleaned — NCS. XF Details. Variety 2-A.** A caramel-gold example with moderate wear on the portrait and sharp detail on the eagle. Both sides are hairlined. The final year of Carson City coinage witnessed a double eagle mintage of only 18,402 pieces. (#9023)

**1893-CC Twenty, Semiprooflike MS61
Final Double Eagle from Carson City**

- 5306 1893-CC MS61 NGC.** The 1893-CC is the final double eagle produced at the Carson City Mint. Doug Winter (2001) notes that in high grades it is among the most readily available double eagles from this mint. The bright gold surfaces of this MS61 specimen display occasional whispers of apricot, and the design elements are sharply impressed. Scattered minute marks determine the grade, but these are fewer and less serious than typically seen on the issue. (#9023)

**MS62 1893-CC Double Eagle
Minimally Abraded and Lustrous**

- 5307 1893-CC MS62 PCGS. CAC. Variety 2-A.** On June 1, 1893, acting Mint Director Robert Preston suspended coinage at the Carson City Mint, ending an era that began in 1870. The facility continued to operate as a Federal assay office until 1933, and it stands today open to the public as a museum. Due to only five months of production, the '93-CC has a low mintage of 18,402 pieces. None appear to be set aside as the last of their kind, since the finest seen at PCGS grade MS63. The present pumpkin-gold and olive-green example possesses pleasing luster and an exemplary strike. Marks are minor for the grade, particularly on the reverse. CAC has certified just six coins at the MS62 level (4/12). (#9023)

**1893-S Double Eagle, MS63
Challenging Any Finer**

- 5308 1893-S MS63 PCGS.** The Select level of preservation is about the finest most collectors are likely to encounter of the 1893-S twenty dollar. PCGS has graded just 40 pieces higher, and NGC 22 finer (4/12), and a number of these are probably resubmitted examples. Yellow-gold lustrous surfaces display hints of red and the design features are well defined. Minute marks are within the confines of the designated grade. (#9024)

Well-Struck 1893-S Double Eagle, MS63

5309 1893-S MS63 PCGS. San Francisco made nearly a million examples of the 1893-S twenty, but they are well-made and generally found Uncirculated today. This Select example boasts complete mint luster over green- to orange-gold surfaces that are well-struck and quite eye-appealing, despite the minor abrasions that define the grade. (#9024)

5310 1894-S MS63 PCGS. CAC. Vibrant luster emanates from peach-gold surfaces that are minimally abraded. An excellent strike is noted on the design elements. Encapsulated in a green label holder. Ex: *FUN Signature* (Heritage, 1/2007), lot 6450. (#9026)

5311 1897 MS64 PCGS. Frosty greenish-gold surfaces have a fine-grained "crusty gold" look that collectors cherish for its originality. A small luster graze near star 2 is among few singular marks. PCGS has seen only four numerically finer (5/12). (#9031)

Boldly Lustrous 1897 Twenty Dollar, MS64+

5312 1897 MS64+ PCGS. CAC. The mintage of the 1897 double eagle exceeded 1.3 million coins, but this near-Gem is toward the upper end of the surviving certified populations. Bold cartwheel luster is thoroughgoing over the orange-gold, well-struck surfaces. An upper-end example of this Type Three issue. PCGS has seen five pieces in 64+ with four finer (5/12). (#9031)

**Stunning 1897 Double Eagle, MS65
None Certified Finer**

5313 1897 MS65 PCGS. The generous mintage of 1,383,175 circulation-strike 1897 double eagles ensured its status as one of the most common pre-1900 issues through the Select level of preservation. Near-Gem specimens are scarce, but the population drops significantly in MS65, above which PCGS and NGC have certified none.

Both sides of this Gem display stunning cartwheel luster that complements greenish-gold fields and orange-gold devices. Excellent detail is apparent on the design features, including Liberty's hair, the stars, and the eagle's plumage. Die lapping is noted at the eagle's neck. A few stray hits are within the parameters of the grade classification. Population: 4 in 65, 0 finer (4/12). (#9031)

**Rare 1898 Double Eagle, MS64
Solidly Struck**

5314 1898 MS64 NGC. The 1898 double eagle is seldom seen above MS62, and in near-Gem it is very rare. NGC and PCGS combined have graded fewer than 30 MS64 pieces, some of which are likely resubmitted coins. Neither service has seen any finer (4/12). Exquisite definition is visible on the design elements, especially Liberty's hair, and the lustrous, peach-gold surfaces are minimally abraded. Two milling marks on Liberty's neck identify the piece. (#9033)

5315 1901 MS65 NGC. A sharply detailed Gem from a relatively low mintage of 111,430 pieces, this lustrous green and orange-gold specimen exhibits strong lilac highlights. NGC has certified no coins in higher numeric grades (5/12). (#9039)

**1902 Select Twenty Dollar
Extremely Rare Any Finer**

5316 1902 MS63 NGC. CAC. The 1902 double eagle had a sparse mintage of 31,140 coins, remarkably low compared to the thousands or millions of pieces posted by other dates. As might be expected, examples are scarce in nearly all grades. Most Mint State survivors grade MS61 or 62, and the population drops precipitously at the MS63 level, the highest grade most collectors will encounter. NGC and PCGS have seen a total of only 11 examples finer.

This Select offering displays highly lustrous orange-gold somewhat satiny surfaces, and the strike is bold. A few trivial, scattered marks, most notably a shallow graze on the O in GOD, define the grade. Census: 15 in 63, 2 finer (4/12). (#9041)

**Select 1902-S Liberty Twenty
Vivid Color, Vibrant Luster**

5317 1902-S MS63 PCGS. The 1902-S Liberty double eagle was produced in large quantities, but the issue is scarce in grades above the Select level. This attractive MS63 example exhibits sharply detailed design elements, with vivid orange and greenish-gold surfaces, and vibrant mint luster. A scattering of grade-consistent contact marks on both sides prevents a higher grade. (#9042)

5318 1903 MS64 PCGS. CAC. The light yellow-gold surfaces of this impressive Choice specimen show attractive highlights of rose and especially vibrant mint luster. The design elements are sharply detailed and eye appeal is excellent. (#9043)

**Gem 1903 Double Eagle
Only Three Finer Coins at PCGS**

5319 1903 MS65 PCGS. The 1903 Liberty double eagle was produced in large quantities, making the issue readily available in lower Mint State grades. The issue is a prime condition rarity above the Gem level, however. This delightful Gem exhibits sharply detailed design elements, vibrant mint luster, and pleasing yellow and greenish-gold surfaces, with highlights of rose. PCGS has certified only three coins in higher numeric grades (4/12). (#9043)

**Near-Gem 1903-S Twenty Dollar
Well-Struck and Near-Pristine**

5320 1903-S MS64 PCGS. The 1903-S mintage of nearly 1 million pieces seemed large — until the prodigious mintages of 1904 in both Philadelphia and San Francisco. This near-Gem 1903-S is radiant orange-gold, with roiling cartwheel luster and well-struck, near-unmarked surfaces. PCGS has graded only 10 submissions finer (5/12). (#9044)

**1903-S Liberty Twenty, MS64+
Only 10 Finer Coins at PCGS**

5321 1903-S MS64+ PCGS. CAC. The 1903-S Liberty double eagle was produced in large quantities, but the issue circulated heavily, and the date is rare in high grade. This high-end Choice example features sharply detailed design elements and the lightly marked yellow-gold surfaces display vibrant mint luster. PCGS has certified only 10 coins in higher numeric grades (4/12). (#9044)

5322 1904 MS64 PCGS. This well-detailed Choice specimen shows just a touch of softness on Liberty's hair, and the light orange-gold surfaces are lustrous and free of mentionable distractions. (#9045)

5323 1904 MS64+ PCGS. Generous cartwheel luster is the hallmark of this blazing near-Gem 1904, with orange-gold and greenish-gold surfaces and superb eye appeal. (#9045)

5324 1904 MS64+ PCGS. Yellow-gold and jade-green compete for territory on this blazing near-Gem 1904 twenty, well-struck and free of singular abrasions. A super choice for a type set. (#9045)

5325 1904 MS64+ NGC. CAC. The 1904 Liberty Head is the ultimate type issue due to its enormous mintage of more than 6 million coins. This MS64+ example shows a sharp strike over two-toned orange-gold and mint-green surfaces with radiant luster. (#9045)

**1904 Liberty Twenty, MS65+
Favorite Type Coin**

5326 1904 MS65+ PCGS. The 1904 Liberty double eagle is one of the most available dates of the series and a favorite of type collectors. This high-end Gem displays vibrant mint luster and sharply detailed design elements, with attractive green and orange-gold surfaces that show highlights of lilac. (#9045)

**1904 MS65+ Twenty Dollar Liberty
A Type Coin With Something Special**

5327 1904 MS65+ NGC. CAC. Every collector knows the 1904 is by far the most available issue in the Type Three series, even in Gem condition. But this coin has a little something special, surfaces that are just a bit cleaner, luster that is just a bit thicker, and a strike that is just a little stronger than the "usual" MS65. For the type collector, this + coin is definitely worth a look and serious consideration. (#9045)

**Sharply Struck, Highly Lustrous
1904 Double Eagle, MS66**

- 5328 1904 MS66 PCGS.** The 1904 Liberty Head double eagle is the quintessential type issue to represent the long-running James B. Longacre design. The series as a whole is one that many collectors favor, particularly those with a preference for large gold coins (largely) from the 19th century. Because of its prodigious mintage of more than 6.2 million pieces, the 1904 double eagle is sought-after and available in higher Mint State grades than most issues in the series. Nonetheless, even though the current PCGS *Population Report* shows several thousand Gem examples, Premium Gem survivors decrease by more than an order of magnitude. This example fits nicely into that grade level, with near-pristine, lustrous surfaces that boast orange-gold in the centers with lime-green rim accents. The sharp strike and highly lustrous surfaces put this coin in the top rung of certified survivors: PCGS has graded only two finer (4/12). (#9045)
-

- 5329 1904-S MS64 PCGS.** The brightly lustrous yellow and rose-gold surfaces of this sharply detailed Choice example exhibit only minor signs of contact. Visual appeal is especially strong. (#9046)
- 5330 1904-S MS65 NGC.** The prooflike surfaces of this sharply detailed Gem show only minor contact marks, and the even greenish-gold color adds to the considerable visual appeal. NGC has graded only one coin in higher numeric grade (5/12). (#9046)
- 5331 1904-S MS65 NGC.** Sharply detailed, with vibrant mint luster and vivid greenish-gold surfaces, this delightful Gem possesses excellent eye appeal. Only a few minor contact marks and luster grazes prevent an even higher grade. (#9046)
- 5332 1904-S MS65 NGC.** The 1904-S was produced in large numbers and probably ranks as the favorite date of type collectors seeking a Type Three example. This delightful Gem features sharply detailed design elements and vibrant mint luster. (#9046)
- 5333 1904-S MS65 NGC.** This sharply detailed Liberty double eagle displays light greenish-gold surfaces that exhibit prooflike reflectivity in sheltered areas. NGC has graded only one coin above the Gem level (5/12). (#9046)
-

**1905 Twenty, MS62
Scarcer, Low-Mintage Date**

- 5334 1905 MS62 NGC.** After the massive output of twenties in 1904, only 58,919 pieces were struck the following year. The 1905 is widely recognized as a semikey among post-1900 twenties. This well-struck example has subdued satiny surfaces and subtle reddish patina. The strike is strong and abrasions are small. (#9047)
-
- 5335 1907 MS64 PCGS.** A charming Choice example from the last year of the Liberty design, this sharply detailed yellow and rose-gold specimen offers lightly marked lustrous surfaces with strong eye appeal.
From The Robert Dorsey Smith Collection. (#9052)

PROOF LIBERTY DOUBLE EAGLE

1892 Double Eagle, PR64 Deeply Gleaming Near-Gem

5336 1892 PR64 PCGS. This historic date is a rarity as a business strike with an unusually low mintage of only 4,300 pieces. It must be called extremely rare in proof, with a reported Philadelphia production of a mere 93 pieces. Modern numismatic researchers believe that perhaps 25 proofs survive in all states of preservation. Twenty dollars was a substantial amount of money in the Gay Nineties, and few collectors of that era were willing to tie up much larger sums required for even a partial date run of proof double eagles. A confident America was gearing up for the gala celebration of the 400th anniversary of Columbus' discovery of the New World when coins of this date were struck, but the disastrous Panic of 1893 soon devastated the nation's economy. The United States was plunged into one of its worst business depressions in history, leading to innumerable business failures and forcing the dispersal of many coin collections formed in more prosperous times.

The present example boasts dazzlingly bright orange-gold surfaces displaying the delightful orange-peel texture prized by experienced collectors of U.S. proof gold. The contrast between fields and devices on the obverse is somewhat less vivid than on the more assertively brilliant reverse. Careful study under magnification reveals some light hairlines of minimal visual importance. This coin is "hallmarked" by a single tiny black freckle in the field just below the eagle's tailfeathers that emerges under a loupe. PCGS has certified only three examples of this date in PR64, and only four have received a higher proof designation (4/12). This exciting coin would be hard to match for quality and harder still to exceed for sheer appeal. (#9108)

HIGH RELIEF DOUBLE EAGLES

1907 Wire Rim High Relief, MS62
Boldly Detailed

- 5337 1907 High Relief, Wire Rim MS62 PCGS.** Modern collectors primarily know Augustus Saint-Gaudens as the designer of the ten and twenty dollar coins issued in 1907. But many overlook the high regard in which he was held among artists of his own day. He studied at the Paris École des Beaux-Arts along with other great artists of his era. In 1889 architect Stanford White hosted a dinner for John Singer Sargent and invited Saint-Gaudens and others of “the Paris old boys.” By the turn of the century he was the preeminent sculptor in America, a standing that enabled him uniquely to design the gold coins of 1907. Saint-Gaudens’ training allowed him to mold his artistic concepts from three-dimensional sculpture to two-dimensional coinage while retaining the appearance of the original sculptural inspiration. The dimensionality of the design is certainly apparent on this MS62 example. All the features stand out in bold relief, and only close inspection reveals a few minor contact marks. (#9135)

Satiny 1907 Wire Rim High Relief Twenty
MS64 in First-Generation Holder

- 5338 1907 High Relief, Wire Rim MS64 PCGS.** This wonderful near-Gem shines with brilliant yellow-gold satiny luster on both sides. The striking details are strong throughout, as expected of a coin struck multiple times from a hydraulic press. A few tiny (nearly undetectable) rim bruises are noted on each side. A few tiny orange toning spots are evident on the reverse, and both sides show the usual extensive, swirling die polish lines visible in the fields. These die polish lines are partly responsible for the satiny luster. Housed in an old green-label PCGS holder.
Ex: Central States Signature (Heritage, 5/2007), lot 2386. (#9135)

Gem 1907 High Relief Twenty
Vivid Color and Luster
Popular Wire Rim Design

5339 1907 High Relief, Wire Rim MS65 PCGS. CAC. Augustus Saint-Gaudens is best known for his monumental sculptures, especially those of Civil War heroes. But no matter how large the physical size of the commission was, he always began by mastering the subject in smaller dimensions. David McCullough explains his work on the *Farragut Memorial* in his masterful work on American émigrés to 19th century Paris:

“It was the largest piece Saint-Gaudens had yet attempted, and the wonder is someone who had begun as a cameo cutter and mastered that tiny, exacting craft to such perfection could now, not so long afterward, undertake a project of such colossal scale. But the lessons of cameo cutting, of working ‘in the small,’ were not to be dismissed, even when working so large.”

The importance of being a cameo cutter in his youth served Saint-Gaudens throughout his professional career, and its importance is abundantly evident when, at the end of his life, he designed the High Relief twenties at the request of President Roosevelt. Saint-Gaudens also produced numerous bas-reliefs throughout his career, but it was the high relief used in his days as a cameo cutter that he fell back on when he redesigned the double eagle.

The present coin is a marvelous Gem that shows Saint-Gaudens classic design to best advantage. The design elements display the expected sharp definition on the central areas of the coin, while the peripheral details are less deeply impressed because of the concavity of the fields. The surfaces exhibit a vivid yellow and rose-gold patina, with vibrant satiny mint luster and swirling die-polish lines in the fields. Housed in a green label holder.

From The Robert Dorsey Smith Collection. (#9135)

Magnificent 1907 High Relief Twenty, MS67 ★
Among the Finest Wire Rim Examples Known

5340 1907 High Relief, Wire Rim MS67 ★ NGC. *Conceive an idea. Then stick to it. Those who hang on are the only ones who amount to anything. You can do anything you please. It's the way it's done that makes the difference. A good thing is no better for being done quickly.*

—Augustus Saint-Gaudens

These were sentiments Saint-Gaudens formulated in his student days in Paris and ideas he later passed on to his own students. He demonstrated belief in these principles in his various monumental works, the most obvious example being the Shaw Memorial that required almost 14 years to complete. When it came to designing the ten and twenty dollar coins at the behest of Theodore Roosevelt, he took this same deliberate pace, much to the chagrin of the president. Beginning in December 1905, when Roosevelt first broached the subject with the sculptor, the coins were still not fully in production when Saint-Gaudens died in August 1907. Still, one cannot argue with Saint-Gaudens' belief that his unhurried pace produced a superior design.

This unhurried pace and well-thought out design is especially evident on this magnificently well-preserved example. The surfaces are as close to perfect as any we have seen recently. Not only are they well-preserved, but there is enough added appeal that NGC also gave the piece its Star designation. Each side displays bright satiny mint luster, and there is just a hint of reddish patina present (unlike the usually seen strong presence of red). The striking details are complete in all areas, even showing complete separation of the lettering on the upper reverse from the rim. Simply breathtaking quality. Census: 3 in 67 ★, 6 finer (4/12). (#9135)

**MCMVII High Relief Twenty
XF Sharpness**

- 5341 1907 High Relief, Flat Rim — Rim Filing — NGC Details. XF.** Possibly initially a Wire Rim example, this rim of this High Relief double eagle were presumably filed to make the coin more suitable for use as a pocket piece by an early owner. Liberty's chest and raised knee display wear consistent with the XF level. The recessed fields are unblemished and exhibit satin luster.
-

**Flat Rim 1907 High Relief, MS64
Bright, Satiny Surfaces**

- 5342 1907 High Relief, Flat Rim MS64 PCGS.** A satiny near-Gem of this world-famous issue. The fully struck central devices rise in high relief above the smooth and satiny fields. The right reverse border has a few tiny planchet flaws, and minor strike doubling is seen on the base of the LIBE in LIBERTY, but these Mint-produced characteristics are of no consequence, and do not affect the coin's significant eye appeal. As an issue, the High Relief is merely scarce, but by gold type standards, it is rare, and demand is furthered by its remarkable medallic appearance and undeniable historical importance. Its design came from America's foremost sculptor, and production was compelled by Presidential order.
Ex: FUN Signature (Heritage, 1/2007), lot 3792; Central States Signature (Heritage, 5/2007), lot 2393. (#9136)
-

1907 Flat Rim High Relief, MS66 Rare, High-Grade Example

5343 1907 High Relief, Flat Rim MS66 PCGS. The first production of the High Relief coins produced undesirable “fins” or knife rims on the coins, created by the metal flowing between the face dies and the edge collar. After officially taking office on November 1, it was little more than a month later when Mint Director Frank A. Leach wrote to Philadelphia Mint Superintendent John Landis on December 6 (Burdette, *Renaissance of American Coinage 1905-1908*):

“I was exceedingly humiliated today to have the Secretary of the Treasury call attention to the excessive burr, or fin, on one of the new double eagle pieces now being distributed.

“I was also surprised to find so many of these defective coins in a bag as I saw in the Treasurer’s office here.

“I gave explicit orders when in Philadelphia that such coins should not be delivered, and directed the man who seemed to have the coins in charge to see that the same should all be gone over and the bad ones laid aside.

“I wish you to make [an] investigation and see why my instructions were not carried out, and if there was any negligence or carelessness, who is to blame.”

Leach not long after reinforced that already-forceful and ominous message with another reminder:

“You are hereby instructed to continue striking the double eagles on the medal press from now until January 1, 1908. In the execution of this work I would suggest that the operators be instructed to work with extreme care so as to prevent the excessive burrs on the edges of the coin, and that they attempt to turn out no more work daily than can be well done. It is desired that you proceed with this work immediately, so as to get out as many of these coins as possible within the legal limit of time these designs can be used. You will receive instructions as to the distribution of these coins later, possibly through the Treasurer.”

Although Mint personnel succeeded in almost entirely eliminating the “burrs” or wire rims, the Flat Rim pieces, as such pieces are called today, are rarer by a factor of about 5 to 1. High-grade Flat Rim coins such as the present piece are far rarer than their Wire Rim counterparts. This piece, like most Flat Rim coins, nonetheless does show a trace of a wire rim, from 10 o’clock to 11:30 on the reverse. The strike is impeccably bold, and close examination with a loupe fails to reveal even the most trivial distractions on this incredibly lovely and exceedingly rare coin. PCGS has certified only nine specimens finer than the present example (4/12).

Ex: Central States Signature (Heritage, 5/2007), lot 2395. (#9136)

SAINT-GAUDENS DOUBLE EAGLES

1907 Reduced Relief Twenty, MS65 The So-Called 'Arabic Numerals' Variety

- 5344 1907 Arabic Numerals MS65 PCGS.** Few 20th century coins have the sheer collector appeal of the first-year 1907 Saint-Gaudens twenty (unless, of course, it's the High Relief from the same year). This Gem example displays softly frosted mint luster and light, even reddish patina. Close examination shows a number of small, but individually insignificant abrasions.
From The Robert Dorsey Smith Collection. (#9141)

- 5345 1908 No Motto MS65 PCGS. CAC.** Long Rays obverse. A green-gold Gem with booming luster and only minor contact. The strike is crisp save for blending on the torch fingers.
*Ex: FUN Signature (Heritage, 1/2008), lot 10795.
From The Robert Dorsey Smith Collection. (#9142)*

MS66+ No Motto 1908 Twenty High Grade Type Coin

- 5346 1908 No Motto MS66+ PCGS.** Short Rays obverse. Since it has the highest mintage of any No Motto Saint-Gaudens double eagle issue by far, the 1908 No Motto is the logical option for type collectors, and the presence of European holdings and the Wells Fargo hoard has left the issue with a number of high-end survivors. This is one such coin, yellow-gold on the immensely lustrous obverse with a more orange reverse and a small copper spot on the left side of Liberty's gown. Close to Superb Gem quality. (#9142)

- 5347 1908 No Motto, Wells Fargo Nevada MS66 PCGS.** Short rays obverse. A magnificent butter-gold Premium Gem with exemplary preservation and vibrant cartwheel sheen. The strike is crisp save for slight blending on the leg feathers. Housed in a green label holder. (#9142)

1909 Saint-Gaudens Twenty, MS64 Underrated Issue in High Grade

- 5348 1909 MS64 PCGS. CAC.** The 1909 Saint-Gaudens double eagle splits a reported mintage of 161,282 pieces with its 1909/8 counterpart. The 1909 is an underrated issue in high grade, and even MS64 examples are scarce. This attractive Choice example exhibits well-detailed design elements, vibrant mint luster, and lightly marked orange-gold surfaces. (#9150)

Scarce MS62 1909/8 Double Eagle

- 5349 1909/8 MS62 PCGS. FS-301.** An attractive orange-gold example with coruscating luster and a bold strike. Marks are distributed but are generally minor. The 1909/8 was the first of the prominent hubbed overdates of the 20th century. Unlike the 1918/7-D nickel, 1918/7-S quarter, 1942/1 and 1942/1-D dimes, and 1943/2 nickel, the 1909/8 double eagle was a peacetime issue. (#9151)

1909/8 Twenty, MS63 Sole Overdate in the Series

- 5350 1909/8 MS63 PCGS. FS-301.** Due to a hubbing error, the last 9 in the date is plainly stamped over an 8. This is the only overdate issue in the Saint-Gaudens double eagle series, and examples are prized by collectors in all grades. This well-detailed Select specimen displays vibrant mint luster and pleasing greenish-gold surfaces with highlights of orange. (#9151)

Gem 1909-S Saint-Gaudens Twenty
Conditionally Very Rare in Higher Grades

- 5351 1909-S MS65 PCGS.** The 1909-S Saint-Gaudens double eagle has surfaced in several hoards over the years, and lower Mint State examples are plentiful. The issue becomes scarce at the Gem level, however, and finer examples are very rare. This sharply detailed Gem displays vibrant mint luster over pleasing greenish-gold surfaces, with highlights of rose and orange. (#9153)

Premium Gem 1910-D Double Eagle
Extremely Rare in Higher Grades

- 5352 1910-D MS66 PCGS.** The 1910-D Saint-Gaudens double eagle is definitely scarce in MS66 condition, and finer coins are virtually unobtainable. This remarkable Premium Gem offers sharply detailed design elements and lustrous orange-gold surfaces, with highlights of rose. PCGS has graded only two coins in higher numeric grades (5/12). (#9155)

1910-S Double Eagle, MS65
Scarce Issue in Gem Condition

- 5353 1910-S MS65 PCGS.** Although the 1910-S Saint-Gaudens double eagle was produced in large numbers, most examples seen are in lower Uncirculated grades, and the issue is quite scarce at the Gem level. This delightful Gem is sharply detailed and lustrous, with vivid orange-gold surfaces, and highlights of rose. (#9156)
- 5354 1911-D MS66 NGC.** Near-pristine surfaces display copious luster over orange-gold centers bounded by jade accents near the rims. Excellent eye appeal for the grade, and seldom seen finer. (#9158)
- 5355 1911-D MS66 NGC. CAC.** This remarkable Premium Gem exhibits strong mint luster over slightly granular surfaces that show only one mentionable distraction, a thin scratch on the sun on the reverse. Sharply detailed devices add to the impressive visual appeal. (#9158)

1911-D/D Twenty, Satiny MS66
Scarce in High Grades

- 5356 1911-D/D MS66 NGC. CAC. FS-501.** The repunched mintmark variety is well-known and not particularly rare, but it adds a collectible variety to this series that lacks the varieties seen in many other 20th century series. This satin-surfaced Premium Gem lacks the usually seen abrasions on many 1911-D twenties. The strike is complete and the usual matte-like finish is apparent on each side. Census: 32 in 66, 2 finer (4/12). (#145010)

Well-Preserved Gem 1911-S Twenty

- 5357 1911-S MS65 NGC.** Gem examples of the 1911-S are fortunately more available than previously, due to a hoard discovered in Central America in the early 1980s. This example boasts excellent eye appeal over deep reddish-orange surfaces that complement bold luster and the minimal marks demanded of the grade. NGC has seen only 35 finer (5/12). (#9159)

Mattelike Yellow-Gold Near-Gem 1913 Twenty
Extreme Conditional Rarity in MS65

- 5358 1913 MS64 PCGS.** Gem 1913 double eagles are leading condition rarities in the Saint-Gaudens series, making near-Gems such as the present piece essentially the finest obtainable: PCGS has seen only 10 submissions in 65, likely not all separate coins. This is a mattelike, frosty greenish-gold example with blatant eye appeal and radiant luster. (#9161)
- 5359 1913-D MS64+ PCGS. CAC.** Orange-gold centers are bounded by jade tints at the rims on this near-Gem, which shows the typical fine-grained, mattelike surfaces of the issue, as well as the bold strike it is well-known for. Only a couple of abrasions on each side likely limit an even finer grade. (#9162)

**Well-Made Series Issue, Sharp and Lustrous
Gem 1913-D Double Eagle**

5360 1913-D MS65 PCGS. Gem 1913-D double eagles are the finest grade generally obtainable, and since they are well-made mintmarked coins in addition, they find their way into many a type set. This piece displays the typical sharp strike and thoroughgoing luster over deep orange-gold surfaces with remarkable eye appeal. (#9162)

**Select Mint State 1913-S Double Eagle
Deep Orange-Gold Surfaces**

5363 1913-S MS63 PCGS. The small production of 34,000 double eagles makes this a popular coin, one that fortunately survives in Mint State rather than being melted like many issues later in the series. Deep orange-gold color complements frosty luster, a good if incomplete strike, and minor abrasions on each side. (#9163)

1913-S Twenty, Highly Lustrous MS62

5361 1913-S MS62 PCGS. CAC. The strike is strong throughout as is the mint luster on this popular Saint-Gaudens issue. The surfaces are bit choppy with numerous small abrasions, but none are worthy of individual mention. For the grade, the strength of the frosted mint luster makes this an especially appealing coin. (#9163)

**Green Label MS64 1913-S Twenty
Popular Low-Mintage Issue**

5364 1913-S MS64 PCGS. Renowned for its low mintage of 34,000 pieces, the '13-S is nonetheless collectible in quality Mint State. The present Choice representative is impressively free from marks and displays a precise strike except on the fingers holding the torch. Certified in a green label holder. (#9163)

**1913-S Double Eagle, MS62
Above-Average Strike**

5362 1913-S MS62 PCGS. CAC. The lustrous peach-gold surfaces of this 1913 San Francisco representative reveal just a few small marks, and are devoid of significant copper spots that often plague this issue. The design features are better impressed than ordinarily seen, including the fingers on Liberty's branch hand and fairly strong detail on those of the torch hand. (#9163)

High-End Near-Gem 1914 Double Eagle

5365 1914 MS64 PCGS. CAC. Despite the low mintage less than 100,000 coins, examples of the 1914 twenty can be located up to the Gem level and occasionally beyond. This near-Gem boasts high-end eye appeal over light greenish-gold surfaces. Relatively few marks appear for the grade, and the surfaces display a typical fine-grained, mattelike texture. PCGS records 39 submissions finer (5/12). (#9164)

**Choice 1915 Double Eagle
Elusive Issue in Higher Grades**

- 5366 1915 MS64 PCGS.** This sharply detailed 1915 double eagle displays individually countable columns on the Capitol and sharp definition on Liberty's torch and the eagle's feathers. The pleasing copper-gold surfaces radiate vibrant mint luster, and only minor contact marks are evident. The 1915 is seldom encountered in higher grades. (#9167)

**1915 Saint-Gaudens Twenty, MS64+
Nice Color and Luster**

- 5367 1915 MS64+ PCGS. CAC.** From a small mintage of 152,000 pieces, the 1915 Saint-Gaudens double eagle is a scarce and expensive issue at the Gem level. High-end Choice examples, like the present coin, are a good balance of quality and value. This sharply detailed specimen displays attractive orange-gold surfaces and vibrant mint luster. (#9167)
- 5368 1922 MS64 NGC. CAC.** Glowing cartwheel luster emanates from each side of this yellow-gold near-Gem, which shows a few minor, grade-consistent abrasions amid generous eye appeal. (#9173)
- 5369 1922 MS64+ NGC. CAC.** This glowing coin could easily be seen in a Gem holder were it not for a tiny copper spot on the obverse and a few dark flecks on the reverse. Generous luster runs over yellow-gold surfaces that show no overt contact. (#9173)

**Near-Gem 1922-S Saint
Partial Brilliant Surface Finish**

- 5370 1922-S MS64 NGC.** Radiant cartwheel luster is the calling card of this near-Gem 1922-S double eagle, which shows surfaces that are orange-gold and more reflective and near-brilliant than the fine-grained, mattelike texture more often seen. Some contact marks on Liberty's legs and the central reverse define the grade. NGC has seen only 16 numerically finer (5/12). (#9174)

Two-Toned Stunning Gem 1923 Twenty

- 5371 1923 MS65 PCGS.** Glowing reddish-orange and mint-green compete for territory on this Gem 1923 Philadelphia double eagle, a grade that is the essentially the finest obtainable for the issue: PCGS has seen only one coin in 65+ with three finer (5/12). Careful examination with a loupe merely confirms the minimal marks and stunning eye appeal. A super coin for type purposes. (#9175)

**Pale Copper-Gold Gem 1923 Double Eagle
Tied for Finest at NGC**

- 5372 1923 MS65 NGC.** The Gem grade is essentially the finest obtainable for the 1923 Philadelphia double eagle, although the 1923-Ds can come even finer. This 1923-P shows an unusually attractive pale copper-gold color, with bountiful luster and relatively few surface marks on either side. Finest certified at NGC; PCGS has seen three finer (5/12). (#9175)
- 5373 1923-D MS65 NGC. CAC.** A pleasing Gem specimen of this available mintmarked issue, with vibrant mint luster over pale yellow-gold surfaces. The design elements are sharply detailed and the fields show few signs of contact. (#9176)
- 5374 1923-D MS66 PCGS.** The world simply cannot have too many 1923-D Saint-Gaudens double eagles, as one of the best-produced and highest-surviving issues in the series. This Premium Gem boasts orange and mint hues amid gleaming luster and super eye appeal. (#9176)
- 5375 1923-D MS66 PCGS. CAC.** Orange-gold centers are bounded by generous glimpses of mint-green near the rims on each side of this lovely Premium Gem. A dig on Liberty's right cheek is among few marks of import. (#9176)

**1923-D Saint-Gaudens Twenty, MS66
Ideal Mintmark Type Coin**

5376 1923-D MS66 PCGS. CAC. The 1923-D Saint-Gaudens double eagle is a favorite choice of mintmark type collectors because high-grade examples are readily available. This spectacular Premium Gem is sharply detailed, with vibrant mint luster and unmarked copper-gold surfaces, with attractive green highlights. Housed in an old green label holder. (#9176)

5377 1924 MS65 NGC. The 1924 Saint-Gaudens double eagle is the quintessential type coin for the series, as attractive high-grade specimens are always readily available. This delightful Gem exhibits sharply detailed design elements throughout, with vibrant mint luster over smooth yellow and rose-gold surfaces. Eye appeal is exceptional. (#9177)

5378 1924 MS65+ NGC. Although the 1928 has a higher mintage, the 1924 Saint-Gaudens twenty is the most available issue of the series in today's market. This high-end Gem would make an ideal type coin, with sharply detailed devices and vivid orange-gold surfaces. (#9177)

5379 1924 MS66 PCGS. CAC. Every detail of the design is crisply defined on this spectacular Premium Gem. The light orange-gold surfaces are free of mentionable distractions, and the vibrant mint luster adds to the outstanding visual appeal. (#9177)

5380 1924 MS66 ★ NGC. CAC. Both sides are pristine save for wispy marks on the sun. The remarkably smooth fields of this green-gold piece ensure remarkable eye appeal. NGC has certified 59 pieces as MS66 ★ and only two finer with a Star designation (5/12). (#9177)

**1924-D Double Eagle, MS62
Attractive Better-Date Example**

5381 1924-D MS62 PCGS. The 1924-D was once considered a great rarity in the Saint-Gaudens series, but the date was represented in several hoards, making it "just" a better date today. This sharply detailed MS62 example displays attractive greenish-gold surfaces, with bright mint luster. A scratch in the left obverse field, and some short marks on Liberty's legs, explain the grade. (#9178)

Dual-Textured MS62 1924-D Double Eagle

5382 1924-D MS62 PCGS. This 1924-D double eagle shows a dual surface texture, frosty deep reddish-orange margins yielding to some lighter yellow-gold reflectivity around the figure of Liberty and the central eagle on the reverse. An interesting and appealing example of this former great rarity in the series, certified in a green-label holder. (#9178)

**MS62 1924-D Twenty
Former Great Rarity in the Series**

5383 1924-D MS62 PCGS. CAC. A former great series rarity, today the 1924-D is a better issue, one still quite elusive in Gem or finer grades. This MS62 example shows excellent cartwheel luster as its foremost attribute, with frosty yellow-gold surfaces that show a modicum of light abrasions and a good strike. (#9178)

1924-D Double Eagle, Lustrous MS64

5384 1924-D MS64 PCGS. The 1924-D double eagle mintage exceeding 3 million pieces remained largely in Treasury vaults until the FDR gold recall in 1933, when most of it was melted, making the issue scarce to rare. Most survivors are in MS62 to MS64 grades. The present orange-gold and olive-green example is above average for the issue, since the lustrous surfaces exhibit only moderate marks and there is no indication of high point friction. PCGS has graded only 10 finer (4/12). (#9178)

Select Mint State 1924-S Twenty
Formerly the Single Rarest Issue in the Series

- 5385 1924-S MS63 PCGS.** The 1924-S, like its sibling the 1924-D, is a former great rarity in the Saint-Gaudens series — but in the case of the 1924-S, it used to be renowned as the *single rarest issue*, rarer even than the 1927-D, the Ultra High Relief, or the 1933. This Select example boasts excellent luster over greenish-gold surfaces, and is far more affordable than in earlier times. This would be a great acquisition meanwhile, as collectors save up for a nice '27-D. (#9179)

AU Sharpness 1925-S Twenty
Much Melted S-Mint Issue

- 5386 1925-S — Cleaning — Genuine PCGS. AU Details.** The high mintage but much melted 1925-S trades for five figures in Uncirculated grades, but those willing to settle for a lightly impaired example can obtain the issue for a reasonable premium over its bullion content. The present satiny piece shows a trace of wear on Liberty's chest and the eagle's breast. Subdued by a mild cleaning, but nicely struck and minimally abraded. (#9182)

1925-S Twenty, MS62
Almost All Melted

- 5387 1925-S MS62 PCGS.** The 1925-S twenty was massively produced with 3.7 million pieces struck. However, almost the entire mintage was melted in 1937, and only 600 or so pieces are believed known today. This piece represents especially good value. The surfaces are remarkably clean for the grade, not like what one would expect for an MS62, with barely any abrasions present on either side. The softly frosted mint luster displays even, light reddish-gold color. (#9182)

Choice Very Fine 1926-D Twenty
Unusual Find in This Grade

- 5388 1926-D VF35 NGC.** The 1926-D is widely recognized as one of the rarities in the Saint-Gaudens series, but this coin adds another dimension of scarcity. It is one of the few circulated pieces known, and in fact appears to be the lowest graded 1926-D at either service. We contend this coin was carried as a pocket piece. The surfaces are bright as such coins appear, and there are no large or detracting marks from handling in circulation. Even wear over the high points. (#9184)

1926-S Twenty, MS63
Impressive Eye Appeal

- 5389 1926-S MS63 PCGS. CAC.** The surfaces are awash in orange-gold with halos of brighter, yellow-gold over the centers. The typical 1926-S is sharply struck and, with bold definition over the highpoints, the present example is no exception. A few wispy abrasions seem to rule out an even higher grade, but the eye appeal is impressive. (#9185)

MS63+ 1926-S Double Eagle
Rare in Gem Condition

- 5390 1926-S MS63+ PCGS. CAC.** Despite the enormous mintage, most examples of the 1926-S were melted in the 1930s — a chorus that could be sung for many later (post-1920) entries in the Saint-Gaudens series. The 1926-S even today is a rarity in Gem condition. This Select example hosts excellent luster over orange-gold surfaces. A bold strike complements the scattered minor abrasions that define the grade. (#9185)

- 5391 1927 MS65 PCGS.** Cartwheel luster radiates from orange-gold, sharply struck surfaces that complement a tinge of mint-green on the reverse. Not an uncommon issue but uncommonly attractive and perfect for a nice type set. (#9186)

- 5392 1927 MS66 PCGS. CAC.** This incredibly well-preserved Premium Gem displays sharply detailed design elements, vibrant mint luster, and attractive orange-gold surfaces with hints of rose and lilac. (#9186)

1929 Saint-Gaudens Twenty, MS65
Sought-After Key Date
Only Five Finer Coins at PCGS

5393 1929 MS65 PCGS. The year 1929 marks a distinct line of demarcation in the Saint-Gaudens double eagle series between common and rare. The 1928 Philadelphia twenty is a well-known and popular type issue that is well-produced and generally available in high grades. The David Akers *Handbook* (second edition, 2008) says, “The 1928 is one of the most common Saint-Gaudens Double Eagles, and it is obtainable in quantity in all grades from MS-60 to MS-66.”

On the other hand, each Saint-Gaudens double eagle, beginning with the 1929 and continuing through the series’ end in 1933, is a major rarity. Excluding the uncollectible 1933’s, the five issues that usher in the series’ end comprise the 1929, the 1930-S, the 1931 and 1931-D, and the 1932. Of those five issues, the 1929, while still quite rare in an absolute sense, is the most available overall. Most examples of the 1929, however, are confined to the lower Mint State grades, and in Gem and finer condition, the issue takes a sudden leap upward, becoming rarer than the 1931 and 1932 issues.

Writing in the 1988 edition of the *Handbook*, Akers commented that there is little appreciable rarity difference from MS60 to MS63 for the 1929,

“... since there are as many choice Mint State examples of this issue in existence as there are minimal Mint State ones. I have seen only a few really exceptional quality 1929 double eagles, coins that were definitely better than MS-65, but I know of at least two in prominent private collections that have strong claim to grading full MS-67. However, I have seen more super examples of the 1931 and 1932 than I have of the 1929, so it may come as a surprise to some that one is probably more likely to be able to find an MS-65+ or better 1931 or 1932 than a similar quality 1929.”

This is an exceptional MS65 example, and is seldom seen as such. The surfaces are satiny and virtually unmarked. The strike is complete throughout, and each side displays light, even orange-gold color. Population: 26 in 65, 5 finer (4/12). (#9190)

1931 Twenty Dollar, MS66
One of the Finest Known
Ex: Duckor/Eliasberg

5394 1931 MS66 PCGS Secure. Ex: Duckor/Eliasberg. The five late-date Saint-Gaudens twenties are among the rarest and most celebrated of all 20th century coins. The 1931 is generally regarded as second rarest, only trailing the 1930-S. In 1982 David Akers' survey of auction appearances of double eagles covered the major auctions from 1944 through 1981, with scattered coverage in the earlier years. Heritage cataloger David Stone has extended this survey back another 10 years, and he has examined 152 auction catalogs by 14 firms between 1935 and 1944. The 1931 twenty was offered 12 times in those catalogs. What is remarkable is out of those 12 offerings, the 1931 and 1932 double eagles were offered 11 times in the same auctions. This common pairing of the 1931 and 1932 suggests a common source, and in fact recent findings support such a claim.

In David Tripp's 2004 reference on the 1933 twenties, *Illegal Tender*, he explores Special Agent Lipson's inquiries of Brooklyn coin dealer Joseph Barnet and his near involvement with the sale of a 1933 double eagle to collector Charles Williams:

"Staring through his thick lenses, Barnet added that he had almost sold one [1933 twenty]. Charles M. Williams of Cincinnati had called him and, as Barnet regularly advertised to sell 1931 and 1932 double eagles, asked if he might have a '33. Old Joe got in touch with [James] Macallister, who offered him one at \$800. Barnet, however, advised Williams not to buy it as he suspected 'that more of these coins would appear on the market' and drive the price down. In the middle of 1936, for example, 1931 and 1932 double eagles, once exceptionally rare, had started showing up in quantity (also from Israel Switt), and had become increasingly less expensive. Barnet had first advertised them in 1938 for \$150 and \$175 respectively, but within four years they had become a drug on the market, and Barnet was having a hard time moving them, even as he dropped the price. By 1942 they were being offered for as little as \$80 and \$85 each, with few takers."

The low point in price for the 1931 and 1932 was in Morgenthau's May 1939 auction of the New York Collection, Part II. The 1931 brought \$61, and the 1932 realized only \$76. Switt's coins were slowly absorbed into the market, and by 1944 the price of a 1931 double eagle jumped to \$220 in the J.F. Bell auction and \$300 for the 1932. No hoards were ever found in Europe, and the price of the 1931 has climbed steadily since the late 1930s. Louis Eliasberg had acquired both his 1931 and 1932 twenties by the time he purchased the Clapp Collection in 1942. After he bought the Clapp holdings, he used Charles E. Green's Mint Record and Type Table, United States to formulate a want list of the coins he still needed to acquire in order to achieve a complete set of U.S. coins (the only such set ever assembled). The 1931 twenty was not on Eliasberg's want list. Dr. Charles W. Green, an avid collector and student of the series, but not the same gentleman who compiled the aforementioned Mint Record, wrote Louis Eliasberg of his findings about the release of various Philadelphia and San Francisco double eagle issues. He stated that only 45 examples of the 1931 twenty were officially "put out." His figure understates the availability of the 1931 a bit, as probably 20-40 additional coins were available through East Coast dealers who managed to purchase the coins from the Mint, or from other entrepreneurs like "Izzy" Switt, and resell them to collectors.

David Akers estimates the surviving population of Mint State 1931s at 100 to 125 pieces, and the issue is almost always found in Mint State. The 1931 follows the usual bell curve of availability with one AU58 coin, one MS61, six pieces in MS62, and 15 in MS63. This narrow end of the curve is followed by the largest number of coins in the MS64-65 grades with 42 coins certified by both services in MS64 and 33 pieces in MS65. The trailing end of the bell curve is composed of a mere 14 coins in MS66 with the finest being the Morse MS67 (4/12).

In recent decades the 1931 has always been treated as a featured attraction in its infrequent auction appearances, and record prices often attend those offerings. This is the Eliasberg specimen. The remarkably high grade of this piece is attested to not only by its overall high state of preservation as seen by the vivid mint luster, but it is also evident in the uncommonly strong strike details. When encountered, the 1931 is often seen with weak stars below the Capitol building. This piece is sharply defined in that area, and the Capitol also exhibits complete detailing on the columns. The figure of Liberty has an overlay of light lilac patina with the remainder of that side showing bright reddish-gold. The eagle also shows intermittent streaks of the same lilac with the same bright reddish patina elsewhere. Neither side has any of the often-seen alloy stains. The surfaces are remarkably free from abrasions with only the tiniest marks on the lower reverse and on the rim.

This magnificent 1931 is one of the finest examples known. The fact that it was in Louis Eliasberg's complete collection of U.S. coins and is also the piece Dr. Duckor selected for his set speaks volumes about the state of preservation, originality, and eye appeal of this exceptional coin.

Ex: Louis E. Eliasberg, Sr.; *Eliasberg Estate; The United States Gold Coin Collection (Bowers and Ruddy, 10/1982)*, lot 1072, purchased by David Akers for \$17,600; Dr. and Mrs. Steven L. Duckor *Number One PCGS Registry Set*. (#9192)

1931-D Double Eagle, MS65

Only Five Finer Examples

5395 1931-D MS65 PCGS. In 1931, amid the Great Depression, the Philadelphia Mint struck a substantial number of double eagles, primarily intended for export. The Denver Mint produced only 106,500 pieces. But most of the year's double eagles never left Treasury or bank vaults and were ultimately melted. Both the 1931 double eagle and the 1931-D — the Denver Mint's last — were victims of Franklin Delano Roosevelt's Presidential Executive Order 6102, The Gold Confiscation Act of April 5, 1933, calling for holders of significant quantities of gold to sell their coins at the prevailing price of \$20.67 per ounce. Evidence that most 1931-D twenties were melted is verifiable by the lack of coins certified by third-party grading services. Of the few certified coins, most are in some degree of Mint State.

In *American Coin Treasures and Hoards*, Q. David Bowers tells of his experience with four 1931-D double eagles that survived the confiscation:

"In 1960 a Sidney, New York, businessman took from his bank safety deposit box four 'ordinary' \$20 pieces and brought them to a coin dealer [Bowers], for he had heard there was a premium above face value for all gold coins.

The dealer glanced at them, found they were all of the extremely rare 1931-D variety and in blazing gem Mint State, showed him the listing in *The Guide Book*, and expected that the finder would be delighted. Just the opposite occurred. Uncertainty set in—what were they *really* worth? Could they be sold for more elsewhere? Maybe they shouldn't be sold after all.

Back into the safe deposit box the rare 1931-D \$20 pieces went. Had they been common dates they would have been sold for the current market value at the time, which would have been between \$40 and \$50."

Bowers never found out what happened to those coins. Most other specimens were less fortunate, and ended up in the melting furnace.

Initially, David Akers considered the 1931-D the fourth rarest issue in the series. Over time, he reevaluated the rarity based on newly found coins. Several mini-hoards of the 1931-D were discovered, but "relatively few of these pieces graded better than Choice Uncirculated and the majority were heavily marked and lackluster." He further modified his opinion in the late 1980s, after a "mini-hoard" of 15 or 20 pieces surfaced. He then opined that the 1931-D's true population rarity was more in line with the slightly less rare 1931 and 1932 double eagles.

The 1931-D is still conditionally rare, as most of that hoard graded between MS60 and MS63. In *A Handbook of 20th-Century United States Gold Coins*, Akers writes, "In MS64 or better condition, the 1931-D is an extreme rarity, and there may well be only 12 to 15 examples at that level still in existence. I have seen only a handful of true gems." Jeff Garrett handled a group of eight examples in late 1998, most of which would grade MS63 by today's standards. PCGS and NGC combined have graded only 21 Gem coins (several likely resubmissions), with five higher, all MS66 (11/11).

This exceptionally attractive example is, in fact, an upper-end Gem. A light red-orange patina that turns hazel-gray around the margins covers the softly frosted surfaces. Each side is smooth and virtually unabraded. The lack of marks and original color suggest careful preservation since 1931. This specimen is indeed an uncommon find, a fact that will not be lost on the perceptive specialist.

Ex: *FUN Signature* (Heritage, 1/2007), lot 3831; *Long Beach Signature* (Heritage, 5-6/2007), lot 2820. (#9193)

PROOF SAINT-GAUDENS DOUBLE EAGLES

With Motto 1908 Double Eagle, PR66+ An Elite Matte Proof

5396 1908 Motto PR66+ NGC. The U.S. Mint was not alone in producing matte proofs beginning in 1908. Canada's Ottawa Mint opened in that same year, producing specimen coinage in sets, similar to U.S. proof sets. The *Charlton Catalog* says:

"The finish imparted to [Canadian] specimen coins has varied over the years. During the Victoria period, it consisted of frosted, raised elements with bright, mirror fields. In the reigns of Edward VII and George V an overall satin (sometimes called matte) finish was in vogue."

This sounds remarkably similar to the United States' transition during the same time to matte proofs, although the term "matte" is a relatively recent one. "Sandblast proof" is an older and more descriptive term, although that is not the whole story either. Walter Breen writes in the first chapter of his *Proof Encyclopedia*, beginning on page 17 of the 1989 edition:

"Early in the 20th century, apparently owing to the influence of the Paris Mint ... medals and proof coins began experimentally to be made by a new process yielding no longer the old and tired brilliant mirrorlike fields, but instead a uniform granular sheen. Russell Nering has traced the process back to about 1896, in which year — if memory serves — Belgium and possibly some other small European countries issued a few proofs by the new processes. Britain introduced it on the Coronation proof sets of 1902, and Canadian sets of 1908. ...

"Regrettably, the story here is not yet complete. At least five different variations on the matte and sandblast proof technique were experimentally used on regular proofs between 1909 and 1915. At the moment it is hardly possible to give verbal descriptions, or to tell exactly how they were made (the relevant records have not been released to the National Archives). What I do know is that the finish in each instance had to be applied after striking, and that in some instances it involved pickling the coins in weak acid and in others it involved spraying them with a stream of fine sand in compressed air."

With so many slightly different possible production methods, varying surface textures and colors can be found among high-grade matte/sandblast proof gold, even among coins of a given date. The present piece is a case in point. This PR66+ 1908 double eagle displays the usual khaki color, but the high points of the knee, breasts, and nose show a slightly different texture or color from the rest of the coin. These areas are neither wear nor cabinet friction, or anything else of the sort, but clearly could have been caused by the angle of the spray of sand hitting the device high points, for example. A complete wire rim encircles the reverse but not the obverse, and there are no shiny spots or any visible contact marks. An interesting example of this classic proof gold coinage. Census: 25 in 66 (1 in 66+), 12 finer (4/12).

Ex: Long Beach Signature (Heritage, 2/2012), lot 5097. (#9205)

Roman Gold Gem Proof 1910 Twenty

5397 1910 PR65 NGC. The recorded number of 1910 proof double eagles produced, 167 examples, appears to be on the high side, but it is true that there are considerable numbers certified at the major grading-authentication services. Garrett and Guth comment concerning the issue:

“ ... this is one of the more available dates in Proof condition [sic]. Sales to collectors recovered after tumbling in 1909, the year after the unpopular matte Proofs were sold. The Roman or satin finish coins proved much more popular with collectors. The 1910 issue is available in most grades, including 17 examples reported by NGC and PCGS as PF-66, four as PF-67, and even two coins as PF-68. This date ranks as the seventh scarcest of the 10 Proof coin series.”

The authors also confirm the existence of a single matte proof bearing the 1910 date, last seen in 1998. Between the two grading services combined, there are 68 proof examples of this issue certified — as always, factoring in an unknown number of duplications — and of course there are likely still uncertified examples that reside in old-time collections (or perhaps as unrecognized proofs in some newer collections).

The present Gem example bears the unmistakable hallmarks of a proof striking, including crisply delineated details on Liberty's head, hair, toes, and the Capitol building, for example. A few small contact marks, none individually severe, keep this piece from an even higher grade. The yellow-gold surfaces are bright and boast much appeal. Census: 8 in 65, 18 finer (4/12). (#9207)

Superb Gem Matte Proof 1912 Twenty Lighter Color Than Often Seen

5398 1912 PR67 NGC. The mintage of proof double eagles by 1912 had dwindled, largely due to Mint missteps, to a skimpy 74 pieces. The debut of the regular-issue Saint-Gaudens double eagle proofs in 1908 — the first to be sold generally to the collecting public — saw the simultaneous launch of the matte proof surface (although “sandblast proof” is a technically more accurate term) that was unfamiliar to American collectors, although quite in vogue on the Continent.

The convex surfaces of the dies for the new American coins made them unsuitable for a highly polished surface that would create brilliantly mirrored fields with contrasting frosted devices, an effect seen on the pre-1902 proof gold coinage. The Mint experimented with a number of different finishes during the 1908-1915 period, including the matte or sandblast and Roman or satin finish treatments. For some years, up to three different finishes are known, sometimes differences of degree rather than kind.

The Robert Loewinger reference, *Proof Gold Coinage of the United States*, discusses the origin of the matte proof gold process:

“The [matte proof] process originally started in Belgium and was popularized in the Paris Mint. The finish was applied after striking and was made by sandblasting the coins at different forces and speeds with different sizes of grains of sand. Also pickling the coins in a weak acid was another technique that was used on these coins after striking.”

Despite the innovation, numismatists disliked the dark, uncontrasted appearance of the matte proofs, and for 1909-1910 the Mint switched to a lighter Roman or satin finish, which also proved unpopular. For 1911 and through the end of the series in 1915, the matte proof was the surface treatment of choice at the Mint. The 1912 matte proof double eagles showed a “finish that sparkled with thousands of tiny facets,” according to Garrett and Guth’s *Gold Encyclopedia*. The proofs are dark, although generally not so much so as those of 1908.

This example is lighter than the usually seen 1912 proof, suggesting there were perhaps at least two periods when proofs were sandblasted. The finely granular surfaces sparkle when closely examined. We see no contact marks or shiny spots on either side of this immaculate coin. Census: 12 in 67, 0 finer (4/12). (#9209)

1914 Twenty Dollar, Matte PR66
Outstanding in All Aspects

5399 1914 PR66 NGC. The 1914 Saint-Gaudens double eagle saw 70 proofs struck in that year and is among the rarest of the series. James Halperin et al., writing in *The Coinage of Augustus Saint-Gaudens* (2006), estimate that 25 to 30 different examples are extant. David Akers in his *20th Century United States Gold Coins* (2008) puts the survival range at 25 to 35 pieces. NGC and PCGS combined have certified 46 specimens, some of which are likely resubmitted or crossover coins. Our records indicate that the 1914 proof twenty dollar has made 34 appearances at auction between 1990 and 2011. A number of them, of course, are likely duplicates.

The present Premium Gem proof displays deep mustard-gold surfaces with a superfine-grained texture. A well directed strike has created bold definition on the design elements, including Liberty's facial features, hair, drapery, fingers, toes, and the heart-shaped sandal ornament. The reverse devices are likewise crisp, including the eagle's plumage, beak, and claws. A partial wire rim is evident on both sides, especially the reverse. A tiny contact mark is noted on the ray between TR in TRUST and another on the right upright of U in the same word. They do not detract and are mentioned only because they will help pedigree the coin for future catalogers and researchers.

This is a super representative of early 20th century matte proof gold that will satisfy the most discriminating collector. Census: 9 in 66, 7 finer (4/12). (#9211)

TERRITORIAL GOLD

- 5400** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Bent — NGC Details. AU. K-24, R.3. A diagonal bend is prominent on both sides, and a few thin marks are noted near 27 G. Glimmers of orange-tinged luster fill the legends. A presentable representative of the scarce and historically important Bechtler issuer. Listed on page 374 of the 2013 *Guide Book*. (#10040)

Blundered 'N' Bechtler Gold Dollar
Choice AU, Kagin-4

- 5401** (1837-42) C. Bechtler Dollar, N Reversed AU55 NGC. K-4, R.4. The well-known die engraving blunder with a deeply entered and retrograde N in ONE. Curiously, it is punched over what appears to be a normal N. This olive-gold example shows apricot-tinged luster within the legends. One small clip on the reverse at 10 o'clock, and a few minor retained laminations and peripheral roller marks are present, all as made. Struck from widely rotated dies. Listed on page 373 of the 2013 *Guide Book*. (#10055)

C. Bechtler Five Dollar, 150G. 20C., K-15, AU55
Exceedingly Rare, Few Survive in Any Grade

5402 (1831-34) C. Bechtler Five Dollar, 150G. 20C. AU55 NGC. K-15, R.7. Although the lower-denomination Bechtler gold coins, the gold dollars in particular, are a regular occurrence at Heritage, the K-15 five dollar gold pieces are exceedingly rare, as the R.7 rating indicates.

The elder Christopher Bechtler, his son August, and nephew (also named Christopher) produced a wide range of coinage from 1831 until roughly 1852. Although the Bechtlers operated their mint in Rutherford County, North Carolina, they marked the source of the gold in their coins in various ways, including N CAROLINA, NORTH CAROLINA, and CAROLINA; RUTHERF and RUTHERFORD CAROLINA; CAROLINA GOLD; and RUTHERF. and RUTHERFORD GEORGIA GOLD. The Bechtler family also marked the relative weight and fineness on their products, increasing trust in the regional populace and further encouraging the coins to circulate.

The present K-15 variety is marked RUTHERFORD COUNTY ★ C. BECHTLER, ASSAYER on one side, and NORTH CAROLINA GOLD on the other, along with 5 DOLLARS and 150G. 20C. in the middle. A beaded border surrounds each side, as NGC notes on the holder. The Bechtler half eagle content of 150 gn of 20-carat (20/24ths pure) gold works out to 125 gn or 8.1 gm of pure gold; the federal standard for a half eagle of the 1831-34 timeframe was 123.75 gn (8.02 gm).

In other words, *the Bechtler K-17 five dollar gold coins contained slightly more gold than the contemporary federal Capped Head half eagles, a series legendary for its low survival rates due to almost universal melting.*

This Choice AU piece shows plenty of luster remaining over yellow-gold surfaces that show almost no abrasions without the aid of a loupe, and even then, the scattered marks and scrapes are undistracting. It seems a near-certainty that this piece was held back from circulation for unknown reasons, thus escaping the dual fates of melting or circulation until it became unrecognizable. Listed on page 373 of the 2012 *Guide Book*. Census: 1 in 55, 3 finer (4/12). (#10118)

Rare 1860 Clark, Gruber Ten Dollar
K-3, AU Details

5403 1860 Clark, Gruber & Co. Ten Dollar — Spot Removals — NGC Details. AU. K-3, R.5. The surfaces of this classic Territorial gold piece show several areas of scraping and scratching where attempts were made to remove spots; a failed effort off the second R in GRUBER on the reverse suggests the greenish color removed elsewhere. Despite these faults and a number of deep digs, this is an important rarity from the Colorado period of discoveries that shows only light wear across predominantly yellow-orange surfaces. An arc die crack is noted from approximately 3 to 5 o'clock on the obverse. Listed on page 390 of the 2013 *Guide Book*.

1860 Clark, Gruber Ten, AU55
Lightly Circulated and Originally Toned

5404 1860 Clark, Gruber & Co. Ten Dollar AU55 PCGS. K-3, R.5. The many worldwide discoveries of gold in the 19th to early 20th centuries tended to follow a usual pattern. Once a sufficient quantity of gold dust or nuggets had been extracted from the rocks and streams — which took little time following discoveries in gold-abundant areas of the world, including Latin America, Australia, South Africa, Canada, and America — at first a barter economy would develop, if there were insufficient local currency (sometimes including foreign gold and silver coinage). Miners, sluicers, and panners would exchange their unassayed gold, often in combination with other minerals, in exchange for needed supplies, food, and equipment. As gold volumes grew and populations increased, local assayers and coiners would come in to fill the void, establishing reliable (mostly) assay methods and converting the gold to purer forms, or at least into media that were third-party-valued more measurably and precisely, enabling easier commerce.

This pattern has recurred throughout history, given the survival records in the form of crude gold coins dating to the Lydians circa 600 B.C. In U.S. history it occurred in north Georgia and North Carolina with the Bechtler coinage, in the great California Gold Rush, among the Mormons in the Utah Territory, and in Colorado.

“Pike’s Peak or Bust” was the slogan of the Pike’s Peak Gold Rush, after the first major gold discoveries in 1858. It later became known as the Colorado Gold Rush, but at the time the area formed part of the Kansas Territory. The rapid population growth from gold-seekers led to creation of the Colorado Territory in 1861.

Brothers Milton and Austin Clark teamed with Emanuel Henry Gruber to form the Clark, Gruber firm, which offered assaying, minting, and banking services. The partners opened a bank in Denver City, issuing their first gold coins in July 1860. The ten and twenty dollar gold pieces in 1860 featured an absurd volcanic depiction of Pike’s Peak; the 1861-dated coins switched to a federal style.

This Choice AU 1860 Clark, Gruber ten dollar displays a lustrous, original “old gold” look, a piece that appears never to have been cleaned, placing it in a minority. A few light abrasions pepper each side in keeping with limited circulation, but no individually notable marks appear. Prevailing orange-gold color deepens at the rims to violet and sky-blue in the protected device edges. A mighty attractive example to represent a historic era of American numismatic history. Listed on page 390 of the 2013 *Guide Book*. Population: 25 in 55, 21 finer (4/12). (#10137)

AU Clark, Gruber 1861 Ten, K-7
Challenging Pioneer Gold Coiner

- 5405** 1861 Clark, Gruber & Co. Ten Dollar AU50 PCGS. K-7, R.4. The second-year Clark, Gruber ten dollar issue abandoned the volcanic Pikes Peak motif for a more conventional imitation of Federal types. The present wheat-gold pioneer gold piece has a light strike on the lower eagle and upper portrait but is otherwise well defined. Marks are inconsequential save for a couple of hair-thin lines near the date. Listed on page 391 of the 2013 *Guide Book*. (#10141)

1851 Reeded Edge Humbert Fifty, K-7, VF35
887 Thous., Intensely Appealing

- 5406** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. VF35 PCGS. K-7, R.4. The 1851 Humbert fifty dollar octagonal pieces were struck in Lettered Edge or Reeded Edge styles, both appearing with the .880 or .887 Thous. fineness. The Reeded Edge .887 Thous. K-7 variety shows a small-sized concentric circle on the reverse and outer ribbon away from the edge, while the K-6 shows a medium-sized concentric circle and ribbon closer to the edge. The rarity factors listed in Kagin (1981) are quite out of date, and both varieties are likely R.4, still very scarce.

This Choice VF example shows original reddish-tinged surfaces with some of the expected rim bumps and circulation wear, but the appeal is intense despite the grade. These coins have a historic piquancy that time (or circulation) can scarcely erase. Kagin's reference correctly notes that the U.S. Assay Office was a provisional U.S. Mint at the time these pieces were struck, and they should be considered as part of the traditional U.S. regular issues. Listed on page 377 of the 2013 *Guide Book*. (#10214)

**Near-Mint 1852 Augustus Humbert Ten
K-10a, 'IUNITED' Variety**

5407 1852 Humbert Ten Dollar AU58 NGC. K-10a, Low R.4. Kagin's "IUNITED" variety, a later state of K-10. The U in UNITED has the appearance of two Is due to advanced die crumbling, as coined. This is a better-grade honey-gold example with moderately marked surfaces and ample mint luster. Listed on page 378 of the 2013 *Guide Book*. Census: 7 in 58, 4 finer (4/12). (#10187)

**Near-Mint 1855 Kellogg & Co. Twenty
Rare K-3b With Short Arrows**

5408 1855 Kellogg & Co. Twenty Dollar AU58 NGC. K-3b, R.5. The obverse has the O of CO on Liberty's hair, while the reverse has short arrows. This private "Territorial" issue was struck in the State of California after the opening of the San Francisco Mint, shedding a bit of light on the limitations of that term. Generous orange-gold luster remains on this scarcely worn example, an aid to grading in the face of significant striking weakness, particularly at the upper obverse. Scattered light abrasions and a few deeper digs are as expected for such a large coin that saw commercial use. Listed on page 387 of the 2013 *Guide Book*. (#10225)

**K-4 1849 Moffat & Co. Five Dollar
Rare MS62 Representative**

5409 1849 Moffat & Co. Five Dollar MS62 NGC. K-4, R.5. Moffat & Co. was one of the earliest and most highly respected assay firms in Gold Rush California, producing ingots of uniform size (the famous and rare \$16.00 ingots) as well as small-denomination Federal-imitative Territorial gold pieces. This is an unmarked straw-gold five dollar representative that has strong eye appeal. Made from clashed dies, it is sharply struck for a territorial gold piece, although the curls near the ear are slightly soft. The luster is bright and softly frosted throughout. A subtle surface disturbance is noted close to the dentils above the first A in CALIFORNIA. Listed on page 376 of the 2013 *Guide Book*. (#10240)

NUGGETS

S.S. Central America 21-Gram Gold Nugget Excellent Display Piece

- 5410 California Placer Gold Nugget.** Ex: S.S. Central America. 21.00 gm. Of bulbous shape with two long flanges and a test cut where one flange meets the main mass, about half an inch deep, three-quarters of an inch wide, and nearly an inch long. The small plastic case still bears the violet Sotheby's New York lot number sticker from the insurers' sale.
Ex: Sotheby's (6/2000), lot 128. A photocopy of the lot description from that catalog is included with the lot.

California Placer Gold Nugget, 7.22 Grams Recovered From the S.S. Central America

- 5411 California Placer Gold Nugget.** Ex: S.S. Central America. A long and flat nugget, nearly an inch across but weighing under seven-and-a-quarter grams. This nugget was recovered from the Central America and went into the 8% of treasure awarded to the insurers. The small plastic case still bears the violet Sotheby's New York lot number sticker.
Ex: Sotheby's (6/2000), part of lot 152 (pictured on right in that catalog). Photocopy of catalog entry detailing provenance included with lot.

BOOK

- 5412 A California Gold Rush History** by Q. David Bowers, Autographed by Bob Evans and Adam Crum. This 1055-page tome is number 135 of 400 printed, outer case peeling at one corner but book in very good condition overall, S.S. Central America gold dust intact behind pane in inner front cover. The last page has a large plate affixed, with signatures of Bob Evans (in blue) and Adam Crum (in black) at bottom. On the inside back cover is a semitransparent envelope with two pictures of a Justh & Hunter ingot; presumably the book originally was offered with the ingot, though later they were separated and the book now is offered on its own.

S.S.C.A. RELIC GOLD MEDALS

"1855 Kellogg Fifty Dollar" 2001 Relic Medal Made from S.S.C.A. Kellogg & Humbert Ingots

- 5413 2001 SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS.** Struck on September 7, 2001, one of 223 pieces with that counterstamp date. A relic medal made from California Gold Rush Kellogg & Humbert 887 Fine gold ingots recovered from the S.S. Central America, which sank in 1857. Fully struck and flawless with exemplary cameo contrast. No box or other packaging accompanies the lot. (#10358)
- 5414 1855 SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Uncirculated PCGS.** Made September 12, 2001, the last date of striking. This 2.5-ounce piece made of melted-down gold from an S.S. Central America ingot comes with the usual trappings: slipcover, presentation box, copper-and-glass frame, and commemorative screwdriver. (#10359)

CALIFORNIA FRACTIONAL GOLD

- 5415 1855/4 Liberty Octagonal 25 Cents, BG-106, R.3, MS66 NGC.** A moderately flashy Premium Gem with a pristine appearance and a good strike. Late lapped die state with portions of the portrait absent, as made. Census: 5 in 66, 0 finer (5/12). (#10375)
- 5416 1853 Liberty Octagonal 1 Dollar, BG-530, R.2, MS61 NGC.** A satiny canary-gold Period One octagonal dollar with clean surfaces and an even strike. The N initial on the reverse exergue represents San Francisco jeweler Antoine Louis Nouizillet. (#10507)
- 5417 1853 Liberty Octagonal 1 Dollar, BG-531, R.4, MS61 NGC.** The grade is perhaps conservative despite the moderate field hairlines and chatter on this available octagonal dollar variety. Lemon-yellow, lustrous, and well-struck. (#10508)
- 5418 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS67 PCGS.** This honey-gold Superb gem is intricately struck and prominently mirrored. Immaculate aside from a single thin mark above the A in DOLLAR. The obverse has a minor retained lamination at 10:30. Population: 4 in 67, none finer (5/12). (#10544)
- 5419 1872 Washington Octagonal 25 Cents, Baker-503A, BG-722, Low R.4, MS63 NGC.** 0.18 gm. A satiny canary-gold representative of the popular Washington Head series. Evenly struck and smooth overall with a couple of hair-thin lines on each side. (#10549)

**Deep Prooflike MS66 BG-790
1872/1 Octagonal Indian Quarter**

5420 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS66 Deep Prooflike NGC. As of (4/12), NGC has certified three BG-790 quarters as Deep Prooflike, two at the MS64 level and the present MS66 example. The prominently mirrored sun-gold fields exhibit exemplary contrast with the nicely struck Indian and wreath. A couple of letters in the reverse legend are lightly brought up. (#910617)

5421 1874 Indian Octagonal 25 Cents, BG-795, R.3, MS65 PCGS. Dashes of golden-brown toning overlie radiant sun-gold surfaces. A suitably struck and undisturbed Gem of this Period Two type issue. Population: 20 in 65, 2 finer (5/12).
Ex: FUN Signature (Heritage, 1/2008), lot 11410. (#10622)

5422 1875 Indian Octagonal 25 Cents, BG-797, Low R.4, MS65 Deep Prooflike NGC. The strike is somewhat off-center towards 12 o'clock on the obverse, so the topmost star details are off the flan, with correspondence on the lower reverse. Deeply mirrored orange-gold with some hazy gray on the reverse and an indented planchet flaw on the right reverse. (#910624)

**Finest Certified MS67 BG-801
Round Liberty 1859 Quarter**

5423 1859 Liberty Round 25 Cents, BG-801, R.3, MS67 NGC. The sole 1859-dated round quarter variety, and the single finest certified example. This crisply struck Superb Gem has semi-prooflike fields and lovely honey-gold toning. A brief lintmark near the coronet tip provides an identifier. Census: 1 in 67, 0 finer (4/12). (#10662)

5424 1873 Liberty Round 25 Cents, BG-817, R.3, MS66 NGC. This canary-gold quarter is perfect from the technical perspective save for a very brief line near the coronet tip. The centers are lightly impressed, as always for this Breen-Gillio marriage. Census: 6 in 66, 1 finer as 66 Prooflike (4/12). (#10678)

5425 1870 Liberty Octagonal 50 Cents, BG-908, R.5, MS66 PCGS. A well struck high grade example with semi-prooflike canary-gold surfaces. Pristine save for a wispy graze on the field beneath the hair bun. Population: 7 in 66, none finer (4/12). (#10766)

5426 1872 Indian Octagonal 50 Cents, BG-940, R.4, MS65 NGC. This moderately mirrored Gem offers smooth wheat-gold fields and only minor inexactness of strike at the centers. One small strike-through (as made) east of the numerator. (#10798)

5427 1871 Liberty Round 50 Cents, BG-1011, R.2, MS66 PCGS. This flashy canary-gold Premium Gem is crisply struck and virtually immaculate. The sole round 1871 half dollar variety without an initial beneath the bust. Population: 14 in 66, 1 finer (5/12). (#10840)

5428 1868 Liberty Octagonal 1 Dollar, BG-1105, High R.4, MS62 PCGS. A moderately prooflike pumpkin-gold Period Two octagonal dollar that shows the usual incompleteness of strike at the centers, due to the high relief of the portrait. Certified in an old green label holder. Population: 12 in 62, 18 finer (5/12). (#10916)

5429 1868 Liberty Octagonal 1 Dollar, BG-1105, High R.4, MS63 Prooflike NGC. The sole 1868-dated Period Two octagonal dollar variety. Perhaps scarcer than the Breen-Green rarity estimate suggests, since NGC has certified only eight examples, with none graded above the MS63 level (5/12). Flashy with splashes of rose-red toning and a few inconsequential obverse field hairlines. (#710916)

5430 1875 Indian Octagonal 1 Dollar, BG-1112, High R.5, AU58 NGC. Brightly reflective yellow-gold surfaces frame sharply detailed design elements that show only the slightest signs of circulation. This variety was discovered by Augustus Heaton before 1907. (#10923)

**1870 Goofy Head Octagonal Dollar
BG-1118, MS64 Prooflike**

5431 1870 Goofy Head Octagonal 1 Dollar, BG-1118, Low R.5, MS64 Prooflike NGC. The BG-1118 Goofy Head is the only 1870 octagonal dollar design that lacks the CALIFORNIA GOLD legend. The maker is unknown, per Breen-Gillio. This near-Gem Prooflike example boasts reflective honey-gold surfaces with considerable reddish tinges on each side. Census: 1 in 64 Prooflike, 0 finer (5/12). (#710929)

5432 1876/5 Indian Octagonal 1 Dollar, BG-1128, R.5, MS61 NGC. This nicely struck example is predominantly green-gold but has lilac toning on the high points. The fields are mildly flashy and lack any relevant abrasions. (#10939)

5433 1876/5 Indian Octagonal 1 Dollar, BG-1128, R.5, MS63 NGC. A straw-gold representative with moderately flashy fields and no noticeable marks. The centers show incompleteness of strike, though peripheral elements are crisply impressed. (#10939)

End of Session Three

SESSION FOUR

Heritage Live!™, Internet, Fax, and Mail Only Session
Saturday, June 2, 2012 | 12:00PM CT | Dallas | Lots 7001 - 9081

A 15% Buyer's Premium (\$14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1171

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live™, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

7043 1787 New Jersey Copper, Small Planchet, Plain Shield — Scratched — ANACS. Fine 12 Details. NGC Census: (4/77). PCGS Population (16/214). (#506)
From The JG Collection, Part Two.

7044 1787 New Jersey Copper, Small Planchet, Plain Shield — Environmental Damage — NGC Details. VF. NGC Census: (6/65). PCGS Population (27/169). (#506)

7045 1787 New Jersey Copper, Small Planchet, Plain Shield — Corroded — ANACS. VF20 Details. NGC Census: (6/65). PCGS Population (27/169). (#506)
From The JG Collection, Part Two.

7046 1787 New Jersey Copper, Small Planchet, Plain Shield — Burnished, Corroded — ANACS. VF25 Details. NGC Census: (8/57). PCGS Population (35/134). (#506)
From The JG Collection, Part Two.

7047 1787 New Jersey Copper, Small Planchet, Plain Shield — Corroded — ANACS. VF30 Details. NGC Census: (7/50). PCGS Population (37/97). (#506)
From The JG Collection, Part Two.

7048 1786 Vermont Copper, VERMONTENSIMUM — Clipped, Lamination, Scratched — ANACS. VF20 Details. NGC Census: (4/28). PCGS Population (26/123). (#545)
From The JG Collection, Part Two.

7049 1786 Vermont Copper, Bust Left VG8 ANACS. NGC Census: (0/2). PCGS Population (1/11). (#551)
From The JG Collection, Part Two.

7050 1786 Vermont Copper, Bust Left VG10 ANACS. NGC Census: (0/2). PCGS Population (4/7). (#551)
From The JG Collection, Part Two.

7051 1788 Vermont Copper, Bust Right VF20 PCGS. PCGS Population (32/71). NGC Census: (4/19). (#563)

7052 1783 Nova Constellatio Copper, Pointed Rays, Small US — Bent — ANACS. VF30 Details. NGC Census: (0/30). PCGS Population (5/112). (#801)
From The JG Collection, Part Two.

7053 1785 Nova Constellatio Copper, Pointed Rays, Large Date — Corroded, Damaged — ANACS. VF30 Details. NGC Census: (8/42). PCGS Population (21/181). (#813)
From The JG Collection, Part Two.

7054 1785 Nova Constellatio Copper, Pointed Rays, Large Date XF45 NGC. NGC Census: (5/26). PCGS Population (24/85). (#813)

7055 1787 Fugio Cent, UNITED STATES, No Cinquefoils — Corroded — NGC Details. Fine. NGC Census: (1/1). PCGS Population (2/31). (#880)

7056 1787 Fugio Cent, UNITED STATES, Cinquefoils — Holed — NGC Details. VG. NGC Census: (1/53). PCGS Population (6/235). (#889)

7057 1787 Fugio Cent, Club Rays, Rounded Ends VG8 PCGS. NGC Census: (0/44). PCGS Population (5/105). (#904)

7058 1787 New Haven Brass — Corroded, Damaged — ANACS. AG3 Details. NGC Census: (0/0). PCGS Population (0/4). (#919)
From The JG Collection, Part Two.

7059 1787 New Haven Brass — Bent, Corroded — ANACS. Fine 12 Details. W-6925. NGC Census: (0/0). PCGS Population (0/4). (#919)

7060 1787 New Haven Brass — Corroded — ANACS. VF20 Details. NGC Census: (0/0). PCGS Population (0/4). (#919)

7061 1787 Auctori Plebis Token XF40 NGC. NGC Census: (2/15). PCGS Population (5/29). (#601)

7062 (1792-94) Kentucky Token, Plain Edge XF40 ANACS. NGC Census: (10/89). PCGS Population (21/276). (#614)
From The JG Collection, Part Two.

7063 1794 Franklin Press Token MS63 Brown NGC. NGC Census: (12/4). PCGS Population (17/8). (#630)

7064 1783 Georgivs Triumpho Token VF25 ANACS. NGC Census: (1/20). PCGS Population (5/90). (#664)
From The JG Collection, Part Two.

7065 1783 Washington & Independence Cent, Large Military Bust VF35 ANACS. NGC Census: (3/59). PCGS Population (21/165). (#667)
From The JG Collection, Part Two.

7066 1783 Washington & Independence Cent, Large Military Bust — Bent, Damaged — ANACS. XF45 Details. NGC Census: (11/43). PCGS Population (42/94). (#667)
From The JG Collection, Part Two.

7067 1783 Washington & Independence Cent, Draped Bust, No Button VF25 ANACS. NGC Census: (3/27). PCGS Population (5/101). (#676)
From The JG Collection, Part Two.

7068 1783 Washington Unity States Cent — Corroded, Edge Bumps — ANACS. XF40 Details. NGC Census: (12/93). PCGS Population (40/179). (#689)
From The JG Collection, Part Two.

7069 Undated Washington Double Head Cent — Rim Dings, Scratched — ANACS. XF45 Details. NGC Census: (5/43). PCGS Population (33/111). (#692)
From The JG Collection, Part Two.

7070 1793 Washington Ship Halfpenny, Copper, Lettered Edge XF40 ANACS. NGC Census: (10/38). PCGS Population (33/165). (#734)
From The JG Collection, Part Two.

HALF CENTS

7071 1794 Poor 1 NGC. NGC Census: (1/158). PCGS Population (0/360). Mintage: 81,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in Poor 1 : \$81. (#1003)
From The JG Collection, Part Two.

7072 1794 — Corroded — ANACS. VF30 Details. C-1a. NGC Census: (13/90). PCGS Population (26/157). Mintage: 81,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$3,125. (#1003)

7073 1797 Plain Edge Genuine PCGS. The PCGS number ending in .97 suggests environmental damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 127,840. (#1036)

7074 1797 Plain Edge — Corroded — ANACS. VG8 Details. C-2. NGC Census: (4/41). PCGS Population (8/113). Mintage: 127,840. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : \$650. (#1036)
From The JG Collection, Part Two.

7075 1803 VF20 PCGS. PCGS Population (15/154). NGC Census: (5/95). Mintage: 92,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$400. (#1060)

7076 1804 Plain 4, No Stems VF20 ANACS. C-8 Spiked Chin. NGC Census: (23/749). PCGS Population (31/632). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$185. (#1063)

7077 1804 Plain 4, No Stems — Corroded — ANACS. VF30 Details. C-6 Spiked Chin. NGC Census: (38/691). PCGS Population (47/546). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$231. (#1063)

7078 1804 Plain 4, No Stems XF40 NGC. C-13. NGC Census: (45/632). PCGS Population (65/434). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$300. (#1063)
From The JG Collection, Part Two.

7079 1804 Crosslet 4, Stems — Improperly Cleaned — NGC Details. AU. C-10. NGC Census: (0/0). PCGS Population (21/82). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$550. (#1069)

7080 1804 Spiked Chin VF20 PCGS. PCGS Population (14/237). NGC Census: (8/173). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$215. (#1075)

7081 1804 Spiked Chin VF30 PCGS. PCGS Population (21/195). NGC Census: (11/153). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$289. (#1075)

7082 1805 Small 5, No Stems VF25 NGC. NGC Census: (5/177). PCGS Population (9/111). Mintage: 814,464. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$213. (#1081)

7083 1806 Small 6, No Stems VF25 PCGS. PCGS Population (18/432). NGC Census: (8/785). Mintage: 356,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$230. (#1093)

7084 1806 Large 6, Stems XF40 NGC. C-4. NGC Census: (0/0). PCGS Population (1/102). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$320. (#1099)

7085 1807 VF20 ANACS. C-1. NGC Census: (11/159). PCGS Population (11/190). Mintage: 476,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$200. (#1104)
From The JG Collection, Part Two.

7086 1808 — Cleaned, Rotated Dies — ANACS. VF20 Details. C-3. NGC Census: (2/103). PCGS Population (8/93). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$185. (#1107)
From The JG Collection, Part Two.

7087 1809 VF35 PCGS. NGC Census: (13/406). PCGS Population (20/185). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$135. (#1123)

7088 1809 XF45 NGC. C-3. NGC Census: (47/334). PCGS Population (23/140). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$195. (#1123)

7089 1809 AU55 NGC. NGC Census: (42/237). PCGS Population (28/71). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$325. (#1123)

7090 1809 AU58 NGC. NGC Census: (86/151). PCGS Population (18/52). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$450. (#1123)
From The JG Collection, Part Two.

7091 1809/6 VF25 PCGS. PCGS Population (4/185). NGC Census: (2/152). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$120. (#1126)

7092 1809 9/Inverted 9 “Overdate” — Damaged — ANACS. VF30 Details. C-5. NGC Census: (3/150). PCGS Population (8/180). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$156. (#1126)
From The JG Collection, Part Two.

7093 1809/6 9 Over Inverted 9 VF35 PCGS. PCGS Population (16/164). NGC Census: (1/149). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$185. (#1126)

7094 1809/6 9 Over Inverted 9 AU53 PCGS. PCGS Population (14/59). NGC Census: (12/95). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$510. (#1126)

7095 1810 VF35 PCGS. PCGS Population (12/59). NGC Census: (5/53). Mintage: 215,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$428. (#1132)

7096 1811 AG3 PCGS. PCGS Population (5/141). NGC Census: (0/76). Mintage: 63,140. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3 : \$199. (#1135)

8449 1917 Type One MS64 Full Head PCGS. PCGS Population (1644/1385). NGC Census: (1221/1069). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$425. (#5707)

8450 1917 Type One MS64 Full Head NGC. NGC Census: (1218/1069). PCGS Population (1643/1385). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$425. (#5707)
From The JG Collection, Part Two.

8451 1917 Type One MS64 Full Head NGC. NGC Census: (1225/1070). PCGS Population (1635/1380). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$425. (#5707)

8452 1917 Type One MS64 Full Head NGC. NGC Census: (1193/1055). PCGS Population (1627/1376). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#5707)

8453 1917 Type One MS64 Full Head NGC. NGC Census: (1193/1055). PCGS Population (1627/1376). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#5707)

8454 1917 Type One MS65 Full Head NGC. NGC Census: (705/364). PCGS Population (971/414). Mintage: 8,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$800. (#5707)

8455 1917-D Type One AU55 Full Head ANACS. NGC Census: (17/1028). PCGS Population (64/1399). Mintage: 1,509,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$210. (#5709)

8456 1917-S Type One AU53 NGC. NGC Census: (18/209). PCGS Population (20/434). Mintage: 1,952,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$200. (#5710)

8457 1917 Type Two AU58 NGC. NGC Census: (60/363). PCGS Population (127/445). Mintage: 13,880,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$125. (#5714)

8458 1918-D AU58 PCGS. PCGS Population (98/369). NGC Census: (63/251). Mintage: 7,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$200. (#5722)

8459 1918-D MS61 NGC. NGC Census: (11/237). PCGS Population (2/365). Mintage: 7,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$230. (#5722)
From The JG Collection, Part Two.

8460 1919 MS63 Full Head NGC. CAC. NGC Census: (49/233). PCGS Population (85/338). Mintage: 11,324,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$380. (#5729)

8461 1919-D Fine 12 ANACS. NGC Census: (11/305). PCGS Population (13/519). Mintage: 1,944,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$175. (#5730)

8462 1919-D VF25 NGC. NGC Census: (8/274). PCGS Population (24/466). Mintage: 1,944,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$320. (#5730)

8463 1919-D VF30 PCGS. PCGS Population (25/441). NGC Census: (15/259). Mintage: 1,944,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$356. (#5730)

8464 1919-S Fine 12 ANACS. NGC Census: (5/326). PCGS Population (6/539). Mintage: 1,836,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$160. (#5732)

8465 1919-S — Reverse Struck Through Debris, Cleaned — ANACS. VF30 Details. NGC Census: (16/277). PCGS Population (31/447). Mintage: 1,836,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$307. (#5732)
From The JG Collection, Part Two.

8466 1919-S XF40 PCGS. PCGS Population (53/356). NGC Census: (23/240). Mintage: 1,836,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$400. (#5732)

8467 1919-S AU50 NGC. NGC Census: (11/197). PCGS Population (32/273). Mintage: 1,836,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$485. (#5732)

8468 1920-D XF45 PCGS. PCGS Population (26/321). NGC Census: (7/179). Mintage: 3,586,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$147. (#5736)

8469 1920-S AU50 PCGS. PCGS Population (18/500). NGC Census: (6/382). Mintage: 6,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$100. (#5738)

8470 1920-S AU55 PCGS. PCGS Population (56/430). NGC Census: (30/340). Mintage: 6,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$150. (#5738)

8471 1921 VG10 NGC. NGC Census: (25/595). PCGS Population (49/947). Mintage: 1,916,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$209. (#5740)

8472 1921 Fine 15 PCGS. PCGS Population (43/873). NGC Census: (22/542). Mintage: 1,916,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$363. (#5740)

8473 1921 XF45 PCGS. PCGS Population (49/591). NGC Census: (32/417). Mintage: 1,916,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$721. (#5740)

8474 1923 — Reverse Stained — NGC Details. Unc. NGC Census: (0/1075). PCGS Population (8/1332). Mintage: 9,716,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$125. (#5742)

8475 1923 MS62 NGC. NGC Census: (92/968). PCGS Population (92/1223). Mintage: 9,716,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$160. (#5742)
From The JG Collection, Part Two.

8476 1923 MS63 NGC. NGC Census: (152/816). PCGS Population (239/984). Mintage: 9,716,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$200. (#5742)
From The JG Collection, Part Two.

8477 1923 MS64 NGC. NGC Census: (307/510). PCGS Population (421/560). Mintage: 9,716,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$300. (#5742)

8478 1923 MS63 Full Head NGC. NGC Census: (17/70). PCGS Population (34/98). Mintage: 9,716,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$800. (#5743)

8479 1923-S Good 6 PCGS. PCGS Population (22/936). NGC Census: (2/438). Mintage: 1,360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6 : \$285. (#5744)

8480 1923-S Fine 15 NGC. NGC Census: (14/394). PCGS Population (31/848). Mintage: 1,360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$607. (#5744)

8481 1923-S Fine 15 PCGS. PCGS Population (31/847). NGC Census: (14/396). Mintage: 1,360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$607. (#5744)

8482 1924 MS63 PCGS. CAC. PCGS Population (164/390). NGC Census: (101/375). Mintage: 10,920,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$210. (#5746)

8483 1924 MS64 Full Head PCGS. PCGS Population (100/107). NGC Census: (96/87). Mintage: 10,920,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$440. (#5747)

8484 1924-D MS65 NGC. NGC Census: (418/282). PCGS Population (485/95). Mintage: 3,112,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$450. (#5748)
From The JG Collection, Part Two.

8485 1924-S AU58 NGC. NGC Census: (40/239). PCGS Population (55/303). Mintage: 2,860,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$240. (#5750)
From The JG Collection, Part Two.

8486 1925 MS62 NGC. NGC Census: (63/352). PCGS Population (81/588). Mintage: 12,280,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$165. (#5752)
From The JG Collection, Part Two.

8487 1925 MS65 PCGS. CAC. PCGS Population (125/16). NGC Census: (71/12). Mintage: 12,280,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$450. (#5752)

8488 1925 MS65 PCGS. CAC. PCGS Population (126/18). NGC Census: (72/13). Mintage: 12,280,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$450. (#5752)

- 8628 1805/4 VG10 NGC.** O-101. NGC Census: (4/810). PCGS Population (6/149). Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$481. (#6070)
From The JG Collection, Part Two.

- 8629 1805 — Improperly Cleaned — NGC Details. VF.** O-109a. NGC Census: (12/868). PCGS Population (40/284). Mintage: 211,722. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$740. (#6069)
From The JG Collection, Part Two.

- 8630 1805 — Polished, Scratched — ANACS. VF30 Details.** O-109A. NGC Census: (32/801). PCGS Population (48/191). Mintage: 211,722. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$1,114. (#6069)

- 8631 1806/5 VF20 NGC.** O-103. NGC Census: (12/936). PCGS Population (27/133). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$750. (#6077)
From The JG Collection, Part Two.

- 8632 1806/5 VF25 PCGS.** PCGS Population (18/115). NGC Census: (17/919). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$901. (#6077)

- 8633 1806 Knobbed 6, Large Stars — Improperly Cleaned — NGC Details. VF.** O-105a. NGC Census: (0/0). PCGS Population (12/68). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$800. (#6074)

- 8634 1806 Pointed 6, No Stem VF25 PCGS.** PCGS Population (30/221). NGC Census: (0/0). (#6073)

- 8635 1806/9 — Obv Damage — NGC Details. XF.** O-111a. NGC Census: (6/1677). PCGS Population (10/14). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$3,125. (#6078)
From The JG Collection, Part Two.

- 8636 1806 Pointed 6, Stem — Scratched — NGC Details. VG.** O-120a. NGC Census: (33/1738). PCGS Population (24/960). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : \$250. (#6071)

- 8637 1806 Pointed 6, Stem — Obverse Digs — ANACS. VG8 Details.** O-109. NGC Census: (33/1738). PCGS Population (24/961). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : \$250. (#6071)
From The JG Collection, Part Two.
- 8638 1806 Pointed 6, Stem — Scratched — ANACS. VG8 Details.** O-115. NGC Census: (33/1738). PCGS Population (24/961). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : \$250. (#6071)
From The JG Collection, Part Two.
- 8639 1806 Pointed 6, Stem — Cleaned — ANACS. VG10 Details.** O-115. NGC Census: (34/1698). PCGS Population (42/915). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$282. (#6071)
- 8640 1806 Pointed 6, Stem — Scratched, Cleaned — ANACS. Fine 12 Details.** O-119. NGC Census: (55/1643). PCGS Population (66/849). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$340. (#6071)
- 8641 1806 Pointed 6, Stem VF20 NGC.** O-118a. NGC Census: (73/1513). PCGS Population (81/691). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$600. (#6071)
From The JG Collection, Part Two.
- 8642 1806 Pointed 6, Stem VF20 ANACS.** NGC Census: (73/1518). PCGS Population (82/693). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$600. (#6071)
- 8643 1806 Pointed 6, Stem — Damaged — ANACS. VF30 Details.** O-114A. NGC Census: (85/1377). PCGS Population (129/481). Mintage: 839,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$930. (#6071)
From The JG Collection, Part Two.
- 8644 1807 Draped Bust — Surface Damaged — Genuine PCGS.** Mintage: 301,076. (#6079)
- 8645 1807 Draped Bust VG10 ANACS.** O-102. NGC Census: (30/1521). PCGS Population (57/1055). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$277. (#6079)
- 8646 1807 Draped Bust — Damaged — NGC Details. Fine.** O-106. NGC Census: (62/1462). PCGS Population (68/991). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$345. (#6079)
From The JG Collection, Part Two.
- 8647 1807 Draped Bust — Damaged — NGC Details. Fine.** O-105. NGC Census: (62/1462). PCGS Population (68/991). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$345. (#6079)
- 8648 1807 Draped Bust Fine 12 NGC.** O-103a. NGC Census: (62/1459). PCGS Population (67/988). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$345. (#6079)
From The JG Collection, Part Two.
- 8649 1807 Draped Bust — Cleaned — ANACS. Fine 12 Details.** O-105. NGC Census: (62/1459). PCGS Population (67/988). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$345. (#6079)
- 8650 1807 Draped Bust Fine 12 PCGS.** PCGS Population (67/989). NGC Census: (62/1459). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$345. (#6079)
- 8651 1807 Draped Bust Fine 12 PCGS.** PCGS Population (68/991). NGC Census: (62/1462). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$345. (#6079)
- 8652 1807 Draped Bust Fine 15 ANACS.** O-105. NGC Census: (45/1420). PCGS Population (107/884). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$426. (#6079)
From The JG Collection, Part Two.
- 8653 1807 Draped Bust — Improperly Cleaned — NGC Details. VF.** O-105. NGC Census: (44/1372). PCGS Population (106/776). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$575. (#6079)
From The JG Collection, Part Two.
- 8654 1807 Draped Bust VF20 NGC.** O-110. NGC Census: (44/1372). PCGS Population (106/776). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$575. (#6079)
From The JG Collection, Part Two.
- 8655 1807 Draped Bust VF25 NGC.** O-108. NGC Census: (49/1323). PCGS Population (102/674). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$687. (#6079)
From The JG Collection, Part Two.
- 8656 1807 Draped Bust — Cleaned — ANACS. VF30 Details.** O-105. NGC Census: (71/1255). PCGS Population (101/575). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$895. (#6079)
From The JG Collection, Part Two.
- 8657 1807 Draped Bust VF30 NGC.** O-105. NGC Census: (71/1254). PCGS Population (101/575). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$895. (#6079)
- 8658 1807 Draped Bust — Cleaned — ANACS. VF35 Details.** O-105. NGC Census: (57/1197). PCGS Population (90/485). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$1,063. (#6079)
- 8659 1807 Draped Bust — Scratched — ANACS. XF40 Details.** O-106. NGC Census: (98/1100). PCGS Population (115/370). Mintage: 301,076. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,375. (#6079)
From The JG Collection, Part Two.

BUST HALF DOLLARS

- 8660 1807 Large Stars, 50 Over 20 — Damaged — ANACS. VF30 Details.** O-112. NGC Census: (33/1098). PCGS Population (36/245). Mintage: 750,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$855. (#6086)
From The JG Collection, Part Two.
- 8661 1807 Large Stars, 50 Over 20 — Wire Brushed — ANACS. VF30 Details.** O-112. NGC Census: (33/1095). PCGS Population (36/248). Mintage: 750,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$875. (#6086)

End of Session Four

SESSION FIVE

Sunday, June 3, 2012 | 10:00AM CT | Dallas | Lots 9408 - 11422

A 15% Buyer's Premium (\$14 minimum) Will Be Added To All Lots

To view full descriptions, enlargeable images and bid online, visit HA.com/1171

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live™, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

LIBERTY HALF EAGLES

10503 1845-D — Improperly Cleaned — NGC Details. Fine. NGC Census: (1/267). PCGS Population (3/242). Mintage: 90,629. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$700. (#8224)

10504 1848-D — Rev Graffiti — NGC Details. VF. NGC Census: (3/109). PCGS Population (3/115). Mintage: 47,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,025. (#8238.42)

10505 1849-C VG8 NGC. NGC Census: (2/212). PCGS Population (1/178). Mintage: 64,800. (#8241)

10506 1853 XF40 PCGS. CAC. PCGS Population (29/236). NGC Census: (9/452). Mintage: 305,770. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$470. (#8253)

10507 1857 AU53 PCGS. CAC. PCGS Population (19/99). NGC Census: (24/214). Mintage: 98,180. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$490. (#8271)

10508 1861 AU53 NGC. NGC Census: (117/1150). PCGS Population (71/468). Mintage: 688,150. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$490. (#8288)

10509 1872-S VF20 NGC. NGC Census: (3/146). PCGS Population (10/63). Mintage: 36,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$500. (#8327)

10510 1873 Closed 3 AU53 NGC. NGC Census: (23/240). PCGS Population (17/115). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$425. (#8329)

10511 1879-S MS61 NGC. NGC Census: (78/87). PCGS Population (25/82). Mintage: 426,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$625. (#8350)

10512 1884 AU58 NGC. NGC Census: (111/238). PCGS Population (39/73). Mintage: 191,078. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$500. (#8364)

10513 1887-S MS63 PCGS. PCGS Population (270/48). NGC Census: (395/89). Mintage: 1,912,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,025. (#8371)

10514 1887-S MS63 NGC. NGC Census: (392/89). PCGS Population (269/44). Mintage: 1,912,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,025. (#8371)

From The JG Collection, Part Two.

10515 1889 AU55 NGC. NGC Census: (24/103). PCGS Population (34/57). Mintage: 7,565. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$575. (#8374)

10516 1892-S MS62 PCGS. PCGS Population (56/32). NGC Census: (61/9). Mintage: 298,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$650. (#8382)

10517 1893-S MS62 ANACS. NGC Census: (343/177). PCGS Population (170/123). Mintage: 224,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$475. (#8386)

10518 1898-S MS63 NGC. NGC Census: (51/55). PCGS Population (61/39). Mintage: 1,397,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$960. (#8397)

10519 1899 MS63 NGC. NGC Census: (3217/2613). PCGS Population (1455/726). Mintage: 1,710,729. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$670. (#8398)

From The JG Collection, Part Two.

10520 1901/0-S MS62 PCGS. PCGS Population (73/161). NGC Census: (60/133). Mintage: 3,648,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$725. (#8403)

10521 1902 MS62 PCGS. PCGS Population (279/314). NGC Census: (495/397). Mintage: 172,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$475. (#8405)

10522 1902 MS63+ NGC. NGC Census: (250/147). PCGS Population (211/103). Mintage: 172,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$670. (#8405)

From The JG Collection, Part Two.

10523 1903-S — Improperly Cleaned — NGC Details. Unc. NGC Census: (78/3626). PCGS Population (112/2971). Mintage: 1,855,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$450. (#8408)

10524 1905-S MS61 NGC. NGC Census: (150/103). PCGS Population (45/119). Mintage: 880,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$460. (#8412)

10525 1906 MS63 NGC. NGC Census: (408/302). PCGS Population (377/265). Mintage: 348,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$670. (#8413)

From The JG Collection, Part Two.

10526 1906-D MS62 NGC. NGC Census: (837/1062). PCGS Population (604/844). Mintage: 320,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$475. (#8414)

10527 1907 MS62 PCGS. PCGS Population (1799/2348). NGC Census: (3180/2904). Mintage: 626,192. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$475. (#8416)

10528 1907 MS62 PCGS. CAC. PCGS Population (1799/2350). NGC Census: (3185/2910). Mintage: 626,192. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$475. (#8416)

From The Robert Dorsey Smith Collection.

10529 1907 MS63+ PCGS. PCGS Population (1585/764). NGC Census: (1842/1066). Mintage: 626,192. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$615. (#8416)

INDIAN HALF EAGLES

10530 1908 — Improperly Cleaned — NGC Details. Unc. NGC Census: (127/5664). PCGS Population (98/4096). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$520. (#8510)

10531 1908 MS62 PCGS. PCGS Population (1508/2035). NGC Census: (2471/1909). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10532 1908 MS62 PCGS. PCGS Population (1508/2035). NGC Census: (2471/1909). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10533 1908 MS62 PCGS. PCGS Population (1508/2035). NGC Census: (2471/1909). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10534 1908 MS62 PCGS. PCGS Population (1508/2035). NGC Census: (2471/1909). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10535 1908 MS62 NGC. NGC Census: (2471/1909). PCGS Population (1508/2035). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10536 1908 MS62 NGC. NGC Census: (2476/1911). PCGS Population (1512/2037). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10537 1908 MS62 NGC. NGC Census: (2476/1911). PCGS Population (1512/2037). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10538 1908 MS62 NGC. NGC Census: (2480/1915). PCGS Population (1555/2051). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10539 1908 MS62 PCGS. PCGS Population (1555/2051). NGC Census: (2480/1915). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10540 1908 MS62 PCGS. PCGS Population (1555/2051). NGC Census: (2480/1915). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10541 1908 MS62 NGC. NGC Census: (2480/1915). PCGS Population (1555/2051). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10542 1908 MS62 NGC. NGC Census: (2480/1915). PCGS Population (1555/2051). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10543 1908 MS62 NGC. NGC Census: (2480/1915). PCGS Population (1555/2051). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10544 1908 MS62 PCGS. PCGS Population (1555/2051). NGC Census: (2480/1915). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10545 1908 MS62 NGC. NGC Census: (2480/1915). PCGS Population (1555/2051). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10546 1908 MS62+ PCGS. PCGS Population (1508/2035). NGC Census: (2471/1909). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10547 1908 MS62+ PCGS. PCGS Population (1508/2035). NGC Census: (2471/1909). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10548 1908 MS62+ PCGS. PCGS Population (1508/2035). NGC Census: (2471/1909). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10549 1908 MS62+ PCGS. PCGS Population (1508/2035). NGC Census: (2471/1909). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10550 1908 MS62+ PCGS. PCGS Population (1508/2035). NGC Census: (2471/1909). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10551 1908 MS62+ PCGS. PCGS Population (1555/2051). NGC Census: (2480/1915). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10552 1908 MS62+ PCGS. PCGS Population (1555/2051). NGC Census: (2480/1915). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10553 1908 MS62+ NGC. NGC Census: (2480/1915). PCGS Population (1555/2051). Mintage: 577,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8510)

10554 1908-D MS62 PCGS. PCGS Population (951/1600). NGC Census: (837/1411). Mintage: 148,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$975. (#8511)

10555 1909 — Improperly Cleaned — NGC Details. AU. NGC Census: (12/5518). PCGS Population (99/4056). Mintage: 627,138. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$430. (#8513.11)

10556 1909 — Obverse Scratched — NGC Details. Unc. NGC Census: (157/4355). PCGS Population (84/2901). Mintage: 627,138. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$530. (#8513)

10557 1909 MS62 PCGS. PCGS Population (1247/1181). NGC Census: (1879/1032). Mintage: 627,138. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$785. (#8513)

10558 1909 MS62 PCGS. PCGS Population (1278/1190). NGC Census: (1886/1032). Mintage: 627,138. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$785. (#8513)

10559 1909 MS62 PCGS. PCGS Population (1278/1190). NGC Census: (1886/1032). Mintage: 627,138. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$785. (#8513)

10560 1909 MS62 NGC. NGC Census: (1886/1032). PCGS Population (1278/1190). Mintage: 627,138. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$785. (#8513)

10561 1909 MS62 NGC. NGC Census: (1886/1032). PCGS Population (1278/1190). Mintage: 627,138. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$785. (#8513)

10562 1909 MS62 PCGS. PCGS Population (1287/1190). NGC Census: (1888/1033). Mintage: 627,138. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$785. (#8513)

From The Robert Dorsey Smith Collection.

10563 1909-D MS62 NGC. NGC Census: (9364/10289). PCGS Population (8857/11854). Mintage: 3,423,560. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$645. (#8514)

10564 1909-D MS62 NGC. NGC Census: (9380/10288). PCGS Population (8863/11857). Mintage: 3,423,560. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$645. (#8514)

10565 1909-D MS63 NGC. NGC Census: (7790/2503). PCGS Population (9302/2592). Mintage: 3,423,560. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,470. (#8514)

10566 1909-D MS63 NGC. NGC Census: (7780/2498). PCGS Population (9264/2561). Mintage: 3,423,560. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,675. (#8514)

From The JG Collection, Part Two.

10567 1909-D MS63+ PCGS. CAC. PCGS Population (9302/2592). NGC Census: (7790/2503). Mintage: 3,423,560. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,470. (#8514)

10568 1910 AU58 NGC. NGC Census: (983/4439). PCGS Population (625/2571). Mintage: 604,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$455. (#8517)

10569 1910 MS62 PCGS. PCGS Population (1245/696). NGC Census: (1798/969). Mintage: 604,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$775. (#8517)

10570 1910 MS62 PCGS. PCGS Population (1245/696). NGC Census: (1798/969). Mintage: 604,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$775. (#8517)

10571 1910 MS62 PCGS. PCGS Population (1245/696). NGC Census: (1798/969). Mintage: 604,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$775. (#8517)

10572 1910 MS62 NGC. NGC Census: (1805/973). PCGS Population (1280/705). Mintage: 604,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$775. (#8517)

10573 1910 — Reverse Struck Thru — MS62 NGC. NGC Census: (1805/973). PCGS Population (1280/705). Mintage: 604,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$775. (#8517)

10574 1910 MS62 PCGS. PCGS Population (1280/705). NGC Census: (1805/973). Mintage: 604,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$775. (#8517)

10575 1910 MS62+ NGC. NGC Census: (1798/969). PCGS Population (1245/696). Mintage: 604,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$775. (#8517)

10576 1911 MS61 NGC. NGC Census: (2647/4278). PCGS Population (841/3239). Mintage: 915,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$620. (#8520)

10577 1911 MS62 NGC. NGC Census: (2980/1278). PCGS Population (1892/1308). Mintage: 915,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8520)

10578 1911 MS62 PCGS. PCGS Population (1893/1308). NGC Census: (2978/1280). Mintage: 915,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. (#8520)

COMMEMORATIVE SILVER

10764 1893 Isabella Quarter Genuine PCGS. The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 24,214. (#9220)

10765 1893 Isabella Quarter — Improperly Cleaned — NGC Details. AU. NGC Census: (7/3305). PCGS Population (43/4482). Mintage: 24,214. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$370. (#9220)

10766 1893 Isabella Quarter — Cleaned — ANACS. AU50 Details. NGC Census: (8/3331). PCGS Population (43/4488). Mintage: 24,214. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$360. (#9220)

10767 1893 Isabella Quarter AU55 PCGS. PCGS Population (184/4274). NGC Census: (54/3271). Mintage: 24,214. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$400. (#9220)

10768 1893 Isabella Quarter MS64 PCGS. PCGS Population (1148/595). NGC Census: (1006/620). Mintage: 24,214. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$715. (#9220)

10769 1900 Lafayette Dollar — Cleaned — ANACS. Good 6 Details. NGC Census: (1/2329). PCGS Population (5/3148). Mintage: 36,026. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6: \$165. (#9222)

10770 1900 Lafayette Dollar — Damaged, Solder Residue — ANACS. Fine 12 Details. NGC Census: (0/2326). PCGS Population (4/3139). Mintage: 36,026. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$200. (#9222)
From The JG Collection, Part Two.

10771 1900 Lafayette Dollar — Cleaned — ANACS. AU53 Details. NGC Census: (5/2290). PCGS Population (33/2976). Mintage: 36,026. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$475. (#9222)

10772 1900 Lafayette Dollar — Cleaned — ANACS. AU58 Details. NGC Census: (164/2081). PCGS Population (285/2546). Mintage: 36,026. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$535. (#9222)

10773 1900 Lafayette Dollar — Cleaned — ANACS. AU58 Details. NGC Census: (166/2092). PCGS Population (285/2541). Mintage: 36,026. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$535. (#9222)

10774 1921 Alabama MS64 PCGS. PCGS Population (814/515). NGC Census: (794/449). Mintage: 59,038. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$400. (#9224)

10775 1921 Alabama MS64 NGC. NGC Census: (795/449). PCGS Population (815/510). Mintage: 59,038. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$400. (#9224)

10776 1921 Alabama 2x2 — Polished — ANACS. AU50 Details. NGC Census: (3/1555). PCGS Population (20/1993). Mintage: 6,006. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$225. (#9225.19)

10777 1921 Alabama 2x2 MS60 ANACS. MS60 Details. NGC Census: (0/1505). PCGS Population (9/1886). Mintage: 6,006. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$275. (#9225)

10778 1921 Alabama 2x2 — Polished — ANACS. MS60 Details. NGC Census: (0/1503). PCGS Population (9/1889). Mintage: 6,006. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$275. (#9225.19)

10779 1936 Albany — Wire Brushed — ANACS. MS60 Details. NGC Census: (1/2761). PCGS Population (1/4519). Mintage: 17,671. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$230. (#9227)

10780 1936 Albany MS61 ANACS. NGC Census: (8/2763). PCGS Population (12/4506). Mintage: 17,671. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$235. (#9227)

10781 1936 Albany MS64 PCGS. PCGS Population (1615/2267). NGC Census: (805/1790). Mintage: 17,671. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$260. (#9227)

10782 1936 Albany MS64 PCGS. PCGS Population (1615/2266). NGC Census: (805/1790). Mintage: 17,671. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$260. (#9227)

10783 1936 Albany MS65 NGC. NGC Census: (1139/645). PCGS Population (1436/832). Mintage: 17,671. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$320. (#9227)

10784 1936 Albany MS66 PCGS. CAC. PCGS Population (743/89). NGC Census: (505/140). Mintage: 17,671. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$465. (#9227)

10785 1937 Antietam MS64 NGC. NGC Census: (518/1825). PCGS Population (1117/2955). Mintage: 18,028. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$615. (#9229)

10786 1937 Antietam MS64 NGC. NGC Census: (519/1830). PCGS Population (1116/2954). Mintage: 18,028. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$615. (#9229)

10787 1937 Antietam MS65 NGC. NGC Census: (951/874). PCGS Population (1504/1451). Mintage: 18,028. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$760. (#9229)

10788 1935 Arkansas MS65 PCGS. PCGS Population (498/165). NGC Census: (385/93). Mintage: 13,012. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$155. (#9233)

10789 1935 Arkansas MS66 NGC. NGC Census: (85/7). PCGS Population (152/12). Mintage: 13,012. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$400. (#9233)

10790 1935-D Arkansas MS66 NGC. NGC Census: (99/24). PCGS Population (185/37). Mintage: 5,505. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$400. (#9234)

10791 1935-S Arkansas MS65 NGC. NGC Census: (336/112). PCGS Population (409/179). Mintage: 5,506. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$185. (#9235)

10792 1935-S Arkansas MS66 PCGS. PCGS Population (162/17). NGC Census: (100/12). Mintage: 5,506. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$450. (#9235)

10793 1935-S Arkansas MS66 PCGS. PCGS Population (162/17). NGC Census: (100/12). Mintage: 5,506. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$450. (#9235)

10794 1936 Arkansas MS65 NGC. NGC Census: (255/63). PCGS Population (285/96). Mintage: 9,660. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$165. (#9237)

10795 1936 Arkansas MS66 PCGS. CAC. PCGS Population (89/7). NGC Census: (57/6). Mintage: 9,660. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$480. (#9237)

10796 1936-S Arkansas MS65 NGC. NGC Census: (355/79). PCGS Population (347/128). Mintage: 9,662. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$190. (#9239)

10797 1937 Arkansas MS66 PCGS. CAC. PCGS Population (95/5). NGC Census: (48/3). Mintage: 5,505. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$525. (#9241)

CIVIL WAR PATRIOTIC

11422 1863 United States Of America Token MS66 Brown NGC. Fuld-197/380a.

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Arms & Armor, Currency, US Coin, and World & Ancient Coin Auctions lots; except that the lots in World and Ancient Coin Auctions 3003 & 3018 shall have a Buyer's Premium of 19.5%;
- Nineteen and one-half percent (19.5%) on Americana & Political, Civil War & Militaria, Comic, Manuscript, Movie Poster, Space Exploration, Sports Collectibles, Texana, Wine, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- For lots in all other categories not listed above, twenty-five percent (25%) on the first \$50,000 (minimum \$14), twenty percent (20%) of any amount between \$50,000 and \$1,000,000, and twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session: HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments.

Current Bid.....	Bid Increment	Current Bid.....	Bid Increment
<\$10	\$1	\$20,000 - \$29,999	\$2,000
\$10 - \$29	\$2	\$30,000 - \$49,999	\$2,500
\$30 - \$49	\$3	\$50,000 - \$99,999	\$5,000
\$50 - \$99	\$5	\$100,000 - \$199,999	\$10,000
\$100 - \$199	\$10	\$200,000 - \$299,999	\$20,000
\$200 - \$299	\$20	\$300,000 - \$499,999	\$25,000
\$300 - \$499	\$25	\$500,000 - \$999,999	\$50,000
\$500 - \$999	\$50	\$1,000,000 - \$1,999,999	\$100,000
\$1,000 - \$1,999	\$100	\$2,000,000 - \$2,999,999	\$200,000
\$2,000 - \$2,999	\$200	\$3,000,000 - \$4,999,999	\$250,000
\$3,000 - \$4,999	\$250	\$5,000,000 - \$9,999,999	\$500,000
\$5,000 - \$9,999	\$500	>\$10,000,000	\$1,000,000
\$10,000 - \$19,999	\$1,000		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and in Texas on invoices under \$1000. Check the Web site at: <http://coins.ha.com/c/ref/sales-tax.zx> for more details.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.

Terms and Conditions of Auction

29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.

30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Dispute Resolution for Consumers and Non-Consumers: Any claim, dispute, or controversy in connection with, relating to and/or arising out of the Auction, participation in the Auction, award of lots, damages of claims to lots, descriptions, condition reports, provenance, estimates, return and warranty rights, any interpretation of these Terms and Conditions, any alleged verbal modification of these Terms and Conditions and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation shall or any other matter: a) if presented by a consumer, be exclusively heard by, and the parties consent to, exclusive in personam jurisdiction in the State District Courts of Dallas County, Texas. THE PARTIES EXPRESSLY WAIVE ANY RIGHT TO TRIAL BY JURY. Any appeals shall be solely pursued in the appellate courts of the State of Texas; or b) for any claimant other than a consumer, the claim shall be presented in confidential binding arbitration before a single arbitrator, that the parties may agree upon, selected from the JAMS list of Texas arbitrators. The case is not to be administrated by JAMS; however, if the parties cannot agree on an arbitrator, then JAMS shall appoint the arbitrator and it shall be conducted under JAMS rules. The locale shall be Dallas Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. Any party on any claim involving the purchase or sale of numismatic or related items may elect arbitration through binding PNG arbitration. Any claim must be brought within one (1) year of the alleged breach, default or misrepresentation or the claim is waived. This agreement and any claims shall be determined and construed under Texas law. The prevailing party (party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature, Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgsc.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM O: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

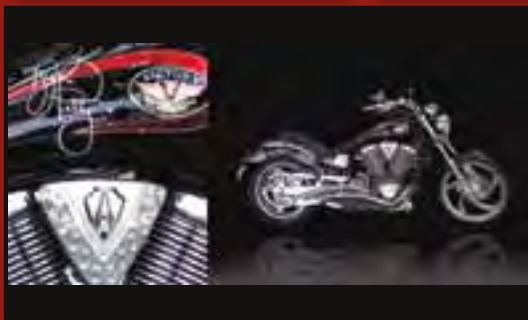

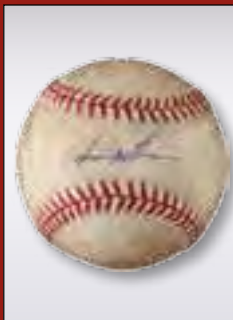

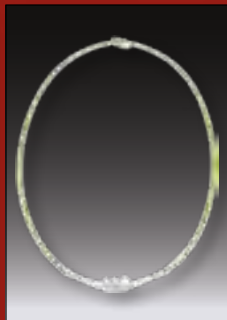

For wiring instructions call the Credit department at 1-800-872-6467 or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 10-10-11

Sold For: \$42,500, May 2010
Benefiting Pat & Emmitt Smith Charities

Heritage Auctions would like to help worthy charities save time and resources while raising more money, goodwill and awareness. We are offering our services to approved charities and their donors to give back and to meet new friends, not to profit from the endeavor itself. Therefore all profits will be donated to charities selected by our employees.

Call today to find out how the professionals at Heritage Charity Auctions can sharpen your philanthropic efforts and help you reach your fundraising goals.

HERITAGE HA.com
AUCTIONS

HERITAGE MyCollection

YOUR PERSONAL ONLINE COLLECTION INVENTORY

Heritage's new **MyCollection** software is a private record of collectibles that you own, buy, or resell, and it's great for insurance or estate planning.

It's FREE, and...

- ◆ Stores images, description, and more.
- ◆ All items bought from Heritage are added automatically!
- ◆ Items bought elsewhere can also be added
- ◆ Allows for infinite organization of your collection.
- ◆ Exports to Excel or to print for easy reference.
- ◆ You enjoy absolute privacy. Your information will not be shared with, or sold to, any third party for any reason.
- ◆ Available in all Heritage categories

Click on the heading to view:

Item	Photo	Item Reference #	Description & Provenance Data	Year Value / Recommended Retention Date	Current Price	Market Amount	Make Offer to Buyer / Seller
<p>Total Value: \$15,304.00 Total purchase price: \$10,559.00 Total Make Offer Value for items accepting offers: \$21,744.75</p>							
			1881-1882 US 10C Nickel Provenance: 18.22 View Auction Results	Buy Now	\$8.00		Buy Now Offer
			1881-1882 US 10C Nickel Provenance: 18.22 View Auction Results	Buy Now	\$8.00	10	Buy Now Offer
			1881-1882 US 10C Nickel Provenance: 18.22 View Auction Results	Buy Now	\$8.00	10	Buy Now Offer
			1881-1882 US 10C Nickel Provenance: 18.22 View Auction Results	Buy Now	\$8.00	10	Buy Now Offer
			1881-1882 US 10C Nickel Provenance: 18.22 View Auction Results	Buy Now	\$8.00	10	Buy Now Offer

But the most exciting thing about the new **MyCollection** software is the ability to receive offers on items you purchased from Heritage at auction, including the ability to set your own "Buy Now" price.

Heritage members now have the opportunity to make an anonymous offer to the buyer of items previously purchased at auction from Heritage, directly through our Auction Results Archives. Heritage manages the transaction, maintaining privacy for both parties. Acceptance of an offer represents agreement with the terms and conditions of sale, including Heritage's commission. This service is free to the buyer (no buyer's premium), includes a 7 day return policy, protects the identity of both parties, and allows offers and counter-offers. If you receive an offer, you will have 72 hours to decline, counter-offer or accept the offer. You are under no obligation until you accept an offer or a buyer accepts your counter offer. You will receive payment for items sold within 30 days of Heritage's receipt of your item.

FINE & RARE WINE AUCTIONS

You're a smart collector. Be a smarter consignor.

In less than a year, Heritage Auctions has taken its place among the industry leaders in fine wine auctions. The reason is simple: Consigning is absolutely free, and we are realizing strong prices, which means more money in your pocket. In addition, we offer advances on qualifying consignments. So why wait? Whether you're consigning a single bottle or your entire cellar, find out today how Heritage Auctions can deliver results worth celebrating.

HERITAGE CURRENCY AUCTIONS

Colonial Paper Money Has a Story to Tell

According to Isaiah Thomas in the *History of Printing in America*, prior to the Revolutionary War, printing materials had been purchased from England. Once the war broke out, supplies had to be procured from the few mills in the Colonies. "The paper which these mills could make fell far short of the necessary supply. Paper, of course, was extremely scarce, and what could be procured was badly manufactured, not having more than half the requisite labor bestowed upon it. It was often taken from the mill wet, and unsized. People had not been in the habit of saving rags, and stock for the manufacture of paper was obtained with great difficulty. Everything like rags was ground up together to make a substitute for paper. This, with wretched ink, and worn out types, produced miserable printing." Benjamin Edes printed this issue and Israel Hobart was the signer of this piece. Hobart was listed as one of the coroners in Middlesex in 1761. Edes published the Boston Gazette and Country Journal and was a great patriot. Like so many others, the depreciation of paper money led to poverty for Edes in his later years. There were two different due dates for the notes from this issue: June 18, 1778 and June 18, 1779.

The Business Climate is Perfect at Long Beach.

Join us at the Long Beach Expo • May 31 - June 2, 2012

Located within sight of major attractions like the Queen Mary and The Aquarium of the Pacific in beautiful Long Beach, California, the Expo brings together more than 10,000 dealers and collectors three times each year. The weather is great, and so is the business climate on our 100,000-square-foot bourse floor!

Literally hundreds of dealers are on hand buying and selling U.S. and World coins. And there are activities for collectors of all levels and ages at every show, including:

- A multi-million-dollar Signature Auction held by Heritage Auctions, the official auctioneer of the Long Beach Expo
- Onsite coin grading by PCGS
- Numerous youth activities including the popular kids' treasure hunt sponsored by the Full Step Nickel Club
